QUEEN'S COLLEGE,
OXFORD.

11 June, 1901.

My dear Payne,

As I know you are interested in the early history of Medical Literature, I write to ask whether you can guide me to the book which a busy law student might have bought in 1653 for 2 shillings & which he describes in his accounts as

y^e^ English Phisition.

Yours ever

J Rhoades.

- Revd. John Richard Magrath,
Provost of Queen's College 1878 - 1930
b. 1839 d. 1930
[Who was Who 1929-40]

Gathering Leaves belong to Papist Magnes

The booke that me [illegible] ought
how to make Opiat. 197
How to make salue. 38
to make a Plaister by Crawfoot 17
a pram & a pult also 247.
How to clarify honey. 251

for wounds 75
Good medicines comon & cheape 6
affords not purging or vomiting but upon
necessity 8.

How to make pultis & a plaister. 11. 12. 191. 77. 12 81.
for Gallt. 12.
affords not distilled waters 14.
why scarlet is called Cordiall of Trinity 1
purpose and saith Leaue ye same
q. against vile or quicksilver. 225.

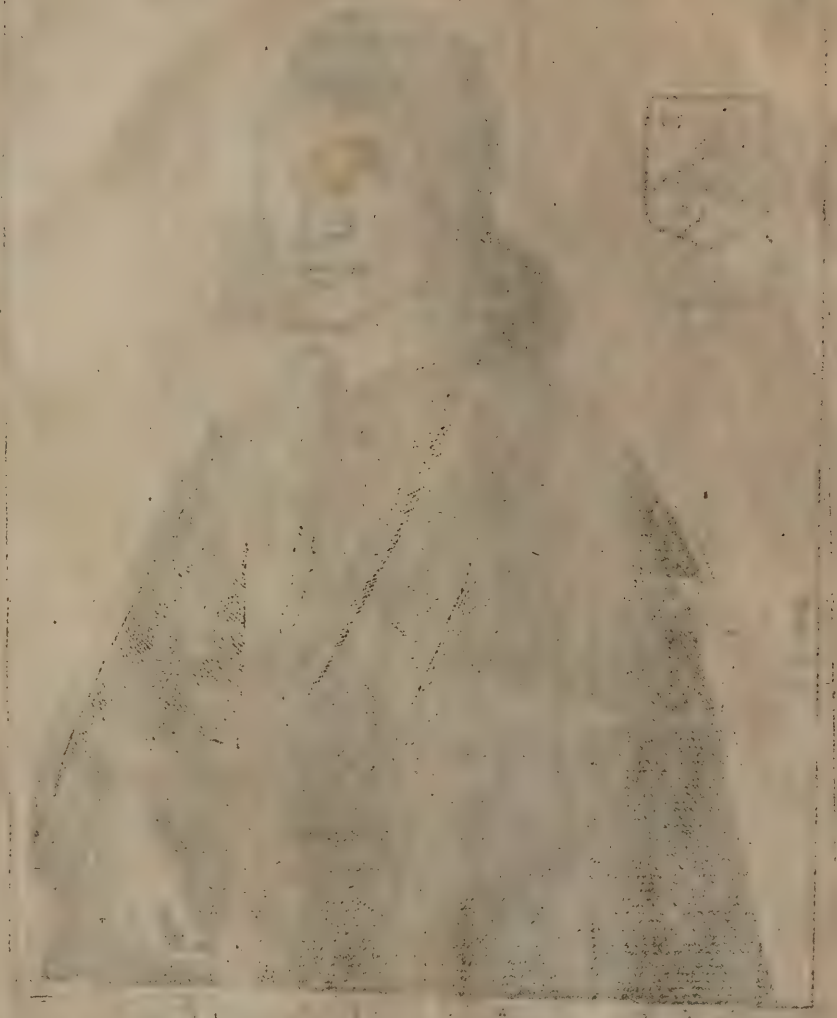
Ashen.

for dysent. Mallose Flowers. Coltsfoot. oile of Dill. oile of Elder
oleum Laurinum, oile of Bayes.



In Effigiem Nicholai Culpeper Equitis .

The shaddow of that Body heer you find
Which serves but as a case to hold his mind,
His Intellectuall part be pleas'd to looke
In lively lines described in the Booke . *crofs sculpsit*

G. Fetherston

THE

Englisſh Phyſitian:

OR

An Aſtrologo-Phyſical Diſcourſe of the Vulgar Herbs of this Nation.

Being a Compleat Method of Phyſick, whereby a man may preſerve his Body in Health; or cure himſelf, being ſick, for three pence charge, with ſuch things only as grow in England, *they being moſt fit for Engliſh Bodies.*

Herein is alſo ſhewed,

1. The way of making Plaiſters, Oyntments, Oyls, Pultiſſes, Syrups, Decoctions, Julips, or Waters, of all ſorts of Phyſical Herbs, That you may have them readie for your uſe at all times of the yeer.
2. What Planet governeth every Herb or Tree (uſed in Phyſick) that groweth in *England.*
3. The Time of gathering all Herbs, both Vulgarly, and Aſtrologically.
4. The Way of drying and keeping the Herbs all the yeer.
5. The Way of keeping their Juyces ready for uſe at all times.
6. The Way of making and keeping all kind of uſeful Compounds made of Herbs.
7. The way of mixing Medicines according to *Cauſe* and and *Mixture* of the *Diſeaſe*, and *Part* of the Body *Afflicted.*

By *Nich. Culpeper*, Gent. Student in *Phyſick* and *Aſtrologie*.

LONDON:
Printed by *Peter Cole*, at the ſign of the Printing-Preſs in Cornhil, near the Royal Exchange. 1652.

WELLCOME INSTITUTE LIBRARY

TO THE READDR.

Courteous Reader,

ARISTOTLE, in his *Metaphysicks* writing of the Nature of Man, hit the Nail on the Head when he said, That Man is naturally enclined to, and desirous of Knowledg: and indeed it is palpable and apparent, that as Pride is the first visible sin in a child, whereby we may gather that it was the first sin of *Adam*; so Knowledg being the first Vertue a Child minds, as is apparent to them that do but with the eye of Reason heed their actions even whilst they are very yong, even before they are a yeer old, even by natural instinct, whereby a man may more than guess that Knowledg was the greatest loss, or at least one of the greatest we lost by the fall of *Adam*: Knowledg, saith *Aristotle*, is *in Prosperity an Ornament, in Adversity a Refuge*; and truly there is almost no greater enemy to Knowledg in the world than Pride and Covetousness: Excellently said, *Juvenal, Sat.* 7.

Scire volunt omnes, mercedem solvere nemo.

Although all men, in Knowledg take delight,
Yet they love money better, that's the spight.

And again, some men are so damnable proud and envious withal, that they would have no body know any thing but themselves; the one I hope will shortly learn better manners, and the other be a burden too heavy for the Earth long to bear.

The Subject which I here fixed my thoughts upon is not only the Description and Nature of Herbs, which had it been all, I had authority sufficient to bear me out in it, for *Solomon* employed part of that wisdom he asked, and received of God in searching after them, which he wrote in Books, even of all Herbs, Plants and Trees; some say those Writings were carried to *Babylon* by *Nebuchadnezzar*; being kept in the *Temple* at *Jerusalem* for the publick view of the People, but being transported to *Babylon* in the Captivity, *Alexander* the GREAT TYRANT at the taking of *Babylon* gave them to his Master *Aristotle*, who committed them to the mercy of the fire.

But since the daies of *Solomon*, many have those famous men been that have written of this Subject, and great Encouragements have

been given them by Princes, of which I ſhall quote an example or two, *Mathiolus* his greedineſs was ſuch to finiſh his Comment upon *Dioſcorides*, which Book is yet in uſe in the famous Univerſities in *Leyden* in *Holland*, & *Mountpilier* in *France*, that he forgot to count what the charges of it might amount to, although I rather cõmend him for his dilligence in Studie and Care of the Worlds good, than harbor the leaſt ill thought of him for not counting the middle and both ends before he began the Work, I ſay when he came to count the charges of Printing and cutting the Cuts, it far ſurmounted his Eſtate; in this he was abundantly furniſhed by *Ferdinand* the Emperor, and diverſe other Princes of *Germany*, as himſelf confeſſed furniſhed him with great ſums of money, for perfecting that ſo great, ſo good a Work; the Prince Elector of *Saxony* ſent him much money towards his charge, as alſo *Joachim*, Marqueſs of *Brandenburg*, who as he was neighbor to *Saxony* in Place, ſo was he in Affection to ſo good a Work; *Frederick*, Count *Palatine* of the *Rhine*, the *Cardinal Prince* of *Trent*, the *Arch Biſhop* of *Saltzberg*, the *Dukes* of *Bavaria* and *Cleveland*, and the *Free State* of *Norimberg*, together with many others, ſo that he had the help of the Emperor, of Arch Dukes, Dukes, Electors, Cardinals, Princes. Happie is that Nation whoſe Magiſtrates countenance ſuch as mind and ſtudy their Good: I might inſtance in many more, and thereby give you a glimps how Magiſtrates formerly favored this Art, and which is more, how ſtudious they were in it. *Bellonius* a man that ſoared high in the Nature of Herbs, alſo profeſſed he had the helping hand of Kings and Cardinals to maintain him in his Studies, and more than this, Kings themſelves were Studious in it; amongſt which (*Solomon* excepted) *Mithridates* that renowned King of *Pontus* ſeems to bear away the Bell, his Writings after his death were found in his Country Mannor by *Pompey* the great, but never a Roman of them all had the honeſty to print them with his name in the Frontiſpiece, ſo that we have nothing of them but what is quoted by ſome honeſt Authors, eſpecially by *Plutarch*.

Ad nos vix tenuis famæ dilabitur aura.

Men mind our good, but ſuch croſs times do fall,
We only hear they did, and that is all.

I will in Arabia p. 127

Meſue King of *Damaſcus*, *Avicenna*, and *Evax* King of *Arabia*, labored much in this Study, and I could well have afforded to have mentioned *Diocleſian* the Roman Emperor had he not waſhed out his Vertues, and defiled them with a Purple ſtain, in a moſt bloody perſecution of Chriſtians. It is quoted in *Virgil*, that when a famous Prince was proffered by *Apollo* to be taught his Arts, *viz. Phyſick*, *Muſick*, *Augury*, and the *Art of ſhooting in the Bow*, he made choice of Phyſick and to know the Nature of Herbs.

Ipſe

Ipſe ſuas artes, ſua munera, lætus Appollo
Augurium, Citheramq; dedit, celereſq; ſagittas,
Ille, ut depoſiti præferret fata Parentis
Scire poteſtates Herbarum, uſumq; Medendi
Maluit: & mutas agitare (inglorias) Artes.

His Arts to him, when great Appollo *gave,*
He did nor Augury, nor Arrows crave,
Nor the Melodious Lute, but to prevent
His Fathers death, who now with age was ſpent,
To be an Herbariſt, and Medicine
To learn, he rather did his thoughts incline.

So precious hath the knowledg of the Vertues of Herbs been in former times to men of quality, and indeed happy is that Nation, whoſe Rulers mind Knowledg, as *Solomon* ſaith on the contrary, *Wo to that Nation whoſe King is a Child*, and indeed in Ancient times people need little other Phyſick than ſuch Herbs as grew neer them, ſome Footſteps of which and but a few only, are now in uſe with us to this day, as people uſually boyl Fennel with Fiſh, and know not why they do it but only for cuſtom, when indeed the Original of it was founded upon Reaſon, becauſe Fennel conſumes that Flegmatick quality of Fiſh, which is obnoxious to the Body of man, Fennel being an Herb of *Mercury*, and he ſo great an Enemie to the Sign *Piſces*.

In this Art the Worthies of our own Nation, *Gerard*, *Johnſon*, and *Parkinſon* are not to be forgotten, who did much good in the Studie of this Art, yet they and all others that wrote of the Nature of Herbs, gave not a bit of a reaſon why ſuch an Herb was apropriated to ſuch a part of the Body, nor why it cured ſuch a Diſeaſe; truly my own body being ſickly brought me eaſily into a capacitie to know that Health was the greateſt of all Earthly Bleſſings, and truly he was never ſick that doth not beleeve it; then I conſidered that all Medicines were compounded of Herbs, Roots, Flowers, Seeds &c. and this firſt ſet me awork in ſtudying the Nature of Simples, moſt of which I knew by ſight before, and indeed all the Authors I could reade gave me but little ſatisfaction in this particular, or none at all; I cannot build my faith upon Authors words, nor beleeve a thing becauſe they ſay it, and could wiſh every bodie were of my mind in this, to labor to be able to give a reaſon for every thing they ſay or do; they ſay reaſon makes a man differ from a Beaſt, if that be true, pray what are they that inſtead of Reaſon for their judgment, quote old Authors, perhaps their Authors knew a reaſon for what they Wrote, perhaps they did not, what is that to us, do we know it? Truly in writing this Work firſt, to ſatisfie my ſelf I drew out all the Vertues of vulgar Herbs, Plants, and Trees &c. out of the beſt and moſt approved Authors I had or could get, and having done ſo, I ſet my ſelf to ſtudie the Reaſon of

them; I knew well enough the whol world and every thing in it was formed of a Compoſition of contrary Elements, and in ſuch a harmony as muſt needs ſhew the wiſdom and Power of a great God. I knew as well this Creation though thus compoſed of contraries was one united Body, and man an Epitome of it, I knew thoſe various affections in man in reſpect of Sickneſs and Health were cauſed Naturally (though God may have other ends beſt known to himſelf) by the various operations of the *Macrocoſm*; and I could not be ignorant, that as the Cauſe is, ſo muſt the Cure be, and therefore he that would know the Reaſon of the operation of Herbs muſt look up as high as the Stars; I alwaies found the Diſeaſe vary according to the various motion of the Stars, and this is enough one would think to teach a man by the Effect where the Cauſe lay: Then to find out the Reaſon of the Operation of Herbs, Plants, &c. by the Stars went I, and herein I could find but few Authors, but thoſe as full of nonſenſe and contradictions as an Egg is full of meat, this being little pleaſing, and leſs profitable to me, I conſulted with my two Brothers, Dr REASON, and Dr EXPERIENCE, and took a Voyage to viſit my Mother NATURE, by whoſe advice together with the help of Dr DILLIGENCE, I at laſt obtained my deſires, and being warned by Mr *Honeſty*, a ſtranger in our daies to publiſh it to the World, I have done it.

But you will ſay, *What need I have written of this Subject, ſeing ſo many famous and learned men have written ſo much of it in the Engliſh Tongue, nay much more than I have done?*

To this I Anſwer,

1. All that have written of Herbs either in the Engliſh or not in the Engliſh Tongue, have no waies anſwered my intents in this Book, for they have intermixed many, nay very many outlandiſh Herbs, and very many which are hard, nay not at all to be gotten, and what harm this may do I am very ſenſible of. Once a Student in Phyſick in *Suſſex* ſent up to *London* to me, to buy for him ſuch and ſuch Medicines, and ſend them down, which when I viewed, they were Medicines quoted by Authors living in another Nation, and not to be had in *London* for Love nor Money, ſo the poor man had ſpent much pains and Brains in ſtudying Medicines for a Diſeaſe that were not to be had; ſo a man reading *Gerards* or *Parkinſons* Herbal for the Cure of a Diſeaſ, he may as like as not, light on an Herb that is not here to be had, or not without great difficulty, if poſſible; but in mine, all grow neer him.

2. My laſt, though not the leaſt of my Reaſons is, Neither *Gerard* nor *Parkinſon* nor any that ever wrote in the like Nature, ever gave one wiſe Reaſon for what they wrote, and ſo did nothing elſ but train up yong Novices in Phyſick in the School of Tradition, and teach them juſt as a Parrot is taught to ſpeak, an Author ſaith ſo, therefore 'tis true, and if all that Authors ſay be true, why do they contradict one another? But in mine, if you view it with the Eye of Reaſon, you ſhall ſee a Reaſon for every thing that is written, whereby you may find the very Ground and Foundation of Phyſick, you may know what

what you do, and wherefore you do it, and this shall call me Father, it being (that I know of) never done in the world before.

I have now but two things more to write and then I have done.

1 *What the profit and benefit of this Work is.*

2 *Instructions in the Use of it.*

1. The Profit and Benefits arising from it, or that may acrue to a wise man, from it are many, so many that should I sum up all the particulars, the Epistle would be as big as the Book; I shall only quote some few general Heads.

First, The admirable Harmony of the Creation is herein seen, in the Influence of Stars upon Herbs and the Body of man, how one part of the Creation is subservient to another, and all for the use of man whereby the Infinite Power and Wisdom of God in the Creation appears; and if I do not admire at the simplicity of the Ranters, never trust me, who but viewing the Creation can hold such a sottish Opinion, as that it was from eternity, when the Mysteries of it are so cleer to everie eye; but that Scripture shall be verified to them, *Rom.* 1. 20. *The invisible things of Him from the Creation of the world are cleerly seen, being understood by the things that are made, even his eternal Power and Godhead, so that they are without excuse.* And a Poet could teach them a better Lesson.

Excideret ne tibi divini muneris author
Presentem monstrat, quælibet Herba Deum.

Because out of thy thoughts God should not pass,
His Image stamped is on every Grass.

This indeed is true, God hath stamped his Image upon every Creature, and therefore the abuse of the Creature is a great sin; but how much more doth the Wisdom and Excellencie of God appear if we consider the Harmony of the Creation in the Vertue and Operation of every Herb; this is the first.

Secondly, Hereby thou maist know what infinite Knowledg *Adam* had in his Innocencie, that by looking upon a Creature, he was able to give it a name according to his Nature, and by knowing that, thou maist know how great thy fall was, and be humbled for it even in this respect, because hereby thou art so ignorant.

Thirdly, Here is the right way for thee to begin the study of Physick if thou art minded to begin at the right end, for here thou hast the Reason of the whol Art. I wrote before in certain Astrological Lectures which I read, and printed, intituled *Semeiotica Uranica* what Planet caused (as a second Cause) every Disease, and how it might be found out what Planet caused it; here thou hast what Planet cures it by *Sympathy* and *Antipathy*; and this brings me to my last promise, *Viz.*

Instructions for the right use of the Book.

And herein let me premise a word or two, Many Herbs, Plants, &c

are

are not in the Book apropriated to their propper Planets, the Reason was, want of time, or some other thing else, which many that know me will easily guess at; at last the Book hanging longer in the Press than I imagined it would, I took the time and pains (though I could ill have spared either) to apropriate them all, and have for thy benefit (Courteous Reader) inserted them in order after the Epistle, now then for thy Instruction;

First, Consider what Planet causeth the Disease; that thou maist find in my *Semeiotica.*

Secondly, Consider what part of the Body is afflicted by the Diseas, and whether it lie in the Flesh, or Blood, or Bones, or Ventricles.

Thirdly, Consider by what Planet the afflicted part of the Bodie is governed; that my *Semeiotica* will inform you in also.

Fourthly, You have in this Book the Herbs for Cure apropriated to the several Diseases, and the Diseases for your ease set down in the Margin, whereby you may strengthen the part of the Bodie by its like, as the Brain by Herbs of *Mercury*, the Breast and Liver by Herbs of *Jupiter*, the Heart and Vitals by Herbs of the *Sun*, *&c.*

Fifthly, You may oppose Diseases by Herbs of the Planet opposite to the Planet that causeth them, as Diseases of *Jupiter* by Herbs of *Mercury*, and the contrary; Diseases of the *Luminaries* by Herbs of *Saturn*, and the contrary; Diseases of *Mars* by Herbs of *Venus*, and the contrary.

Sixthly, There is a way to cure Diseases somtimes by Sympathy, and so every Planet cures his own Diseases,, as the *Sun* and *Moon* by their Herbs cure the Eyes, *Saturn* the Spleen, *Jupiter* the Liver, *Mars* the Gall and Diseases of Choller, and *Venus* Diseases in the Instruments of Generation.

Seventhly, There was a smal Treatise of mine of *Humane Vertues*, printed at the latter end of my *Ephemeris* for the yeer 1651. I suppose it would do much good to yong Students to peruse that with this Book.

Eighthly Yong Students would do themselves much good, and benefit themselves exceedingly in the Study of Physick if they would tak the pains to view the Vertues of the Herbs &c. in the Book, and compare them to these Rules, they shall to their exceeding great content find them all agreeable to them, and shall thereby see the reason why such an Herb conduceth to the Cure of such a Disease.

Ninthly, I gave you the Key of al in the Herb *Wormwood*, which if because of the volubility of the Language, any think it will not fit the Lock, I will here give it you again in another Herb of the same Planet which in the Book either through my own forgetfulness, or my *Amanuensis* was omitted, and here I shal give it you plainly without any circumstanees.

The Herb is *Carduus Benedictus.*

It is called *Carduus Benedictus*, or blessed Thistle or holy Thistle, I suppose the name was put uppon it by some that had little Holiness in them-

themselves: It is an Herb of *Mars*, and under the Sign *Aries*; now in handling this Herb, I shall give you a rational Pattern of all the rest, and if you please to view them throughout the Book, you shall to your content find it true.

It helps Swimmings and giddiness of the Head, or the Disease called Vertigo, *because* Aries *is the House of* Mars.

It is an excellent Remedy against the yellow Jaundice, and other Infirmities of the Gall, because Mars *governs Choller.*

It strengthens the attractive faculty in man, and clarifies the Blood, because the one is ruled by Mars.

The continual drinking the Decoction of it helps red Faces, Tetters, and Ringworms because Mars *causeth them.*

It helps Plague-sores, Boils, and Itch, the Bitings of mad Dogs and venemous Beasts, all which infirmities are under Mars. Thus you see what it doth by Sympathy.

By Antypathy to other Planets.

It cures the French Pox by Antypathy to Venus *who governs it.*

It strengthens the Memory and cures Deafness by Antipathy to Saturn *who hath his Fall in* Aries *which Rules the Head.*

It cures Quartan Agues, and other Diseases of Melancholly and adust Choller by Sympathy to Saturn, Mars *being exalted in* Capricorn.

Also it provokes Urine, the stopping of which is usually caused by Mars *or the* Moon.

If you please to make use of these Rules, you shall find them true throughout the Book, and by heeding them, you may be able to give a Reason of your Judgment to him that asketh you: I assure you it gave much content to me, and for your goods did I pen it; but I must conclude, my Epistle having exceeded its Bounds alreadie; hereby you see what Reason may be given for Medicines, and what necessity there is for every *Physitian* to be an *Astrologer*, you have heard it before I suppose, but now you know it; what remains, but that you labor to glorifie God in your several places, and do good to your selves first by encreasing your Knowledg, and to your Neighbors afterwards by helping their Infirmities; some such I hope this Nation is worthy of, and to such shall I remain a Friend, during life, readie to my poor power to help.

The Names of several Books printed by Peter Cole, *at the sign of the Printing Press in Cornhill, by the Exchange,* London.

Four several Books, by Nich. Culpeper, *Gent. Student in* Physick *and* Astrology.

1 A PHYSICAL DIRECTORY: Or a Translation of the *Dispensatory*, made by the Colledg of Physitians of *London*. Whereunto is added, The *Key to* Galen's *Method of Physick*.

2 A DIRECTORY for *Midwives*; or a Guide for *Women*.

3 An EPHEMERIS for the year 1651. Amplified with Rational *Predictions* from the Book of the Creatures. 1 Of the State of the Year. 2 What may probably be the effects of the Conjunction of *Saturn* and *Mars*, July 9. 1650. in *Scotland*, *Holland*, *Zealand*, *York*, *Amsterdam*, *&c.* and about what time they may probably happen. To which is joyned, An *Astrologo-Physical Discourse of the Humane Vertues in the Body of Man.*

4. GALENS ART OF PHYSICK; wherein is laid down,

1. A Description of Bodies, Healthful, Unhealthful, and Neutral.

2. Signs of good and bad Constitutions.

Cum multis aliis—

THE English Physitian.

Adders Tongue.

Description.

THis small Herb hath but one Leaf; which grows with the Stalk a fingers length above the ground, being fat, and of a fresh green colour, broad like the Water Plantane (but less) without any middle Rib in it: from the bottom of which Leaf on the inside, riseth up (ordinarily) one, somtimes two, or three small slender stalks, the upper half wherof is somwhat bigger, and dented with smal round dents of a yellowish green colour, like the Tongue of an Adder or Serpent (only this is as useful as they are formidable) The Root continues all the year.

Place.

It groweth in moist Meadows, and such like places.

Time.

And is to be found in *April* and *May*, for it quickly perisheth with a little heat.

Vertues and use.

It is temperate, in respect of heat, but dry in the Second Degree. The Juyce of the Leaves drunk with the distilled Water of Horstail is a singular Remedy for all manner of wounds in the Breast, Bowels, or other parts of the Body, and is given with good success unto those who are troubled with Casting, Vomiting, or bleeding at the Mouth or Nose, or otherwise downwards. The said Juyce given in the distilled Water of Oaken Buds is very good for Women who have their usual Courses, or the Whites flowing down too abundantly. It helps sore Eyes. The Leaves infused or boyled in Oyl Omphacine, or unripe Olives set in the Sun for certain daies, or the green Leaves sufficiently boyled in the said Oyl, is made an excellent green Balsom, not only for green and fresh Wounds, but also for old and inveterate Ulcers, especially if a little fine clear Turpentine be dissolved therin: It also stayeth and represseth all inflamations that arise upon pains, by Hurts, or Wounds.

Wounds in the Breast, Bowels, Vomiting, Bleeding, Terms stops, Whites, Wounds, Ulcers, Inflamations in Wounds.

It is an Herb under the Dominion of the *Moon* in *Cancer*, and therfore if the weakness of the Rententive Faculty be caused by an evil influence of *Saturn*, in any part of the Body governed by the Moon, or under the Dominion of *Cancer*, this Herb cures it by Sympathy: It cures those Diseases before specified in any part of the Body under the influence of *Saturn*, by Antypathy.

What parts of the Body are under each Planet and Sign, and also what Diseases may be found in my Astrological Judgment of Diseases, and for the internal Work of Nature in the Body of Man, as Vital, Animal, Natural, and Procreative Spirit of Man, The Apprehension, Judgment, Memory, the external Sences, *viz.* Seeing, Hearing, Smelling, Tasting, and Feeling; the Vertues, Attractive, Retentive, Digestive, Expulsive &c. under the Dominion of what Planets they are, may be found in my *Ephemeris* for the yeer 1651. in both which you shall find the Chaff of Authors blown away by the Fame of Dr *Reason*, and nothing but Rational Truths left for the Judgment of the Ingenious to feed upon.

Lastly, To avoid blotting Paper with one thing many times, and also to ease your Purses in the price of the Book, and withal to make you Studious in Physick, you have at the latter end of the Book, the way of preserving all Herbs either in Juyce, Conserve Oyl, Oyntment, or Plaister, Electuary Pill or Troches.

Agrimony.

Description.

THis hath diverse long leaves (some greater, some smaller) set upon a Stalk, all of them dented about the edges, green above, and grayish

grayiſh underneath, and a little hairy withal: Among which ariſeth up uſually, but one ſtrong, round, hairy, brown Stalk, two or three Foot high, with ſmaller Leaves ſet here and there upon it, at the top wherof grow many ſmal yellow Flowers one above another in long Spikes: after which come rough heads of Seeds hanging downwards which wil cleave to and ſtick upon Garments or any thing that ſhal rub againſt them. The Root is black, long, and ſomwhat woody, abiding many yeers and ſhooting afreſh every Spring which Root, though ſmal hath a reaſonable good ſcent.

Place.

It groweth upon Banks near the ſides of Hedges, or Pales.

Time.

And it Flowreth in *July* and *Auguſt*, the Seed being ripe ſhortly after.

Vertues and uſes.

Clenſing, Drying, Binding, Liver, Jaundice, Inward Wounds, Inward Bruiſes, Bloody and troubled urin, Chollick, Breaſt, Cough, Tertain and Quartan Agues, Bloody Flux, ulcers, Cancers, Thorns, Splinters and Nails in the fleſh Members out of joynt, Apoſthumes.

It is of a clenſing and cutting faculty without any manifeſt heat, moderately drying and binding; It openeth and clenſeth the Liver, helpeth the Jaundice, and is very beneficial to the Bowels, healing all inward Wounds, Bruiſes, Hurts, and other diſtempers. The Decoction of the Herb made with Wine and drunk is good againſt the ſtinging and biting of Serpents, and helps them that have foul, troubled, or bloody waters, and makes them piſs cleer ſpedily; It alſo helpeth the Chollick, clenſeth the Breaſt, and rids away the Cough. A draught of the Decoction taken warm before the Fit, firſt removes, and in time rids away the Tertian or Quartan Agues: The Leaves and Seed taken in Wine, ſtayeth the Bloody Flux. Outwardly applied, being ſtamped with old Swines greaſe, it helpeth old ſores, Cancers, and inveterate Ulcers; and draweth forth Thorns, Splinters of Wood, Nails, or any other ſuch thing gotten into the Fleſh; it helpeth to ſtrengthen the Members that be out of joynt; and being bruiſed and applied, or the Juyce dropped in, it helpeth foul and impoſthumed Ears.

The diſtilled Water of the Herb is good to all the ſaid purpoſes, either inward or outward, but a great deal weaker.

It is an Herb under *Jupiter*, and the Sign *Cancer*, and therfore ſtrengthens thoſe parts under that Planet and Sign, and removes Diſeaſes in them by Sympathy, and thoſe under *Saturn*, *Mars*, and *Mercury*, by Antipathy. If they happen in any part of the Body governed by *Jupiter*, or under the Signs, *Cancer*, *Sagitary*, or *Piſces*, and therfore muſt needs be good for the Gout, either uſed outwardly in an Oyl or Oyntment, or inwardly in an Electuary or Syrup, or concreated Juyce, for which ſee the latter end of the Book.

It is a moſt admirable remedy for ſuch whoſe Livers are annoyed either by heat or cold. The Liver is the former of Blood, and Blood the Nouriſher of the Body, and Agrimony and Strengthner of the Liver.

I cannot ſtand to give you a Reaſon in every Herb why it cureth ſuch Diſeaeſs, but if you pleaſe to peruſe my Judgment in the Herb Wormwood you ſhall find them there, and it will be well worth your while to conſider it in every Herb, you ſhall find them true throughout the Book.

Alehoof, or Ground-Ivy.

Deſcription.

THis well known Herb, lieth, ſpreadeth, and creepeth upon the ground, ſhooting forth Roots, at the corners of the tender joynted Stalks, ſet all along with two round Leavs at every Joynt, ſomwhat hairy, crumpled, and unevenly dented about the edges with round dents: at the Joynts likewiſe with the Leaves towards the end of the Branches come forth hollow long Flowers of a bleviſh Purple colour with ſmall white ſpots upon the lips that hang down: The Root is ſmal with ſtrings.

Place.

It is commonly found under Hedges, and on the ſides of Ditches, under Houſes, or in ſhadowed Lanes, and other waſt grounds in almoſt every part of the Land.

Time.

They Flower ſomwhat early, and abide ſo a great while; the Leaves continue green untill Winter, and ſomtimes abide, except the Winter be very ſharp and cold.

Vertues and uſe.

Inward Wounds, Pains Griping, Wind Choller, Stomach, Spleen, Belly, ſtopping in the Liver, Gal Plague, Poyſon, Gout, Sciatica, ſore Mouth & Throat, ulcers in the Privities, Itch, Scabs, Web in the Eye Redneſs & watring of them, ulcers, noiſe in the Ears Deafneſs.

It is quick, ſharp, and bitter in taſt, and is therby found to be hot and dry, a ſingular Herb for all inward Wounds, exulcerated Lungs, or other parts, either by it ſelf or boyled with other the like Herbs: And being drunk, it in ſhort time eaſeth all griping Pains, Windy and Chollerick Humors in the Stomach, Spleen, or Belly: helps the yellow Jaundice by opening the ſtoppings of the Gaul and Liver, and Melancholly by opening the ſtoppings of the Spleen, expelleth Venom or Poyſon, and alſo the Plague, it provoketh Urin, and Womens Courſes. The Decoction of it in Wine drunk for ſome time together procureth eaſe unto them that are troubled with the *Sciatica* or Hip Gout, as alſo the Gout in the Hands, Knees, or Feet: and if you put to the Decoction, ſome Honey, and a little Burnt Allum, it is excellent good to gargle any ſore mouth or Throat, and to waſh the Sores and Ulcers in the privy parts of man or woman: It ſpeedily healeth green Wounds being bruiſed and bound therunto: The Juyce of it boyled with a little Hony & *Vardigreeſ*, doth wonderfully clenſ Fiſtula's, Ulcers, and ſtayeth

ſtayeth the ſpreading or eating of Cancers and Ulcers, It helpeth the Itch, Scabs, Wheals, and other breakings out in any part of the Body. The Juyce of Celondine, Field Dayſies, and Ground-Ivy clarified, and a little fine Sugar diſſolved therin and dropped into the Eyes is Sovereign Remedy for all the Pains, Redneſs, and Watering of them; as alſo for the Pin and Web, Skins, and Films growing over the Sight; It helpeth Beaſts as well as Men; The Juyce dropped into the Ears doth wonderfully help the noiſe and ſinging of them, and helpeth the Hearing which is decayed. It is good to Tun up with new Drink, for it will ſo clarifie it in a night, that it will be the fitter to be drunk the next morning; or if any Drink be thick with removing or any other accident, it will do the like in a few hours.

It is an Herb of *Venus*, and therfore cures her Diſeaſes by Sympathy, and thoſe of *Mars* by Antipathy; how to preſerve it all the yeer you ſhall find at the latter end of the Book.

Alexander.

Deſcription.

IT is uſually ſown in all the Gardens in *Europe*, and ſo well known, that it needs no further Deſcription.

Time.

They Flower in *June* and *July*, and the Seed is ripe in *Auguſt*.

Vertues and uſe.

Obſtructions of the Liver and Spleen, provokes the Terms Afterbirth Wind, provokes Urin, biting of Serpents.

It warmeth a cold Stomach, and openeth ſtoppings of the Liver and Spleen, it is good to move Womens Courſes, to expel the After-birth, to break Wind, to provoke Urine, and help the Strangury; and theſe things the Seeds wil do likewiſe, if either of them be boyled in Wine, or being bruiſed and taken in Wine, it is alſo effectual againſt the biting of Serpents. And now you know what Alexander Porredg which is ſo familiar in this City is good for, that you may no longer eat it out of ignorance but out of knowledg.

The Black Alder-Tree.

Deſcription.

THis Tree ſeldom groweth to any great bigneſs, but for the moſt part abideth like a Hedg, Buſh, or Tree, ſpreading into Branches, the Wood of the Body being white, and of a dark, red Core or Heart; the outward Bark is of a blackiſh colour, with many white ſpots theron: but the inner Bark next unto the Wood is yellow, which being chewed will turn the Spittle neer unto a Saffron colour. The Leaves are ſomwhat like thoſe of the ordiuary Alder-Tree, or the Female Cornel, or Dogberry-Tree, called in *Suſſex* Dog-wood, but blacker, and not ſo long. The Flowers are white, coming forth with the Leaves at the Joynts, which turn into ſmal round Berries, firſt green, afterwards red, but blackiſh when they are through ripe divided as it were into two parts, wherin is contained two ſmal round and flat Seeds: The Root runneth not deep into the Ground, but ſpreadeth rather under the upper cruſt of the Earth.

Place.

This Tree or Shrub may be found plentifully in St. Johns Wood by *Hornſey*, and in the Woods upon *Hamſted Heath*; as alſo at a Wood called the old Park in *Barcomb* in *Suſſex*, neer the Brooks ſide.

Time.

It Flowreth in *May*, and the Berries are ripe in *September*.

Vertues and uſe.

The inner yellow Bark herof purgeth downwards both Choller & Flegm, & the watry humors of ſuch as have the Dropſie, and ſtrengtheneth the inward parts again by binding. If the Bark hereof be boyled with *Agrimony*, *Wormwood*, *Dodder*, *Hops*, and ſome *Fennel*, with *Smalledg*, *Endive*, and *Succory Roots*, and a reaſonable draught taken every morning for ſome time together, it is very effectual againſt the Jaundice, Dropſie, and the evil diſpoſition of the Body, eſpecially if ſome ſuitable purging Medicine have been taken before to avoid the groſſer excrements; It purgeth and ſtrengtheneth the Liver and Spleen, clenſing them from ſuch evil humors, and hardneſs as they are afflicted with,: It is to be underſtood that theſe things are performed by the dryed Bark, for the freſh green Bark taken inwardly provoketh ſtrong Vomitings, pains in the Stomach, and gripings in the Belly: Yet if the Decoction may ſtand and ſettle two or three daies until the yellow colour be changed black, it will not work ſo ſtrongly as before, but will ſtrengthen the Stomach, and procure an Appetite to Meat. The outer Bark contrarywiſe doth bind the Body, and is helpful for all Lasks and Pluxes therof, but this muſt alſo be dried firſt, wherby it wil work the better. The inner Bark herof boyled in Vineger, is an approved remedy to kill Lice, to cure the Itch, and take away Scabs by drying them up in a ſhort time: It is ſingular good to waſh the Teeth, to take away the Pains, to faſten thoſe that are looſe, to clenſ them, and keep them ſound. The Leaves are good Fodder for Kine to make them give more Milk.

Choller, Flegm.

Jaundice, Dropſy, Cachexia, Liver, Spleen.

Stomach weak, Appetite loſt, Flux, Lice Itch, Scabs Tooth-ach Teeth looſe.

If in the Spring time you uſe the Herbs be-

fore mentioned and will but take a handful of each of them, and to them ad a handful of Elder Buds, and having bruised them all, boyl them in a Gallon of ordinary Beer when 'tis new, and having boyled them half an hour, ad this to three Gallons more, and let them work together, and drink a draught of it every morning, half a pint or there abouts: It is an excellent Purge for the Spring, to consume that Flegmatick quality the Winter hath left behind it, and withal keep your Body in health, and consume those evil humors which the heat of Summer will readily stir up, esteem it as a Jewel.

The Common Alder-Tree.

Description.

GRoweth to a reasonable heighth, and spreads much if it like the place; It is so generally wel known unto Country People that I conceive it needless to tel them that which is no news.

Place and Time.

It delighteth to grow in moist Woods and watry places, Flowring in *April* or *May*, and yeilding ripe Seed in *September*.

Vertues and Use.

Cooling, Drying, Binding, Swellings, Fleas.

The Leaves and Bark of the *Alder-Tree*, are cooling, drying, and binding, The fresh Leaves laid upon swellings, dissolveth them, and staieth the Inflamations; The Leaves put under the bare Feet gauled with travelling are a great refreshing to them: The said Leaves gathered while the morning dew is on them, and brought into a Chamber troubled with Fleas, wil gather them therinto, which being suddenly cast out wil rid the Chamber of those troublesom Bed-fellows.

Burnings, Inflamations.

It is a Tree under the Dominion of *Venus*, and of some watry Sign or other, I suppose *Pisces*, and therfore the Decoction, or distilled Water of the Leaves is excellent against Burnings, and Inflamation, either with Wounds or without, to bath the place grieved with, and especially for that inflamation in the Breast which the vulgar call an Ague.

If you cannot get the Leaves, as in Winter 'tis impossible, make use of the Bark in the same manner.

S. Angelica,

TO write a Description of that which is so well known to be growing in almost every Garden, I suppose is altogether needless: yet for its Vertues it is of admiaable use.

In times of Heathenism when men had found out any excellent Herb &c. they dedicated it to their gods, As the *Bay-tree* to *Apollo*, the *Oak* to *Jupiter*, the *Vine* to *Bacchus*, the *Poplar* to *Hercules*: These the Papists following as their Patriarchs, they dedicate them to their Saints, as our *Ladies Thistle* to the *Blessed Virgin*, St. *Johns Wort* to St. *John*, and another Wort to St. *Peter*, &c. Our Physitians must imitate like Apes, (though they cannot come off half so cleverly) for they Blasphemously call Pansies, or Hartseas, an *Herb of the Trinity*, becaus it is of three colours: and a certain Oyntment, an *Oyntment of the Apostles*, becaus it consisteth of twelve Ingredients; Alas poor Fools, I am sorry for their folly, and grieved at their Blasphemy; God send them the rest of their Age, for they have their share of Ignorance already; O! why must ours be Blasphemous becaus the Heathens and Papists were Idolatrous? certainly they have read so much in old rustie Authors, that they have lost all their Deomity, for unless it were amongst the Ranters, I never read or heard of such Blasphemy: The Heathens and Papists were bad, and ours worse, the Papists giving Idolatrous Names to Herbs for their Vertues sake, not for their fair looks; and therfore some called this an Herb of the *Holy Ghost*, others more moderate called it *Angelica*, becaus of its Angelical Vertues, and that name it retains still, and all Nations follow it so near as their Dialect will permit.

Vertues and use.

Poyson, Pestilence, Epidemical Diseases.

It resists Poyson, by defending and comforting the Heart, Blood, and Spirits, it doth the like against the Plague, and all Epidemical Diseases if the Root be taken in pouder to the waight of half a dram at a time, with some good Triacle in Cardus Water, and the party therupon laid to sweat in his Bed. If Treacle be not at hand, take it alone in Cardus, or *Angelica* Water. The Stalks or Roots candied and eaten fasting, are good Preservatives in time of Infection; and at other times to warm and comfort a cold Stomach. The Root also steeped in Vineger, and a little of that Vineger taken somtimes fasting, and the Root smelled unto is good for the same purpose. A water distilled from the Root simply, or steeped in Wine and distilled in Glass, is much more effectual than the Water of the Leaves; and this Water drunk two or three spoonfuls at a time, easeth all Pains and Torments coming of Cold and Wind, so as the Body be not bound: and taken with some of the Root in Pouder at the beginning helpeth the Plurefy, as also all other Diseases of the Lungues and Breast, as Coughs, Phthisick, and shortness of Breath; and a Syrup of the

Cold and Pleurefy, Cough, Lungues, Breast, Strangury, Shortness of Breath,

Stalks

Stalks doth the like: It helps pains of the Collick, the Strangury, and stopping of the Urin, procureth Womens Courses, and expelleth the After-birth, openeth the stoppings of the Liver and Spleen, and briefly easeth and discusseth al windines and inward swellings. The Decoction drunk before the fit of an Ague, that they may sweat (if possible) before the fit come, wil in two or three times taking rid it quite away: It helps digestion, and is a remedy for a Surfet. The Juyce or the Water being dropped into the Eyes or Ears, helps dimnes of sight and deafnes: The Juyce put into the hollow Teeth, easeth their pains. The Roots in Pouder made up into a Plaister with a little Pitch, and laid on the biting of a mad-Dog, or any other venemous creature, doth wonderfully help: The Juyce or the Water dropped, or tents wet therin, and put into old filthy deep Ulcers, Or the Pouder of the Root (in want of either) doth clens and caus them to heal quickly, by covering the naked Bones with Flesh. The distilled Water applied to places pained with the Gout or *Sciatica*, doth give a great deal of ease.

Chollick, provokes the Terms, afterbirth, stoppings of the Liver and Spleen, Indigestion, Surfets, Tooth-ach, biting of Mad-dogs.

Ulcers, Gout, Sciatica.

The wild *Angelica* is not so effectual as the Garden, although it may be safly used to al the purposes aforesaid.

It is an Herb of the *Sun* in *Leo*; let it be gathered when he is there, the *Moon* applying to his good Aspect; let it be gathered either in his hour, or in the hour of *Jupiter*, let *Sol* be angular. Observe the like in gathering the Herbs of other Plants, and you may happen do wonders. In al Epidemical Diseases caused by *Saturn* this is as good a Preservative as grows.

Apples.

A Word or two of the most usual kinds of *Apples*, though the *Colledg of Physitians* make use of none but such as *Vulgò vulgati*, Pearmains, *vel* Pippins.

Apples in general are cold and windy, and being of sundry tasts, *Galen* sheweth thereby how to distinguish them: Som have a sharp tast, and are good for fainting Stomachs and loos Bellies; others sowr, good to cool and quench thirst; som sharp, fit to cut gros flegm; som sweet, soon destributed in the Body, and as soon passed away, yet sooner corrupted in the Stomach if they be staid: The best sorts before they be throughly ripe are to be avoided; then to be roasted or scalded is the best way to take them, and a little Spice or Seeds cast upon them and taken after meat, do strengthen both Stomach and Bowels, especially in those that loath, or hardly digest their meat, or are given to casting, or have a Flux or Lask: Those that are a little sowr and harsh used in that manner are fittest: Sweet Apples loosen the Belly and drive forth Worms; Sowr Apples stop the Belly, and provoke Urin; and Crabs for this purpose are fittest: The sweet Apples as the Pippin and Pearmain, help to dissolve Melancholly humors, and to procure Mirth, and therfore are fittest for *Confectio Alkermes*, and *Syrupus de Pomis*. The Leavs boyled and given to drink in hot Agues, where the heat of the Liver and Stomach causeth the Lips to break out, and the Throat to grow dry, harsh and furred, is very good to wash and gargle it withal, and to drink down som. This may to good purpose be used when better things are not at hand, or cannot be had. The Juyce of Crabs either Verjuyce or Cider, is of singular good use in the Heat and faintings of the Stomach, and against Casting to make a Posset with, or taken som of it alone by it self. The Juyce of Crabs, or Cider applied with wet cloaths therein to scalded or burnt places, cooleth, healeth, and draweth forth the Fire. A rotten Apple applied to Eyes blood-shotten, or enflamed with heat, or that are black and blue about them by any stroke or fall, and bound too all day or night, helpeth them quickly. The distilled Water of rotten Apples doth cool the heat and inflamations of Sores, and is good to bath foul creeping Ulcers, and to wash the Face to take away Spots, Freckles or other discolorings. The distilled Water of good and sound Apples is of special good use to procure Mirth, and expel Melancholly. The Ointment called *Pomatum*, if sweet and well made, helpeth the Chops in the Lips or Hands, and maketh smooth and supple the rough Skin of the Hands or Face parched with wind or other accidents.

Flux, loosen, Worms Melancholly, Agues, heat of the Liver and Stomach.

Scalding, Burning, Eyes, Inflamation, Ulcers, Spots, Freckles.

Chaps in the Lips & Hands.

Thus my Authors.

All that I can say of Apples is this:

1 That they are extream windy.

2 That they provoke Urin, being roasted (especially Pomwaters) and mixed with fair Water, and drunk up at night going to bed; half a dozen great ones mixed with a quart of Water, excellently provokes Urin, if there be no material stone in the Body: This I had of *Gerhard*, and have often known it proved, and alwaies with good succes. All Apples loosen the Belly and pleasure the Stomach by their coolnes.

Arrach wild & stinking.

Description.

THis hath small and almost round Leaves, yet a little pointed and without dent or cut, of a dusky mealy colour, growing on the slender Stalks and Branches that spread on the ground, with smal Flowers in clusters set with the

the Leaves, and smal Seeds succeding like the rest, perishing yearly, and rising again with its own sowing. It smels like old rotten Fish, or somthing worse.

Place.

It grows usually upon Dunghils.

Time.

They flower in *June* and *July*, and their Seed is ripe quickly after.

Vertues and use.

Stinking *Arrach* is used as a remedy to help Women pained, and almost strangled with the *Mother*, by smelling to it: But inwardly taken, there is not a better Remedy under the *Moon* for that Disease. I would be large in commendation of this Herb, were I but Eloquent. It is an Herb under the dominion of *Venus*, and under the sign *Scorpio*: It is common almost upon every Dunghil. The Works of God are given freely to Man, his Medicins are common and cheap, and easie to be found: 'tis the Medicines of the *Colledg of Physitians* that are so dear and scarce to find) I commend it for an Universal Medicine for the Womb, and such a Medicine as will easily, safly, and speedily cure any Disease therof, as the fits of the Mother, Dislocation or falling out therof; it cools the Womb being over-heated. (And let me tel you this, and I wil tel you but the truth, Heat of the womb is one of the greatest causes of hard labor in Childbirth) It makes barren women fruitful, it clenseth the Womb if it be foul and strengthens it exceedingly; it provokes the Terms if they be stopped, and stops them if they flow immoderatly. You can desire no good to your Womb, but this Herb will effect it; therfore if you love Children, if you love Health, if you love Ease, keep a Syrup alwaies by you made of the Juyce of this Herb and Sugar (or Honey if it be to clens the Womb) and let such as be rich keep it for their poor neighbors, and bestow it as freely as I bestow my studies upon them, or elf let them look to answer it another day when the Lord shall come *to make inquisition for Blood.*

Mother.

Womb.

Archangel.

TO put a gloss upon their practice; the Physitians call an Herb (which Country people vulgarly know by the name of *Dead-Nettles*) *Archangel*, wherein whether they savor of more *Superstition* or *Folly* I leave to the judicious Reader. There is more curiosity than courtesie to my Countrymen used by others in the explaination, aswel of the Names as Description of this so wel-known an Herb; which that I may not also be guilty of, Take this short Description first of the *Red-Archangel.*

Descriptions.

This hath diverse square stalks somwhat hairy, at the joynts whereof grow two sad green Leaves dented about the edges, opposit to one another, the lowermost upon long footstalks, but without any toward the tops which are somwhat round, yet pointed, and a little crumpled and hairy: Round about the upper Joynts where the Leaves grow thick, are sundry gaping Flowers of a pale reddish colour, after which com the Seeds three or four in a Husk. The Root is smal and thriddy, perishing every year: the whol Plant hath a strong scent, but not stinking.

White-Archangel hath diverse square stalks not standing streight upright but bending downward, wheron stand two Leavs at a Joynt, larger and more pointed than the other, dented about the edges and greener also more like unto Nettle-Leavs, but not stinking, yet hairy: At the Joynts with the Leavs stand larger and more open gaping white Flowers, in Husks round about the Stalks (but not with such a bush of Leavs, as Flowers set in the top, as is on the other) wherin stand smal roundish black Seeds: The Root is white, with many strings at it, not growing downward but lying under the upper crust of the Earth, and abideth many years encreasing: This hath not so strong a scent as the former.

Yellow-Archangel is like the White in the Stalks and Leavs, but that the Stalks are more streight and upright, and the Joynts with Leaves are further asunder, having longer Leavs than the former; and the Flowers a little larger and more gaping, of a fair yellow colour in most, in som paler. The Roots are like the White, only they creep not so much under the ground.

Place.

They grow almost every where, (unless it be in the middle of the street) the Yellow most usually in the wet grounds of Woods, and somtimes in the dryer, in divers Countries of this Nation.

Time.

They flower from the begining of the spring all the summer long.

Vertues and use.

The *Archangels* are somwhat hot and dryer than the *stinking Nettles*, and used with better success for the stopping and hardness of the Spleen than they by using the Decoction of the Herb in Wine, and afterwards applying the Herb hot unto the Region of the Spleen as a Plaister, or the Decoction with Spunges. The Flowers of the *White Archangel* are preserved, or conserved to be used to stay the Whites, and the Flowers of the Red to stay the Reds in Women. It makes the Heart merry, drives away Melancholly, quickens the Spirits, is good against *Quartan Agues*, stancheth bleedings at Mouth or Nose, if it be stamped and applied

Spleen.

White, Red and yellow Flux.

Melancholy.

Quartan Agues.

Bleeding at Nose,

Swelling, Kings-Evil, Gout, Sciatica, Joynts, Ulcers, old ſores, Bruiſes, Burnings.

to the nape of the Neck: The Herb alſo bruſed and with ſome Salt and Vinegar, and Hogs Greaſ laid upon any hard tumor or ſwelling; or that which is vulgarly called the Kings Evil, doth help to diſſolve or diſcuſs them, and being in like manner applied doth much allay the pains and give eaſ to the Gout, Sciatica, and other aches of the Joynts and Sinews: It is alſo very effectual to heal all green Wounds, and old Ulcers, alſo to ſtay their fretting, gnawing, and ſpreading; It draweth forth Splinters and ſuch like things gotten into the fleſh, and is very good againſt bruiſes and burnings. But the yellow *Archangel*, is moſt commended for old filthy corrupt Sores and Ulcers, yea, although they grow to be hollow; and to diſſolve tumors. The chief uſe of them is for Women it being an Herb of *Venus*, and may be found in my *Guide for Women*.

Arſmart.

Deſcription of the Mild.

THis hath broad Leaves ſet at the great red Joynts of the Stalks, with ſemicircular blackiſh marks on them uſually, yet ſomtimes without: The Flowers grow in long Spikes uſually either bluſh or whitiſh with ſuch like Seed following. The Root is long with many ſtrings thereat periſhing yeerly; this hath no ſharp taſt (as another ſort hath, which is quick and biting) but rather ſowr like Sorrel, or elſ a little drying or without taſt.

Place.

It grows in watery Plaſhes, Ditches, and the like, which for the moſt part are dry in Summer.

Time.

It Flowreth in *June*, and the Seed is ripe in *Auguſt*.

Vertues and uſe.

Ulcers, Cold ſwellings, bruiſes, Congeled Blood, Toothach, Felons, or Andicoms, Worms in the Ears. Fleas, Tired Horſes,

It is of a cooling and drying quality, and very effectual for putrified Ulcers in Man or Beaſt, to kill the Worms and clenſ the putrified Places: The Juyce therof dropped in, or otherwiſe applied, conſumeth all cold Swellings, and diſſolveth the congealed Blood of bruiſes by ſtrokes, falls, &c. A piece of the Root, or ſome of the Seed bruiſed and held to an aching Tooth, taketh away the pain. The Leaves bruiſed and laid to the Joynt that hath a Fellon theron, taketh it away. The Juyce deſtroyeth Worms in the Ears being dropped into them: if the hot Arſmart be ſtrewed in a Chamber it will ſoon kill all the Fleas; and the Herb or Juyce of the cold Arſmart put to Horſes or other Cattels ſores will drive away the Flie in the hotteſt time of Summer: A good handful of the hot biting Arſmart put under a Horſes Saddle will make him travel the better although he were half tired before: The mild Arſmart is good againſt hot Impoſthumes and Inflamations at the beginning, and to heal green Wounds. *Impoſtums Inflamations, Wounds.*

All Authors chop the Vertues of both ſorts of Arſmart together, as men chop Herbs for the Pot, when both of them are of clean contrary qualities, The hot Arſmart groweth not ſo high or tall as the mild doth, but hath many leaves of the colour of Peach leaves, very ſeldom or never ſpotted, in other particulars it is like the former, but may eaſily be known from it, if you will be but pleaſed to break a Leaf of it croſs your Tongue, for the hot will make your Tongue to ſmart, ſo will not the cold; if you ſee them both together, you may eaſily diſtinguiſh them, becauſ the mild hath far broader Leaves: And our Colledg of Phyſitians out of their learned care for the publick good, *Anglice* their own gain, miſtake the one for the other in their *New-Maſter-Piece*, wherby they diſcover, 1. Their Ignorance, 2. Their Careleſneſs, and he that hath but half an eye may ſee their pride without a pair of Spectacles. I have done what I could to diſtinguiſh them in their Vertues, and when you find not the contrary named, uſe the cold. The truth is, I have not yet ſpoken with Dr. *Reaſon*, nor his Brother Dr. *Experience*, concerning either of them both.

Aſarabacca.

Deſcription.

ASarabacca hath many Heads riſing from the Roots, from whence come many ſmooth Leaves, every one upon his own Footſtalk, which are rounder and bigger than Violet Leaves, thicker alſo, and of a darker green ſhining colour on the upper ſide, and of a paler yellow green underneath, little or nothing dented about the edges; from among which riſe ſmal round hollow, brown green husks, upon ſhort ſtalks about an inch long, divided at the brims into five diviſions, very like the Cups or Heads of the Henbane Seed, but that they are ſmaller; and theſe be all the Flowers it carrieth, which are ſomwhat ſweet, being ſmelled unto, and wherein when they are ripe is contained ſmal cornered, rough Seeds, very like the Kernels or Stones of Grapes or Raiſons. The Roots are ſmall and whitiſh ſpreading diverſ waies in the ground, and encreaſing into diverſ Heads; but not running or creeping under ground as ſome other creeping Herbs do; They are ſomwhat ſweet in ſmell, reſembling Nardus, but more when they are dry, than green; and of a ſharp but not unpleaſant taſt.

Place.

It groweth frequently in Gardens.

Time.

They keep their Leaves green all Winter, but ſhoot forth new in the Spring, and with them come forth thoſe Heads or Flowers which give ripe Seed about Midſummer, or ſomwhat after.

Vertues and uſe.

Cauſeth Vomiting, Choller, Flegm, Urin, Obſtructions of the Liver and Spleen, Dropſy, Jaundice, Agues.

This Herb being drunk, not only provoketh vomiting, but purgeth downward, and by Urin alſo, purging both Choller and Flegm: if you ad to it ſome Spicknard, with the Whey of Goats Milk or Honeyed Water, it is made more ſtrong, but it purgeth Flegm more manifeſtly than Choller, and therfore doth much help pains in the Hips and other parts, it being boyled in Whey, it wonderfully helpeth the Obſtruction of the Liver and Spleen, and therfore profitable for the Dropſie and Jaundice being ſteeped in Wine and drunk. It helps thoſe continual Agues that come by the plenty of ſtubborn humors: An Oyl made therof by ſetting it in the Sun, with ſome Laudanum added to it, provoketh ſweating (the ridg of the Back being anointed therwith) and therby driveth away the ſhaking Fits of Agues. It will not abide any long boyling, for it loſeth its chiefeſt ſtrength therby; nor much beating; for the finer Pouder doth provoke Vomits and Urin, and the courſer purgeth downwards.

The common Uſe herof is to take the Juyce of five or ſeven Leavs in a little Drink to cauſ Vomitings: The Roots have alſo the ſame Vertue, though they do not operate ſo forcibly, yet they are very effectual againſt the biting of Serpents, and therfore is put as an ingredient both into *Methridate* and *Venice Treacle*. The Leaves and Roots being boyled in Ly, and the Head often waſhed therwith, while it is warm, comforteth the Head and Brain that is ill affected by taking cold, and helpeth the Memory.

Serpents.

Head.

Memory.

I ſhall deſire Ignorant people to forbear the uſe of the Leavs, the Roots purge more gently, and may prove beneficial in ſuch as have Cancers, or old putrified Ulcers, or Fiſtulaes upon their Bodies, to take a dram of them in Pouder in a quarter of a pint of white Wine in the morning. The truth is, I fancy Purging and Vomiting Medicines as little as any Man breathing doth, for they weaken Nature, nor ſhall never adviſe them to be uſed unleſs upon urgent neceſſity. If a Phyſitian be Natures ſervant, it is his duty to ſtrengthen his Miſtris as much as he can, and weaken her as little as may be.

Aſparagus, Sparagus, or Sperage.

Deſcription.

IT riſeth up at firſt with diverſ whitiſh green ſcaly Heads, very brittle or eaſie to break while they are yong, which afterwards riſe up into very long and ſlender green ſtalks, of the bigneſs of an ordinary riding wand at the bottom of moſt, or bigger or leſſer, as the Roots are of growth; on which are ſet diverſ branches of green Leavs, ſhorter and ſmaller than Fennel to the top, at the joynts wherof come forth ſmall moſſie yellowiſh Flowers, which turn into round Berries, green at the firſt, and of an excellent red colour when they are ripe, ſhewing like Beads of Corral, wherin are contained exceeding hard, black Seeds. The Roots are diſperſed from a ſpongeous Head into many long, thick, and round ſtrings, wherby it ſucketh much Nouriſhment out of the ground, and encreaſeth plentifully thereby.

Prickly Aſparagus, Sparagus, or Sperage.

Deſcription.

IT groweth uſually in Gardens; and ſome of it grows wild, in *Appleton* Meadow in *Glouceſterſhire*, where the poor people do gather the Buds, or yong Shoots, and ſell them cheaper than our Garden *Aſparagus* is ſold at *London*.

Time.

They do for the moſt part Flower, and bear their Berries late in the yeer, or not at all, although they are houſed in Winter.

Vertues and uſe.

Belly, Strangury, Diſury, Gout, Sciatica, Eyes Tooth-ach.

The yong Buds or branches boyled in ones ordinary broth, maketh the Belly ſoluble and open, and boyled in white Wine, provoketh Urin being ſtopped, and is good againſt the Strangury, or difficulty of making water; it expelleth the gravel and ſtone out of the Kidneys, and helpeth pains in the Reins: And boyled in white Wine or Vineger it is prevalent for them that have their Arteries looſned, or are troubled with the Hip-Gout, or Sciatica. The Decoction of the Roots boyled in Wine and taken is good to cleer the ſight, and being held in the Mouth eaſeth the Toothach: And being taken faſting ſeveral mornings together ſtirreth up bodily luſt in Man or Wo-

man (whatsoever some have written to the contrary.) The Garden *Asparagus* nourisheth more than the wild; yet hath it the same effects in al the aforementioned Diseases. The Decoction of the Roots in white Wine, and the Back and Belly bathed therwith, or kneeling or lying down in the same, or sitting therin as a Bath, hath been found effectual against pains of the Reins and Bladder, pains of the Mother and Chollick, and generally against all pains that happen to the lower parts of the Body; and no less effectual against stiff and benummed Sinews, or those that are shrunk by Cramps, and Convulsions, and helpeth the *Sciatica*.

Reins, Bladder, Mother, Cramp, Chollick, Convulsion

Ash-Tree.

THis is so wel known that time wil be misspent and Paper wasted in writing a Description of it; and therfore I shal only insist upon the Vertues of it.

Vertues and use.

The yong tender Tops with the Leaves taken inwardly, and some of them outwardly applied are singular good against the biting of the Viper, Adder, or any other Venemous Beast: And the Water distilled therfrom, being taken a smal quantity every morning fasting, is a singular Medicine for those that are subject to a Dropsie, or to abate the greatness of those who are too gross or fat. The Decoction of the Leaves in white Wine, helpeth to break the Stone and expel it, and cureth the Jaundice. The Ashes of the Bark of the Ash made into Ly, and those Heads bathed therwith which are Leprous, Scabby, or Scal'd, they are therby cured. The Kernels within the Husks commonly called Ashen Keys, prevaileth against Stitches and pains in the sides proceeding of Wind, and avoideth away the stone by provoking Urin.

Adders & Vipers biting, Dropsy, Stone, Jaundice, Leprosie, Scabs, Scald Heads, Stitches, Stone, Disury, Rickets.

I can justly except against none of all this save only the first, *viz.* That Ash-tree Tops and Leaves are good against the biting of Serpents and Vipers, and I suppose this had its rise from *Gerard*, or *Pliny*, both which hold that there is such an Antipathy between an Adder and an Ash-tree, that if an Adder be compassed round with Ash-tree Leaves, she wil sooner run through the fire than through the Leaves, the contrary to which is the truth, as both my eyes are witnesses: the rest are Vertues somthing likely, only if it be in Winter when you cannot get the Leaves, you may safely use the Bark instead of them, the Keys you may easily keep all the year, gathering them when they are ripe.

Avens.

Description.

THe ordinary *Avens* hath many long, rough, dark green, winged Leavs rising from the Root, every one made of many Leavs set on each side of the middle Rib, the largest three wherof grow at the ends and are snip'd or dented round about the edges: the other being smal pieces, somtimes two and somtimes four standing on each side of the middle rib underneath them; among which do rise up divers rough or hairy Stalks about two foot high branching forth with Leavs at every Joynt, not so long as those below, but almost as much cut in on the edges, some into three parts, some into more: On the Tops of the Branches stand smal pale yellow Flowers consisting of five Leavs, like the Flowers of Cynkfoyl, but larger in the middle, wherof standeth a smal green Head, which when the Flower is fallen groweth to be rough and round, being made of many long greenish purple Seeds (like grains) which wil stick upon your Cloathes. The Root consists of many brownish strings or fibres, smelling somwhat like unto Cloves, especially those which grow in the higher, hotter, and drier grounds, and in the freer and clear Air.

Place.

They grow wild in many places under Hedg sides, and by the Pathwaies in Fields, yet they rather delight to grow in shadowy than in Sunny places.

Time.

They Flower in *May* and *June* for the most part, and their seed is ripe in *July* at the furthest.

Vertues and use.

It is good for the Diseases of the Chest or Breast, for pains and Stitches in the Sides, and to expel crude and raw humors from the Belly and Stomach by the sweet savor and warming quality; it dissolveth the inward congealed Blood hapning by falls or bruises, and the spitting of Blood, if the Roots either green or dryed be boyled in Wine and drunk, as also al manner of inward Wounds or outward if they be washed or bathed therwith. The Decoction also being drunk comforteth the Heart, and strengtheneth the Stomach, and a cold Brain, and therfore is good in the Spring time to open Obstructions of the Liver, and helpeth the wind Chollick; it also helpeth those that have Fluxes, or are burstен, or have a Rupture; It taketh away spots or marks in the Face, being washed therwith: The Juyce of the fresh Root or Pouder of the dried Root hath the same effect with the Decoction.

Breast, Stitches, Wind, Belly, Stomach, Inward Wounds, Heart, cold Brain, Obstructions, Chollick, Fluxes, Ruptures, Spots and Marks in the Face, Plague, Poyson, Indigestion.

coction. The Root in the Spring time steeped in Wine doth give it a delicat savor and tast, and being drunk fasting every morning comforteth the Heart, and is a good Preservative against the Plague, or any other Poyson; it helpeth Digestion, and warmeth a cold Stomach, and openeth the Obstructions of the Liver and Spleen.

It is very safe, you need have no Dose prescribed; and is very fit to be kept in every good bodies house.

Balm.

THis Herb is so wel known to be an Inhabitant almost in every Garden, that I shal not need to write any Description thereof, although the Vertues thereof which are many may not be omitted.

Vertues and use.

The *Arabian* Physitians have extolled the Vertues hereof to the Skyes, although the *Greeks* thought it not worth mentioning. *Serapio* saith, It causeth the Mind and Heart to becom merry, and reviveth the Heart fainting into soundings, especially of such who are over taken in their sleep, and driveth away al troublesom cares and thoughts out of the Mind arising from Melancholly, or black Choller; which *Avicen* also confirmeth. It is very good to help Digestion, and open Obstructions of the Brain; and hath so much purging quality in it (saith *Avicen*) as to expel those Melancholly vapors from the Spirits & Blood which are in the Heart and Arteries, although it cannot do so in other parts of the Body. *Diascorides* saith, That the Leaves steeped in Wine, and the Wine drunk, and the Leavs externally applied, is a remedy against the sting of Scorpions, and the bitings of mad Dogs, and commendeth the Decoction therof for Women to bath or sit in to procure their Courses; it is good to wash aching Teeth therwith, and profitable for those that have the bloudy-Flux. The Leaves also with a little Nitre taken in Drink, are good against a Surfet of *Mushromes*, helps the griping pains of the Belly, and being made into an Electuary is good for them that cannot fetch their breath: Used with Salt it takes away Wens, Kernels, or hard Swellings in the Flesh or Throat; it clenseth foul Sores, and easeth pains of the Gout: It is good for the Liver and Spleen. A Tansie or Cawdle made with Egs and the Juyce therof while it is yong, putting to it some Sugar and Rosewater is good for Women in Childbed when the After-birth is not throughly avoided, and for their faintings upon, or after their sore travel. The Herb bruised and boyled in a little Wine and Oyl and laid warm on a Boil, will ripen and break it.

Mind, Heart, Faintings Swoonings, Melancholy, Indigestion, Obstruction of the Brain, Heart, Arteries, Venemous-Beasts, Mad Dogs Terms provokes, Toothach, Bloody Flux. Mushroms dificulty of breathing, Gout, Liver, Spleen, Women in Child bed, Fainting in travel, Boyls.

It is an Herb of *Jupiter* and under *Cancer*, and strengthens Nature much in al its actions; let a Syrup made with the Juyce of it and Sugar, (as you shall be taught at the latter end of the Book) be kept in every Gentlewomans house, to releeve the weak stomachs and sick Bodies of their poor sickly Neighbors; as also the Herb kept dry in the Hous that so with other convenient Simples you may make it into an Electuary with Hony according as the Disease is, and as you shall be taught at the latter end of the Book.

Barberry.

THe Shrub is so wel known to every Boy and Girl that hath but attained to the age of seven years, that it needs no Description.

Vertues and use.

Mars owns the Shrub, and presents it to the use of my Country-men to purge their Bodies of Choller. The inner Rind of the *Barberry Tree* boyled in White-Wine and a quarter of a pint drunk each morning, is an excellent remedy to clense the Body of Chollerick Humors, and free it from such Diseases as Choller causeth, such be Scabs, Itch, Tetters, Ringworms, yellow Jaundice, Boils, &c. It is excellent for hot Agues, Burnings, Scaldings, heat of Bloud, heat of the Liver, Bloudy-flux, for the Berries are as good as the Bark, and more pleasing; they get a man a good stomach to his victuals, by strengthning the attractive faculty, which is under *Mars*, as you see more at large in the latter end of my *Ephemeris* for the year 1651. The Hair washed with the Ly made of the Ashes of the Tree and Water, 'twil make it turn yellow, *viz.* of *Mars* his own colour. The Fruit and Rind of the Shrub, the Flowers of Broom and of Heath, or Furz, clense the Body of Choller by *Sympathy*, as the Flowers, Leaves and Bark of the *Peach-Tree* do by *Antipathy*; because these are under *Mars*, that under *Venus*.

Choller, Scabs, Itch Tetters, Ringworm Yellow-Jaundice, Boyls, Agues, Burning, Scaldings, Apetit lost Hair.

Barly.

THe continual usefulness hereof hath made al in general so aquainted herewith, that it is altogether needless to describe its several kinds hereof plentifully growing, being yearly sown in this Land. The Vertues whereof take as followeth.

Vertues and use.

Barly in al the parts and compositions therof (except *Malt*) is more cooling than *Wheat*, and a little clensing: and al the Preparations therof,

therof, as *Barly-water* and other things made therof, do give great nourishment to persons troubled with Feavers, Agues, and heats in the Stomach. A Pultis made of *Barly Meal* or *Flower* boyled with Vinegar and Honey, and a few dry Figs put into them, dissolveth all hard Impostlums, and aswageth Inflamations being therto applied: And being boyled with *Melilot* and *Chamomel* Flowers, and som *Linseed*, *Fenugreek* and *Rue* in Pouder, and applied warm, it easeth the pains in the Sides and Stomach, and windines of the Spleen. The Meal of *Barly* and *Fleawort* boyled in Water, and made into a Pultis with Honey and Oyl of Lillies, applied warm, cureth swellings under the Ears, Throat, Neck and such like: and a Plaister made therof with Tar, Wax & Oyl, helpeth the Kings-Evil in the Throat: Boyled with sharp Vinegar into a Pultis and laid on hot helpeth the Leprosie: Being boyled in red Wine with Pomgranat Rinds and Mirtles, stayeth the Lask or other Flux of the Belly: Boyled with Vinegar and a Quince, it easeth the hot pains of the Gout. Barly flower, white Salt, Honey and Vinegar mingled together, taketh away the Itch speedily and certainly: The Water distilled from the green Barly in the end of *May* is very good for thos that have Desluxions of humors fallen into their Eyes, and easeth the pains being dropped into them: or White-Bread steeped therein and bound on to the Eyes, doth the same.

Feavers, Agues, Stomach, Apostums, Inflamations, Spleen Ears, Throat, Neck, Kings-Evil, Leprosie, Flux, Gout, Itch Eyes.

Garden Bazil, OR Sweet Bazil.

Description.

THe greater ordinary *Bazil* riseth up usually with one upright Stalk diversly branching forth on all sides, with two Leaves at every Joynt, which are somewhat broad and round, yet pointed, of a pale green colour, but fresh, a little snipt about the edges, and of a strong heady scent: The Flowers are smal and white standing at the tops of the Branches, with two smal Leavs at the Joynt, in som places green, in others brown, after which come black Seed. The Root perisheth at the approach of Winter, and therfore must be new sowen every year.

Place.

It only groweth in Gardens.

Time.

It must be sowed late, and flowers in the heat of Summer, being a very tender Plant.

Vertues and use.

This is the Herb which all Authors are together by the Ears about, and rail at one another like *Lawyers*: *Galen* and *Diascorides* hold it not fitting to be taken inwardly: and *Chrysippus* rails at it with downright *Billingsgate-Rhetorick*. *Pliny*, and the *Arabian* Physitians defend it.

For mine own part I presently found that speech true;

Non nostrum inter nos tantas componere lites.

And away to Dr *Reason* went I, who told me it was an Herb of *Mars*, and under the *Scorpion*, and perhaps therfore called *Basilicon*, and then no mervail if it carry a kind of virulent quality with it: Being applied to the place bitten by a venemous Beast, or stung by a Wasp or Hornet, it speedily draws the Poyson to it; *Every like draws his like*. *Myzaldus* affirms, That it being laid to rot in Horsdung it wil breed Venemous Beasts. And *Hollerius* a *French* Physitian affirms upon his own knowledg, That an acquaintance of his by common smelling to it, had a *Scorpion* bred in his Brain. Somthing is the matter this Herb and *Rue* wil not grow together, no, nor near one another: And we know *Rue* is as great an enemy to Poyson as any grows.

Venemous Beasts, Bees, Wasps, Hornets.

To conclude: It expelleth both Birth, and After-birth; and as it helps the deficiency of *Venus* in one kind, so it spoils al her actions in another. I dare write no more of it.

The Bay-Tree.

THis is so wel known that it needs no Description; I shal therfore only write the Vertues therof, which are many.

Vertues and use.

Galen saith, That the Leaves or Bark do dry and heal very much, and the Berries more than the Leaves: The Bark of the Root is less sharp and hot, but more bitter, and hath some astriction withal, whereby it is effectual to break the Stone, and good to open obstructions of the Liver, Spleen, and other inward parts, which bring the Dropsie, Jaundice, &c. The Berries are very effectual against al Poyson of venemous Creatures, and the Stings of Wasps and Bees, as also against the Pestilence or other infectious Diseases, and therfore is put into sundry Triacles for that purpose: They likewise procure Womens Courses; and seven of them given to a Woman in sore travel of Child-birth, do cause a speedy delivery, and expel the After-birth; and therfore not to be taken by such as have not gon out their time leest they procure Abortment, or cause Labor too soon: They wonderfully help al cold and rhumatick Distillations from the Brain to the Eyes, Eyes, Lungs or other parts: And being made into an Electuary with Honey, do help the

Stone, Obstructions of the Liver and Spleen, Dropsie, Poyson, Jaundice, Bees, Wasps, Hornets, Terms provokes, Cause Delivery, After-birth Lungs,

Coughs, Shortneſs of Breath, Megrim, Wind, Vertigo, Diſuſy, Mother, Worms, Joynts, Nerves, Arteries, Stomach, Belly, Womb, Ears, Marks in the Skin, Itch, Scabs.

Conſumption, old Coughs, ſhortneſs of Breath, and thin Rhewms: as alſo the Megrim, they mightily expel wind and provoke Urin; help the Mother, and kil the Worms: The Leaves alſo work the like effects. A Bath of the Decoction of the Leavs and Berries, is ſingular good for Women to ſit in that are troubled with the Mother, or the Diſeaſes therof, or the ſtoppings of their Courſes, or for the Diſeaſes of the Bladder, pains in the Bowels by wind, and ſtoppnig of Urin: A Decoction likewiſe of equal parts of Bay-berries, Cummin-Seed, Hyſop, Origanum, and Euphorbium, with ſome Honey, and the Head bathed therwith doth wonderfully help Diſtillations and Rhewms, and ſetleth the Pallat of the Mouth into its place. The Oyl made of the Berries is very comfortable in all cold Griefs of the Joynts, Nervs, Arteries, Stomach, Belly, or Womb, and helpeth Palſies, Convulſions, Cramps, Aches, trembling and numneſs in any part, wearineſs alſo, and pains that come by ſore travelling: Al griefs and pains likewiſe proceeding from Wind, either in the Head, Stomach, Back, Belly, or Womb, by anointing the parts affected therwith: And pains in the Ears are alſo cured by dropping in ſome of the Oyl, or by receiving into the Ears the warm fume of the Decoction of the Berries through a Funnel. The Oyl takes away marks of the Skin and Fleſh by bruiſes, fals, &c. and diſſolveth the congealed Blood in them: It helpeth alſo the Itch, Scabs, and Wheals in the Skin.

Witchcraft

I ſhal but only ad a word or two to what my Friend hath written, *viz.* That it is a Tree of the *Sun*, and under the Cœleſtial Sign *Leo*, and reſiſteth Witchcraft very potently, as alſo al the evil old *Saturn* can do to the Body of Man, and they are not a few, for it is the Speech of one, and I am miſtaken if it were not *Myzaldus*, That neither Witch nor Devil, Thunder nor Lightning wil hurt a Man in the place where a Bay-Tree is.

Beans. *faba*

BOth the Garden and Field *Beans* are ſo wel known that it ſaveth me labor of writing any Deſcription of them: Their Vertues briefly are as followeth.

Spots, Stone, Diſury, Inflamation, Womens Breaſts,

The diſtilled wather of the Flowers of Garden *Beans* is good to clenſ the Face and Skin from Spots and Wrinckles, and the Meal or Flower of them, or the ſmal, doth the ſame. The Water diſtilled from the green Husks is held to be very effectual againſt the Stone, and to provoke Urine. *Bean* Flower is uſed in Pultiſſes to aſſwage Inflamations riſing upon Wounds, and the ſwelling of Womens Breaſts cauſed by the curding of their Milk, and repreſſeth their Milk: The Flower of *Beans* and Fenugreek mixed with Honey, and applied to Fellons, Boyls, Bruiſes, or blue Marks by blows, or the Impoſthumes in the Kernels of the Ears, helpeth them all: And with Roſe Leavs, Frankinſenſ and the white of an Egg being applied to the Eyes, helpeth them that are ſwoln, or do water, or have received any blow upon them if uſed with Wine. If a *Bean* be parted in two, the skin being taken away, and laid on the place where a Leech hath been ſet that bleedeth too much, it ſtaieth the bleeding. *Bean* Flower boyled to a Pultis with Wine and Vinegar and ſome Oyl put therto, ceaſeth both pain and ſwelling of the Cods: The Husks boyled in Water to a conſumption of a third part therof ſtaieth a Lask: and the Aſhes of the Husks made up with old Hogs Greaſ, helpeth the old pains, contuſions and Wounds of the Sinews, the *Sciatica*, and Gout. The Field *Beans* have all the aforementioned Vertues as the Garden Beans.

Felons, or Andicoms, Boils, Bruſes, Ears. Eyes, Leeches.

Cods ſwelled, Flux, Pain, Sinews, Sciatica, Gout.

Beans eaten are extream windy meat, but if after the Dutch faſhion when they are half boyled you husk them, and then ſtew them (I cannot tell you how, for I never was Cook in al my life) they are wholſomer Food.

French-Beans.

Deſcription.

THe French or Kidney *Bean* ariſeth up at firſt but with one ſtalk which afterwards divideth its ſelf into many Arms or Branches, but alſo weak that if they be not ſuſtained with ſticks or poles, they wil lie fruitleſs upon the ground: at ſeveral places of theſe Branches grow forth long footſtalks, with every one of them three broad round and pointed green Leavs at the end of them, towards the tops wherof come forth diverſ Flowers made like unto Peaſe Bloſſoms, of the ſame colour for the moſt part that the fruit wil be of, that is to ſay, white, yellow, red, blackiſh, or of a deep purple; but white is moſt uſual; after which come long and ſlender flat Pods, ſome crooked, ſome ſtraight, with a ſtring as it were running down the Back therof, wherein are contained flattiſh round fruit made to the faſhion of a Kidney; the Root is long and ſpreadeth with many ſtrings annexed to it, and periſheth every year.

There is alſo another ſort of *French Beans* commonly growing with us in this Land, which is called the Scarlet flowred *Bean*.

This ariſeth up with ſundry Branches as the other, but runs up higher to the length of Hop-poles, about which they grow twining, but turning contrary to the Sun, having Foot-

ſtalks

stalks with three Leaves on each as on the other: The Flowers also are in fashion like the other, but many more set together, and of a most Orient Scalet colour. The Beans are larger than the ordinary kind, of a deep Purple colour, turning black when it is ripe and dry: The Root perisheth also in Winter.

Vertues.

Disury, Shortness of breath, Incite to Venery.

The ordinary *French Beans* are of an easie digestion, they move the Belly, provoke Urin, enlarge the Breast that is straitned with shortness of Breath, engender *Sperme*, and incite *Venery*.

A gallant shew.

And the Scarlet-coloured Beans in regard of the glorious beauty of their colour, being set near a Quickset Hedg, wil bravely adorn the same, by climing up theron; so that they may be discerned a great way, not without admiration of the beholder at a distance. But they wil go near to kil the Quicksets by cloathing them in Scarlet.

Ladies-Bedstraw.

Description.

THis ariseth up with divers smal brown and square upright Stalks a yard high or more, somtimes branched forth into diverse parts, ful of Joynts, and with diverse very fine small Leaves at every one of them little or nothing rough at al: At the tops of the Branches grow many long tufts or branches of yellow Flowers very thick set together, from the several Joynts which consist of four smal Leavs apiece, which smel somwhat strong, but not unpleasant: The Seed is smal and black like Poppy seed, two for the most part joyned together: The Root is reddish with many smal thrids fastned unto it, which take strong hold of the ground and creepeth a little; And the Branches leaning a little down to the ground take Root at the Joynts therof, wherby it is easily encreased.

Ther is also another sort of *Ladies-Bedstraw* growing frequently in *England*, which beareth white Flowers as the other doth yellow; but the Branches of this are so weak that unless it be sustained by the Hedges, or other things near which it groweth it wil lie down on the ground; the Leaves a little bigger than the former, and the Flowers not so plentiful as those; and the Root hereof is also thridy, and abiding.

Place.

They grow in Meadows and Pastures both wet and dry, and by the Hedges.

Time.

They flower in *May* for the most part, and the Seed is ripe in *July* and *August*.

Vertues and use.

Stone, Dysury, Bleeding, Wounds,

The Decoction of the former of these being drunk is good to fret and break the Stone, and provokes Urin, stayeth inward bleedings, and healeth inward Wounds: The Herb or Flower bruised and put up into the Nostrils, stayeth their bleeding likewise: The Flowers and the Herb made into an Oyl by being set in the *Sun*, and changed after it hath stood ten or twelve daies; or into an Ointment being boyled in *Axungia* or Sallet-Oyl with some Wax melted therein after it is strained; either the Oyl made therof or the Ointment do help Burnings with Fire, or Scalding with Water: the same also, or the Decoction of the Herb and Flower is good to bath the Feet of Travellers and Lacquies whose long running causeth wearines and stifnes in their Sinews and Joynts; If the Decoction be used warm, and the Joynts afterwards anointed with the Ointment. It helpeth the dry Scab, and the Itch in Children: And the Herb with the white Flower is also very good for the Sinews, Arteries, and Joynts to comfort and strengthen them after travel, cold and pains.

Burnings, Gauled-Feet, Weariness, Stifness of Joynts, Scabs, Itch

They are both Herbs of *Venus*, and therfore strengthen the parts both internal and external which she rules.

Beets.

Description.

THere are two sorts of *Beets* which are best known generally, and wherof I shal principally intreat at this time. *Viz.* The White and the Red *Beets*, and their Vertues.

The *Common White Beet* hath many great Leaves next the ground somwhat large, and of a whitish green colour: The Stalk is great, strong and ribbed, bearing great store of leaves upon it almost to the very top of it; The flowers grow in very long tufts, smal at the ends, and turning down their Heads, which are smal, pale, greenish, yellow Burrs, giving cornered prickled Seed. The Root is great, long and hard, and when it hath given Seed of no use at all.

The *Common Red Beet* differeth not from the White, but only it is lesser and the Leaves and the Roots are somwhat red: The Leaves are differently red, in som only with red strakes or veins, som of a fresh red, and others of a dark red. The Root hereof is red, spungy and not used to be eaten.

Clens, Digest, Disury Obstructions of the Liver and Spleen, Vertigo, Venemous Beasts.

The *White Beet* doth much looson the Belly, and is of a clensing and digesting quality, and provoketh Urin: The Juyce of it openeth obstructions both of the Liver and Spleen, and is good for the Headaches and swimmings therein, and turnings of the Brain; and is effectual also against al venemous creatures: and applied upon the Temples, stayeth Inflamati-

ons

Erning, St. Anthonies Fire, Wheals, Blisters, Chilblains, Kibes, Itch Dandriff, Scurff, Scabs, Ulcers, Cankers, Baldneß.

ons in the Eyes; it helpeth Burnings being used without Oyl, and with a little Allum put to it, is good for St. Anthonies fire. It is also good for al Wheals, Pushes, Blisters and Blains in the Skin: The Herb boyled and laid upon Chilblains or Kibes, helpeth them: The Decoction therof in Water and some Vinegar healeth the Itch, if bathed therwith, and clenseth the Head of Dandraf, Scurff, and dry Scabs, and doth much good for fretting and running Sores, Ulcers, & Cankers in the Head, Legs, or other parts, and is much commended against Baldness and shedding of Hair.

Flux Terms stops, Whites, Stinking Breath, Noise in the Ears, Toothach, Smell lost.

The red Beet is good to stay the Bloody Flux, Womens Courses, and the Whites, and to help the yellow Jaundice. The Juyce or the Root put into the Nostrils purgeth the Head, helpeth the noise in the Ears, and the Tooth-ach; the Juyce snuffed up the Nose helps a stinking Breath if the caus lies in the Nose as many times it doth, if any bruis have been there, as also want of smel coming that way.

Water-Betony.

Description.

First of the *Water-Betony*, which riseth up with square hard greenish Stalks, and sometimes brown, set with broad dark green Leavs dented about the edges with notches, somwhat resembling the Leavs of the Wood-Betony, but much larger, two for the most part set at a Joynt. The Flowers are many, set at the tops of the Stalks and Branches, being round bellied, and open at the Brims and divided into two parts, the uppermost being like a Hood, and the loweſt like a Lip hanging down, of a dark red colour, which passing away, there comes in their places smal round Heads with smal points in the ends, wherin lie smal and browniſh Seeds: The Root is a thick Bush of strings and threds growing from an Head.

Place.

It groweth by Ditchsides, Brooks, and other Water-courses generally through this Land, and is seldom found far from the Waters sides.

Time.

It Flowreth about *July*, and the Seed is ripe in *August*.

Vertues and use.

Ulcers, Bruises, Sunburning.

It is of a clensing quality; the Leavs bruised and applied are effectual for all old and filthy Ulcers; and especially if the Juyce of the Leavs be boyled with a little Honey, and tents dipped therin, and the Sores dressed therwith: as also for Bruises or Hurts whether inward or outward. The distilled water of the Leaves is used for the same purposes; as also to bath the Face or Hands spotted or blemished, or discolored by Sunburning.

I confess I do not much fancy distilled Waters, I mean such Waters as are distilled cold, some vertue of the Herb they may happily have (it were a strange thing else) but this I am confident of, that being distilled in a Pewter Stil, as the vulgar and apish fashion is, both Chymical Oyl and Salt is left behind, unless you burn them, and then all is spoiled, Water and al, which was good for as little as can be by such a Distillation. You have the best way of Distillation in my *Translation of the London Dispensatory*. The *Colledg of Physitians* having as much skil in Distillations as an Ass hath reading Hebrew.

Water-Betony is an Herb of *Jupiter* in *Cancer* and is apropriated more to Wounds and Hurts in the Breast than Wood-Betony which follows.

Wood-Betony.

Description.

The Common or *Wood-Betony* hath many Leavs rising from the Root which are somwhat broad and round at the ends, roundly dented about the edges, standing upon long Footstalks, from among which rise up smal, square, slender, but yet upright hairy Stalks, with some Leaves thereon, two apiece at the Joynts, smaller than the lower, whereon are set several spiked Heads of Flowers like Lavender, but thicker and shorter for the most part, and of a reddish or purple colour, spotted with white spots both in the upper and lower part: The Seeds being contained within the Husks that hold the Flowers, are blackish, somwhat long and uneven. The Roots are many white threddy strings; the Stalk perisheth, but the Root with some Leavs theron, abides al the Winter. The whol Plant is somwhat smal.

Place.

It groweth frequently in Woods, and delighteth in Shady-places.

Time.

And it flowreth in *July*, after which, the Seed is quickly ripe, yet in its prime in *May*.

Vertues and Use.

Epidemical Diseases, Witchcraft, Apetite, Indigestion, Gravel.

Antonius Musa Physitian to the Emperor *Augustus Cæsar*, wrote a peculiar Book of the Vertues of this Herb, and amongst other Vertues, saith of it, That it preserveth the Lives and Bodies of Men free from the danger of Epidemical Diseases, and from Witchcrafts also: It is found by daily experience to be good for many Diseases; It helpeth those that loath, or cannot digest their Meat, those that have

Stomach, have weak Stomachs, or ſower belchings, or *Belching*, continual riſing in their Stomach, uſing it fa- *Jaundice*, miliarly either green or dry; either the Herb, *Falling-ſickneſs*, the Root, or the Flowers in Broth drunk, or Meat, or made into Conſerve, Syrup, Water *Palſey*, Electuary, or Pouder as every one may beſt *Convulſion* frame themſelvs unto, or as the time or ſeaſon *ſhrinking of the Sinews*, requireth, taken any of the aforeſaid waies. It *Gout*, helpeth the Jaundice, Falling-ſickneſs, the *Dropſie*, Palſie, Convulſions or ſhrinking of the Si- *Frenſie*, news, the Gout, and thoſe that are inclined to *Cough*, Dropſies, thoſe that have continual Pains in *Cold*, their Head, although it turn to Phrenſie. The *ſhortneſs of Breath*, Pouder mixed with pure Honey is no leſs a- *Agues of all ſorts*, vailable for al ſorts of Coughs or Colds, *Sore Eyes*, Wheeſing or ſhortneſs of Breath, Diſtillati- *Worms*, ons of thin Rhewm upon the Lungues, which *Obſtructions of the Liver and Spleen*, cauſeth Conſumptions. The Decoction made *Stitches*, with Mead and a little Penyroyal, is good for *Pains in the Back and Belly*, thoſe that are troubled with putrid Agues, whe- *Terms provokes*, ther Quotidian, Tertian, or Quartan, and to *Mother*, draw down and evacuate the Blood and humors *Childbirth* that by falling into the Eyes do hinder the *Stone*, Sight: The Decoction therof made in Wine *Toothach*, and taken, killeth the Worms in the Belly, o- *Venemous Beaſts*, peneth Obſtructions both of the Spleen and *Mad-dogs* Liver, cureth Stitches and Pains in the Back, *Wearineſs*, or Sides, the Torments and griping pains of *Bleeding at Mouth and Noſe*, the Bowels, and the wind Chollick: and *Piſſing & ſpitting of Blood*, mixed with Honey purgeth the Belly, helpeth *Ruptures*, to bring down Womens Courſes, and is of *Bruiſes*, eſpecial uſe for thoſe that are troubled with the *Wounds*, falling down of the Mother, and pains therof, *Veins and Sinews Cut*, and cauſeth an eaſie and ſpeedy delivery of *Ulcers*, Women in Childbirth: it helpeth alſo to *Fiſtulaes*, break and expel the Stone either in the Blad- *Boyls*, der or Kidneys. The Decoction with Wine *Ears*. gargled in the Mouth, eaſeth the Toothach. It is commended againſt the ſting or biting or Venemous Serpents or Mad Dogs. Being uſed inwardly and applied outwardly to the place. A dram of the Pouder in Betony taken with a little Honey in ſome Vinegar, doth wonderfully refreſh thoſe that are overwearied by travail; it ſtaieth bleedings at the Mouth or Noſe, and helpeth thoſe that piſs or ſpit Blood, and thoſe that are Burſten or have a Rupture, and is good for ſuch as are bruiſed by any fall or otherwiſe. The green Herb bruiſed, or the Juyce applied to any inward hurt or outward green Wound in the Head or Body wil quickly heal and cloſe it up; as alſo any Veins or Sinews that are cut; and will draw forth any broken Bone, or Splinter, Thorn or other thing gotten into the Fleſh: It is no leſs profitable for old Sores, or filthy Ulcers, yea, though they be Fiſtulaus and hollow, but ſome do adviſe to put in a little Salt to this purpoſe: Being applied with a little Hogs Lard, it helpeth a Plague-Sore, and other Boyls and Puſhes: The fumes of the Decoction while it is warm received by a Funnel into the Ears, eaſeth the pains of them, deſtroyeth the Worms, and cureth the running Sores in them. The Juyce dropped into them doth the ſame. The Root of Betony is diſpleaſing both to the taſt and Stomach, whereas the Leavs and Flowers by their ſweet and ſpicy taſt, are comfortable both in Meat and Medicine.

There are ſome of the many Vertues *Antony Muſa* an expert Phyſitian (for it was not the practice of *Octavius Cæſar* to keep Fools about him) apropriates to Betony; It is a very precious Herb that's certain, and moſt fitting to be kept in a mans houſ both in Syrup, Conſerve, Oyl, Oyntment, and Plaiſter. The Flowers are uſually Conſerved.

The Herb is apropriated to the Planet *Jupiter*, and the Sign *Aries*.

The Beech-Tree. *Fagus*

IN treating of this Tree, you muſt underſtand that I mean the great *Maſt Beech*; which is by way of diſtinction from that other ſmal rough ſort, called in *Suſſex*, the ſmal Beech; but in *Eſſex*, Hornbeam.

I ſuppoſe it needleſs to deſcribe it, being already ſo wel known to my Countrymen.

Place.

It groweth in Woods amongſt Oaks, and other Trees, and in Parks, Forreſts, and Chaſes, to feed Deer; and in other places to fatten Swine.

Time.

It bloometh in the end of *April*, or begining of *May* for the moſt part, and the Fruit is ripe in *September*.

Vertues and uſe.

The Leavs of the Beech-Tree are cooling and binding, and therfore good to be applied to hot Swellings to diſcuſs them: The Nuts do much nouriſh ſuch Beaſts as feed thereon: The Water that is found in the hollow places of decaying Beeches, will cure both Man and Beaſt of any Scurf, Scab, or running Tetters, if they be waſhed therwith. You may boyl the Leavs into a Pultis, or make an Ointment of them when time of year ſerves.

Cools, *Binds*, *Hot ſwellings*, *Scurff*, *Scabs*, *Tetters*.

Bilberries:

Called alſo (by ſom)

Whorts, *and* Whortleberries.

Deſcriptions.

OF theſe I ſhal only ſpeak of two ſorts, which are commonly known in *England*, *Viz.* The *Black*, and the *Red Bilberries*. And firſt of the Black.

This smal Bush creepeth along upon the ground, scarce rising half a yard high, with diverſ smal dark green Leaves set on the green Branches, not alwaies one against another, and a little dented about the edges: At the foot of the Leaves com forth smal, hollow, pale, blush coloured Flowers, the brims ending in five points, with a reddish threed in the middle, which pass into smal round Berries of the bigness and colour of *Juniper Berries*, but of a Purple sweetish sharp tast; the Juyce of them giveth a Purplish colour to their Hands and Lips that eat and handle them, especially if they break them. The Root groweth asloop under ground, shooting forth in sundry places as it creepeth: This loseth its Leaves in Winter.

The *Red Bilberry*, or *Whortle-bush*, riseth up like the former, having sundry harder Leaves, like the Box-Tree Leaves, green and round pointed standing on the several Branches, at the tops whereof only, and not from the sides as in the former, com forth diverſ round flowers of a pale red color, after which succeed, round, reddish sappy Berries when they are ripe, of a sharp tast: The Root runneth in the ground, as the former; but the Leaves of this abide al Winter.

Place.

The first groweth in Forrests, on the Heaths and such like barren plaaces: The Red grows in the North parts of this Land, as *Lancashire*, *Yorkshire*, &c.

Time.

They flower in *March* and *April*; and the Fruit of the Black is ripe in *June* and *July*.

Vertue and use.

Agues, Stomach, Liver, Vomiting, Apetit lost, Cough, Phthisick, Fluxes.

The *Black Bilberries* are good in hot Agues and to cool the heat of the Liver and stomach; they do somwhat bind the Belly, and stay Vomitings and Loathings: The Juyce of the Berries made into a Syrup, or the Pulp made into a Conserve with Sugar, is good for the purposes aforesaid, as also for an old Cough or an Ulcer in the Lungs, or other diseases therein. The *Red Whorts* are more binding, and stop Womens Courses, spitting of Blood, or any other Flux of Blood or Humors, being used aswel outwardly as inwardly.

Bifoyl, or Twayblade.

Description.

THis smal Herb from a Root somewhat sweet, shooting downwards many long strings, riseth up a round green Stalk bare or naked next the ground for an inch, two or three to the middle therof, as it is in age or growth, as also from the middle upward to the Flowers, having only two broad Plantan-like Leaves (but whiter) set at the middle of the Stalk one against another, and compasseth it round at the bottom of them.

Place.

It is a usual Inhabitant in *Woods*, *Copses*, and in many other places in this Land.

There is another sort growes in wet grounds and Marshes, which is somwhat differing from the former: It is a smaler Plant, and greener, having somtimes three Leaves; the Spike of Flowers is less than the former, and the Roots of this do run or creep in the ground.

They are much and often used by many to good purpose for Wounds both green and old, and to consolidate or knit Ruptures.

The Birch-Tree.

Description.

THis groweth a goodly tall straight Tree, fraught with many Boughes and slender Branches bending downward; the old ones being covered with a discoloured chapped Bark, and the yonger being browner by much: The Leaves at their first breaking out are crumpled, and afterward like the Beech Leaves, but smaler and greener, and dented about the edges: It beareth smal short Catkins, somwhat like those of the Hazel-Nut-tree, which abide on the Branches a long time, until growing ripe they fall on the ground, and their Seed with them.

Place.

It usually groweth in Woods.

Vertues.

The Juyce of the Leaves while they are yong, or the distilled Water of them, or the Water that coms out of the Tree, being bored with an Augur and distilled afterwards; any of these being drunk for som time together, is available to break the Stone in the Kidnies or Bladder; and is good also to wash sore Mouths. *Stone, sore Mouths.*

Birds-Foot.

THis smal Herb groweth not above a span high, with many Branches spread on the ground, set with many wings of small Leaves; The Flowers grow upon the Branches, many smal ones of a pale yellow colour, being set at a head together, which afterwards turn into so many smal joynted Cods with Seeds in them; the Cods well resembling the Claws of smal Birds, whence it took its name.

There is another sort of *Birds-Foot* in all things

things like the former, but a little larger; the Flowers of a pale whitish red colour, and the Cods distinct by Joynts like the other, but a little more crooked, and the Roots do carry many smal white Knots or Kernels amongst the Strings.

Place.

These grow on Heaths, and many open untilled places of this Land.

Time.

They flower and seed in the end of Summer.

Vertues and use.

Dry, Bind Wounds, Stone, Ruptures.

They are of a drying, binding quality, and therby very good to be used in Wound-drinks, as also to apply outwardly for the same purpose. But the latter *Birds-foot* is found by experience to break the Stones in the Back or Kidnies, and drive them forth, if the Decoction therof be taken; and it wonderfully helpeth the Rupture, being taken inwardly, and outwardly applied to the place.

All Salts have best operation upon the Ston, as Ointments & Plaisters have upon Wounds; and therfore if you may make a Salt of this for the Stone, the way how to do so may be found in my Translation of the *London Dispensatory*, and it may be I may give you again in plainer terms at the latter end of this Book.

Bishops-weed. *Bullwort*

Description.

COmmon *Bishops-weed* riseth up with a round straight Stalk, somtimes as high as a Man, but usually three or four foot high, beset with diverse smal, long, and somwhat broad Leavs, cut in som places and dented about the edges, growing one against another, of a dark green colour; having sundry Branches on them, and at the top smal umbels of white flowers, which turn into smal round brown Seed, little bigger than Parsly-seed, of a quick hot scent and tast: The Root is white and stringie, perishing yearly after it hath seeded, and usually riseth again of its own sowing.

Place.

It groweth wild in many places in *England* and *Wales*, as between *Greenheath* and *Gravsend*.

Vertues.

Disury, Terms provokes, Wind, Chollick, Venemous Beasts, Cantharides, black and blew Spots,

It digesteth Humors, provoketh Urin and Womens Courses, dissolveth Wind; and being taken in Wine, easeth pains and griping in the Bowels, and is good against the biting of Serpents: It is used to good effect in those Medicins which are given to hinder the poysonful operation of *Cantharides* upon the passages of the Urin: Being mixed with Honey, and applied to black and blue marks, coming of blows or bruises, it takes them away: and being drunk or outwardly applied, it abateth an high colour, and makes it pale; and the Fumes therof taken with Rozin, or Raisons, cleanseth the Mother. *High colour, Mother.*

It is hot and dry in the third degree, of a bitter tast and somthing sharp withal; it provokes Lust to purpose; I suppose *Venus* owns it.

Bistort, or Snakeweed.

Description.

THis hath a thick, short, knobbed Root, blackish without, and somwhat reddish within, a little crooked or turned together, of an harsh astringent tast, with diverse black threds hanging there, from whence spring up every year diverse Leaves standing upon long Footstalks, being somwhat broad and long like a Dock-leaf, and a little pointed at the ends, but that it is of a blewish green colour on the upper side, and of an Ash colour gray, and a little purplish underneath, with diverse Veins therin; from among which rise up diverse smal and slender Stalks, two foot high, and almost naked, and without Leavs, or with very few, and narrow, bearing a spiky Bush of pale Flesh-colour'd Flowers, which being past there abideth smal Seed, somwhat like unto Sorrel Seed, but greater.

There are other sorts of *Bistort*, growing in this Land, but smaller, both in height, Root, and Stalks, and especially in the Leavs, The Root blackish without, and somwhat whitish within, of an austere binding tast as the former.

Place.

They grow in shadowy moist Woods, and at the foot of Hils, but are chiefly nourished up in Gardens. The narrow leaved *Bistort* groweth in the North, in *Lancashire*, *Yorkshire*, and *Cumberland*.

Time.

They Flower about the end of *May*, and the Seed is ripe about the beginning of *July*.

Vertues and use.

Both the Leavs and Roots have have a powerful faculty to resist al Poyson: The Root in Pouder taken in drink expelleth the Venem of the Plague, the smal Pox, Meazles, Purples, or any other infectious Disease, by sweating: The Root in Pouder or Decoction therof in Wine being drunk, stayeth Blood, and any Fluxes in the Body of either Man or Woman, or Vomitings; it is also very available against Ruptures or Burstings, or all bruises or fals, dissolving the congealed Blood, and easeth the pains that happen thereupon, it also helpeth the Jaundice. The Water *Poyson, Plague, Smal pocks Meazles, Purples, Epidemical Diseases. Inward bleeding, Flux, Vomiting, Ruptures, Jaundice.*

ter distilled from both Leavs and Roots, is a singular remedy to wash any place bitten or stung by any venemous creature; as also for any of the purposes before spoken of.

Venemous Beasts.

And is very good to wash any running Sores or Ulcers. The Decoction of the Root in Wine being drunk, hindreth Abortion or Miscarriage in Child-bearing. The Leavs also kil the Worms in Children, and is a great help for them that cannot keep their Water, if the Juyce of Plantane be added therto. And outwardly applied, much helpeth the *Gonorrhea*, or running of the Reins. A dram of the Pouder of the Root taken in the Water thereof, wherein som red hot Iron or Steel hath been quenched is also an admirable help thereto, so as the Body be first prepared and purged from the offensive humors. The Leaves, Seed, or Roots are al very good in Decoctions, Drinks or Lotians, for inward or outward Wounds or other sores: and the Pouder strewed upon any cut or wound in a Vein, stayeth the immoderat bleeding thereof. The Decoction of the Roots in Water whereunto som Pomgranate Pils and Flowers are added, injected into the Matrix, stayeth the acces of humors to the Ulcers thereof, and bringeth it to its right place, being fallen down, and stayeth the immoderat flux of the Courses. The Root hereof with Pellitory of *Spain* and burnt Allum of each a like quantity, beaten smal and made into Past, with some Honey, and a little Picce thereof put into an hollow-Tooth, or held between the Teeth if there be no hollowness in them, stayeth the defluxion of Rhewm upon them, which causeth pains, and helps to clense the Head, and avoid much offensive Water. The Distilled Water is very effectual to wash Sores or Cankers in the Nose or any other part, if the Pouder of the Root be aplied therunto afterwards. It is good also to fasten the Gums, and to take away the heat and inflamations that happen in the Jaws, Almonds of the Throat or Mouth, if the Decoction of the Leavs, Roots, or Seeds be used, or the Juyce of them; but the Roots are most effectual to all the purposes aforesaid.

Ulcers, *Abortion,* *Worms,* *Diabites,* *Running of the Reins.* *Wounds,* *Bleeding,* *Matrix,* *Terms stops,* *Tooth-ach,* *Head.* *Cankers,* *Gums, Inflamations* *Almonds of the Ears.*

One-Blade.

Description.

THis smal Plant never beareth more than one Leaf, but only when it rises up with its Stalk which thereon beareth another, and seldom more, which are of a bluish green colour, broad at the bottom and pointed with many Ribs or Veins like Plantane: At the top of the Stalk grow many smal white Flowers Star-fashion smelling somthing sweet: after which come smal reddish Berries when they are ripe. The Root is smal, of the bigness of a Rush, lying and creeping under the upper erust of the Earth, shooting forth in diverse places.

Place.

It groweth in moist shadowy, grassie places of Woods in many places of this Realm.

Time.

It flowreth about *May*, and the Berries be ripe in *June*, and then quickly perisheth until the next year it springth from the same again.

The Vertues.

Half a dram, or a dram at most of the Roots hereof in Pouder, taken in Wine and Vineger of each a like quantity, and the party presently laid to sweat, is held to be a sovereign remedy for those that are infected with the Plague, and have a sore upon them, by expelling the Poyson and defending the Heart and Spirits from danger: it is also accounted a singular good Wound-Herb, and therfore used with other Herbs in making such Balms as are necessary for the curing of Wounds, either green or old, and especially if the Nervs or Sinews be hurt.

Pestilence; *Wounds,* *Nervs.* *hurt.*

The Bramble; OR *Black-Berry-Bush.*

THis is so wel known that it needeth no Description. The Vertues therof are as followeth.

Vertues and use.

The Buds, Leavs and Branches while they are green are of a good use in the Ulcers and putrid sores of the Mouth and Throat, and for the Quinsie; and likewise to heal other fresh Wounds and Sores; but the Flowers & Fruit unripe are very binding, and so profitable for the Bloudy-flux, Lasks, and are a fit remedy for spitting of Bloud. Either the Decoction or Pouder of the Root being taken is good to break or drive forth Gravel, and the Stone in the Reins and Kidnies. The Leavs and Brambles aswel green as dry, are excellent good Lotions for sores in the Mouth or secret parts: The Decoction of them & of the dried Branches, do much bind the Belly, and are good for the too much flowing of Womens Courses: The Berries or the Flowers are a powerful remedy against the Poyson of the most venemous Serpents, as wel drunk as outwardly aplied, helpeth the sores of the Fundament, and the Piles. The Juyce of the Berries mixed with Juyce of Mulberries, do bind more effectually, and help fretting and eating sores and Ulcers whersoever. The Distilled Water of the Branches, Leaves and Flowers, or of the Fruit, is very pleasant in tast, and very effectual

Ulcers, *Sores,* *Quinsie,* *Wounds,* *Flux,* *Bloodyflux* *Spitting* *Bloud,* *Gravel,* *Stone,* *Secrets.* *Terms stops,* *Poyson,* *Venemous Beasts.* *fundament* *Piles,*

Feavers, Head, Eyes, Itch, Scab-by Heads.

ctual in Feavers and hot distempers of the Body, Head, Eyes and other parts, and for al the purposes aforesaid. The Leaves boyled in Ly and the Head washed therewith, healeth the Itch and the running sores therof, and maketh the Hair black. The Pouder of the Leaves strewed on cankrous and running Ulcers, doth wonderfully help to heal them. Some use to condensate the Juyce of the Leaves, and some the Juyce of the Berries to keep for their use all the year, for the purposes aforesaid.

It is a Plant of *Venus* in *Aries*: You shall have som Directions at the latter end of the Book for the gathering of al Herbs and Plants &c. If any ask the Reason why *Venus* is so prickly? Tel them 'tis because she is in the house of *Mars*.

Blites.

Description.

OF these there are two sorts commonly known, *Viz.* White and Red. The White hath Leavs somwhat like unto Beets, but smaller, rounder and of a whitish green colour, every one standing upon a smal long Footstalk: The Stalk riseth up two or three foot high with such like Leavs theron: The Flowers grow at the top in long round tufts or clusters, wherein are contained smal and round Seed. The Root is very full of threeds or strings.

The red *Blite* is in all things like the white, but that his Leavs and tufted heads are exceeding red at first, and after turn more Purplish.

There are other kinds of Blites which grow wild, differing from the two former sorts but little, only the wild are smaler in every part.

Place.

They grow in Gardens, and wild in many places of this Land.

Time.

They seed in *August* and *September*.

Vertues and use.

Reds and Whites in Women.

They are all of them cooling, drying and binding, serving to restrain the Fluxes of Bloud in either man or woman, especially the Red; which also stayeth the overflowing of women's Reds, as the white Blite stayeth the Whites in Women. It is an excellent secret, you cannot wel fail in the use; they are al under the Dominion of *Venus*.

There is one other sort of wild *Blites*, like the other wild kinds, but having long and spike heads of greenish Seed, seeming by the thick setting together to be al Seed.

This sort the Fishes are delighted with, and it is a good and usual Bait; for Fishes will bite fast enough at them, if you have but wit enough to catch them when they bite.

Borrage & Bugloss.

THese are so wel known to be Inhabitants in every Garden, that I hold it needless to describe them.

Time.

They flower in *June* and *July*, and the Seed is ripe shortly after.

Vertues and use.

Feavers, Pestilence, Poyson, Venemous Beasts, Milk in Nurses, Melancholy, Ill Bloud,

They are very Cordial. The Leaves or Roots are to very good purpose used in putrid and Pestilential Feavers, to defend the Heart, and hlp to resist and expel the Poyson, or the Venom of other Creatures; the Seed is of the like effect; and the Seed and Leavs are good to encrease Milk in Womens Breasts: The Leavs, Flowers and Seed, all, or any of them are good to expel Pensiveness and Melancholly: it helpeth to clarifie the Bloud, and mitigate heat in Feavers. The Juyce made into a Syrup prevaileth much to all the purposes aforesaid, and is put with other cooling, opening, clensing Herbs, to open obstructions, and help the yellow-Jaundice, and, mixed with Fumitory, to cool, clens, and temper the Blood, therby it helpeth the Itch, Ringworms, and Tetters, or other spreading Scabs or Sores. The Flowers candied, or made into a Conserve are helping in the former causes, but are chiefly used as a Cordial, and is good for those that are weak with long sickness, and to comfort the Heart and Spirits of those that are in a consumption, or troubled w^th often swoonings or passions of the Heart: The Distilled Water is no less effectual to all the purposes aforesaid, and helpeth the redness and inflamation of the Eyes being washed therewith: The dried Herb is never used, but the green; yet the Ashes therof boyled in Mead, or Honyed Water is available against Inflamations and Ulcers in the Mouth or Throat, to wash and gargle it therewith. The Roots of *Bugloss* are effectual being made into a licking Electuarie, for the Cough, and to condensate thin flegm, and Rhewmatick Distillations upon the Lungs.

Yellow-Jandice, Itch, Ring-worms, Tetters, Scabs, Weakness by long sickness, Consumption, Swooning, Inflamations. Ulcers, sore Mouths & Throat, Cough, Flegm.

They are both Herbs of *Jupiter*, and under *Leo*, both great Cordials, great strengthners of Nature.

Bluebottles.

THese are so wel known generally unto my Country men to grow among their Corn, that I suppose it needless to write any Description therof: There are other kinds

which I purposely omit both in this and others, my intent being only to insist most principally upon the vulgarly known, and commonly growing Flowers and Herbs.

Time.

They Flower and Seed in the Summer Months.

Vertues and use.

Bruises, Broken Veins, Poyson, Plague, Epidemical Diseases, Wounds, Ulcers, Inflamations in the Eyes.

The Pouder or dried Leavs of the *Bluebottle*, or Cornflower is given with good success to those that are bruised by a fal, or have broken a Vein inwardly, and void much Blood at the Mouth, being taken in the Water of Plantane, Horstail, or the greater Comfry. It is a Remedy, against the Poyson of the Scorpion, and resisteth al other Venoms and Poysons; The Seed or Leavs taken in Wine is very good against the Plague, and al infectious Diseases, and is very good in Pestilential Feavers. The Juyce put into fresh or green Wounds doth quickly soder up the Lips of them together, and is very effectual to heal al Ulcers and Sores in the Mouth: The Juyce dropped into the Eyes, taketh away the heat and inflamation in them. The distilled Water of the Herb hath the same properties, and may be used for all the Effects aforesaid.

Briony, or Wild Vine.

Description.

THe Common white *Briony* groweth ramping upon the Hedges, sending forth many long rough very tender branches at the beginning, with many very rough broad Leavs theron, cut (for the most part) into five partitions, in form very like a Vine Leaf, but smaller, rougher, and of a whitish or hoary green colour, spreading very far, spreading and twining with his smal Claspers (that come forth at the Joynts with the Leavs) very far on whatsoever standeth next it: At the several Joynts also (especially towards the top of the Branches) cometh forth a long Stalk bearing many whitish Flowers, together in a long tuft, consisting of five smal Leaves apiece, laid open like a Star: after which come the Berries, separated one from another more than a Cluster of Grapes, green at the first, and very red when they are through ripe, of no good sent, but of a most loathsom tast provoking Vomit: The Root groweth to be exceeding great with many long Twines or Branches growing from it of a pale whitish colour on the outside, and more white within, and of a sharp, bitter loathsom tast.

Place.

It groweth on Banks, or under Hedges, through this Land the Roots lie very deep.

Time.

It Flowreth in *July* and *August*, som earlier and some later than others.

Vertues and Use.

Falling-sickness, Vertigo, Flegm, Palsies, Convulsion Cramp, Stitches, Dropsies, Gravel, Stone, Obstructions, Womb, Mother, Dead Child, After-birth.

The Roots of the *Briony* purge the Belly with great Violence, troubling the Stomach, and hurting the Liver, and therfore not rashly to be taken, but being corrected is very profitable for the Diseases of the Head, as Falling-sickness, Giddiness, and Swimmings, by drawing away much Flegm and Rhewmatick humors that oppress the Head, as also the Joynts and Sinews, and is therfore good for Palseys, Convulsions, Cramps, and Stitches in the Sides, and the Dropsie; and in provoking Urin it clenseth the Reins and Kidnies from Gravel and the Stone, by opening the Obstructions of the Spleen, and consumeth the hardness and swellings therof. The Decoction of the Root in Wine drunk once a week at going to bed, clenseth the Mother, and helpeth the rising therof, expelleth the dead Child, and Afterbirth, but is not to be used by Women with Child, for fear of abortion; a dram of the Root in Pouder taken in white Wine bringeth down their Courses. An Electuary made of the Roots and Honey, doth mightily clens the Chest of Rotten Flegm, and wonderfully help an old streng Cough, those that are troubled with shortness of Breath, and is very good for them that are bruised inwardly, to help to expel the clotted or congealed Blood. The Leavs, Fruit, and Root, do clens old and filthy Sores, are good against al fretting and running Cankers, Gangrenes, and Tetters, and therfore the Berries are by some Country People called Tetter-Berries. The Root clenseth the Skin wonderfully from al black and blew Spots, Freckles, Morphew, Leprosie, foul Scars, or other deformity whatsoever: as also al running Scabs, and Mangines are healed by the Pouder of the dried Root, or the Juyce therof, but especially by the fine white hardned Juyce: The distilled water of the Roots worketh the same effects but more weakly. The Root bruised and applied of it self to any place where the Bones are broken, helpeth to draw them forth, as also Splinters and Thorns in the Flesh; and being applied with a little Wine mixed therwith it breaketh Boyls, and helpeth Whitlows on the Joynts.

Cough, Shortness of Breath, Sores, Cankers, Gangrenes, Tetters, Ring-worms, Black Spots, Freckles, Morphew, Leprosie.

Broken Bones, Splinters Thorns, Whitlows, or Nail-wheals, or Anticoms.

For al these latter beginning at Sores, Cankers &c. apply it outwardly and take my advice along with you, you shal find in my *Translation of the London Dispensatory*, among the Preparations at latter end, a Medicin called *Foeculæ Brioniæ*, take that and use it, you have the way there how to make it, and mix that with a little Hogs Greas or other convenient Oyntment, and use it at your need.

As for the former Diseases where it must be taken inwardly, it purgeth very Violently, and needs

needs an abler hand to correct it than moſt Country people have, therfore it is a better way for them (in my opinion) to let the Simple alone, and take the Compound Water of it, mentioned in my *Diſpenſatory*, and that is far more ſafe, being wiſely corrected.

Brooklime.

Deſcription.

THis ſendeth forth from a creeping Root, that ſhooteth forth ſtrings at every Joynt as it runneth, diverſ and ſundry green Stalks, round and ſappy with ſome branches on them, ſomwhat broad, round, deep green, and thick Leavs ſet by couples theron: from the Boſom wherof ſhoot forth long Footſtalks, with ſundry ſmal blue Flowers on them, that conſiſt of five ſmal round pointed Leavs apiece.

There is another ſort nothing differing from the former, but that it is greater, and the Flowers of a paler blue Colour.

Place.

They grow in ſmal ſtanding Waters, and uſually neer Watercreſſes.

Time.

And Flower in *June* and *July*, giving Seed the next Month after.

Vertues and uſe.

Brooklime and Watercreſſes are generally uſed together in Diet Drinks with other things, ſerving to purge the Blood and Body from ill Humors that would deſtroy health, and are helpful for the Scurvy: They do alſo provoke Urin, and help to break the Stone and paſs it away; they procure Womens Courſes, and expel the dead Child. Being fried with Butter and Vinegar and applied warm, it helpeth all manner of Tumors or Swellings, and Inflamations.

Blood purgeth, Ill Humors, Scurvy, Diſury, Stone, Terms provokes, Dead child Swellings, Inflamations.

Such drinks ought to be made of Sundry Herbs according to the Malady offending, I ſhal give a plain and eaſie Rule at the latter end of the Book.

Butchers-Broom.

Deſcription.

THe firſt ſhoots that ſprout from the Root of *Butchers-Broom* are thick, whitiſh, and ſhort, ſomwhat like thoſe of Aſparagus, but greater: theſe riſing up to be a foot and an half high are ſpread into diverſ Branches, green & ſomwhat creſted with the roundneſs, tough and flexible, wheron are ſet ſomwhat broad and almoſt round hard Leavs, ſharp and prickly pointed at the ends, of a dark green colour, two for the moſt part ſet at a place, very cloſe or neer together; about the middle of the Leaf, on the back or lower ſide from the middle Rib, breaketh forth a ſmal whitiſh green Flower conſiſting of four ſmal round pointed Leavs ſtanding upon little or no Footſtalk, and in the place wherof cometh a ſmal round Berry, green at the firſt, and red when it is ripe, wherin are two or three white, hard, round Seeds contained: The Root is thick, white, and great at the Head, and from thence ſendeth forth diverſ thick, white, long, tough ſtrings.

Place.

It groweth in Copſes, and upon Heaths and waſt grounds, and oftentimes under or neer the Holly-Buſhes.

Time.

It ſhooteth forth his yong buds in the Spring and the Berries are ripe in or about *September*, The Branches and Leavs abiding green al the Winter.

Vertues and uſe.

The Decoction of the Roots made with Wine, openeth Obſtructions, provoketh Urin, helpeth to expel Gravel and the Stone, the Strangury, and Womens Courſes, as alſo the yellow Jaundice and the Head-ach; and with ſome Honey or Sugar put therunto, clenſeth the Breaſt of Flegm, and the Cheſt of much clammy Humors gathered therin. The Decoction of the Roots drunk, and a Pultis made of the Berries and Leavs being applied, are effectual in knitting and conſolidating broken Bones and Parts out of Joynt.

Obſtructions, Diſury, Gravel, Stone, Strangury, Terms provokes, Yellow-Jaundice, Headach, Flegm. Broken Bones, Diſlocations.

It is called Bruſcus in ſome places, and in *Suſſex* Kneeholly, and Kneeholm. The common way of uſing it is to boyl the Roots of it and Parſly, and Fennel, and Smallage in white Wine, and drink the Decoction, adding the like quantity of Graſs Roots to them; the more of the Roots you boyl the ſtronger will the Decoction be, it works no ill effects, yet I hope you have wit enough to give the ſtrongeſt Decoction to the ſtrongeſt Bodies.

Broom, & Broomrape.

TO ſpend time in writing a Deſcription herof is altogether needleſs, it being ſo generally uſed by all the good Huſwifes almoſt through this Land to ſweep their Houſes with, and therfore very wel known to all ſorts of people.

The *Broomrape* ſpringeth up in many places from the Roots of the *Broom* (but more often in fields, by Hedg ſides, and on Heaths) The Stalk wherof is of the bigneſs of a Finger or Thumb, above two Foot high having a ſhow of Leavs on them and many Flowers at

rhe top, of a deadiſh, yellow colour, as alſo the Stalks and Leavs are.

Place.

They grow in many places of this Land, commonly, and as commonly ſpoyl all the Land they grow in.

Time.

And Flower in the Summer Months, and give their Seed before Winter.

Vertues and uſe.

The Juyce, or Decoction of the yong Branches, or Seed, or the Pouder of the Seed taken in Drink, purgeth downwards, and draweth Flegmatick and watery humors from the Joynts, wherby it helpeth the Dropſie, Gout, Sciatica, and the pains in the Hips and Joynts: It alſo provoketh ſtrong Vomits, and helpeth the pains of the Sides, and ſwellings of the Spleen, clenſeth alſo the Reins, or Kidnies and Bladder of the Stone, provoketh Urin abundantly, and hindreth the growing again of the Stone in the Body. The continual uſe of the Pouder of the Leaves and Seed, doth cure the Black Jaundice: The diſtilled Water of the Flowers is profitable for al the ſame purpoſes; it alſo helpeth Surfets, and altereth the Fits of Agues, if three or four ounces therof, with as much of the Water of the leſſer Centaury and a little Sugar put therin, be taken a little before the fit cometh, and the party be laid down to ſweat in their Bed. The Oyl or Water that is drawn from the ends of the green ſticks heated in the fire, helpeth the Toothach. The Juyce of the yong Branches made into an Oyment of old Hogs Greaſ and anointed: Or the yong Branches bruiſed and heated in Oyl or Hogs Greaſ, and laid to the Sides pained by wind, as in Stitches, or the Spleen, eaſeth them in once or twice uſing it: The ſame boyled in Oyl is the ſafeſt and ſureſt Medicine to kil Lice in the Head or Body of any; and is an eſpecial Remedy for Joynt aches, and ſwoln Knees that come by the falling down of Humors.

Flegm, Joynts, Dropſie, Sides, Spleen, Bladder, Kidneys, Stone, Diſury, black Jaundice, Agues.

Toothach.

Wind, Stitches, Lice.

The *Broomrape* alſo is not without his Vertues.

The Decoction therof in Wine is thought to be as effectual to avoid the Stone in the Kidnies and Bladder, and to provoke Urin, as the *Broom* it ſelf: The Juyce therof is a ſingular good help to cure as wel green Wounds, as old and filthy Sores, and malignaut Ulcers. The inſolate Oyl wherin there hath been three or four Repetitions of Infuſion of the top ſtalks with Flowers ſtrained and cleered, clenſeth the Skin of al manner of Spots, Marks and Freckles that ariſe either by the heat of the Sun, or the Malignity of humors.

Stone, Diſury, Green Wounds.

As for the *Broom* (for as yet I know not what to ſay to *Broomrape* in the buſineſs) but as for *Broom*, *Mars* owns it, and it is exceeding prejudicial to the Liver, I ſuppoſe by Reaſon of the Antipathy bgtween *Jupiter* and *Mars*, therfore if the Liver be diſaffected, adminiſter none of it.

Bucks-horn Plantane.

Deſcription.

THis being ſown of Seed, riſeth up at the firſt with ſmal, long, narrow hairy dark green Leavs like graſs, without any diviſion or gaſh in them; but thoſe that follow are gaſhed in on both ſides the Leavs into three or four gaſhes, and pointed at the ends, reſembling the Knags of a Bucks Horn (wherof it took the name) and being well grown round about the Root upon the ground, in order one by another therby reſembling the form of a Star: from among which riſe up diverſ hairy Stalks, about a hand breadth high, bearing every one a ſmal long ſpiky Head like to thoſe of the common *Plantane*, having ſuch like Bloomings and Seed after them. The Root is ſingle, long, and ſmal, with diverſ ſtrings at it.

Place.

They grow in dry Sandy grounds, as in *Tuttle-Fields* by *Weſtminſter* and diverſ other places of this Land.

Time.

They Flower and Seed in *May*, *June*, and *July*, and their green Leavs do in a manner abide freſh al the Winter.

Vertues and uſe.

This boyled in Wine and drunk, and ſome of the Leavs apply'd to the hurt place, is an excellent remedy for the biting of the Viper or Adder which I take to be one and the ſame: The ſame being alſo drunk helpeth thoſe that are troubled with the Stone in the Veins or Kidnies by cooling the heat of the parts afflicted ſtrengthning them: as alſo weak Stomachs that cannot retain but caſt up their Meat. It ſtayeth al bleedings at Mouth and Noſe, bloody Urin, or the Bloody Flux, and ſtoppeth the Lask of the Belly and Bowels. The Leavs herof bruiſed and laid to their ſides that have an Ague, ſuddenly eaſeth the Fit: and the Leavs and Roots beaten with ſome Bay Salt and applied to the Wriſts, worketh the ſame effects. The Herb boyled in Ale or Wine and given for ſome mornings and evenings together, ſtaieth the diſtillations of hot and ſharp Rhewms falling into the Eyes from the Head, and helpeth al ſorts of ſore Eyes.

Venemous Beaſts, Stone, Stomach, Vomiting, Bleeding, Piſſing blood, Flux Bloody Flux, Agues, Eyes.

Venus challengeth the Dominion of this Herb.

Bugle

Bugle.

Description.

THis hath larger Leavs than those of the *Selfheal*, but elſ of the ſame faſhion, or rather a little longer, in ſome green on the upper ſide, and in others more browniſh, dented about the edges, ſomwhat hairy, as the ſquare Stalk is alſo, which riſeth up to be half a yard high ſomtimes, with the Leavs ſet by couples; from the middle almoſt whereof upwards ſtand the Flowers together, with many ſmaler and browner Leaves than the reſt on this ſtalk below, ſet at diſtances, and the ſtalk bare between them, among which Flowers are alſo ſmal ones of a bluiſh, and ſomtimes of an Aſh colour, faſhioned like the Flowers of the *Ground-Ivy*, after which come ſmall, round, blackiſh Seed. The Root is compoſed of many ſtrings, and ſpreadeth upon the ground in diverſ parts round about.

The *White-flowered Bugle* differeth not in form or greatneſs from the former, ſaving that the Leavs and Stalks are alwaies green and never brown like the other, and that the Flowers therof are very white.

Place.

They grow in Woods, wet Copſes, and Fields generally throughout *England*; but the *White flowered Bugle* is not ſo plentiful as the other.

Time.

They flower from *May* until *July*, and in the mean time perfect their Seed. The Roots and Leavs next therunto upon the ground abiding all Winter.

Vertues and uſe.

Bruiſes, Falls, Wounds, Scabs, Ulcers, Liver-grown, Gangreans Fiſtulaes, Sore Mouths, Gums. Sores in the Secrets, broken bones.

The Decoction of the Leavs and Flowers made in Wine and taken diſſolveth the congeled Blood in thoſe that are bruiſed inwardly by a fall or otherwiſe, and is very effectual for any inward Wounds, Thruſts or Stabs into the Body or Bowels, and is an eſpecial help in all Wound-drinks, and for thoſe that are Liver-grown (as they cal it.) It is wonderful in curing all manner of Ulcers and Sores whether new and freſh, or old and inveterate, yea Gangrenes and Fiſtulaes alſo, if the Leavs bruiſed be aplied, or their Juyce uſed to waſh and bath the places. And the ſame made into a Lotion with ſome Honey and Allum, cureth all ſores of the Mouth or Gums be they never ſo foul, or of long continuance; and worketh no leſs powerfully and effectually for ſuch Ulcers and Sores as happen in the ſecret parts of Men or Women: Being alſo taken inwardly, and outwardly applied, it helpeth thoſe that have broken any Bone, or have any Member out of Joynt. An Ointment made with the Leaves of Bugle, Scabious and Sanicle bruiſed and boyled in Hogs-Greaſ, until the Herbs be dry, and then ſtrained forth into a Pot, for ſuch occaſions as ſhal require it, is ſo ſingular good for al ſorts of hurts in the Body, that non that know its uſefulneſs will be without it.

This Herb is belonging to Dame *Venus*, and if the Vertues of it make you in love with it, (as they wil if you be wiſe) keep a Syrup of it to take inwardly, and an Ointment and Plaiſter of it to uſe outwardly alwaies by you.

The truth is, I have known this Herb cure ſome Diſeaſes of Saturn, of which I thought good to quote one. Many times ſuch as give themſelvs much to drinking are troubled with ſtrange Fancies, ſtrange ſights in the night-time, and ſome with Voices, as alſo with the Diſeaſ *Ephialtes* or *the Mare*. I take the reaſon of this to be (according to *Fernelius*) a Melancholly vapor made thin by exceſſive drinking ſtrong Liquor, and ſo flyes up and diſturbs the Fancy, and breeds imaginations like it ſelf, *viz.* fearful and troubleſom: Theſe I have known cured by taking only two ſpoonfuls of the Syrup of this Herb, after Supper two hours when you go to bed. But whether this do it by *Sympathy* or *Antipathy* is ſom queſtion; all that know any thing in *Aſtrologie*, know that there is a great Antipathy between *Saturn* and *Venus* in matter of Procreation, yea ſuch an one, that the barreneſs of *Saturn* can be removed by none but *Venus*, nor the luſt of *Venus* be repelled by none but *Saturn*: but I am not yet of opinion this is done this way; and my reaſon is, becauſe theſe vapors though in quality Melancholly, yet by their flying upward ſeem to be ſomthing *Aërial*, therfore I rather think it is done by Sympathy, *Saturn* being exalted in *Libra* the houſe of *Venus*.

Mares, Strange Sights in the night.

Selfheal, which follows, is of the ſame nature, and I am of opinion the ſame Herb, only differs a little in form according to the difference of place they grow in; this I am ſure they work the ſame effect.

Burnet.

THe common Garden Burnet is ſo well known that it needeth no deſcription. There is another ſort which is wild, the deſcription wherof take as followeth.

Deſcription.

The great wild Burnet, hath winged Leavs riſing from the Roots like the Garden Burnet, but not ſo many, yet each of theſe Leavs are at the leaſt twice as large as the other, and nicked in the ſame manner about the edges, of a grayiſh colour on the underſide: The Stalks are greater and riſe higher, with many ſuch like Leavs ſet theron, and greater heads at the tops of a browniſh green colour, and out of them

come ſmal dark purple Flowers, like the former, but greater. The Root is black and long like the other, but greater alſo: It hath almoſt neither ſcent nor taſt therin like the Garden kind.

Place.

The firſt grows frequently in Gardens. The Wild kind groweth in diverſ Countries of this Land, eſpecially in *Huntington* & *Northampton ſhires* in the Meadows there; as alſo near *London* by *Pancras-Church*, and by a Cauſey ſide in the middle of a Field by *Paddington*.

Time.

They flower about the end of *June* and beginning of *July*, and their Seed is ripe in *Auguſt*.

Vertues.

They are accounted to be both of one property, but the leſſer is more effectual, becauſe quicker and more Aromatical: It is a friend to the Heart, Liver, and other the principal parts of a mans Body. Two or three of the Stalks with Leavs put into a Cup of Wine, eſpecially Clarret, are known to quicken the Spirits, refreſh and cheer the Heart and drive away Melancholly. It is a ſpecial help to defend the Heart from noiſom vapors, and from Infection of the Peſtilence, the Juyce therof being taken in ſom Drink, and the party laid to ſweat thereupon. They have alſo a drying and an aſtringent quality, whereby they are available in all manner of Fluxes of Bloud or Humors, to ſtanch bleedings inward or outward, Lasks, Scourings, the Bloudy-flux, Womens too abundant Courſes, the Whites, and the Chollerick belchings and caſtings of the Stomach; and is a ſingular good Wound-herb for all ſorts of Wounds both of the Head and Body, either inward or outward; for all old Ulcers, or running Cankers and moiſt ſores to be uſed either by the Juyce or Decoction of the Herb, or by the Pouder of the Herb or Root, or the Water of the Diſtilled Herb, or Ointment by it ſelf, or with other things to be kept. The Seed is alſo no leſs effectual both to ſtop Fluxes and dry up moiſt Sores, being taken in Pouder inwardly, in Wine or ſteeled Water, that is, wherin hot Gads of Steel have been quenched. Or the Pouder of the Seed mixed with the Ointments.

Heart, Liver, Melancholy, Peſtilence, epidemical Diſeaſes, Bleeding, Stoppeth Terms and Whites, Belching, Vomiting, Wounds, ulcers, Cankers, Sores, Fluxes.

This is an Herb the *Sun* challengeth dominion over, and is a moſt precious Herb, little inferior to *Betony*: The continual uſe of it preſervs the Body in health, and the Spirits in vigor; for if the *Sun* be the preſerver of life under God, his Herbs are the beſt in the World to do it by.

The Butter-Bur.

Deſcription.

THis riſeth up in *February*, with a thick Stalk about a foot high, whereon are ſet a few ſmal Leavs, or rather pieces, and at the tops a long ſpiked head of Flowers, of a bluſh or deep red colour, according to the ſoil wherin it groweth; and before the Stalk with the Flowers have abidden a month above ground, wil be withered and gone, blown away with the wind; and the Leaves will begin to ſpring, which being ful grown are very large & broad, being ſomwhat thin and almoſt round, whoſe thick red footſtalks, about a foot long ſtand towards the middle of the Leavs: The lower parts being divided into two round parts, cloſe almoſt one to another, and of a pale green colour, and hoary underneath. The Root is long and ſpreading under ground, being in ſome places no bigger than ones Finger, in others much bigger, blackiſh on the outſide & white within, of a bitter and unpleaſant taſt.

Place and *Time.*

They grow in low and wet grounds by Rivers and Waters ſide: their Flower (as is ſaid) riſing and decaying in *February* and *March*, before the Leavs which appear in *April*.

Vertues and *uſe.*

The Roots hereof are by long experience found to be very available againſt the Plague and Peſtilential Feavers, by provoking Sweat, if the Pouder therof be taken in Wine, it alſo reſiſteth the force of any other Poyſon. The Root hereof taken with *Zedoary* and *Angelica*, or without them, helps the riſing of the Mother: The Decoction of the Root in Wine is ſingular good for thoſe that wheeze much, or are ſhort-winded. It provoketh Urin alſo and Womens courſes, and killeth the flat and broad Worms in the Belly. The Pouder of the Root doth wonderfully help to dry up the moiſture of ſores that are hard to be cured, and taketh away all ſpots and blemiſhes of the skin.

Plague, epidemical Diſeaſes. Poyſon, Mother, Wheezing, Difficulty of breathing, Diſury, Terms provokes, Flat and broad Worms, Blemiſhes of the skin

It were wel if Gentlewomen would keep this Root preſerved, to help their poor Neibors: *It is fit the Rich ſhould help the Poor, for the Poor cannot help themſelvs.*

The

The Bur-Dock.

IT is so well known even to the little Boys who pul off the Burs to throw and stick upon one another, that I shal spare to write any description of it.

Place.

They grow plentifully by Ditches and Water-sides, and by the High-waies almost every where through this Land.

Vertues and use.

Cools, Dryes, Ulcers, Sores, Flegm, Sinews, Arteries,

The *Bur Leavs* are cooling, moderatly drying, and discussing withal, whereby it is good for old Ulcers and Sores: A dram of the Roots taken with Pine Kernels, helpeth them that spit foul, mattery, and bloudy Flegm: The Leavs applied on the places troubled with the shrinking of the Sinews or Arteries, give much ease: The Juyce of the Leavs, or rather the Roots themselvs given to drink with old Wine doth wonderfully help the bitings of any Serpents: And the Root beaten with a little Salt and laid on the place, suddenly easeth the pain thereof, and helpeth those that are bit with a mad-Dog. The Juyce of the Leavs taken with Honey provoketh Urin, and remedieth the pain of the Bladder. The Seed being drunk in Wine forty daies together, doth wonderfully help the *Sciatica*. The Leavs bruised with the White of an Egg and applied to any place burnt with Fire, taketh out the Fire, gives sudden ease, and heals it up afterwards. The Decoction of them fomented on any fretting sore or Canker stayeth the corroding quality, which must be afterwards anointed with an Ointment made of the same Liquor, Hogs-Greas, Nitre and Vinegar, boyled together. The Roots may be preserved with Sugar, and taken fasting, or at other times for the said purposes, and for Consumptions, the Ston, and the Lask. The Seed is much commended to break the Stone and cause it to be expelled by Urin; and is often used with other Seeds and things to that purpose.

Venemous Beasts, Mad dogs, Disury, Bladder, Sciatica, Burning, Sores, Cankers, Consumption, Stone, Flux.

Venus challengeth this Herb for her own, and by its Leaf or Seed you may draw the Womb which way you please, either upward by applying it to the Crown of the Heed, if in case it fal out; or downward in fits of the Mother, by applying it to the Soals of the Feet; Or if you would stay it in its place, apply it to the Navel, and that is one good way to stay the Child in it. See more of it in my *Guide for Women*.

Cabbages or Coleworts.

I Shal spare a labor in writing a Description of these, sith almost every one that can but write at all may describe them from his own knowledg, they being generally so well known that Descriptions are altogether needless.

Place.

These are generally planted in Gardens.

Time.

Their flowering time is towards the middle or end of *July*, and the Seed is ripe in *August*.

Vertues and use.

Venemous Beasts. Terms provokes, Hoarseness, Consumption,

The *Cabbages* or *Coleworts* boyled gently in Broth and eaten, do open the Body, but the second Decoction doth bind the Body. The Juyce therof drunk in Wine helpeth those that are bitten by an Adder, and the Decoction of the Flowers bringeth down Womens Courses. Being taken with Honey, it recovereth hoarseness or loss of the voice. The often eating of them wel boyled, helpeth those that are entring into a Consumption. The Pulp of the middle Ribs of Coleworts boyled in Almond Milk, and made up into an Electuary with Honey, being taken often, is very profitable for those that are purse and short-winded. Being boyled twice, and an old Cock boyled in the Broth and drunk, it helpeth the pains and obstructions of the Liver and Spleen, and the Stone in the Kidnies. The Juyce boyled with Honey and dropped into the corner of the Eye, cleareth the sight, by consuming any Film or cloud begining to dim it; it also consumeth the Canker growing therin. They are much commended being eaten before meat, to keep one from surfetting, as also from being drunk with too much Wine, or quickly make a man sober again that is drunk before. For (as they say) there is such an *Antipathy* or enmity between the Vine and the Colewort, that the one will die where the other groweth. The Decoction of Coleworts taketh away the pain and ach, and allayeth the swellings of swoln and gouty Legs and Knees, wherein many gross and watry humors are fallen, the place being bathed therwith warm: It helpeth also old and filthy sores being washed therewith, and healeth all smal Scabs, Pushes and Wheals that break out in the Skin. The Ashes of Colewort Stalks mixed with old Hogs-Grease are very effectual to anoint the Sides of those that have had long

Obstructions, Stone, Sight, Canker Surfets, Swellings, Gout, Sores, Scabs, Wheals,

pains

Melancholly, Wind.

pains therin, or any other place pained with Melancholly and windy humors.

This was surely *Chrysippus* his god, and therfore he wrote a whol Volumn of them and their Vertues, and that none of the least neither, for he would be no smal Fool, he apropriates them to every part of the Body, and to every Disease in every part, and honest old *Cato* they say used no other Physick, I know not what Mettals their Bodies were made of, this I am sure, *Cabbages* are extream windy whether you take them as Meat, or as Medicine, yea as windy Meat as can be eaten, unless you eat Bagpipes or Bellows, and they are but seldom eaten in our daies, and *Colewort* Flowers are somthing more tollerable, and the wholsomer Food of the two.

The *Moon* challengeth the Dominion of the Herb.

The Sea Colewort.

Description.

THis hath divers somwhat long and broad, large thick wrinkled Leavs, somwhat crumpled upon the edges, growing each upon a several thick Footstalk very brittle, of a grayish green colour. From among which riseth up a strong thick stalk two Foot high and better, with some Leavs theron to the top, where it brancheth forth much; and on every Branch, standeth a large Bush of pale whitish Flowers, consisting of four Leavs apiece: The Root is somwhat great and shooteth forth many Branches under ground, keeping the green Leavs al the Winter.

Place.

They grow in many places upon the Sea Coasts, as wel on the Kentish, as *Essex* Shores, as at *Lidd* in *Kent*, *Colechester* in *Essex*, and divers other places, and in other Countries of this Land.

Time.

They Flower and Seed about the time that other kinds do.

Vertues.

The Broth or first Decoction of the *Sea Colewort* doth by the sharp nitrous and bitter qualities therin, open the Belly and purge the Body, it clenseth and digesteth more powerfully than the other kind: The Seed herof bruised and drunk, killeth Worms. The Leavs or the Juyce of them applied to Sores or Ulcers clenseth and healeth them, and dissolveth Swellings, and taketh away Inflamations.

Sores, Wounds, Ulcers, Swellings, Inflamations.

Calamint, or Mountain Mint.

Description.

THis is a smal Herb seldom rising above a a Foot high, with square hoary and woody Stalks, and two smal hoary Leavs set at a Joynt, about the bigness of Marjoram, or not much cigger, a little dented about the edges, and of a very fierce or quick scent, as the whol Herb is: The Flowers stand at several spaces of the Stalks from the middle almost upwards, which are smal and gaping like to those Mints, and of a pale Blush colour: after which follow smal, round, blackish Seeds: The Root is smal and Woody, with divers smal sprigs spreading within the ground, and dieth not, but abideth many yeers.

Place.

It groweth on Heaths, and Upland dry grounds, in many places of this Land.

Time.

They Flower in *July*, and their Seed is ripe quickly after.

Vertues and Use.

The Decoction of the Herb being drunk, bringeth down Womens Courses and provoketh Urin: It is profitable for those that are Burstен, or troubled with Convulsions or Cramps, with shortness of Breath, or Chollerick torments and pains in their Bellies or Stomachs, it also helpeth the yellow Jaundice, and staieth Vomiting, being taken in Wine; taken with Salt and Honey, it killeth al manner of Worms in the Body: It helpeth such as have the Leprosie, either taken inwardly, drinking Whey after it, or the green Herb outwardly applied: It hindreth Conception in Women: being either burned, or strewed in the Chamber, it driveth away Venemous Serpents. It takes away black and blue marks in the Face, and maketh black Scars become wel colored, if the green Herb (not the dry) be boyled in Wine and laid to the place, or the place washed therwith. Being applied to the Hucklebone, by continuance of time it spendeth the humors which caused the pain of the Sciatica. The Juyce dropped into the Ears killeth the Worms in them: The Leavs boyled in Wine and drunk provoketh sweat, and openeth Obstructions of the Liver and Spleen; it helpeth them that have a Tertian Ague (the Body being first purged) by taking away the cold Fits. The Decoction herof with some Sugar

Terms provokes, Dissury, Ruptures, Convulsions. Cramps, Shortnes of Breath, Jaundice, Vomiting, Worms, Leprosie, Serpents, Black and blue Marks, Scars, Sciatica, Obstruction of the Liver and Splein.

Tertian Agues.

Sugar put therto afterwards, is very profitable for thoſe that be troubled with the overflowing of the Gal, and that have an old Cough, and that are ſcarce able to breath by the ſhortneſs of their wind: That have any cold diſtemper in their Bowels, and are troubled with the hardneſs of the Spleen, for al which purpoſes, both the Pouder called *Diacalaminthes* and the Compound Syrup of Calamint (which are to be had at the Apotheearies) are moſt effectual.

Gall, Cough, Bowels, Spleen.

Let not Women be too buſy with it, for it works very violently upon the Fœminin parts.

Chamomel.

THis is ſo wel known every where that it is but loſt time and labor to deſcribe it. The Vertues wherof are as followeth.

A Decoction made of *Chamomel* and drunk, taketh away al pains and Stitches in the Sides.

Stitches in the Side.

The Flowers of *Chamomel* beaten and made up into Bals with Oyl driveth away al ſorts of Agues; if the party grieved be anointed with that Oyl taken from the Flowers, from the Crown of the Head to the Soal of the Foot, and afterwards laid to ſweat in his Bed, and that he ſweat wel: This is *Nicheſſor* an Egyptian's Medicine. It is profitable for all ſorts of Agues that come either from Flegm or Melancholly, or from an Inflamation of the Bowels being applied when the Humors cauſing them ſhal be concocted; and there is nothing more profitable to the ſides and Region of the Liver and Spleen than it.

Agues.

Liver, Spleen, Wearineſs,

The bathing with a Decoction of Chamomel taketh away wearineſs, eaſeth pains to what part of the Body ſoever they be applied: it comforteth the Sinews that are overſtrained, mollifieth al Swellings: It moderately comforteth al parts that have need of warmth, digeſteth and diſſolveth whatſoever hath need therof by a wonderful ſpeedy property. It eaſeth al the pains of the Chollick and Stone, and al pains and torments of the Belly, and gently provoketh Urin. The Flowers boyled in Poſſet Drink provoketh Sweat, and helpeth to expel Colds, Aches, and Pains, wherſoever and is an excellent help to bring down Womens Courſes. A Syrup made of the Juyce of *Chamomel* with the Flowers and white Wine, is a Remedy againſt the Jaundice and Dropſie. The Flowers boyled in a Ly, are good to waſh the Head, and comfort both it and the Brain. The Oyl made of the Flowers of *Chamomel* is much uſed againſt al hard ſwellings, pains or aches, ſhrinking of the Sinews or Cramps, or pains in the Joynts, or any other part of the Body; being uſed in Cliſters, it helpeth to diſſolve wind and pains in the Belly; anointed alſo it helpeth Stitches and pains in the Sides.

Sinews, Swellings,

Chollick, Stone, Belly-ach,

Cold, Ach,

Jaundice, Dropſie,

Brain,

Cramp,

Stitch in the Side.

Nicheſſor ſaith the Egyptians dedicated it to the *Sun* becauſ it cured Agues; and they were like enough to do it, for they were the arranteſt Apes in their Religion that ever I red of. *Bacchinus*, *Pena*, and *Lobel* commend the Syrup made of the Juyce of it and Sugar, taken inwardly, to be excellent for the Spleen. Alſo this is certain, that it moſt wonderfully breaks the Stone, ſome take it in Syrup or Decoction, others inject the Juyce of it into the Bladder with a Syring; my Opinion is, That the Salt of it taken half a dram in a morning, in a little White or Rheniſh Wine is better than either, that it is excellent for the Stone appears by this, which I have ſeen tried, *viz.* That a Stone that hath been taken out of the Body of a man being wrapped in Chamomel will in time diſſolve, and in a little time too.

Campions wild.

Deſcriptions.

THe white wild *Campion* hath many long and ſomwhat broad dark green Leavs, lying upon the ground with diverſ Ribs therin ſomwhat like Plantane, but ſomwhat hairy, broader, and not ſo long: The hairy Stalks riſe up in the middle of them three or four foot high, and ſomtimes more, with diverſ great white Joynts at ſeveral places theron, and two ſuch like Leavs therat up to the top, ſending forth Branches at the ſeveral Joynts alſo; al which bear on ſeveral Footſtalks white Flowers at the tops of them, conſiſting of five broad pointed Leavs, every one cut in on the end unto the middle, making them ſeem to be two apiece, ſmelling ſomwhat ſweet, and each of them ſtanding in large green ſtriped hairy Husks, large and round below next to the Stalk: The Seed is ſmal and grayiſh in the hard Heads that come up afterwards: The Root is white and long, ſpreading diverſ fangs in the ground.

The Red Wild Campion groweth in the ſame manner as the White, but his Leavs are not ſo plainly ribbed, ſomwhat ſhorter, rounder and more woolly in handling: The Flowers are of the ſame form and bigneſs, but in ſom of a pale, in others of a bright red colour, cut in at ends more finely, which maketh the Leavs ſeem more in number than the other. The Seed and the Roots are alike: The Roots of both ſorts abiding many years.

There are forty five kinds of Campions more, thoſe of them which are of Phyſical uſes having the like Vertues with theſe above deſcribed, which I take to be the two chiefeſt kinds.

Place.

They grow commonly through this Land by Fields, Hedg-ſides, and Ditches.

Time.

They flower in Summer ſom earlier than others, and ſome abiding longer than others.

Vertues and uſe.

Bleeding inward & outward, Diſury, Gravel, Choller, Venemous Beaſts. Plagues, Sores, Ulcers, Cankers, Fiſtulaes.

It is found by experience that the Decoction of the Herb either the White or Red being drunk, doth ſtay inward bleedings; and applied outwardly it doth the like: And being drunk helpeth to expel the Urin being ſtop'd, and Gravel or the Stone in the Reins or Kidnies. Two drams of the Seed drunk in Wine, purgeth the Body of Chollerick humors, and helpeth thoſe that are ſtung by Scorpions, or other venemous Beaſts; and may be as effectual for the Plague: It is of very good uſe in old Sores, Ulcers, Cankers, Fiſtulaes and the like, to clenſ and heal them, by conſuming the moiſt humors falling into them, and correcting the putrifaction of Humors offending them.

Carrots.

THe Garden kind are ſo wel known that they need no Deſcription; but becauſe they are of leſs Phyſical uſe than the Wild kind (as indeed almoſt in all Herbs the Wild are moſt effectual in Phyſick, as being more powerful in operation then the Garden kinds) I ſhal therfore briefly deſcribe the *Wild Carrot.*

Deſcription.

It groweth in a manner altogether like the Tame, but that the Leavs and Stalks are ſomwhat whiter and rougher: The Stalks bear large tufts of white Flowers, with a deep Purple ſpot in the middle, which are contracted together when the Seed begins to ripen, that the middle part being hollow and low, and the outer Stalks riſing high, maketh the whol Umbel to ſhew like a Birds-Neſt. The Root is ſmall, long, and hard, unfit for meat, being ſomwhat ſharp and ſtrong.

Place.

The Wild kind groweth in diverſ parts of this Land plentifully by the Fields ſides, and in untilled places.

Time.

They flower and ſeed in the end of Summer.

The Vertues.

Wind, Stitches, provokes Urin and theTerms, Stone,

The Wild kind, breaketh Wind, and removeth Stitches in the Sides, provoketh Urin and Womens Courſes, and helpeth to break and expel the Stone: The Seed alſo of the ſame worketh the like effect, and is good for the Dropſie, and thoſe whoſe Bellies are ſwollen with Wind; helpeth the Chollick, the Stone in the Kidnies, and the riſing of the Mother, being taken in Wine, or boyled in Wine and taken; and helpeth Conception. The Leavs being applied with Honey to running Sores or Ulcers, doth clenſe them.

Dropſie, Chollick, Barrenneſs Ulcers.

I ſuppoſe the Seeds of them perform this better than the Roots; And though *Galen* commend Garden Carrots highly, to break Wind; yet experience teacheth, that they breed it firſt; and we may thank Nature for expelling it, not they: The Seeds of them expel Wind indeed, and ſo mend what the Root marreth.

Caraway.

Deſcription.

IT beareth diverſ Stalks of fine cut Leavs lying upon the ground ſomwhat like to the Leavs of Carrots, but not buſhing ſo thick, of a little quick taſt in them, from among which riſeth up a ſquare Stalk not ſo high as the Carrot, at whoſe Joynts are ſet the like Leavs but ſmaler and finer, and at the top ſmal open tufts or Umbels of white Flowers, which turn into ſmal blackiſh Seed ſmaler than the *Anniſeed*, and of a quicker and hotter taſt. The Root is whitiſh, ſmal and long, ſomwhat like unto a *Parſnep*, but with more wrinckled Bark, and much leſs, of a little hot and quick taſt, and ſtronger than the *Parſnep*, and abideth after Seed-time.

Place.

It is uſually ſown with us in Gardens.

Time.

They flower in *June* or *July*, and ſeed quickly after.

Vertues and *uſe.*

Wind, Diſury, Indigeſtiõ, Head, Stomach, Bowels, Mother, Black and blue ſpots, Bruiſes, Chollick.

Caraway Seed hath a moderat ſharp quality wherby it breaketh Wind and provoketh Urin, which alſo the Herb doth. The Root is better food than the *Parſnep*, and is pleaſant & comfortable to the Stomach, helping digeſtion. The Seed is conducing to all the cold griefs of Head and Stomach, the Bowels or Mother, as alſo the wind in them, and helpeth to ſharpen the Eye-ſight. The Pouder of the Seed put into a Pultis, taketh away black and blue ſpots of Blows or Bruiſes. The Herb it ſelf, or with ſome of the Seed bruiſed and fryed, laid hot in a bag or double cloth to the lower part of the Belly, eaſeth the pains of the wind Chollick.

The Roots of Caraways eaten as men eat Parſnips, ſtrengthen the Stomacks of ancient people exceedingly, and they need not make a whol meal of them neither, and are fit to be planted in every ones Garden.

Caraway Comfects, once only dipped in Sugar, and half a ſpoonful of them eaten in the morning faſting, and as many after each

Meal

meal is a most admirable Remedy for such as are troubled with Wind.

Celandine.

Description.

THis hath diverse tender, round, whitish, green Stalks, with greater Joynts than ordinary in other Herbs, as it were Knees, very brittle and easie to break, from whence grow Branches with large tender long Leavs, much divided into many parts, each of them cut in on the edges, set at the Joynts on both sides of the Branches, of a dark bluish green colour on the upper side like Columbines, and of a more pale bluish green underneath, ful of a yellow sap, when any part is broken, of a bitter tast and strong scent. At the tops of the Branches which are much divided, grow gold yellow Flowers of four Leaves apiece, after which come smal long pods, with blackish seed therin. The Root is somwhat great at the head, shooting forth diverse other long Roots and smal Strings, reddish on the outside and yellow within, ful of a yellow sap therein.

Place.

It groweth in many places by old Walls, by the Hedges, and way sides in untilled places; and being once planted in a Garden, especially in some shady place, it wil remain there.

Time.

They flower all the Summer long, and the Seed ripeneth in the mean time.

Vertues and use.

Obstructions of the Liver and Gall, yellow Jaundice, Dropsie, Pestilence.

The Herb or Roots boyled in white-Wine and drunk, a few Aniseeds being boyled therwith, openeth Obstructions of the Liver and Gall, helpeth the yellow Jaundice: and the often using it, helps the Dropsie, and the Itch, and those that have old Sores in their Legs, or other parts of the Body. The Juyce thereof taken fasting, is held to be of singular good use against the Pestilence: The distilled Water, with a little Sugar, and a little good Triacle mixed therwith (the party upon the taking being laid down to sweat a little) hath the same effect.

Eyes.

The Juyce dropped into the Eyes clenseth them from Films and cloudiness which darken the sight, but it is best to allay the sharpnes of the Juyce with a little Breast-milk:

Ulcers,

It is good in old filthy corroding creeping Ulcers whersoever, to stay their malignity of fretting and running, and to cause them to heal the more speedily: The Juyce often applied to

Tetters, Ringworms, Cancers, Warts,

Tetters, Ringworms, or other such like spreading Cancers, will quickly heal them, and rubbed often upon Warts will take them away.

Belly, Bowels, Mother worms Terms stops,

The Herb with the Roots bruised and heated with Oyl of Camomel, and applied to the Navel, taketh away the griping pain in the Belly and Bowels, and all the pains of the Mother: and applied to Womens Breasts stayeth the overmuch flowing of their Courses.

Toothach,

The Juyce Decoction of the Herb gargled between the Teeth that ake, , easeth the pain; and the Pouder of the dryed Root, laid upon an aching hollow, or loos Tooth, wil caus it to fal out.

Itch, Beauty lost.

The Juyce mixed with som Pouder of Brimstone, is not only good against the Itch, but taketh away al discolourings of the Skin whatsoever: And if it chance that in a tender Body it causeth any Itching or Inflamation, by bathing the place with a little Vinegar it is helped.

This is an Herb of the *Sun*, & under the Celestial *Lyon*, and is one of the best cures for the Eyes that is. Al that know any thing in *Astrologie*, know as wel as I can tel them, That the Eyes are subject to the *Luminaries*; let it then be gathered when the Sun is in *Leo*, and the Moon in *Aries* applying to his Trine; let *Leo* arise, then may you make it into an Oyl or Oyntment which you please to anoint your sore Eyes withal: I can prove it both by my own experience, and the experience of those to whom I have taught it, That most desperat sore Eyes have been cured by this only Medicine; And then I pray, is not this far better than endangering the Eyes by the art of the Needle? for if this do not absolutly take away the Film, it will so facilitate the work that it may be don without danger.

Another il-favored trick have Physitians got to use to the Eye, and that is worse than the Needle; which is, To eat away the Film by corroding or gnawing Medicines. This I absolutly protest against.

1 Because the Tunicles of the Eye are very thin, and therfore soon eaten asunder.

2 The *Callus* or Film that they would eat away is seldom of an equal thickness in every place, and then the Tunicle may be eaten asunder in one place, before the Film be consumed in another, and so be a readier way to extinguish the sight than to restore it.

It is called *Chelidonium* from the Greek word χελίδων, which signifies a Swallow, because they say, That if you prick out the Eyes of yong Swallows when they are in the Nest, the old ones wil recover their Eyes again with this Herb. This I am confident, for I have tried it, That if you mar the very Apple of their Eyes with a Needle, she wil recover them again, but whether with this Herb or no I know not.

Also I have read (and it seems to me somwhat probable) That the Herb being gathered as I shewed before, and the Elements drawn apart from it by the art of the Alchymist, and after they are drawn apart, rectified, the earthy quality still in rectifying them, added to the *Terra damnata* (as Alchymists call it) or *Terra sacratissima* (as som Phylosophers call it)

the Elements so rectified are sufficient for the Cure of al Diseases, the humor offending being known and the contrary Element given, It is an Experience wurth the trying, and can do no harm.

The lesser Celondine,

usually known by the Name of

Pilewort.

I Wonder what ailed the Antients to give this the name of *Celandine* which resembles it neither in Nature nor form: It acquired the Name of *Pilewort* from its Vertues, and it being no great matter where I set it down, so I do set it down at al, I humor'd Dr. *Tradition* so much as to set it down here.

Description.

This *Celandine* then or *Pilewort* (which you please) doth spread many round, pale, green Leavs set on weak and trailing Branches, which lie upon the ground, and are fat, smooth, and somwhat shining, and in some places (though seldom) marked with black spots, each standing on a long Footstalk among which rise smal yellow Flowers, consisting of nine or ten smal narrow Leavs, upon slender Footstalks very like unto a Crowfoot, wherunto the Seed also is not unlike, being many smal ones set together upon a Head. The Root is made of many smal Kernels like grain of Corn, some twice as long as others, of a whitish colour with some Fibres at the end of them.

Place.

It groweth for the most part in the moist corners of Fields, and places that are neer water Sides, yet wil abide in dryer grounds, if they be but a little shadowed.

Time.

It Flowreth betimes about *March* or *April*, is quite gone in *May*, so as it cannot be found until it spring again.

Vertues and use.

Hemorrhoids, Kings Evil.

It is certain by good experience that the Decoction of the Leavs and Roots, doth wonderfully help the Piles and Hemorrhoids, as also Kernels by the Ears and Throat called the Kings evil; or any other hard Wens or Tumors.

Here's another Secret for my Country Men and Women, a couple of them together, Pilewort being made into an Oyl Oyntment or Plaister, readily cures both the Piles or Hemorrhoids, and the Kings Evil, If I may Lawfully cal it the Kings Evil now there is no King, the very Herb born about ones Body next the Skin, helps in such Diseases, though it never touch the place grieved, let good people make much of it for these uses, with this I cured my own Daughter of the Kings Evil, broke the Sore, drew out a quarter of a pint of Corruption, and cured it without any Scar at all, and in one Weeks time.

The Ordinary small Centaury.

Description.

THis groweth up most usually but with one round and somwhat crested stalk, about a foot high, or better, branching forth at the top into many sprigs, and some also from the Joynts of the Stalks below; The Flowers that stand at the tops as it were in an umbel or tuft, are of a pale red, tending to a Carnation colour, consisting of five, somtimes six small Leavs, very like those of St. Johns Wort, opening themselvs in the day time, and closing at night; after which come Seed in little short Husks in form like unto Wheat Corns: The Leavs are smal and somwhat round. The Root smal and hard, perishing every year: The whol Plant is of an exceeding bitter tast.

There is another sort in al things like the former, save only it beareth white Flowers.

Place.

They grow ordinarily in Fields, Pastures, and Woods, but that with the white Flowers, not so frequent as the other.

Time.

They Flower in *July*, or there abouts, and Seed within a Month after.

Vertues and use.

Choller, Sciatica, Obstructions, Liver, Gall, Spleen, Agues, Dropsie, green sickness, Cholick, Terms provokes, Joynts, Gout, Sciatica, Cramp, Convulsion, Venemous Beasts,

This Herb boyled and drunk, purgeth Chollerick and gros humors, and helpeth the Sciatica: It openeth Obstructions of the Liver, Gall, aud Spleen, helping the Jaundice, and easing pains in the Sides, and hardness of the Spleen, used outwardly, and is given with very good effect in Agues: It helpeth those that have the Dropsie or the green Sickness, being much used by the Italians in pouder for that purpose. It killeth the Worms in the Belly as is found by experience. The Decoction therof (*viz.*) the tops of the Stalks with the Leavs and Flowers, is good against the Chollick, and to bring down Womens Courses, helpeth to avoid the dead birth, and easeth pains of the Mother, and is very effectual in al old pains of the Joynts, as the Gout, Cramps, or Convulsions. A dram of the Pouder therof taken in Wine, is a wonderful good help against the biting and poyson of the Adder. The Juyce of the Herb with a little Honey put to it, is good to cleer the Eyes from dimness, mists, and clouds that offend

fend or hinder the Sight: It is singular good both for green and fresh Wounds, as also for old Ulcers and Sores, to close up the one and clens the other, and perfectly to cure them both, although they be hollow or Fistulous; the green Herb especially being bruised and laid therto. The Decoction therof dropped into the Ears, clenseth them from Worms, clenseth the foul Ulcers and spreading Scabs of the Head, and taketh away al Freckles, Spots, and Marks in the Skin being washed therwith.

Eyes, Wounds, Ulcers.

Ears, Scabby Heads, Freckles, Spots,

The Herb is so safe you cannot fail in the using of it, only give inwardly for inward Diseases, use it outwardly for outward Diseases, 'Tis very wholsom but not very toothsom.

Dr. *Reason* and Dr. *Experience* could not agree (the last time I spake with them) whether the Herb were under the Dominion of the *Sun* or *Mars*.

The Cherry-Tree.

I Suppose there are few but know this Tree, for his Fruits sake, and therfore shal spare the writing a Description therof.

Place.

For the place of its growth, it is afforded room in every Orchard.

Vertues and Use.

Cherries, as they are of different tasts, so they are of diverse qualities: The sweet pass through the Stomach and Belly more speedily, but are of little Nourishment. The tart or sowr, are more pleasing to an hot Stomach, procuring appetite to meat, and help to cut tough Flegm and gross humors; but when these are dryed they are more binding the belly than when they are fresh, being cooling in hot Diseases, and welcom to the Stomach, and provoke Urin. The Gum of the *Cherry-Tree* dissolved in Wine, is good for a cold Cough, and hoarsness of the Throat, mendeth the colour in the Face, sharpneth the Eye-sight, provoketh appetite, and helpeth to break and expel the Stone. The Black Cherries bruised with the Stones and distilled, the Water therof is much used, to break the Stone, expel gravel, and break the Wind.

Appetite lost, Flegm Gross Humors, Cool, provoke Urine, Cough, Hoarsness, Sight, Gravel, Wind.

Winter Cherries.

Description.

THe *Winter Cherry* hath a running or creeping Root in the ground of the bigness many times of ones little Finger, shooting forth at several Joynts in several places, whereby it quickly spreadeth a great compass of grownd: The Stalk riseth not above a yard high, wheron are set many broad, and long green Leavs, somwhat like Nightshade but larger, at the Joynts wherof come forth whitish Flowers made of five Leavs apiece, which after turn into green Berries, inclosed with thin Skins, which change to be reddish, when they grow ripe, the Berry likewise being reddish, and as large as a Cherry, wherin are contained many flat and yellowish Seeds lying within the pulp; which being gathered and strung up are kept all the yeer to be used upon occasion.

Place.

They grow not naturally in this Land, but are cherished in Gardens for their Vertues.

Time.

They Flower not until the middle or latter end of *July*, and the Fruit is ripe about the end of *August*, or beginning of *September*.

Vertues and use.

They are of great use in Physick: The Leavs being cooling may be used in Inflamations, but not opening, as the Berries and Fruit are, which by drawing down the Urine provoke it to be avoided plentifully when it is stopped or grown hot, sharp, and painful in the passage; it is good also to expel the Stone and Gravel out of the Reins, Kidnies, and Bladder, helping to dissolve the Stone, and avoiding it by greet or gravel sent forth in the Urin; It also helpeth much to clens inward Impostumes or Ulcers in the Reins or Bladder, or in those that avoid a Bloody or foul Urin. The distilled Water of the Fruit, or the Leavs together with them, or the Berries green or dry, distilled with a little Milk, and drunk morning and evening with a little Sugar, is effectual to al the purposes afore specified, and especially against the heat and sharpnes of the Urin. I shal only mention one way amongst many others which might be used for ordering the Berries to be helpful for the Urin and the Stone, which is thus. Take three or four good handfuls of the Berries either green and fresh, or dried and having bruised them, put them into so many Gallons of Beer or Ale when it is new tunned up: This Drink taken daily hath been found to do much good to many, both to eas the pains and expel Urin, and the Stone; and to caus the Stone not to ingender. The Decoction of the Berries in Wine or Water is the most usual way; but the Pouder of them taken in drink is more effectual.

Inflamations, Disury, Stone, Gravel, ulcers in the Reins and Bladder, pissing Blood, sharpness of urins.

A precious Receipt.

Chervil.

Description.

THe Garden *Chervil* doth at first somwhat resemble Parsly, but after it is better grown the Leavs are much cut in and jagged resembling

resembling Hemlocks, being a little hairy and of a whitish green colour, somtimes turning reddish in the Summer with the Stalks also; It riseth little above half a Foot high, bearing white Flowers in spoked tufts, which turn into long and round Seed pointed at the ends, and blackish when they are ripe; of a sweet tast, but no smel, though the Herb it self smelleth reasonable wel: The Root is smal and long and perisheth every yeer, and must be sowen anew in the Spring for Seed, and after *July* for Autumn Sallet.

The wild Chervil groweth two or three foot high, with yellow Stalks and Joynts, set with broader and more hairy Leavs, divided into sundry parts nicked about the edges, and of a darker green colour, which likewise grow reddish with the Stalks; at the tops wherof stand smal white tufts of Flowers & afterwards smaler and longer seed: The Root is white, hard, and enduring long. This hath little or no scent.

Place.

The first is sown in Gardens, for a Sallet-Herb. The second groweth wild in many of the Meadows of this Land, and by the Hedg-sides, and on Heaths.

Time.

They flower and seed early, and thereupon are sown again in the end of Summer.

Vertues and use.

Stomach Clotted Blood, Bruises, Falls, Disury, Stone, Pleuresie, Sides, Swellings, black and blue Spots.

The Garden Chervil being eaten, doth moderately warm the Stomach, and is a certain remedy (saith *Tragus*) to dissolve congealed or clotted Bloud in the Body, or that which is clotted by bruises, fals, &c. The Juyce or distilled Water therof being drunk, and the bruised Leavs laid to the place, being taken either in meat or drink, it is held good to provoke Urin, to expel the Stone in the Kidnies, to send down Womens Courses, and to help the Pluriste and prickings of the Sides.

The wild Chervil bruised and applied, dissolveth Swellings in any part of the Body, and taketh away the Spots and Marks of congealed Blood by Bruises or Blows, in a little space.

Sweet Chervil; OR Sweet Cicely.

Description.

THis groweth very like the greater *Hemlock* having large spread Leavs, cut into diverse parts, but of a fresher green colour than the *Hemlock*, tasting as sweet as the *Anniseed*. The Stalk riseth up a yard high or better being cresting or hollow, having the like Leavs at the Joynts, but lesser; and at the tops of the branched Stalks, Umbels or Tufts of white Flowers; after which com large and long crested, black shining Seed, pointed at both ends, tasting quick, yet sweet and pleasant. The Root is great and white, growing deep in the ground, and spreading sundry long Branches therein, in tast and smel stronger than the Leavs or Seed, and continuing many years.

Place.

This groweth in Gardens.

Vertues.

Cold Stomach, Wind, Flegm, Lungues, Phtisick, Pestilence, Terms provokes, After-birth, Appetite lost, Ulcers Epidemical Diseases.

This whol Plant besides its pleasantness in Sallets, hath also his Physical Vertues. The Root boyled and eaten with Oyl and Vinegar, (or without Oyl) doth much pleas and warm an old and cold Stomach, oppressed with wind or flegm, or those that have the Phtisick or Consumption of the Lungs. The same drunk with Wine, is a preservative from the Plague; it provoketh Womens Courses, and expelleth the After-birth, procureth an appetit to meat, and expelleth Wind. The Juyce is good to heal the Ulcers of the Head and Face. The candied Roots hereof are held as effectual as *Angelica* to preserv from Infection in the time of a Plague, and to warm and comfort a cold weak Stomach.

It is so harmless you cannot use it amiss.

Chickweed.

Description.

THis is generally known to most People, I shal therfore not trouble you with the Description therof; nor my self with setting fourth the several kinds; sith but only two or three are considerable for their usefulness.

Place.

These are usually found in moist and watry places, by Wood sides, and elsewhere.

Time.

They flower about *June*, and their Seed is ripe in *July*.

Vertues and use.

Hot Liver, Apostums, Swellings, Red Face, Wheals, Pushes, Itch, Scabs Cramp, Convulsion, Palsey, Red Eyes,

It is found to be as effectual as *Purslane* to al the purposes whereunto it serveth, except for meat only. The Herb bruised or the Juyce applied (with cloaths or spunges dipped therein) to the Region of the Liver, and as they dry to have fresh applied, doth wonderfully temper the heat of the Liver; and is effectual for all Imposthums and Swellings whersoever; for all redness in the Face, Wheals, Pushes, Itch, Scabs, the Juyce either simply used, or boyled with Hogs-Greas and applied; the same helpeth Cramps, Convulsions and Palsies: The Juyce or distilled Water is of much good use for al heat and redness in the Eyes to drop som therof into them; as also into the Ears to ease pains in them, and is of good effect to ease the

the pains, the heat, and sharpness of Blood in the Piles and generally al pains in the Body that arise of heat; it is used also in hot and virulent Ulcers and sores in the privy parts of Man or Woman, or on the Legs or elsewhere. The Leavs boyled with Marsh-Mallows and made into a Pultis with Fenugreek, and Linseed, applied to Swellings or Imposthumes ripeneth and breaketh them, or swageth the swellings and easeth the pains: It helpeth the Sinews when they are shrunk by Cramps or otherwise, and to extend and make them pliable again, by this Medicine. Boyl an handful of *Chickweed* and a handful of Red-Rose Leavs dryed, but not distilled in a Quart of *Muscadine* until a fourth part be consumed; then put to them a pint of the Oyl of Trotters, or Sheeps-feet; let them boyl a good while still stirring them wel; which being strained, anoint the grieved place herewith, warm against a fire, rubbing it wel in with ones hand, and bind also some of the Herb (if you wil) to the place, and with Gods blessing it will help in three times dressing.

Hemorrhoids, ulcers,

Sinews,

Cich-Peas, or Cicers.

Description.

THe Garden sorts, whether Red, Black, or White, brings forth Stalks a yard long, wheron do grow many smal and almost round Leavs, dented about the edges, set on both sides of a middle Rib: at the Joynts come forth one or two Flowers upon short Footstalks, Peas fashion, either white or whitish, or purplish red, lighter or deeper according as the Peas that follow will be, that are contained in smal, thick, and short Pods, wherin lie one or two Peas more usually, a little pointed at the lower end, and almost round at the Head, yet a little corner'd or sharp. The Root is smal, and perisheth yeerly.

Place and *Time.*

They are sown in Gardens, or the Fields, as Peas, being sown later than Peas, and gathered at the same time with them, or presently after.

Vertues and use.

They are no less windy than Beans, but nourish more, they provoke Urine, and are thought to encreas Sperm, they have a clensing faculty, wherby they break the Stones in the Kidneys. To drink the cream of them being boyled in Water is the best way; it moveth the Belly downwards, provoketh Womens Courses, and Urin, and encreaseth both Milk and Seed. One ounce of Cicers, two ounces of French Barley, and a smal handful of Marsh-Mallow Roots, clean washed and cut, being boyled in the broth of a Chicken, and four ounces taken in the morning and fasting two hours after is a good Medicine for a pain in the Sides. The white Cicers are used more for Meat than Medicine, yet have they the same effects, and are thought more powerful to encreas Milk and Seed.

Dysury, Seed encreas, Stone, Costivness, Terms provokes.

Pain in the sides,

The wild *Cicers* are so much more powerful than the Garden kinds, by how much they exceed them in heat and drines; whereby they do more open Obstructions, break the Stone, and have al the properties of cutting, opening, digesting, and dissolving, and this more speedily, and certainly than the former.

Obstruction, Stone, Open, Digest, Dissolve.

Cinkfoyl, or Five Leaved Grass;

Called in some Countries,

Five finger'd Grass.

Description.

THis spreadeth and creepeth far upon the ground, with long slender strings like Strawberries, which take Root again and shooteth forth many Leavs made of five parts, and somtimes of seven, dented about the edges and somwhat hard; The Stalks are slender leaning downwards, and bear many smal yellow Flowers theron, with some yellow threds in the middle, standing about a smooth green head; which when it is ripe is a little rough, and containeth smal browniish Seeds. The Root is of a blackish brown colour, seldom so big, as ones little finger, but growing long with some threds therat; and by the smal strings it quickly spreadeth over the ground.

Place.

It groweth by Wood sides, Hedg sides, the Pathwaies in Fields, and in the Borders and Corners of them almost through all this Land.

Time.

It Flowreth in Summer, some sooner, some later.

Vertues and *use.*

Inflamation, Feavers, Pestilence, Sore Mouths, ulcers, Cankers, Fistulaes, Quincy, Yellow Jaundice, Jaundice, Falling sickness, Flux, Terms

It is an especial Herb used in all Inflamations and Feavers whether Infectious or Pestilential; or among other Herbs to cool, and temper the Blood and humors in the Body; As also for all Lotions, Gargles, Injections, and the like for sore Mouths, Ulcers, Cankers, Fistulaes, and other corrupt, Foul, or running Sores. The Juyce herof drunk about four ounces at a time for certain daies together, cureth the Quinsie, and the yellow Jaundice, and taken for thirty daies together cureth the Falling-sickness. The Roots boyled in Milk and drunk is a most effectual remedy, for all Fluxes in Man or Woman, whether the

Whites, Reds, as also the Bloody Flux. The Roots boyled in Vinegar, and the Decoction therof held in the Mouth, easeth the pains of the Toothach. The Juyce or Decoction taken with a little Honey, helpeth the hoarsness of the Throat, and is good for the Cough of the Lungs. The distilled Water of both Roots and Leavs is also effectual to all the purposes aforesaid: and if the Hands be often washed therin, and suffered at every time to dry in of it self without wiping, it wil in short time help the Palsy or shaking in them. The Root boyled in Vinegar, helpeth all Knots, Kernels, hard swellings, and lumps growing in any part of the Flesh, being therto applied; as also al Inflamations, and St. Anthonies Fire, all Impostumes, and painful Sores, with heat and putrefaction; the shingles also, and all other sorts of running, and foul Scabs, Sores, and Itch. The same also boyled in Wine, and applied to any Joynts full of pain and ach, or the Gout in the Hands or Feet, or the Hip-gout, called the *Sciatica*, and the Decoction therof drunk the while, doth cure them; and easeth much pains in the Bowels. The Roots are likewise effectual to help Ruptures or Burstings, being used with other things available to that purpose, taken either inwardly or outwardly, or both; as also for Bruises, or Hurts by Blows, Falls, or the like, and to stay the bleeding of Wounds in any part inward or outward.

Whites, Bloody Flux, Tooth-ach, Hoarsness, Cough, Palsey of the Hands, Knots in the Flesh, St. Anthonies Fire, Shingles, Scabs, Itch, Joynts pained, Sciatica, Ruptures, Gouts, Bruises, Falls, Bleeding.

This is an Herb of *Jupiter*, and therfore strengthens the parts of the Body that he rules, let *Jupiter* be angular and strong when it is gathered, and if you give but a scruple (which is but twenty grains of it) at a time, either in white Wine, or white Wine Vinegar, you shal very seldom miss the cure of an Ague be it what Ague soever in three Fits, as I have often proved to the admiration both of my self and others, let no Man despise it becaus it is plain and easie, the waies of God are all such, 'tis the ungodlines and impudency of Man that made things hard, and hath (by so doing) made sport for al the Devils in Hell, and grieved the good Angels, and when you reade this, your own Genius, if you be any thing at al acquainted with it, may dictate to you many as good Conclusions both of this and other Herbs.

Agues.

Some hold that one Leaf cures a Quotidian, three a Tertian, and four a Quartan Ague, and a hundred to one if it be not *Dioscorides*, for he is ful of such Whimseys. The truth is, I never stood so much upon the number of the Leavs, nor whether I gave it in Ponder or Decoction: If *Jupiter* were strong and the *Moon* applying to him or his good aspect at the gathering of it, I never knew it miss the desired effects.

Clary.

Description.

OUr ordinary Garden *Clary* hath four square Stalks, with broad, rough, wrinkled, whitish, or hairy green Leavs, somwhat evenly cut in on the edges, and of a strong, sweet sent, growing some neer the ground, and some by couples upon the Stalks: The Flowers grow at certain distances with two smal Leavs at the Joynts under them, somwhat like unto the Flowers of Sage, but smaller, and of a whitish blue colour: The Seed is browniish, and somwhat Flat, or not so round as the wild, the Roots are blackish and spread not far, and perish after the Seed time: It is usually sown, for it seldom riseth of its own sowing.

Place.

This groweth in Gardens.

Time.

It Flowreth in *June* and *July*, some a little later than others, and their Seed is ripe in *August*, or therabouts.

Vertues and use.

The Seed is used to be put into the Eyes to cleer them from Moats, or other such like things gotten within the Lids to offend them, as also to clear them from white or red spots in them. The Muccilage of the Seed made with Water, and applied to Tumors and swellings, dispersseth and taketh them away, as also draweth forth Splinters, Thorns, or other things gotten into the Flesh. The Leavs used with Vinegar either by it self or with a little Honey, doth help hot Inflamations, as also Boyls, Felons, and the hot Inflamations that are gathered by their pains, if it be applied before they be grown too great. The Pouder of the dried Leavs put into the Nose provoketh neesing, and therby purgeth the Head and Brain of much Rhewm and Corruption. The Seed or Leavs taken in Wine provoketh to Venery. It is of much use both for Men and Women that have weak Backs, to help to strengthen the Reins, used either by it self or with other Herbs conducing to the same effect, and in Tansies often: The fresh Leavs dipped in a Batter of Flower, Egs, and a little Milk, and fried in Butter, and served to the Table, is not unpleasant to any, but exceeding profitable for those that are troubled with weak Backs, and the effects therof. The Juyce of the Herb put into Ale or Beer, and drunk, bringeth down Womens Courses, and expelleth the After-birth.

Swellings, Splinters, Thorns, Inflamations, Boyls, Felons, Head, Brain, Lust provokes, Back, Terms provokes, Afterbirth

It

It is an usual cours with Men when they have gotten the running of the Reins, or Women the Whites, then run to the bush of *Clary*; Maid bring hither the Frying Pan, fetch me some Butter quickly, then to eating fryed *Clary*, just as Hogs eat Acorns, and this they think wil cure their Diseas (forsooth) wheras when they have devoured as much *Clary* as wil grow upon an Acre of ground, their Backs are as much the better as though they had pissed in their shoos, nay perhaps much worse.

As for that trick of curing the Eyes by it, I can as yet say nothing to it, for the rest it may be effectual.

We will grant that Clary strengthens the Back, but this we deny, That the caus of the running of the Reins in Men, or the Whites in Women lies in the Back (though the Back may somtimes be weakned by them) and therfore the Medicine is as proper, as for me when my Toe is sore, to lay a Plaister to my Nose.

Cleavers, or Goosgras.

Description.

THe common *Cleavers* hath diverse very rough square Stalks, not so big as the Tag of a Point, but rising up to be two or three yards high somtimes, if it meet with any tall Bushes or Trees wheron it may climb (yet without any Claspers) or else much lower and lying upon the Ground full of Joynts, and at every of them shooteth forth a Branch, besides the Leavs therat, which are usually six, set in a round compas like a Star, or the Rowel of a Spur: from between the Leavs at the Joynts towards the tops of the Branches, come forth very smal white Flowers, every one upon a smal threddy Footstalk, which after they are fallen, there do shew two smal, round, rough Seeds, joyned together like two Testicles, which when they are ripe grow hard and whitish, having a little hole on the side somwhat like unto a Navil. Both Stalks, Leavs, and Seeds are so rough that they wil cleav to any thing shal touch them. The Root is small and very threddy, spreading much in the Ground, but dieth every yeer.

Place.

It groweth by the Hedg, and Ditch Sides in many places of this Land, and is so troublesom an Inhabitant in Gardens, that it rampeth upon and is ready to choak what ever grows next it.

Time.

It Flowreth in *June* and *July*, and the Seed is ripe and falleth again in the end of *July* or *August*, from whence it springeth up again, and not from the old Roots.

Vertues and use.

The Juyce of the Herb, and Seed together taken in Wine, helpeth those that are bitten with an Adder, by preserving the Heart from the Venom; It is familiarly taken in Broth to keep them lean and lank that are apt to grow fat. The distilled Water drunk twice a day helpeth the yellow Jaundice, and the Decoction of the Herb in experience found to do the same, and stayeth Lasks and Bloody Fluxes. The Juyce of the Leavs, or they a little bruisep and applied to any bleeding wound, stayeth the Bleeding. The Juyce is also very good to close up the Lips of green Wounds; and the Pouder of the dried Herb strewed therupon doth the same, and likewise helpeth old Ulcers: Being boyled with Hogs Greas, it healeth al sorts of hard Swellings or Kernels in the Throat, being anointed therwith. The Juyce dropped into the Ears taketh away the pains of them.

Venemous Beasts, Heart, Fatnes, Yellow Jaundice, Flux, Bloody Flux, Wounds, Ulcers, Swellings, Kings Evil, Pain in the Ears.

It is a good remedy in the Spring, eaten (being first chopped smal and boyled well) in Water-gruel, to clens the Blood, and strengthen the Liver, thereby keeping the Body in health, and fitting it for that change of Season that is coming.

Clowns Woundwort.

Description.

IT groweth up somtimes to three or four Foot high, but usually about two Foot, with square, green, rough Stalks, but slender, joynted somwhat far asunder, and two very long, and somwhat narrow, dark green Leavs, bluntly dented about the edges thereat ending in a long point, The Flowers stand toward the tops compassing the Stalks at the Joynts with the Leavs and end likewise in a spiked top, having long and much open gaping hoods of a Purplish red colour, with whitish spots in them, standing in somwhat rough Husks, wherin afterwards stand blackish round Seeds. The Root is composed of many long strings, with some tuberous long Knobs growing among them, of a pale yellowish or whitish colour, yet at some times of the year these knobby Roots in many places are not seen in the Plant: The whol Plant smelleth somwhat strongly.

Place.

It groweth in sundry Counties of this Land both *North* and *west*, and frequently by Path sides in the Fields neer about *London*, and within three or four miles distance about it, yet it usually grows in or neer Ditches.

Time.

It Flowreth in *June* and *July*, and the Seed is ripe soon after.

Wounds, Ulcers, Blood, Cancers, Bloody Flux, Vessels broken, Ruptures, Spitting, pissing, and Vomiting Blood, Veins swelled, Muscles cut.

Vertues and use.

I is singularly effectual in all fresh and green Wounds, and therfore beareth not this name for nought. And is very available in stanching of Blood, and to dry up the Fluxes of Humors in old fretting Ulcers, Cancers, &c. that hinder the healing of them.

A Syrup made of the Juyce of it is inferior to none for inward Wounds, Ruptures of Veins, Bloody Flux, Vessels broken, spitting, pissing or vomiting Blood, Ruptures are excellently and speedily, even to admiration cured by taking now and then a little of the Syrup, and applying an Oyntment or Plaister of the Herb to the place. Also if any Vein be swelled, or Muscle cut, apply a Plaister of this Herb to it, and if you ad a little Comfry to it 'twil not do amiss, I assure the Herb deserves Commendations though it have gotten but a Clowniſh name, and whoever reades this (if he try it as I have done) will commend it as well as I.

I have done, only take notice, that it is of a dry Earthy quality, and under the Dominion of the Planet *Saturn*.

Cocks-Head.

Description.

THis hath diverſ weak, but rough Stalks, half a yard long, leaning downwards, beſet with winged Leavs, longer and more pointed than thoſe of Lentils, and whitiſh underneath; from the tops of theſe Stalks arise up other ſlender Stalks, naked without Leavs unto the tops, where there grow many ſmal Flowers in manner of a Spike, of a pale reddiſh colour, with ſome blueneſs among them: after which riſe up in their places, round, rough, and ſomwhat flat Heads. The Root is tough and ſomwhat woody, yet liveth and ſhooteth anew every yeer.

Place.

It groweth under Hedges, and ſomtimes in the open Fields, in diverſ places of this Land.

Time.

They Flower all the Months of *July* and *Auguſt*, and the Seed ripeneth in the mean while.

Vertues and use.

Knots and Kernels in the Flesh, Strangury, Milk in Cattel.

It hath a power to rarifie and digeſt, and therfore the green Leavs bruiſed and laid as a Plaister diſperſeth Knots, Nodes, or Kernels in the Fleſh, and if when it is dry it be taken in Wine, it helpeth the Strangury: and being anointed with Oyl, it provoketh Sweat. It is a ſingular Food for Cattel, to cauſ them to give ſtore of Milk, and why then may it not do the like being boyled in the ordinary drink of Nurſes.

Columbines.

THeſe are ſo wel known, growing in almoſt every Garden, that I think I may ſave the expence of time in writing a Deſcription of them.

Time.

They Flower in *May*, and abide not for the moſt part when *June* is paſt, perfecting their Seed in the mean time.

Vertues and use.

Sore Mouths & Throats, Obſtructions, yellow Jaundice, Womens Travail, Stone.

The Leavs of *Columbines* are commonly uſed in Lotions with good ſucceſs for ſore Mouths and Throats: *Tragus* ſaith, That a dram of the Seed taken in Wine with a little Saffron, openeth Obſtructions of the Liver, and is good for the yellow Jaundice, if the party after the taking therof be laid to ſweat wel in his Bed: The Seed alſo taken in Wine cauſeth a ſpeedy Delivery of Women in Childbirth; if one draught ſuffice not, let her drink a ſecond, and it is effectual: The Spaniards uſe to eat a piece of the Root hereof in a morning faſting, many daies together, to help them being troubled with the Stone in the Reins or Kidneys.

Coltsfoot, or Foalsfoot.

Tussilago.

Description.

THis ſhooteth up a ſlender Stalk with ſmall yellowiſh Flowers ſomwhat early, which fall away quickly, and after they are paſt, come up ſomwhat round Leavs, ſomtimes dented a little about the edges, much leſſer, thicker and greener than thoſe of Butterbur, with a little down or Freez over the green Leaf on the upper ſide, which may be rubbed away, and whitiſh or mealy underneath. The Root is ſmal and white ſpreading much under ground, ſo that where it taketh, it whil hardly be driven away again, if any little piece be abiding therin; and from thence ſpringeth freſh Leavs.

Place.

It groweth as well in wet grounds, as in drier places.

Time.

And Flowreth in the end of *February*, the Leavs beginning to appear in *March*.

Vertues and use.

Cough, Wheesing, ſhortneſs of breath,

The freſh Leavs, or Juyce, or a Syrup made therof is good for a hot dry Cough, for wheesings and ſhortneſs of breath. The dry Leavs are beſt for thoſe that have thin Rhewms, and Diſtillations upon the Lungs, cauſing a Cough,

Agues, Inflamations, Swelling, St. Anthonies fire, Burnings, Chollerick Pushes, Piles, Inflamations in the Privities.

Cough, for which also the dried Leavs taken as Tobacco, or the Root, is very good. The distilled water herof simply, or with Elder Flowers and Nightshade, is a singular remedy against al hot Agues, to drink two ounces at a time, and apply Cloathes wet therein to the Head and Stomach; which also doth much good being applied to any hot Swellings or Inflamations, it helpeth St. Anthonies Fire, and Burnings, and is singular good to take away Wheals, and smal Pushes that arise through heat; As also the burning heat of the Piles, or privy parts, cloathes wet therin being therunto applied.

Comfry.

Description.

THe common great *Comfry* hath divers very large and hairy green Leavs lying on the ground, so hairy or prickly that if they touch any tender part of the Hands, Face, or Body, it will caus it to itch: The Stalk that riseth up from among them being two or three Foot high, hollow and cornered, is very hairy also, having many such like Leavs as grow below, but lesser and lesser up to the top. At the Joynts of the Stalks, it is divided into many branches with some Leavs theron, and at the ends stand many Flowers in order one above another, which are somwhat long and hollow like the finger of a Glove, of a pale whitish colour, after which come smal black Seed. The Roots are great and long, spreading great thick Branches under ground, black on the outside and whitish within, short or easie to break, and ful of a glutinous or clammy Juyce of little or no tast at al.

There is another sort in al things like this, save only it is somwhat less, and beareth Flowers of a pale purple colour.

Place.

They grow by Ditches and Water Sides, and in divers Fields that are moist, for therin they chiefly delight to grow: The first generally through al the Land, and the other but in some several places.

By the leave of my Author, the first grow often in dry places.

Time.

They Flower in *June* and *July*, and give their Seed in *August*.

Vertues and use.

Spitting, pissing Blood, Inward Wounds & Bruises,

The great *Comfry* helpeth those that spit blood, or make a Bloody Urin; The Root boyled in Water or Wine and the Decoction drunk, helpeth al inward Hurts, Bruises and Wounds, and the Ulcers of the Lungs, causing the Flegm that oppresseth them to be easily spit forth; It staieth the defluxions of Rhewm from the Head upon the Lungs, the Fluxes of Blood or humors by the Belly, Womens immoderate Courses, as well the Reds, as the Whites; and the running of the Reins hapning by what caus soever. A Syrup made therof is very effectual for all those inward Griefs and Hurts; and the distilled Water for the same purpose also, and for outward Wounds and Sores in the Fleshy, or Sinewy part of the Body wheresoever; as also to take away the fits of Agues, and to allay the sharpness of Humors. A Decoction of the Leavs herof is available to all the purposes, though not so effectual as of the Roots. The Roots being outwardly applied, helpeth fresh Wounds or Cuts immediatly, being bruised and laid therunto; and is especial good for Ruptures and broken Bones: yea it is said to be so powerful to consolidate and Knit together; that if they be boyled with dissevered pieces of Flesh in a pot it will joyn them together again. It is good to be applied to Womens Breasts that grow sore by the abundance of Milk coming into them: as also to repress the overmuch bleeding of the Hemorrhoids to cool the Inflamation of the parts therabouts, and to give eas of pains. The Roots of Comfry taken fresh, beaten smal, and spread upon Leather, and laid upon any place troubled with the Gout, do presently give eas of the pains; and applied in the same manner giveth eas to pained Joynts and profiteth very much for running and moist Ulcers; Gangrenes, Mortifications, and the like, for which it hath by often experience been found helpful.

Phtisick, Bloody Flux, Terms stops, whites, Nervs cut, Musoles cut, sharp Humors, Wounds, Ruptures, broken Bones, Knotted Breasts, Hemorrhoids, Inflamation, Gout, Pained Joynts, Gangreans.

This is also an Herb of *Saturn*, and I suppose under the Sign *Capricorn*, cold, dry, and earthy in quality, what was spoken of Clowns Woundwort may be said of this.

Costmary, or Alecost.

THis is so frequently known to be an Inhabitant in almost every Garden, that I suppose it needless to write a Description therof.

Time.

It Flowreth in *June* and *July*.

Vertues and use.

Disury, Womb, Choller, Flegm, putrefaction, Corruption, Obstructions Quotidian Agues, Stomach,

The ordinary *Costmary* as well as *Maudlin*, provoketh Urin abundantly, and moistneth the hardness of the Mother; It gently purgeth Choller and Flegm, extenuating that which is grosse, and cutting that which is tough and gluttenous, clenseth that which is foul, and hindreth putrefaction and corruption, it dissolveth without Attraction, openeth Obstructions, and healeth their evil effects, and is a wonderful help to al sorts of day Agues. It is astringent to the Stomach, and strengtheneth

Liver, the Liver and al the other inward parts, and taken in Whey, worketh the more effectually. Taken fasting in the morning, it is very profitable for the pains in the Head that are continual, and to stay, dry up, and consume all thin Rhewms, or distillations from the Head into the Stomach, and helpeth much to digest raw humors that are gathered therein. It is very profitable for those that are fallen into a continual evil disposition of the whol Body called *Cachexia*, being taken especially in the beginning of the Disease: It is an especial friend and help to evil, weak, and cold Livers. The Seed is familiarly given to Children for the Worms, and so is the infusion of the Flowers in white Wine, given them to the Quantity of two ounces at a time: It maketh an excellent Salve to clens and heal old Ulcers, being boyled with Oyl Olive, and Adders Tongue with it: and after it is strained, to put a little Wax, Rozin, and Turpentine to bring it into a convenient Body.

Head-ach, Rhewm, Raw Humors, Cachexia, Worms, Ulcers.

Cudweed, or Cottonweed.

Description.

THe common *Cudweed* riseth up but with one Stalk somtime, and somtimes with two or three, thick set on all sides with small long, and narrow whitish or wooly Leavs from the middle of the Stalk almost up to the top; with every Leaf standeth a smal Flower, of a dun or brownish yellow colour, or not so yellow as others; in which Heads after the Flowers are fallen come smal Seed wrapped up with the down therin and is crried away with the Wind. The Root is small and thredy.

There are other sorts hereof, which are somwhat lesser than the former, not much different, save only that as the Stalk and Leavs are shorter, so the Flowers are paler, and more open.

Place.

They grow in dry, barren, sandy, and gravelly Grounds, in most places of this Land.

Time.

They Flower about *July*, some earlier, some later, and their Seed is ripe in *August*.

Vertues and use.

The Plants are all astringent, or binding and drying, and therfore profitable for Desinxions of Rhewm from the Head, and to stay Fluxes, of Blood wheresoever. The Decoction being made into red Wine and drunk, or the Pouder taken therin; it also helpeth the Bloody Flux, and easeth the torments that come therby, stayeth the immoderate Courses of Women, and is also good for inward or outward Wounds, Hurts, and Bruises, and helpeth Children both of Burstings and the Worms; and the Disease called *Tenasmus*, which is an often provocation to the Stool, and doing nothing, being either drunk or injected: The green Leavs bruised and laid to any green Wound staieth the bleeding, and healeth it up quickly: The Decoction or Juyce therof doth the same, and helpeth all old and filthy Ulcers quickly: The juyce of the Herb taken in Wine and Milk is (as *Pliny* saith) a Sovereign remedy against the Mumps and Quinsie; and further saith, That whosoever shal so take it, shal never be troubled with that Disease again.

Venus is Lady of it.

Binds, Dry, Fluxes, Terms ill stopped, Bind, Dry, Ruptures, Worms, Tenasmus, Wounds, Bleeding, Ulcers, Quinsy.

Cowslips.

BOth the Wild and Garden *Cowslips* are so wel known that I wil neither trouble my self nor the Reader with any description of them.

Time.

They Flower in *April* and *May*.

Vertues and Use.

The Flowers are held to be more effectual than the Leavs, and the Roots of little use.

An Oyntment being made with them taketh away Spots, and Wrinkles of the Skin, Sunburning and Freckles, and ads Beauty exceedingly: They remedy all infirmities of the Head coming of Heat and Wind, as Vertigo, Ephialtes, fals apparitions, Phrensies, Fallingsickness, Palsies, Convulsions, Cramps, Pains in the Nerves: The Roots eas pains in the Back and Bladder, and open the passages of Urine: The Leavs are good in Wounds, and the Flowers take away trembling: If the Flowers be not well dried and kept in a warm place, they wil soon putrifie and look green, have a special eye over them: if you let them see the Sun once a Month, it wil do neither the Sun nor them harm.

Becaus they strengthen the Brain and Nerves, and remedy Palsies the Greeks gave them the name *Prraliss*; The Flowers preserved or conserved, and the quantity of a Nutmeg eaten every morning, is a sufficient Dose, for inward Diseases, but for Wounds Spots, Wrinkles, and Sunburning, an Oyntment is made of the Leavs and Hogs greas.

Venus laies claim to the Herb as her own, and it is under the Sign *Aries*, and our City Dames know wel enough the Oyntment or Distilled Water of it, adds Beauty, or at least restores it when it is lost.

Spots, Wrinkles, Sunburning, Head Heat, Wind Beauty ads, Vertigo, Ephialtes, Convulsion, Cramp, Back Bladder, Wounds, Trembling, Frenzy, Fallingsickness, Palsey.

Sciatica-

Sciatica-Cresses.

Description.

THese are of two kinds; The first riseth up with a round Stalk about two foot high spread into divers Branches, whose lower Leavs are somwhat larger than the upper, yet all of them cut, or torn on the edges, somwhat like unto Garden-Cresses, but smaller: The Flowers are smal and white, growing at the tops of the Branches, where afterwards grow Husks with smal browniſh Seed therin, very strong and sharp in tast, more than the Cresses of the Garden: The Root is long, white and woody.

The other hath the lower leavs whol, somwhat long and broad not torn at al, but only somwhat deeply dented about the edges towards the ends, but those that grow up higher are lesser. The Flowers and Seed are like the former, and so is the Root likewise: and both Root and Seed as sharp as it.

Place.

These grow by the way sides in untilled places, and by the sides of old Walls.

Time.

They Flower in the end of *June*, and their Seed is ripe in *July*.

Vertues and use.

The Leavs, but especially the Roots taken fresh in the Sumer time, beaten & made into a Pultis or Salve, with old Hogs Greas, and applied to the place pained with the *Sciatica*, *Sciatica*, to continue theron four hours if it be on a Man, and two hours on a Woman; the place afterwards bathed with Wine and Oyl mixed together, and then wrapped with Wool or Skins after they have swet a little, wil assuredly cure not only the same Disease in the Hips, Huckleboне, or other of the Joynts, as the Gout in *Gout, Head-ach, Rhewms,* the Hands or Feet, but all other old Griefs of the Head (as inveterate Rhewms) and other part of the Body that is hard to be cured: And if of the former Griefs any part remain; the same Medicine after twenty daies is to be applied again. The same is also effectual in the Diseases of the Spleen: and applied to the *Spleen, Scars, Leprosie, Scurf, Scabs.* Skin it taketh away the blemishes therof, whether they be Scars, Leprosie, Scabs or Scurf: which although it exulcerate the part, yet that is to be helped afterwards with a Salve made of Oyl and Wax.

Esteem of this as another Secret.

Water-Cresses.

Description.

OUr ordinary *Water-Cresses* spreadeth forth with many weak hollow sappy Stalks, shooting out fibres at the Joynts, and upwards, long winged Leavs, made of sundry broad, sappy and almost round Leavs of a browniſh green colour. The Flowers are many and white, standing on long Footstalks, after which come smal yellow Seed, contained in smal long pods like Horns: The whol Plant abideth green in the Winter, and tasteth somwhat hot and sharp.

Place.

They grow (for the most part) in the smal standing Waters, yet sometimes in smal Rivulets of running Water.

Time.

They Flower and Seed in the beginning of Summer.

Vertues and use.

They are more powerful against the Scurvy, *Scurvy,* and to clens the Blood and Humors than *Blood, Hu-* Brooklime is, and serve in al the other uses in *mors, Ston* which Brooklime is available, as to break the *Disury,* Stone, and provoke Urin, and Womens Cour- *Terms pro-* ses. The Decoction therof clenseth Ulcers *voke, Ul-* by washing them therwith. The Leavs bruised, *cers, Frec-* or the Juyce, is good to be applied to the Face, *kles, Pim-* or other parts troubled with Freckles, Pimples, *ples, Spots,* Spots, or the like, at night, and washed away *Dulness,* in the morning, The Juyce mixed with Vi- *Lethargy.* neger, and the forepart of the Head bathed therwith, is very good for those that are dull and drowsie, or have the Lethargy.

Water-cres Pottage is a good Remedy to clens the Blood in the Spring, and help Headaches, and consume the gros Humors Winter hath left behind, those that would live In health may use it if they pleas, if they will not I cannot help it: If any fancy not Pottage they may eat the Herb as a Sallet.

Crosswort.

Description.

THe Common *Croßwort* groweth up with square hairy brown Stalks, little above a Foot High, having four smal broad and pointed hairy, yet smooth green Leavs, growing at every Joynt, each against other Cros waies, which hath caused the name: Toward the tops of the Stalks at the Joynts with the Leavs in three or four rows upwards, stand smal pale, yellow Flowers, after which come smal blackish,

kiſh, round Seed, four for the moſt part ſet in every Husk. The Root is very ſmal and full of Fibres, or Threads, taking good hold of the ground, and ſpreading with the Branches a great deal of ground, which periſheth not in Winter, although the Leavs die every year, and ſpring again anew.

Place.

It groweth in many moiſt grounds as well Meadows, as untilled places about *London*. In *Hamſted* Church-yard, at *Nye* in *Kent*, and ſundry other places.

Time.

It Flowreth from *May* al the Summer long in one place or other, as they are more open to the Sun; and the Seed ripeneth ſoon after.

Vertues and uſe.

Wounds inward & outward, Flegm, Obſtructions, Stomach, Bowels, Ruptures.

This is a ſingular good Wound Herb, and is uſed inwardly, not only to ſtay bleeding of Wounds, but to conſolidate them, as it doth outwardly any green Wounds, which it quickly ſodereth up and healeth. The Decoction of the Herb in Wine, helpeth to expectorate Flegm out of the Cheſt, and is good for Obſtructions in the Breaſt, Stomach, or Bowels, and helpeth a decayed Appetite; It is alſo good to waſh any Wound or Sore with, to clenſ and heal it: The Herb bruiſed and then boyled and applied outwardly for certain daies together, renewing it often, and in the mean time, the Decoction of the Herb in Wine taken inwardly every day, doth certainly cure the Rupture in any, ſo as it be not too inveterate; but very ſpeedily if it be freſh and lately taken.

Crowfoot.

ABundance are the ſorts of this Herb, that to deſcribe them all would tire the Patience even of *Socrates* himſelf, but becauſ I have not yet attained to the Spirit of *Socrates*, I ſhall but deſcribe the moſt uſual.

Deſcription.

The moſt common *Crowfoot* hath many dark green Leavs cut into diverſ parts, in taſt biting & ſharp, biting & bliſtering the Tongue, it bears many Flowers and thoſe of a bright reſplendent yellow colour, I do not remember that ever I ſaw any thing yellower, Virgins in Ancient time uſed to make Pouder of them to ſtrew Bride Beds, after which Flowers come ſmal heads of Seeds, round, but tugged like a Pine Apple.

Place.

They grow very common every where, unleſs you run your Head into a Hedg you cannot chuſe but ſee ſome of them wherever you walk.

Time.

They Flower in *May* and *June*, even till *September*.

Names.

Many are the Names this furious biting Herb hath obtained, almoſt enough to make up a Welch-mans Pedegree, if he fetch it no further than *John* of *Gaunt* of *William* the Conqueror, for it is called *Frogs-foot* from the Greek name βατραχιον, *Crowfoot*, *Gold Knobs*, *Gold Cups*, *King Kob*, *Baſſinets*, *Troll Flower*, *Polts*, *Locker Goulons*, and *Buttter-Flowers*.

Vertues and uſe.

This fiery and hot ſpirited Herb of *Mars* is no way fit to be given inwardly, but an Oyntment of the Leavs or Flowers wil draw a Bliſter, and may ſo be fitting applied to the nape of the Neck to draw back Rhewm from the Eyes, the Herb being bruiſed and mixed with a little Muſtard, draws a Bliſter as well and as perfectly as Cantharides, and with far leſs danger to the Veſſels of Urin, which Cantharides Naturally delight to wrong, I knew the Herb once applied to a Peſtilential riſing that was falling down, and it ſaved life even beyond hope, it were good keeping an Oyntment and Plaiſter of it if it were but for that.

Cuckowpint, or VVake-Robin.

Deſcription.

THis ſhooteth forth three, four, or five Leavs at the moſt from one Root, every one wherof is ſomwhat large and long, broad at the bottom next the Stalk, and forked, but ending in a point, without cut on the edges, of a ful green colour, each ſtanding upon a thick round Stalk, of a hands breadth long or more: among which after two or three Months that they begin to wither, riſeth up a bare round whitiſh green Stalk, ſpotted and ſtraked with purple, ſomwhat higher than the Leavs: at the top wherof ſtandeth a long hollow Hoſe or Husk, cloſe at the bottom, but open from the middle upwards ending in a point; in the middle wherof ſtandeth a ſmal long Peſtle or Clapper, ſmaller at the bottom than at the top, of a dark purple colour as the Husk is on the inſide, though green without; which after it hath ſo abidden for ſome time, the Husk with the Clapper decayeth, and the foot or bottom therof groweth to be a ſmal long Bunch of Berries, green at the firſt, and of a yellowiſh red colour when they are ripe, of the bigneſs of an Hazel Nut Kernel; which abide theron almoſt until Winter; The Root is round and

and somwhat long, for the most part lying along, the Leavs shooting forth at the bigger end, which when it beareth his Berries, is somwhat wrinkled and loos, another being growing under it, which is solid and firm with many smal threads hanging therat: The whol Plant is of a very sharp biting tast, pricking the Tongue as Nettles do the Hands, and so abideth for a great while without alteration: The Root hereof was anciently used instead of Starch to starch Linnen withal.

There is another sort of *Cuckowpint*, with lesser Leavs than the former, and somwhat harder, having blackish spots upon them which for the most part abide longer green in Summer than the former; and both Leavs and Roots are more sharp and fierce than it: In al things els it is like the former.

Place.

These two sorts grow frequently almost under every Hedg side in many places of this Land.

Time.

They shoot forth Leavs in the Spring, and continue but until the middle of Summer, or somwhat later, their Husks appearing before they fall away; and their Fruit shewing in *August*.

Vertues and Use.

Tragus reporteth that a dram weight, or more if need be, of the sported *Wake-Robin*, either fresh and green, or dried, being beaten and taken is a most present and sure Remedy for Poyson and the Plague. The Juyce of the Herb taken to the quantity of a spoonful hath the same effect. But if there be a little Vinegar added therunto as well as unto the Root aforesaid, it somwhat allayeth the sharp biting tast therof upon the Tongue. The green Leavs bruised and laid upon any Boyl or Plague Sore, doth wonderfully help to draw forth the Poyson: A dram of the Pouder of the dried Root taken with twice so much Sugar in the form of a licking Electuary, or the green Root doth wonderfully help those that are pursie and short winded, as also those that have a Cough; it breaketh, digesteth, and riddeth away Flegm from the Stomach, Chest, and Lungs. The Milk wherin the Root hath been boyled is effectual also for the same purpose. The said Pouder taken in Wine or other Drink; or the Juyce of the Berries, or the Pouder of them; or the Wine wherein they have been boyled, provoketh Urine, and bringeth down Womens Courses, and purgeth them effectually after Child-bearing to bring away the After-birth. Taken with Sheeps Milk it healeth the inward Ulcers of the Bowels. The distilled Water herof is effectual to all the purposes aforesaid; A spoonful taken at a time healeth the Itch; And an ounce or more taken at a time for some daies together doth help the Rupture; The Leavs either green or dry, or the Juyce of them, doth clens all manner of rotten and filthy Ulcers in what part of the Body soever, and healeth the stinking Sores in the Nose called *Polipus*. The Water wherin the Root hath been boyled dropped into the Eyes, clenseth them from any Film or Skin, Clouds or Mists which begin to hinder the Sight, and helpeth the watering or redness of them; or when by some chance they become black and blue. The Root mixed with Bean Flower and applied to the Throat or Jaws that are inflamed helpeth them. The Juyce of the Berries boyled in Oyl of Roses, or beaten into Pouder and mixed with the Oyl, and dropped into the Ears and easeth pains in them. The Berries or the Roots beaten with hot Ox Dung, and applied, easeth the pains of the Gout. The Leavs and Roots boyled in Wine with a little Oyl, and applied to the Piles, or the falling down of the Fundament easeth them; and so doth sitting over the hot fumes therof. The fresh Roots bruised, and distilled with a little Milk, yieldeth a most Sovereign Water to clens the Skin from Scurff, Freckles, Spots, or Blemishes whatsoever therin.

Authors have left large Commendation of this Herb you see, but for my part I have neither spoken with Dr. *Reason*, nor Dr. *Experience* about it.

Daisies.

THese are so well known to almost every Child, that I suppose it is altogether needless to write any Description of them. Take therfore the Vertues of them as followeth.

Vertues and Use.

The greater wild *Daisie* is a Wound Herb of good respect, often used in those Drinks or Salvs that are for Wounds, either inward or outwards. The Juyce or distilled Water of these, or the smal *Daisies*, doth much temper the heat of Choller, and refresheth the Liver and other inward parts. A Decoction made of them and drunk, helpeth to cure the Wounds made in the hollowness of the Breast: The same also cureth al Ulcers and Pustles in the Mouth or Tongue, or in the secret parts. The Leavs bruised and applied to the Cods, or to any other parts that are swollen and hot, doth resolve it and temper the Heat: A Decoction made hereof with Walwort and Agrimony, and the places fomented or bathed therewith warm, giveth great eas to them that are troubled with the Palsy, *Sciatica*, or the Gout. The same also dispersseth and dissolveth the Knots or Kernels that grow in the Flesh of any

Poyson, Plague, Boyl, Difficulty of breath, Cough, Flegm, Disury, Terms provokes, Afterbirth Ulcers, Itch, Ruptures, Polipus, Eyes, Throat, Jaws, Gout, Piles, or Hemorrhoids, Fundament falling down, Scurf, Freckles, Spots, Blemishes, Wounds, inward & outward, Choller, Liver, Breast, ulcers, Swellings, Kernels,

Bruises, Falls, Ruptures, Burnings, Inflamations.

ny part of the Body, and the Bruises and Hurts that come of Fals and Blows: They are also used for Ruptures, and other inward Burnings with very good success. An Oyntment made hereof doth wonderfully help al Wounds that have Inflamations about them, or by reason of moist humors having access unto them, are kept long from healing, and such are those for the most part that happen in the Joynts of the Arms or Legs. The Juyce of them dropped into the running Eyes of any doth much help them.

The Herb is under the Sign *Cancer*, and under the Dominion of *Venus*, and therfore excellent good for Wounds in the Breast, and very fitting to be kept both in Oyls, Oyntments, and Plaisters, as also in Syrup.

DANDELYON,

Vulgarly called, Piss-a-beds.

Description.

THis is wel known to have many long and deeply gashed Leavs lying on the ground, round about the Head of the Root; the ends of each Gash or Jag on both sides looking downwards towards the Root, the middle rib being white which broken yieldeth abundance of bitter Milk, but the Root much more: from among the Leavs which alwaies abide green, arise many slender, weak, naked Foorstalks, every one of them bearing at the top one large yellow Flower, consisting of many rows of yellow Leavs, broad at the points and nicked in, with a deep spot of yellow in the middle, which growing ripe, the green Husk wherin the Flower stood, turneth it self down to the Stalk, and the Head of down becometh as round as a Ball, with long reddish Seed underneath, bearing a part of the Down on the Head of every one, which together is blown away with the Wind, or may be at once blown away with ones Mouth. The Root growth downwards exceeding deep, which being broken off within the ground, wil notwithstanding shoot forth again; and wil hardly be destroyed where it hath once taken deep Root in the ground.

Place.

It groweth frequent in al Meadows and Pasture Grounds.

Time.

It Flowreth in one place or other almost all the yeer long.

Vertues and use.

Openeth, Clenseth, Obstructions,

It is of an opening and clensing quality, and therfore very effectual for the Obstructions of the Liver, Gall, and Spleen, and the Diseases that arise from them, as the Jaundice, & Hypocondriacal Passion: It wonderfully openeth the Passages of the Urin both in yong and old. It powerfully clenseth Aposthumes, and inward in the Urinory passages, and by the drying and temperate quality doth afterwards heal them; for which purpose the Decoction of the Roots or Leavs in white Wine, or the Leavs chopped as Potherbs with a few Allisanders and boyled in their Broth, is very effectual. And whoso is drawing towards a Consumption, or an il Disposition of the whol Body called *Cachexia*, by the use herof for some time together shal find a wonderful help: It helpeth also to procure rest and sleep to Bodies distempered by the Heat of Ague Fits, or otherwise. The distilled Water is effectual to drink in Pestilential Feavers, and to wash the Sores.

Liver, Gall, Spleen, Jaundice, Hypochondriacal Melancholly, Disury, Consuption, Cachexia, Watching, Heat, Ague, Pestilence.

You see here what Vertues this common Herb hath, and that's the reason you French and Dutch so often eat them in the Spring; and now if you look a little further you may see plainly without a pair of Spectakles, that Forraign Physitians are not so selfish as ours are, but more communicative of the Vertues of Plants to People.

Darnel.

Description.

THis hath all the Winter long, sundry long, fat, and rough Leavs, which when the Stalk riseth, which is slender and joynted, are narrower, but rough stil; on the top groweth a long spike composed of many Heads, set one above another, containing two or three Husks with sharp, but short Beards or awns at the ends; the Seed is easily shaked out of the Ear, the Husk it self being somwhat tough.

Place.

The Country Husbandmen do know this too well to grow among their Corn: or in the Borders and Pathwaies of other Fields that are fallow.

Vertues and use.

As this is not without some Vices, so hath it also many Vertues. The Meal of *Darnel* is very good to stay Gangreans, and other such like fretting and eating Cankers, and putrid Sores: It also clenseth the Skin of al Lepries, Morphews, Ringworms, and the like, if it be used with Salt and Rhadish Roots. And being used with quick Brimstone and Vinegar, it dissolveth Knots and Kernels, and breaketh those that are hard to be dissolved, being boyled in Wine with Pidgeons Dung and Linseed: A Decoction therof made with Water and Honey, and the place bathed therwith, is profitable for the *Sciatica*. *Darnel* Meal applied

Gangreans, Cankers, Leprosie, Morphew, Ringworms, Sciatica,

Thorns, Splinters, broken Bones, Diabets.

plied in a Pultis, draweth forth Splinters and broken Bones in the Flesh: The red *Darnel* boyled in red Wine and taken, stayeth the Lask and all other Fluxes, and Womens bloody Issues; and restraineth Urin that passeth away too suddenly.

Dill.

Description.

THe common *Dill* groweth up with seldom more than one Stalk, neither so high, nor so great usually as Fennel, being round, and with fewer Joynts theron, whose Leavs are sadder, and somwhat long, and so like Fennel that it deceiveth many; but harder in handling and somwhat thicker, and of a stronger unpleasanter set: The tops of the Stalks have four Branches and smaller Umbels of yellow Flowers, which turn into smal Seed somwhat flatter and thinner than Fennel Seed. The Root is small and woody, perishing every year after it hath born Seed; and is also unprofitable, being never put to any use.

Place.

It is most usually sown in Gardens, and Grounds for the purpose, & is also found wild with us in some places.

Vertues and use.

Swellings, Pains, Loosness, Vomiting, Mother, Hiccough, Raw and tough Humors. Wind, Apostums, Ulcers.

The *Dill* being boyled and drunk is good to eas Swellings & pains, it also stayeth the Belly, and Stomach from casting: The Decoction thereof helpeth Women that are troubled with the Pains and Windiness of the Mother, if they sit therin. It stayeth the Hiccough, being boyled in Wine and but smelled unto, being tied in a Cloth. The Seed is of more use than the Leavs, and more effectual to digest raw and viscuous humors, and is used in Medicines that serve to expel Wind and the pains proceeding therfrom. The Seed being toasted or fried, and used in Oyls or Plaisters, dissolveth the Imposthumes in the Fundament, and drieth up all moist Ulcers (especially in the secret parts.) The Oyl made of *Dill* is effectual to warm, to resolve Humors and Imposthumes, to eas pains and to procure rest.

Terms provokes.

The Decoction of Dill be it Herb or Seed (only if you boyl the Seed you must bruis it) in white Wine, being drunk is a gallant expeller of Wind and provoker of the Terms.

Devils-bit.

Description.

THis riseth up with a round, green, smooth Stalk about two foot high, set with divers long and somwhat narrow, smooth, dark, green Leavs, somwhat snip'd about the edges for the most part, being els al whol and not divided at al or but very seldom, even to the tops of the Branches which yet are smaller than those below, with one Rib only in the middle: At the end of each Branch standeth a round Head of many Flowers set together in the same manner or more neatly than the Scabious, and of a more blewish purple colour; which being past there followeth Seed that falleth away. The Root is somwhat thick, but short and blackish with many Strings, abiding after Seed time many yeers. This Root was longer untill the Devil (as the Fryars say) bit away the rest of it for spight, envying its usefulness unto Man-kind. For sure he was not troubled with any Disease for which it is proper.

A Learned Tale that cost a dull Fryar seven yeers study.

There are two other sorts hereof in nothing unlike the former, save that the one beareth White, and the other Blush colour'd Flowers.

Place.

The first groweth as well in dry Meadows and Fields, as moist, in many places of this Land: But the other two are more rare, and hard to meet with, yet they are both found growing wild about *Appledore*, neer *Rye* in *Kent*.

Time.

They Flower not usually untill *August*.

Vertues and use.

Pestilence, Feavers, Poyson, Venemous Beasts, Bruises, Falls, Clotted Blood, Swellings of the Throat, Mother, Wind, worms, wounds, Scurff, Itch, Dandriff, Pimples, Freckles, Morphew.

The Herb or Root (all that the Devil hath left of it) being boyled in Wine and drunk is very powerful against the Plague, and all Pestilential Diseases or Feavers, Poysons also, and the bitings of Venemous Beasts; It also helpeth those that are inwardly bruised by any casualty, ar outwardly by Falls or Blows, dissolving the clotted Blood: and the Herb or Root beaten and outwardly applied, taketh away the black and blue Marks that remain in the Skin. The Decoction of the Herb, with Honey of Roses put therin is very effectual to help the inveterate tumors and Swellings of the Almonds and Throat, by often gargling the Mouth therwith. It helpeth also to procure Womens Courses, and easeth all pains of the Mother, and to break and discuss Winds therein and in the Bowels. The Pouder of the Root taken in Drink, driveth forth the Worms in the Body: The Juyce, or distilled Water of the Herb is effectual for green Wounds, or old Sores, and clenseth the Body inwardly, and the Seed outwardly, from Sores, Scurff, Itches, Pimples, Freckles, Morphew, or other deformities therof, but especially if a little Vitriol be dissolved therin.

Dock.

THese are so wel known many kinds of them, that I shall not trouble you with a Description of them; my Book grows big too fast.

Vertues and use.

All of them have a kind of cooling (but not all alike) drying quality the Sorrels being most cold, and the Bloodworts most drying: Of the Bur-Dock I have spoken already by himself. The Seed of most of the other kinds whether of the Garden or Field, do stay Lasks or Fluxes of all sorts, the loathings of the Stomach through Choller, and is helpful to those that spit Blood. The Roots boyled in Vinegar helpeth the Itch, Scabs, and breakings out of the Skin, if it be bathed therwith. The Distilled Water of the Herb and Roots hath the same Vertue, and clenseth the Skin of Freckles, Morphews, and all other Spots and Discolourings therin.

Flux, Loathing of Meat, Spitting Blood, Scabs, Itch, Freckles, Morphew.

All Docks being boyled with Meat, make it boyled the sooner: Beside Bloodwort is exceeding strengthning to the Liver, and procures good Blood, being as wholsom a Pot Herb as any grows in a Garden, yet such is the nicity of our times forsooth, that Women will not put it in the Pot becaus it makes the Pottage black, Pride and Ignorance (a couple of Monsters in the Creation) preferring Nicity before Health.

Dodder of Time, or Epithimum, and other Dodders.

Description.

THis first from Seeds giveth Roots in the Ground, which shooteth forth threads or Strings, grosser or finer, as the property of the Plant wherein it groweth, and the Climate doth suffer, creeping and spreading on that Plant wheron it fastneth, be it high or low. These Strings have no Leavs at all upon them, but wind and interlace themselves so thick upon a smal Plant that it taketh away all comfort of the Sun from it, and is ready to choke or strangle it: After these Strings are risen up to that Height that they may draw Nourishment from the Plant, they seem to be broken off from the ground, either by the strength of ther rising, or withered by the heat of the Sun. Upon these Strings are found clusters of small Heads or Husks, out of which start forth whitish Flowers, which afterwads give smal pale colour'd Seed somwhat flat, and twice as big as Poppy Seed. It generally participates of the Nature of that Plant which it climbeth upon, but the *Dodder of Time* is accounted the best, and is the only true *Epithimum*.

Vertues and use.

This is accounted the most effectual for Melancholick Diseases, and to purge black or burnt Choller, which is the caus of many Diseases of the Head and Brains, as also for the trembling of the Heart, faintings, and Swounings. It is helpful in all Diseases and Griefs of the Spleen, and of that Melancholly that ariseth from the windines of the *Hypochondria*. It purgeth also the Reins or Kidneys by Urin. It openeth Obstructions of the Gall, wherby it profiteth them that have the Jaundice; as also of the Liver, and Spleen; purging the Veins of Chollerick and Flegmatick Humors, and helpeth Childrens Agues, a little Wormseed being put therto.

Melancholly, Adust Choller, Trembling, fainting, swooning, Spleen, Hypochondria, Obstructions, Gall, Jaundice, Liver,

The other *Dodders* do (as I said before) participate of the Nature of those Plants whereon they grow: As that which hath been found growing upon Nettles in the West Country, hath by experience been found very effectual to procure plenty of Urin, where it hath been stopped or hindred. And so of the rest.

Disury,

All *Dodders* are under *Saturn*, Tell not me of Physitians crying up *Epithimum*, or that *Dodder* which grows upon *Time* (most of which comes from *Hymettus* in *Greece*, or *Hybla* in *Sicilia*, becaus those Mountains abound with *Time*) he is a Physitian indeed that hath wit enough to chuse his *Dodder* according to Nature of the Disease and Humor peccant, we confess, *Time* is the hotest Herb it usually grows upon, and therfore that which grows upon *Time* is hotter than that which grows upon colder Herbs, for it draws Nourishment from what it grows upon as well as from the Earth where its Root is, and thus you see old *Saturn* is wise enough to have two Strings to his Bow.

Sympathy and *Antipathy*, are the two Hinges upon which the whol Moddel of Physick turns, and that Physitian which minds them not is like a Door off from the Hooks, more likely to do a man a mischief than to secure him: then all the Diseases Saturn causeth, this helps by *Sympathy*, & strengthens al the parts of the Body he rules, such as caused by *Sol* it helps by *Antipathy*, what those Diseases are see my Judgment of Diseases by Astrology, and you be pleased to look the Herb Wormwood, you shal find a Rational way for it.

Dogs

Dogs-Grass; or Quich-Grass.

Description.

IT is well known that this Grass creepeth far about under ground with long white joynted Roots, and smal fibres almost at every Joynt very sweet in tast, as the rest of the Herb is, and interlacing one another, from whence shoot forth many fair long grassy Leavs, small at the ends and cutting or sharp on the edges. The Stalks are joynted like Corn with the like Leavs on them, and a long spiked Head with long Husks on them and hard rough Seed in them.

Place.

It groweth commonly through this Land in divers plowed grounds, to the no smal trouble of the Husbandman, as also of the Gardiners in Gardens to weed it out if they can, for it is a constant Customer to the place it gets footing in.

Vertues and use.

This is the most Medicinable of all the *Quich-grasses*: Being boyled and drunk it openeth Obstructions of the Liver and Gall, and the stoppings of the Urin, and easeth the griping pains of the Belly, and Inflamations; wasteth the matter of the Stone in the Bladder, and the Ulcers thereof also: The Roots brused and applied doth consolidate Wounds: The Seed doth more powerfully expel Urin, and stayeth the Lask, and Vomitings; The distilled Water alone, or with a little Wormseed killeth the Worms in Children.

Liver, Gall, Disury, Griping, Inflamation, Ulcers, in the Bladder, Wounds, Vomiting, Worms,

The way of use is to bruis the Roots, and having well boyled them in white Wine, drink the Decoction; 'tis opening, but not purging very safe; 'tis a Remedy against all Diseases coming of Stopping and such are half those which are incident to the Body of man; and although a Gardiner be of another opinion, yet a Physitian holds half an Acre of them to be worth five Acres of Carrots twice told over.

Stopping.

Dovesfoot, or Cranes-bill.

Description.

THis hath divers small, round, pale, green Leavs, cut in about the edges, much like Mallows, standing upon long reddish hairy Stalks lying in a round compass upon the ground; among which rise up two or three, or more reddish Joynted, slender, weak, and hairy Stalks, with some such like Leavs thereon, but smaller, and more cut in up to the tops, where grow many very smal, bright, red Flowers of five Leavs apiece, after which follow smal Heads, with smal short beaks pointing forth, as all other sorts of these Herbs do.

Place.

It groweth in Pasture Grounds, and by the Path sides in many places, and wil also be in Gardens.

Time.

It Flowreth in *June*, *July*, and *August*, some earlier, and some later, and the Seed is ripe quickly after.

Vertues and use.

It is found by experience to be singular good for the Wind Chollick, and pains thereof, as also to expel the Stone and Gravel in the Kidnies. The Decoction thereof in Wine is an exceeding good Wound Drink for those that have inward Wounds, Hurts, or Bruises, both to stay the bleeding, to dissolve and expel the congealed Blood, and to heal the parts, as also to clens and heal outward Sores, Ulcers, and Fistulaes; and for green Wounds many do but bruise the Herb, and apply it to the place, and it healeth them quickly. The same Decoction in Wine fomented to any place pained with the Gout, or to Joynt-aches, or pain, of the Sinews giveth much eas. The Pouder, or Decoction of the Herb taken for some time together is found by experience to be singular good for Ruptures, and Burstings in People, either yong or old.

Chollick, Stone, Gravel, Wounds, Congealed Blood, Sores, Ulcers, Fistulaes, Gout, Sinews, Ruptures.

Ducksmeat.

THis is so well known to swim on the top of standing Waters, as Ponds, Pools, and Ditches, that it is needless further to describe it.

Vertues and use.

It is effectual to help Inflamations, and St. Anthonies fire, as also the Gout, either applied by it self, or in a Pultis with Barley Meal. The distilled Water herof is by some highly esteemed, against all inward Inflamations, and Pestilent Feavers; as also to help the redness of the Eyes, the Swellings of the Cods, and of the Breasts before they be grown too much. The fresh Herb applied to the Forehead, easeth the Pains of the Head-ach coming of heat.

Inflamations, St. Anthonies Fire, Pestilenee, Eyes Swillings of the Cods, Headach.

Cancer claims the Herb, and the *Moon* wil be Lady of it, a word is enough to a Wise man.

Down,

Down, or Cotton-Thistle.

Description.

THis hath many large Leavs lying on the ground, somwhat cut in, and as it were crumpled on the edges, of a green colour on the upper side, but covered over with a long hairy Wool, or Cottony Down, set with most sharp, and cruel pricks; from the middle of whose Heads of Flowers, thrust forth many Purplish, Crimson Treds, and somtimes (although more seldom) white ones. The Seed that followeth in these Heads, lying in a great deal of fine white Down is somwhat large, long, and round, like the Seed of Ladies Thistle, but somwhat paler. The Root is great and thick spreading much, yet it usually dieth after Seed time.

Place.

It groweth on divers Ditches Banks, and in the Corn-fields, and High-waies generally every where throughout the Land.

Time.

It Flowreth and beareth Seed about the end of Summer, when other Thistles do Flower and Seed.

Vertues and use.

Pliny and *Dioscorides* write, That the Leavs & Roots hereof taken in Drink, helpeth *Wry Neck,* those that have a Crick in their Neck, whereby they cannot turn their Neck but their whol Body must turn also (Sure they do not mean those that have got a Crick in their Neck by being under the Hangmans Hands,) *Galen* saith that the Root and Leavs hereof are of an heating quality, and good for such Persons as have their Bodies drawn together by some *Spasme* or Convulsion; as it is with Children *Spasmus, Convulsion* that have the Rickets, or rather (as the *Colledg* of *Physitians* will have it) the *Rachites*, *Rickets,* for which name for the Disease, they have (in a particular Treatise lately set forth by them) Learnedly Disputed, and put forth to the publick view, that the World may see, they took much pains to little purpose.

Mars owns the Plant, and manifests to the World, that though it may hurt your Fingers it will help your Body, for I fancy it much for the Premises.

The Elder-Tree.

IHold it needless to write any Description of this, sith every Boy that plaies with a Potgun, will not mistake another Tree instead of Elder. I shall therfore in this place only describe the *Dwarf Elder*, called also *Danewort*, and *Walewort*.

The Dwarf Elder.

THis is but an Herb every yeer dying with his Stalks to the ground, and rising again afresh every Spring; and is like unto the Elders both in form and quality, rising up with a four square rough hairy Stalk four foot high or more somtimes. The winged Leavs are somwhat narrower than the Elder, but else very like them. The Flowers are white with a dash of Purple standing in Umbels, very like the Elder also, but more sweet in scent, after which come smal blackish Berries, full of Juyce while they are fresh, wherein there lie smal hard Kernels or Seed. The Root doth creep under the upper crust of the ground, springing afresh in divers places being of the bigness of ones finger or Thumb somtimes.

Places.

The *Elder-Tree* groweth in Hedges, being planted there to strengthen the Fences, and Partitions of Grounds, and to hold up the Banks by Ditches, and Water-courses.

The *Dwarf Elder* groweth Wild in many places of *England*, where being once gotten into a Ground it is not easily gotten forth again.

Times.

Most of the *Elder-Trees* Flower in *June*, and their Fruit is ripe for the most part in *August*.

But the *Dwarf Elder*, or *Wallwort* Flowreth somwhat later, and his fruit is not ripe until *September*.

Vertues and Use.

The first Shoots of the common *Elder* boyled like Asparagus, & the yong Leavs & Stalks boyled in Fat Broth, doth mightily carry forth Flegm and Choller. The middle or inner *Flegm,* Bark boyled in Water, and given to drink *Choller,* worketh much more violently; and the Berries either green or dry; expel the same humors, and is often given with good success to help the Dropsie. The Bark of the Root *Dropsie,* boyled.

boyled in Wine, or the Juyce therof drunk, worketh the same effects, but more powerfully than either the Leavs or Fruit. The Juyce of the Root taken doth mightily provoke Vomit, and purgeth the watery Humors of the Dropsie. The Decoction of the Root taken
Venemous Beasts, Mad Dogs, cureth the biting of the Adder, and biting of Mad Dogs; It mollifieth the hardness of the
Terms provokes. Mother, if Women sit therin, and openeth the Veins, and bringeth down their Courses:
Inflamation, The Berries boyled in Wine performeth the same effect; and the hair of the Head washed therwith is made black. The Juyce of the green Leavs applied to the hot Inflamations of the Eyes, asswageth them. The Juyce of
Brain, the Leavs snuffed up into the Nostrils purgeth the Tunicles of the Brain. The Juyce of the
Ears, Berries boyled with a little Honey and dropped into the Ears, helpeth the pains of them.
Urine provokes, The Decoction of the Berries in Wine being drunk provoketh Urine. The distilled Water
Sunburning, Freckles, Morphew. of the Flowers is of much use to clear the Skin from Sunburning, Freckles, Morphew, or the like; and taketh away Headaches coming of a cold cause, the Head being bathed therwith.
Headach, Ulcers. The Leavs or Flowers distilled in the Month of *May*, and the Legs often washed with the said distilled Water, it taketh away the Ulcers and Sores of them: The Eyes washed therewith, it taketh away the redness and Bloodshot: And the Hands washed morning and
Palsey. evening therwith helpeth the Palsey, and shaking of them.

The *Dwarf Elder* is more powerful than the Common Elder, in opening and purging Choller, Flegm, and Water, in helping the
Gout Inflamation, Burning, Scalding, Chollick, Stone, Disury. Gout, the Piles, and Womens Diseases, coloreth the Hair black, helpeth Inflamation in the Eyes, and pains in the Ears; the biting of Serpents or a Mad Dog, Burnings and Scaldings, the wind Chollick, Chollick and Stone, the difficulty of Urine, the cure of old Sores, and Fistulous Ulcers.

Either Leavs or Bark of Elder stripped upward as you gather it causeth Vomiting, but stripped downward it purgeth downwards. Also Dr. *Butler* in a Manuscript of his commends *Dwarf Elder* to the Sky for Dropsies, *viz.* to drink it being boyled in white Wine, to drink the Decoction I mean, not the Elder.

The Elm-Tree.

THis Tree is so well known, growing generally in all Countries of this Land; that it is needless to describe it.

Vertues and Use.

The Leavs herof bruised, and applied healeth green Wounds being bound thereon with its own Bark; The Leavs or the Bark used with Vinegar, cureth Scurf, and Lepry very
Wounds, Scurff, Leprosie, effectually: The Decoction of the Leavs, Bark, or Root, being bathed, healeth broken Bones. The Water that is found in the Bladders on the Leavs, while it is fresh, is very effectual to clense the Skin and make it fair: and
Beauty, if clothes be often wet therin and applied to the Ruptures of Children it helpeth them; if
Ruptures, they be after wel bound up with a Truss. The said Water put into a Glass, and set in the Ground, or elf in Dung for twenty five daies, the Mouth therof being close stopped; and the bottom set upon a lay of ordinary Salt, that the Feces may settle and the Water become very cleer, is a singular and Soveraign Balm for green Wounds, being used with soft tents:
Swellings, The Decoction of the Bark of the Root fomented mollifieth hard tumors, and the shrinking of the Sinews. The Roots of the *Elm* boyled for a long time in Water, and the fat rising on the top therof being clean scummed off, and the place anointed therwith that is
Baldness, grown Bald, and the Hair fallen away, will quickly restore them again. The said Bark, ground with Brine and Pickle until it come to the form of a Pultis, and laid on the place
Gout, pained with the Gout, giveth great ease. The Decoction of the Bark in Water is excellent to
Burning. bath such places as have burned with fire.

Endive.

Description.

THe common Garden *Endive* beareth a longer and a larger Leaf than Succory, and abideth but one yeer, quickly running up to Stalk and Seed, and then perisheth: It hath blue Flowers, and the Seed of the ordinary *Endive* is so like Succory Seed, that it is hard to distinguish them.

Vertues and Use.

The Decoction of the Leavs, or the Juyce, or the distilled Water of *Endive* serveth well to cool the excessive Heat in the Liver and
Liver, Stomach, Agues, Sharpness of Urine, and Excoriations of the Urinory parts. Stomach, and in the hot Fits of Agues, and all other Inflamations in any part of the Body; it cooleth the heat and sharpness of the Urine, and the Excoriations in the Urinory parts; The Seed is of the same property or rather more powerful, and besides is available for the faintings, swounings, and passions of the Heart. Outwardly applied they serve to temper the sharp Humors of fretting Ulcers, hot Tumors and Swellings, and Pestilential Sores; and wonderfully helpeth not only the redness and Inflamation in the Eyes, but the dimness of the Sight also: They are also used to allay the pains of the Gout.
and Exoriations thereby, Passion of the Heart, Ulcers, Swellings, Eyes, Gout.

You cannot use it amiss, a Syrup of it is a fine cooling Medicine for Feavers.

Elecampane.

Enula campana. Ger. Everil in Campania prima in Ruelium. Holonium Dioscor. Ger. Inula Helenium Rauc. Corbam prima Lonic. Attributa ei fabulariter Epochum. Hoofs Toads.

Description. Scabwort.

THis shooteth forth many large Leavs, long, and broad, lying neer the ground, smal at both ends, somwhat soft in handling, of a whitish green on the upper side, and gray underneath, each set upon a short Footstalk; from among which rise up divers great, and strong hairy Stalks, three or four foot high with some Leavs thereon compassing them about at the lower ends, and are branched toward the tops, bearing divers great and large Flowers like those of the Corn Marigold, both the Border of Leavs and the middle thrum being yellow, which turn into Down; with long small browniſh Seed among it, and is carried away with the wind. The Root is great and thick, branched forth divers waies, blackish on the outside, and white within, of a very bitter tast, and strong, but good sent, especially when they are dryed, no part elſ of the Plant having any smel.

Place.

It groweth in the moist Grounds, and shadowy places oftner than in the dry and open Borders of Fields and Lanes, and in other wast places almost in every County of this Land.

Time.

It Flowreth in the end of *June* and *July*, and the Seed is ripe in *August*, The Roots are gathered for use, as well in the Spring before the Leaves come forth, as in Autumn or Winter.

Vertues and use.

The fresh Roots of *Elecampane* preserved with Sugar, or made into a Syrup or Conserve, are very effectual to warm a cold and windy Stomach, or the pricking therin, and Stitches in the Sides caused by the Spleen; and to help the Cough, shortness of Breath, and wheesing in the Lungs. The dried Root made into Pouder, and mixed with Sugar and taken, serveth to the same purposes, and is also profitable for those that have their Urine stopped; or the stopping of Womens Courses, the pains of the Mother, and of the Stone in the Reins, Kidneys, or Bladder: It resisteth Poyson, and stayeth the spreading of the Venom of Serpents, as also of putrid and pestilential Feavers, and the Plague it self. The Roots and Herb beaten and put into new Ale or Beer, and dayly drunk, cleareth, strengthneth, and quickneth the Sight of the Eyes wonderfully. The Decoction of the Roots in Wine or the Juyce taken therin, killeth and driveth forth all manner of Worms in the Belly, Stomach, and Maw; and gargled in the mouth; or the Root chewed fastneth loos Teeth, and helpeth to keep them from Putrefaction: And being drunk is good for those that spit Blood, helpeth to remove Cramps or Convulsions, and the pains of the Gout, the *Sciatica*, the loosness and pains in the Joynts, or those Members that are out of Joynt, by cold or moisture hapning to them, applied outwardly as well as inwardly, and is good for those that are burſten, or have any inward bruis. The Roots boyled well in Vineger, beaten afterwards and made into an Oyntment, with Hogs Suet or Oyl of Trotters is an excellent remedy for Scabs or Itch in yong or old: The places also bathed or washed with the Decoction doth the same; it also helpeth all sorts of filthy, old, putrid Sores or Cankers whersoever. In the Roots of this Herb lieth the chief effect for all the Remedies aforesaid: The distilled Water of the Leavs and Roots together is very profitable to clens the Skin of the Face or other parts, from any Morphew, Spots, or Blemishes therein, and maketh it cleer.

Cold Stomach, Wind, Stitch, Spleen, Cough, Shortness of Breath, Wheesing, Terms provokes, Mother, Stone, Poyson, Venemous Beasts, Pestilence, Eyes, Worms, Loos Teeth, Spitting Blood, Cramps, Convulsions, Gout, Joynts, Itch, Cankers, Freckles, Morphew, Spots.

fit a worker of all English purges stil. B. C. ag Cinnamon Loaf sugar Candy

Eringo, or Sea-Holly.

Description.

THe first Leavs of our ordinary *Sea-Holly*, are nothing so hard and prickly as when they grow old, being almost round and deeply dented about the edges; hard, and sharp pointed, and a little crumpled, of a bluish green colour, every one upon a long Footstalk: but those that grow up higher with the Stalk, do as it were compass it about. The stalk it self is round and strong, yet somwhat crested with Joynts and Leavs set therat, but more divided, sharp, and prickle; and branches rising from thence, which have likewise other smaller Branches, each of them bearing several bluish round prickly Heads, with many smal jagged prickly Leavs under them standing like a Star, and are somtimes found greenish or whitish: The Root groweth wonderful long, even to eight or ten Foot in length, set with Rings or Circles, toward the upper part, but smooth and without Joynts down lower, browniſh on the outside, and very white within, with a pith in the middle, of a pleasant tast, but much more being artificially preserved and candy'd with Sugar.

Place.

It is found about the Sea Coasts, in almost every Country of this Land which bordereth upon the Sea.

Time.

It Flowreth in the end of Summer, and giveth ripe Seed within a Month after.

Vertues

Vertues and *uſe.*

Obſtructions, Spleen, Liver, yellow Jaundice, Dropſie, Chollick, Diſury, Strangury, Reins,

The Decoction of the Root herof in Wine is very effectual to open the Obſtructions of the Spleen and Liver, and helpeth the yellow Jaundice, the Dropſie, the pains in the Loins, and wind Chollick, provoketh Urine, and expelleth the Stone, and procureth Womens Courſes, The continued uſe of the Decoction for 15. daies taken faſting and next to Bedward, doth help the ſtrangury, the piſſing by drops, the ſtopping of Urine and Stone, and all defects of the Reins or Kidneys; and if the ſaid drink be continued longer, it is ſaid that it perfectly cureth the Stone, and that experience hath found it ſo: It is found good againſt the French Pox. The Roots bruiſed and applied outwardly, helpeth the Kernels of the Throat, commonly called the Kings evil; or taken inwardly and applied to the place ſtung or bitten by any Serpent, healeth it ſpeedily. If the Roots be bruiſed and boyled in old Hogs greaſ, or ſalted Lard and applied to broken Bones, Thorns &c. remaining in the Fleſh doth not only draw them forth, but healeth up the place again, gathering new Fleſh where it was conſumed: The Juyce of the Leavs dropped into the Ears, helpeth Impoſthumes therin: The Diſtilled Water of the whol Herb when the Leavs and Stalks are yong, is profitably drunk for all the purpoſes aforeſaid; and helpeth the Melancholly of the Heart, and is available in Quartane and Quotidian Agues, as alſo for them that have their Necks drawn awry, and cannot turn them, without turning their whol Body.

French Pox, Kings Evil, Venemous Beaſts, Thorns, broken Bones, Splinters, Thorns, Apoſtums, Melancholly, Quartan, & Quotidian Agues, WryNecks,

Seed breedeth.

The Plant is Venerial, and breedeth Seed exceedingly and ſtrengthens the Spirit procreative, it is hot and moiſt, and under the Cœleſtial Ballance.

Eyebright.

Deſcription.

THe common *Eyebright* is a ſmall low Herb, riſing up uſually but with one blackiſh, green Stalk, a ſpan high, or not much more, ſpread from the bottom into ſundry Branches, wheron are ſet ſmal and and almoſt round, yet pointed dark, green, Leavs finely ſnipped about the edges, two alwaies ſet together, and very thick: At the Joynts with the Leavs from the middle upward, come forth ſmall white Flowers ſtryped with purple and yellow Spots or ſtripes; after which follow ſmall round Heads with very ſmall Seed therin: The Root is long, ſmall, and threddy at the end.

Place.

It groweth in many Meadows, and graſſy places, in this Land.

Vertues and Uſe.

If this Herb were but as much uſed as it is neglected, it would half ſpoil the Spectaclemakers Trade; and a man would think that reaſon ſhould teach people to prefer the preſervation of their Natural before Artificial Spectacles: which that they may be inſtructed how to do, take the Vertues of *Eyebright* as followeth.

Eyes, Dimneſs, Brain, Memory.

The Juyce or diſtilled Water of *Eyebright* taken inwardly in white Wine or Broth, or dropped into the Eyes for diverſ daies together, helpeth all infirmities of the Eyes that cauſ dimneſs of Sight: Some make a Conſerv of the Flowers to the ſame effect: Being uſed any of theſe waies it alſo helpeth a weak Brain or Memory. This tunned up with ſtrong Beer that it may work together, and drunk; Or the Pouder of the dried Herb mixed with Sugar, a little Mace, and Fennel Seeds, and drunk or eaten in Broth: Or the ſaid Pouder made into an Electuary with Sugar and taken, hath the ſame powerful effect to help and reſtore the Sight decaied through age. And *Arnoldus de villa nova*, ſaith, It hath reſtored Sight to them that have been blind a long time before.

It is under the Sign of the *Lyon*, and *Sol* claims Dominion over it.

Fern.

Deſcription.

OF this there are two kinds principally to be noted; *viz.* The Male and Female: The Female groweth higher than the Male, but the Leavs therof are leſſer, & more divided or dented; & of as ſtrong a ſmel as the Male: The Vertues of them are both alike; and therfore I ſhall not trouble you with any further Deſcription or diſtinction of them.

Place.

They both grow on Heaths, and in ſhady places neer the Hedg ſides in all Countries of this Land.

Time.

They flouriſh and give their Seed at Midſummer.

The Femal *Fern* is that plant which is in *Suſſex* called Brakes, the Seed of which ſome Authors hold to be ſo rare, ſuch a thing there is I know,, and may eaſily Be had upon Midſummer Eve, and for ought yet I know two or three daies before or after, if not more.

Vertues and Uſe.

Worms,

The Roots of both theſe ſorts of Ferns, being bruiſed and boyled in Mead or Honyed Water, and drunk, killeth both the broad and long Worms in the Body; and abateth the

Spleen, Swelling and hardneſs of the Spleen. The green Leavs eaten, purgeth the Belly and *Choller, Flegm, Stomach,* Chollerick and wateriſh humors, but it troubles the Stomach. They are dangerous for Women with Child to meddle with, by reaſon they cauſ abortment. The Roots bruiſed and boyled in Oyl or Hogs greaſ, maketh a *Wounds,* very profitable Oyntment to heal Wounds, or pricks gotten into the Fleſh. The Pouder of *Ulcers,* them uſed in foul Ulcers, drieth up their Malignant moiſture, and cauſeth their ſpeedier healing: Fern being burned, the ſmoke ther- *Serpents, Gnats, Venemous Beaſts.* of driveth away Serpents, Gnats, and other noiſom Creatures, which in the Fenny Countries do in the night time trouble and moleſt people lying in their Beds with their Faces uncovered it cauſeth Barrenneſs.

Oſmond Royal, *or* Water Fern.

Deſcription.

THis ſhooteth forth in the Spring time (for in the Winter the Leavs periſh) diverſ rough hard Stalks, half round and hollowiſh, or flat on the other ſide, two Foot high, having diverſ Branches of winged yellowiſh green Leavs on all ſides, ſet one againſt another, longer, narrower, and not nicked on the edges as the former: From the top of ſome of theſe Stalks grow forth a long Buſh of ſmal, and more yellowiſh green ſcaly aglets as it were ſet in the ſame manner on the Stalks as the Leavs are; which are accounted the Flower and Seeds; The Root is rough, thick, and Scaly, with a white pith in the middle which is called the Heart therof.

Place.

It groweth on Moors, Bogs, and Watery places in many parts of this Land.

Time.

It is green all the Summer; and the Root only abideth in Winter.

Vertues and uſe.

This hath all the Vertues mentioned in the former Ferns, and is much more effectual than they both for inward and outward Griefs; and *Wounds, Bruiſes,* is accounted ſingular good in Wounds, Bruiſes or the like, the Decoction to be drunk, or boyled into an Oyntment or Oyl, as a Balſom or Balm, and ſo it is ſingular good againſt *Broken Bones, Chollick, Spleen, Ruptures, Diſury.* Bruiſes, and Bones broken or out of joynt, and giveth much eaſ to the Chollick, and Splenetick Diſeaſes; as alſo for Ruptures, or burſtings. The Decoction of the Root in white Wine provokes Urine exceedingly and clenſeth the Bladder and paſſages of Urine.

Featherfew.

Deſcription.

COmmon *Featherfew* hath many large freſh green Leavs very much torn or cut on the edges: The Stalks are hard and round ſet with many ſuch like Leavs, but ſomwhat ſmaller, and at the tops ſtand many ſingle Flowers upon ſeveral ſmal Footſtalks, conſiſting of many ſmal white Leavs, ſtanding round about a yellow thrum in the middle. The Root is ſomwhat hard and ſhort, with many ſtrong Fibres at it: The ſcent of the whol Plant is very ſtrong, and ſtuffing, and the taſt very bitter.

Place.

This groweth wild in ſome places of this Land; but it is for the moſt part nouriſhed in Gardens.

Time.

It Flowreth in the Months of *June* and *July.*

Vertues and Uſe.

It is chiefly uſed for the Diſeaſes of the Mother, whether it be the ſtrangling or riſing of *Mother, Womb,* the Mother, or Hardneſs or Inflamations of *Terms, provokes,* the ſame, applied outwardly thereunto: or a Decoction of the Flowers in Wine with a little Nutmeg or Mace put therin, and drunk often in a day, & is an approved Remedy to bring down Womens Courſes ſpeedily, and helpeth *Dead Birth, After-birth,* to expel the dead Birth and Afterbirth. For a Woman to ſit over the hot fumes of the Decoction of the Herb made in Water or Wine is effectual alſo for the ſame; and in ſome caſes to apply the boyled Herb warm to the privy parts. The Decoction therof made, with ſome Sugar or Honey put therto, is uſed by many with good ſucceſs, to help the Cough, and ſtuffing of the Cheſt by cold, as alſo to *Cough, Reins, Bladder, Choller, Flegm, Melancholly, Sadneſs.* clenſ the Reins and Bladder, and help to expel the ſtone in them. The Pouder of the Herb taken in Wine, with ſome Oximel purgeth both Choller and Flegm, and is available for thoſe that are ſhort winded; and are troubled with Melancholly and Heavineſs or ſadneſs of the Spirits. It is very effectual for all pains in the Head coming of a cold cauſ, the *Headach, Vertigo,* Herb being bruiſed, and applied to the crown of the Head; as alſo for a Vertigo, that is a turning or ſwimming in the Head. The Decoction therof drunk warm, and the Herb bruiſed with a few Corns of Bay Salt and applied to the Wriſts before the coming of the *Ague,* Ague Fits, doth take them away. The diſtilled *Deformety of the skin* Water taketh away Freckles, & other Spots and Deformities in the Face. The Herb bruiſed and heated on a Tyle, with ſome Wine to moiſten it, or fried with a little Wine and Oyl in a frying Pan, and applied warm out- *Wind,* wardly

Chollick, Opium.

wardly to the places, helpeth the wind and Chollick in the lower part of the Belly: It is an especial Remedy against Opium taken too liberally.

Venus commands the Herb and hath commanded it to succour her Sisters [*Women*] and to be a general strengthner of their Wombs and remedy such infirmities, as a careless Midwife hath there caused, if they will be but pleased to make use of her Herb boyled in white Wine, and drink the Decoction, it clenseth the Womb, expelleth the Afterbirth, doth the Woman all the good she can desire of an Herb. And if any grumble becaus they cannot get the Herb in Winter, tell them if they pleas they may make a Syrup of it in Summer.

Fennel.

EVery Garden affordeth this so plentifully, that it needeth no Description.

Vertues and Use.

Wind, Disury, Stone, Encreaseth Milk, Amends Milk, Hiccough, Loathing of meat, Venemous Beasts, Poyson, Mushroms Obstructions in the Liver, Spleen, and Call, Yellow Jaundice, Gout, Cramp, Wheesing, Terms provokes, After Delivery, Clens, open, Fatnes, Eyes.

Fennel is good to break wind, to provoke Urine, and eas the pains of the Stone, and help to break it. The Leavs or Seed boiled in Barley Water and drunk is good for Nurses to encreas their Milk and make it more wholsom for the Child: The Leavs, or rather the Seed boyled in Water staieth the Hiccough, and taketh away that loathing which oftentimes hapneth to the Stomachs of Sick, and Feaverish Persons, and allayeth the heat thereof. The Seed boyled in Wine and drunk, is good for those that are bitten by Serpents, or have eaten Poyson full Herbs or Mushroms: The Seed and the Root much more helpeth to open Obstructions of the Liver, Spleen, and Gall, and thereby helpeth the painful and windy swellings of the Spleen, and the yellow Jaundice, as also the Gout and Cramps. The Seed is of good use in Medicines to help shortnes of breath, and Wheesing by stopping of the Lungs. It helpeth also to bring down the Courses and to clens the parts after delivery. The Roots are of most use in Physick Drinks and Broths that are taken to clens the Blood, to open Obstructions of the Liver to provoke Urine, and amend the ill colour in the Face after Sickness, and to caus a good habit through the Body: Both Leavs, Seeds, and Roots hereof are much used in Drinks or Broths, to make people more spare and lean that are too fat: The distilled Water of the whol Herb or the condensate Juyce dissolved, but especially the Natural Juyce that in hot Countries issueth out thereof of its own accord, dropped into the Eyes, clenseth them from mists and films that hinder the sight. The sweet *Fennel* is much weaker in Physical uses, than the common *Fennel*. The wild *Fennel* is stronger and hotter than the tame; and therfore most powerful against the Stone, but not so effectual to encreas Milk, becaus of its driness.

One good old fashion is not yet quite left off, *viz.* To boil *Fennel* with Fish, for it consumes that Flegmatick humor which Fish most plentifully afford and annoy the body by, therfore it is a most fit Herb for that purpose though few that use it know why or wherfore they do it, I supoose the Reason of its benefit this way is becaus it is an Herb of *Mercury* and under *Virgo*, and therfore bears Antipathy to *Pisces*. Dill is also an Herb of *Mercury*, which I forgot to certifie you of before.

Sow-Fennel, or Hogs-Fennel.

Description.

THe common *Sow-Fennel* hath diverse branched Stalks of thick and somwhat long Leavs, three for the most part joyned together at a place, among which riseth a crested strait Stalk, less than Fennel with some Joynts theron, and Leavs growing thereat, and toward the top some Branches issuing from thence, likewise on the tops of the Stalk and Branches stand diverse tufts of yellow Flowers, where after grow somwhat flat, thin, and yellowish Seed bigger than Fennel Seed: The Root groweth great and deep with many other parts and Fibres about them, of a strong scent like hot Brimstone and yielding forth a yellowish Milk, or clammy Juyce almost like a Gum.

Place.

It groweth plentifully in the Salt low Marshes neer by *Feavershame* in *Kent*.

Time.

It Flowreth and seedeth in *July* and *August*.

Vertues and Use.

Lethargy, Frenzie, Vertigo, Falling-Sickness, Headach, Palsey, Sciatica, Cramp, Sinews, Shortness of breath, Wind, Spleen,

The Juyce of *Sow-Fennel* (saith *Dioscorides* and *Galen*) used with Vinegar and Rose-water, or the Juyce with a little Euphorbium put to the Nose, helpeth those that are troubled with the Lethargy, the Frensie, the turning or Giddiness of the Head, the Falling-Sickness, long and inveterate Headach, the Palsie, *Sciatica*, and the Cramp, and generally all the Diseases of the Sinews, used with Oyl and Vinegar. The Juyce dissolved in Wine, or put into an Eg, is good for the Cough, or shortnes of Breath and for those that are troubled with the Wind in the Body; It purgeth the Belly gently, helpeth the hardnes of the Spleen, giveth eas to Women that

Childbirth have sore travail in Childbirth, and easeth the pains of the Reins and Bladder, and also of the Womb. A little of the Juyce dissolved in Wine and dropped into the Ears, easeth much of the pains in them; and put into an hollow Tooth, easeth the pain therof. The Root is less effectual in all the aforesaid Diseases: yet the Pouder of the Root clenseth foul Ulcers being put into them; and taketh out Splinters of broken Bones or other things in the Flesh and healeth them up perfectly, as also it dryeth up old and inveterate running Sores, and is of admirable Vertue in all green Wounds.

Reins, Bladder, Womb, Ears, Hollow Teeth, Ulcers, broken Bones, Thorns, Wounds.

Figwort, or Throat-wort.

Description.

THe common great *Figwort* sendeth forth divers great, strong, hard, square, brown Stalks three or four Foot high, wherin grow large, hard, and dark green Leavs, two at a Joynt, which are larger and harder than Nettle Leavs, but not stinging: At the tops of the Stalks stand many purple Flowers set in Husks, which are somwhat gaping and open, somwhat like those of Water-Betony; after which come hard round Heads, with a small point in the middle, wherin lie small brownish Seed. The Root is great, white, and thick, with many branches at it growing aslope under the upper crust of the Ground, which abideth many yeers but keepeth not his green Leavs in Winter.

Place.

It groweth frequently in moist and shadowy Woods, and in the lower parts of Fields and Meadows.

Time.

It Flowreth about *July*, and the Seed will be ripe about a Month after the Flowers are fallen.

Vertues and use.

The Decoction uf the Herb taken inwardly, and the bruised Herb applied outwardly, dissolveth clotted or congealed Blood within the Body, coming by any Wound, Bruis, or Fall; and is no less effectual for the Kings Evil, or any other Knots, Kernels, Bunches or Wens growing in the Flesh whersoever, and for the Hemorrhoids or Piles, or other Knobs or Kernels which somtimes grow about the Fundament: An Oyntment made hereof, may be used at all times when the fresh Herb is not to be had. The distilled Water of the whol Plant, Roots and all is used for the same purposes, and drieth up the superfluous virulent moisture of hollow and corroding Ulcers; It taketh away all redness, Spots and Freckles in the Face, as also the Scurff or any foul Deformity therin, and the Leprosie likewise.

Congealed Blood by Wound, Bruise, or Fall, Kings Evil, Wens, Hemorrhoids, Fundament, Ulcers, Scurff, Spots, Freckles, Deformity, Leprosie.

Some Latin Authors call it *Cervicria* be, caus 'tis apropriated to the Neck, and we *Throatwort* becaus 'tis apropriated to the Throat: *Venus* owns the Herb, and the Cœlestial *Bull* will not deny it, therefore a better Remedy cannot be for the Kings Evil, becaus the *Moon* that rules the Diseas is exalted there, nor for any Diseas in the Neck, the rest of the Diseases specified, you may if you look see a very good reason for their cure by this Herb.

Filipendula, or Drop-wort.

Description.

THis sendeth forth many Leavs some bigger, some lesser, set on each side of a middle Rib, and each of them dented about the edges, somwhat resembling wild Tansie, or rather Agrimony, but harder in handling, among which riseth up one or more Stalks two or three Foot high, with like Leavs growing theron, and somtimes also divided into other Branches spreading at the top into many white sweet smelling Flowers, consisting of five Leavs apiece with some threds in the middle of them standing together in a tuft or Umbel each upon a smal Footstalk, which after they have been open and blown a good while do fall away, and in their places appear smal, round chaffy heads like Buttons wherein are the chaffy Seed set and placed. The Root consists of many smal black tuberous pieces, fastned together by many smal long blackish Strings which run from one to another.

Place.

It groweth in many places of this Land, in the Corners of dry Fields and Meadows, and their Hedg Sides.

Time.

They Flower in *June* and *July*, and their Seed is ripe in *August*.

Vertues and Use.

It is very effectual to open the passages of the Urine, and help the Strangury, and all other pains of the Bladder and Reins, helping mightily to expel the Stone in the Kidnies or Bladder, and the Gravel also, and these are done by taking the Roots in Pouder, or a Decoction of them in white Wine, whereunto a little Honey is added: The same also helpeth to expel the Afterbirth. The Roots made into Pouder and mixed with Honey into the form of an Electuary doth much help them

Disury, Strangury, Reins, Bladder, Stone, Gravel,

them whose Stomachs are swollen, dissolving and breaking the Wind which was the cause therof, and is also very effectual for all diseases of the Lungs, as shortness of breath, wheesings, hoarsness of the Throat, and the Cough, and to expectorate cold Flegm, or any other parts thereabouts.

Wind, Lungs, Wheesing, Hoarceness Cough, Flegm.

It is called *Dropwort* becaus it helps such as piss by drops.

The Yellow VVater-Flag, OR, Flower-de-luce.

Iris vulgaris

Description.

THis groweth like the Flower-de-luces, but it hath much longer, and narrower sad green Leavs joyned together in that fashion; the Stalk also groweth oftentimes as high, bearing smal yellow Flowers, shaped like the Flower-de-luce with three falling Leavs, and other three arched that cover their Bottoms; but instead of the three upright Leavs as the Flower-de-luce hath, this hath only three short pieces, standing in their places, after which succeed thick and long three square Heads containing in each part somwhat big and Flat Seed like to those of the Flower-de-luces: The Root is long and slender, of a pale browniish colour on the outside, and of a Hore flesh colour on the inner side, with many hard fibres thereat, and very harsh in tast.

Place.

It usually groweth in watery Ditches, Ponds, Lakes, and More sides which are alwaies overflown with water.

Time.

It flowreth in *July*, and the Seed is ripe in *August*.

Vertues and use.

The Root of this *Water-Flag* is very astringent, cooling, and drying, and therby helpeth all Lasks and Fluxes, whether of Blood or Humors, as bleeding at Mouth, Nose, or other parts, bloody Fluxes, and the immoderate Flux of Womens Courses. The distilled water of the whol Herb, Flowers, and Roots is a Soveraign good Remedy for watering Eyes, both to be dropped into them, and to have Cloathes or Spunges wetted therin and applied to the Forehead; It also helpeth the Spots or Blemishes that happen in or about the Eyes, or in any other parts: The said water fomented on Swellings and hot Inflamations of Womens sore Breasts, upon Cankers also, and those spreading Ulcers called *Noli me Tangere*, doth much good; It helpeth also foul Ulcers in the privy parts of man or woman, or elswhere. An Oyntment made of the Flowers is better for these external applications.

Binds, Cools, Dries, Flux, Bloodyflux, Bleeding, Terms stops, Eyes, Spots, Blemishes, Inflamations, Sore Breasts, Cankers, Ulcers, Noli me tangere.

Take notice that the *Moon* rules the Plant and then I have done.

Flaxweed, or Toadflax.

Linaria. wild flax

Description.

OUr common *Flaxweed* hath divers Stalks full fraught with long and narrow blue or Ash-colour'd Leavs, and from the middle of them almost upward stored with a number of pale yellow Flowers, of a strong unpleasant scent, with deeper yellow mouths, and blackish flat Seeds in round Heads. The Root is somwhat woody and white, especially the main downright one, with many fibres, abiding many yeers, shooting forth Roots every way round about, and new Branches every yeer.

Place.

This groweth throughout this Land, both by the way sides in Meadows, as also by Hedg sides, and upon the sides of Banks and Borders of Fields.

Time.

It Flowreth in Summer, and the Seed is ripe usually before the end of *August*.

Vertues and use.

This is frequently used to provoke Urine being stopped, and to spend the abundance of those watery Humors by Urine which caus the Dropsie. The Decoction of the Herb both Leavs and Flowers in Wine, taken and drunk doth somwhat move the Belly downwards, openeth Obstructions of the Liver, and helpeth the yellow Jaundice, expelleth Poyson, provoketh Womens Courses, driveth forth the dead Child, and Afterbirth. The Distilled water of the Herb and Flowers is effectual for all the same purposes, especially being drunk with a dram of the Pouder of the Seeds, or Bark of the Root of Walwort and a little Cinnamon for certain daies together, is held a singular Remedy for the Dropsie: The Juyce of the Herb or the distilled Water dropped into the Eyes is a certain Remedy for all heat, Inflamations and redness in them. The Juyce or water put into foul Ulcers whither they be Cancrous or Fistulous, with tents rouled therin, or the parts washed or injected therwith clenseth them throughly from the bottom, and healeth them up safely. The same Juyce or Water also clenseth the Skin wonderfully of all sorts of deformity thereof, as Lepry, Morphew, Scurff, Wheals, Pimples, or any other Spots or Marks in the Skin, applied of it self, or used with some Pouder of Lupines.

Disury, Dropsie, Obstructions of the Liver, yellow Jaundice, Dead Child and Afterbirth, Inflamations, Eyes, Ulcers, Cancers, Fistulaes, Leprosie, Scabs, Pimples, Freckles.

Mars owns the Herb, in *Sussex* we call it

Gall-wort, and lay it in our Chickens water, to cure them of the Gall I think, I am sure it releevs them when they are drooping.

Fleawort.

Description.

THe ordinary *Fleawort* riseth up with a Stalk two Foot high, or more, full of Joynts and Branches on every side up to the top, and at every Joynt two small long and narrow whitish green Leavs somwhat hairy: At the tops of every Branch stand diverse small short scaly or chaffy Heads, out of which come forth small whitish yellow threds, like to those of the Plantane Herbs, which are the Bloomings or Flowers. The Seed inclosed in those Heads is smal and shining while it is Fresh very like unto Fleas, both for colour and bigness, but turning black when it groweth old. The Root is not long but white, hard, and woody, perishing every yeer and rising again of its own Seed for diverse yeers if it be suffred to shed: The whol Plant is somwhat whitish and hairy, smelling somwhat like Rozin.

There is another sort hereof differing not from the former in the manner of growing, but only that his Stalk and Branches being somwhat greater do a little more bow down to the ground: The Leavs are somwhat larger; the Heads somwhat lesser, the Seed alike; and the Root and Leavs abide all the Winter, and perish not as the former.

Place.

The first groweth only in Gardens, the second plentifully in Fields that are neer the Sea.

Time.

They Flower in *July*, or thereabouts.

Vertues and use.

Flux, Corrosion, Chollerick Humors,

The Seed fried and so taken staieth the Flux or Lask of the Belly, and the corrosions that come by reason of hot, Chollerick, Sharp, and malignant Humors or by the too much purging of any violent Medicine, as Scammony or the like. The Muccilage of the Seed made with Rose Water, and a little Sugar Candy put therto is very good in all hot Agues and burning Feavers, and other Inflamations to cool the thirst, and lenify the dryness and roughness of the Tongue and Throat. It helpeth also hoarsness of the voice, and Diseases of the Breast and Lungs caused by heat, or sharp salt humors, and the Plurese also. The Muccilage of the Seed made in Plantane Water, whereunto the Yolk of an Egg or two, and a little Populeon is put, is a most safe and sure Remedy to eas the sharpness, prickings, and pains of the Hemorrhoids or Piles, if it be laid on a cloath and bound therto. It helpeth also all Inflamations in any parts of the Body and the pains that come thereby, as the Head-ach and Megrim, and all hot Imposthumes or Swellings, or breakings out of the Skin, as Blains, Blains, Wheals, Pushes, Purples, and the like; as also the pains of the Joynts, and of those that are out of joynt; the pains of the Gout and *Sciatica*, the Bursting of yong Children, and the swelling of the Navel, applied with Oyl of Roses and Vinegar. It is also very good to heal the Nipples and Sore Breasts of Women being often applied thereunto. The Juyce of the Herb with a little Honey put in to the Ears helpeth the running of them, and the Worms breeding in them: The same also mixed with Hogs Greas, and applied to corrupt and filthy Ulcers and Sores, clenseth and healeth them.

Agues, Feavers, Inflamation, Thirst, Hoarceness Salt Humors, Pleuresie,

Breasts, Ears, Worms, Ulcers.

The Herb is cold and dry, *Saturnine*, I suppose it obtained the name *Fleawort* becaus the Seeds are so like Fleas.

Flixweed.

Description.

THis riseth up with a round upright hard Stalk four or five Foot high, spread into sundry Branches, wheron grow many grayish green Leavs very finely cut and severed into a number of short and almost round parts. The Flowers are very smal and yellow growing Spike fasnion, after which come very smal, long Pods, with very smal yellowish Seed in them. The Root is long and woody perishing every yeer.

There is another sort differing in nothing save only it hath somwhat broader Leaves: They have a strong evil savor being smelt unto, and are of a drying tast.

Place.

They grow wild in the Fields by Hedg-sides, and High-waies, and among rubbish, and in many other places.

Time.

They Flower and Seed quickly after, namely in *June* and *July*.

Vertues and use.

Flux, Bleeding, Bloody Flux, Terms broken Bones, Joynt. Members disjoynted.

Both the Herb and Seed of *Flixweed* is of excellent use to stay the Flux or Lask of the Belly being drunk in Water wherein gads of Steel heated have been often quenched; and is no less effectual for the said purpose than Plantane or Comfry, and to restrain any other Flux of Blood in man or Woman, as also to consolidate Bones broken or out of Joynt. The Juyce therof drunk in Wine, or the Decoction of the Herb drunk, doth kill the Worms in the Stomach or Belly, or the

Worms

worms, Sores, Ulcers. Worms that grow in putrid and filthy Ulcers; And made into a Salve doth quickly heal all old sores, how foul or Malignant soever they be. The distilled water of the Herb worketh the same effects although somwhat weaker, yet is a fair Medicine, and more acceptable to be taken.

It is called *Flixweed* becaus it cures the Flux, and for its uniting broken Bones, &c. *Paracelsus* extols it to the Skies. It is fitting Syrups, Oyntments, and Plaisters of it were kept in your Houses.

Flower-de-luce.

THis is so well known, being nursed up in most Gardens, that I shall not need to spend time in writing a Description thereof.

Time.

The Flaggy kinds thereof have the most Physical uses; the Dwarf kinds thereof flower in *April*, the greater sorts in *May*.

Vertues and Use.

Stomach, Flegm, Choller, Jaundice, Dropsie, The Juyce or Decoction of the green Roots of the Flaggy kind of *Flower-de-luce*, with a little Honey drunk, doth purge and clense the Stomach of gross and tough Flegm and Choller therin; It helpeth the Jaundice and the Dropsie- by evacuating those humors both upwards and downwards, and becaus it somwhat hurteth the Stomach, is not to be taken but with Honey ond Spicknard. The same being drunk doth eas the pains and torments of the Belly and Sides, the shaking of Agues, the Diseases of the Liver and Spleen, the Worms in the Belly, the Stone in the Reins, Convulsions or Cramps that come of cold Humors, it also helpeth those whose Seed passeth from them unawars; It is a Remedy against the bitings and stingings of Venemous Creatures being boyled in Water and Vineger and drunk: Being boyled in Wine and drunk it provoketh Urine, helpeth the Chollick, bringeth down Womens Courses; and made up into a Pessary with Honey, and put up into the Body, draweth forth the dead Child. It is much commended against the Cough to expectorate tough Flegm; It much easeth pains in the Head, and procureth sleep: Being put into the Nostrils it procureth Neesing, and therby purgeth the Head of Flegm: The Juyce of the Root applied to the Piles or Hemorrhoids giveth much eas. The Decoction of the Roots gargled in the Mouth easeth the Toothach, and helpeth a Stinking breath. The Oyl called *Oleum Irinum* if it be rightly made of the great broad Flag *Flower-de-luce* (and not of the great Bulbous blue *Flower-de-luce* as is used by some Apothecaries) and Roots of the same of the Flaggy kinds is very effectual to warm and comfort all cold Joynts and Sinews, as also the Gout and *Sciatica*, and mollifieth, dissolveth, and consumeth Tumors or Swellings in any part of the Body, as also of the Matrix: It helpeth the Cramp and Convulsion of the Sinews: The Head and Temples anointed therwith helpeth the Catark or thin Rhewm distilling from thence; and used upon the Breast or Stomach, helpeth to extenuate the cold tough Flegm. It helpeth also the pains and noise in the Ears, and the stench of the Nostrils. The Root it self either green or in Pouder helpeth to clense, heal, and incarnate Wounds, and to cover the naked Bones with Flesh again that Ulcers have made bare; and is also very good to clense and heal up Fistulaes and Cankers that are hard to be cured.

Joynts, Sinews, Gout, Sciatica, Womb, Rhewm, Breast, Wounds, Ulcers, Fistulaes, Cankers.

Fluellin.

Description.

THis shooteth forth many long Branches partly lying upon the Ground, and part standing upright, set with almost round Leavs, yet a little pointed, and somtimes more long than round, without order theron, somwhat hoary, and of an evil greenish white colour; at the Joynts all along the Stalks, and with the Leavs come forth smal Flowers one at a place, upon a very smali short Footstalk, gaping somwhat like Snapdragons, or rather like *Toadflax*, with the upper Jaw of a yellow colour, and the lower of a Purplish, with a smal heel or Spur behind, after which come small round Heads, containing smal black Seed. The Root is smal and threddy, dying every yeer, and raiseth it self again of its own sowing.

There is another sort of *Fluellin* which hath longer Branches wholly trailing upon the ground two or three foot long, and somtimes more, thinner set with Leavs theron, upon smal Footstalks: The Leaves are a little larger and somwhat round, and cornered somtimes in some places on the edges; but the lower part of them being the broadest, hath on each side a smal point, making it seem as if they were Ears, somwhat hairy but not hoary, and of a better green colour than the former; The Flowers come forth like the former, but the colours therein are more white than yellow, and the Purple not so fair: It is a larger Flower, and so are the Seed, and Seed Vessels: The Root is like the other, and perisheth every yeer.

Place.

They grow in divers Corn Fields, and in borders about them, and in other fertile grounds,

Grounds, about *Southfleet* in *Kent* abundantly, at *Buckworth*, *Hamerton*, and *Richwersworth* in *Huntingtonshire*; and in diverſ other places.

Time.

They are in Flower about *June* and *July*, and the whol Plant is dry and withered before *Auguſt* be done.

Vertues and Uſe.

Eyes, Flux, The Leavs bruiſed and applied with Barley Meal to watering Eyes that are hot and inflamed by defluxions from the Head, doth very much help them, as alſo the Fluxes of Blood or Humors, as the Lask, Bloody Flux, Womens Courſes, and ſtaieth all manner of bleeding at Noſe, Mouth, or any other place, or that cometh by any Bruiſ, or Hurt, or burſting a Vein; and wonderfully it helpeth all thoſe inward parts that need conſolidating or ſtrengthening: and is no leſs effectual both to heal and cloſe green Wounds, as to clenſ or heal all foul or old Ulcers, fretting or ſpreading Cankers or the like.

Bloody Flux, Terms ſtops,

Wounds, Ulcers, Cankers.

Bees are induſtrious and go abroad to gather Honey from each Plant and Flower, but Drones lie at home, and eat up what the Bees have taken pains for; Juſt ſo do our *Colledg of Phyſitians*, lie at home and domineer, and ſuck out the Sweetneſs of other Mens Labors and Studies, themſelvs being as ignorant in the Knowledg of Herbs as a Child of four yeers old, as I can make appear to any Rational man by their laſt *Diſpenſatory*, now then to hide their Ignorance, there is not a readier way in the World, than to hide Knowledg from their Country men, that ſo noBody might be able ſo much as to ſmel out their Ignorance, when Simples were more in uſe mens Bodies were in better health by far than now they are, or ſhall be if the Colledg can help it. The truth is, this Herb is of a fine cooling, drying quality, and an Oyntment or Plaiſter of it, might do a Man a courteſie that hath any hot virulent Sores, 'tis admirable for the Ulcers of the French Pox, and being a gallant Antivenerian Medicine, under the Dominion of *Saturn*, if taken inwardly may cure the Diſeaſ. It was at firſt called *Fœmale Speedwel*, but a Shentle man of *Wales* whoſe Noſe was almoſt eaten off with the Pox, and ſo neer the matter, that the Doctors commanded it to be cut off, being cured by only the Uſe of this Herb, to honor the Herb for ſaving his Noſe whol, gave it one of her own Country names, LLUELLIN.

Foxglove. *Digitalis.*

Deſcription.

THis hath many long and broad Leavs lying upon the Ground dented about the edges, a little ſoft or woolly, and of a hoary green colour among which riſe up ſomtimes ſundry Stalks, but one very often bearing ſuch Leavs thereon from the bottom to the middle, from whence to the top it is ſtored with large and long hollow reddiſh Purple Flowers, a little more long and eminent at the lower edg, with ſome white Spots within them, one above another, with ſmal green Leavs at every one, but all of them turning their Heads one way and hanging downwards, having ſome threds alſo in the middle, from whence riſe round Heads pointed ſharp at the ends, wherein ſmal brown Seed lieth. The Roots are many ſmal Huskie Fibres, and ſome greater ſtrings among them; The Flower hath no ſcent; but the Leavs have a bitter hot taſt.

Place.

It groweth on the dry ſandy Grounds for the moſt part, and as well on the higher as lower places under Hedg-ſides in almoſt every County of this Land.

Time.

It ſeldom Flowreth before *July*, and the Seed is ripe in *Auguſt*.

Vertues and uſe.

This Herb is familiarly and frequently uſed by the *Italians* to heal any freſh or green Wound, the Leavs being but bruiſed and bound thereon; and the Juyce therof is alſo uſed in old Sores, to clenſ, dry, and heal them. The Decoction hereof made up with ſome Sugar or Honey is available to clenſ and purge the Body, both upwards and downwards ſomtimes of tough Flegm and clammy Humors and to open Obſtructions of the Liver and Spleen; It hath been found by experience to be available for the Kings Evil, the Herb bruiſed and applied; or an Oyntment made with the Juyce thereof and ſo uſed: And a Decoction of two handfuls therof with four Ounces of *Polipody* in Ale, hath been found by late experience to cure diverſ of the Falling-ſickneſs, that have been troubled with it above twenty yeers.

Wounds, *Clenſ, dry, Heal,* *Obſtruction of the Liver and Spleen,* *Kings Evil,* *Falling-ſickneſs,* *Scabby Heads.*

My ſelf am confident that an Oyntment of it is one of the beſt Remedies for a Scabby Head that is.

Fumitory.

Fumitory.

Description.

OUr common *Fumitory* is a tender sappy Herb, sending forth from one square slender weak Stalk and leaning downwards on all sides many Branches two or three foot long, with finely cut and jagged Leavs of a whitish or rather Blewish, Seagreen colour: At the tops of the Branches stand many small Flowers, as it were in a long spike one above another, made like little Birds of a reddish Purple colour with whitish Bellies: After which come small round Husks containing smal black Seed. The Root is yellow, smal, and not very long, ful of Juyce while it is green But quickly perishing with the ripe Seed: In the Corn Fields in *Cornwal* this beareth white Flowers.

Place.

It groweth in the Corn Fields almost every where as well as in Gardens.

Time.

It Flowreth in *May* for the most part, and the Seed ripeneth shortly after.

Vertues and Use.

The Juyce or Syrup made thereof, or the Decoction made in Whey by it self, with some other purging or opening Herbs and Roots to caus it to work the better, (it self being but weak) is very effectual for the Liver and Spleen, opening the Obstructions thereof and clarifying the Blood from Saltish, Chollerick, and Adust Humors, which caus Lepry, Scabs, Tetters, and Itches, and such like breakings out of the Skin, and after the Purging doth strengthen all the inward parts; it is good also against the yellow Jaundice, and spendeth it by Urin, which it procureth in abundance. The Pouder of the dried Herb given for some time together cureth Melancholly, but the Seed is strongest in operation for all the former Diseases. The distilled Water of the Herb is also of good effect in the former Diseases, and conduceth much against the Plague and Pestilence, being taken with good Treacle. The Distilled Water also, with a little Water and Honey of Roses helpeth all the Sores of the Mouth or Throat, being gargled often therwith. The Juyce dropped into the Eyes cleareth the Sight, and taketh away redness and other defects in them, although it procure some pain for the present and cause Tears. *Dioscorides* saith it hindreth any fresh springing of hairs on the Eyelids (after they be pulled away) if the Eyelids be anointed with the Juyce hereof with Gum *Arabick* dissolved therin. The Juyce of Fumitory and Docks mingled with Vinegar, and the places gently washed or wet therwith, cureth all sorts of Scabs, Pimples, Itches, Wheals, or Pushes which arise on the Face or Hands, or any other part of the Body.

Liver, Spleen, Choller, Aduſt Melancholly, Madneſs, Forgetfulneſs, Jaundice, yellow & black, Peſtilence, Sore Mouth & Throat, Eyes, Hairs, Scabs, Itch, Pimples, Wheals,

Saturn owns the Herb and presents it to the World as a Cure for his own Diseases, and a strengthner of the parts of the Body he rules: If by my *Astrological Judgment* of Diseases, from the Decombiture, you find *Saturn* Author of the Disease, or if by *Direction* from a Nativity you fear a Saturnine Disease approaching, you may by this Herb prevent it in the one, and cure it in the other; and therfore 'tis fit you keep a Syrup of it alwaies by you.

The Furſ-Buſh.

THis is so well known, as well by this name, as in some Countries by the name *Gorſ*, that I shal not need to write any Description therof, my intent being to teach my Country men what they know not, rather than to tell them again of that which is generally known before.

Place.

They are known to grow on dry barren Heaths, and other wast gravelly or sandy grounds in all Countries of this Land.

Time.

They also Flower in the Summer Months.

Vertues and uſe.

They are hot and dry good to open Obstructions of the Liver and Spleen. A Decoction made with the Flowers therof hath been found effectual against the Jaundice, as also to provoke Urine, and clens the Kidneys from Gravel or Stones ingender'd in them.

It is a Plant of *Mars*, and doth all this by Sympathy.

Obſtructions, Liver, Spleen, Yellow Jaundice, Diſury, Gravel, Stone.

Garlick.

THe offensivenes of the breath of him that hath eaten Garlick will leade you by the Nose to the knowledg hereof, and (instead of a description) direct you to the place wher it groweth in Gardens, which kinds are the best and most Phisical.

Vertues and uſe,

This was antiently accounted the Poormans, *Treacle*, it beeing a remedy for all diseases or hurts (except those which it self breeds) It provoketh Urine and womens Courses, helpeth the biting of a Mad Dog and of other Venemous Creatures killeth Wormes in Children

Urine, Terms provokes, Mad Dogs Venemous Beaſts, Worms,

Childern, cutteth and avoydeth tough flegm purgeth the head, helpeth the Lethargie, is a good preſervative againſt, a remedy for any Plague ſore, or foul Ulcer: taketh away ſpots and blemiſhes in the Skin, eaſeth pains of the eares ripeneth and breaketh Impoſtumes or other ſwellings: And for all theſe diſeaſes the Onyons are alſo effectual; But the Garlick hath ſome more peculiar vertues beſides the former: *viz* It hath a ſpeciall quality to diſcuſs the inconveniences coming by corrupt Agues or Mineral Vapours or by drinking corrupt and ſtinking waters; As alſo by taking of Wolfbane, Henbane, Hemlock, or other poyſonfull and dangerous herbs. It is alſo held good in Hydropick diſeaſes, the Jaundice, falling-ſickneſs, Cramps, Convulſions, the piles or Hemorrhoids or other cold diſeaſes.

Lethargy, Flegm, Peſtilence, Apoſtums, Mineral Vapors, Stinking Vapors, Henbane, Hemlock, Wolfbane, Dropſie, Cramps, Convulſions, Falling-ſickneſs.

My Author quotes here many diſeaſes this is good for, but conceals its vices: its heat is very vehement, and al vehement hot things ſend up but ill favor'd vapors to the brains; in cholerick men 'twil ad fuel to the fire, in men oppreſſed by melancholly t'will attenuate the humor and ſend up ſtrange fancies and as ſtrange viſions to the head, therfore let it be taken inwardly with great moderation, outwardly you may make more bold with it.

Mars owns the herb.

Germander.

Diſcription.

COmmon *Germander* ſhooteth forth ſundry ſtalks with ſmall and ſomwhat round leavs, dented about the edges: The Flowers ſtand at the tops, of a deep purple colour: The Root is compoſed of diverſ ſprigs, which ſhoot forth a great way round about, quickly overſpreading a ground.

Place

It groweth uſually with us in Gardens

Time

And flowreth in June or July.

Vertues and uſe

This taken with Honey (ſaith *Dioſcorides*) is a remedy for Coughs for hardnes of the Spleen, and difficulty of Urin, & helpeth thoſe that are fallen into a Dropſie, eſpecially at the beginning of the diſeaſ, a Decction being made therof when it is green & drunk: It alſo bringeth down Womens Courſes and expelleth the dead child: It is moſt effectual againſt the poyſon of al Serpents, being drunk in Wine and the bruiſed herb outwardly applyed uſed with Honey, it clenſeth old and foul Ulcers, and made into an Oyl and the Eyes anoynted therwith, taketh away their dimneſs and moyſtneſs: It is likewiſe good for the paines in the ſides: and Cramps. The Decoction thereof taken for ſome daies together, driveth away and cureth both Tertian and Quarten Agues. It is alſo good againſt all diſeaſes of the brain as continual Headach Falling-ſickneſs, Melancholly Drowſines and Dulnes of ſpirit, Convulſions and Palſeys. A dram of the ſeed taken in Pouder purgeth by Urine and is good againſt the yellow Jaundice. The Juyce of the leaves dropped into the eares killeth the worms in them: The tops therof when they are in flower ſteeped twenty four hours in a draught of white Wine and drunk, killeth wormes in the belly.

Cough, Spleen, Diſury, Dropſie, Terms provokes, Dead Child, Poyſon, Ulcers, Cramps,

It is a moſt prevalent Herb of *Mercury*, and ſtrengthens the brain and apprehention exceedingly; you may ſee what humane vertues are under *Mercury* in the latter end of my *Ephemeris* for 1651. ſtrengthen them when weak, relieve them, when drooping, by this Herb.

Falling ſickneſs, Melancholly, Dulneſs of Spirit, Convulſion Palſey, Yellow, Jaundice, Worms.

Stinking Gladwin.

Deſcription.

THis is one of the kinds of Flower-deluces, having diverſ Leavs riſing from the Roots very like a Flower-de-luce, but that they are ſharp edged on both ſides, and thicker in the middle, of a deeper green colour, narrower and ſharper pointed and of a ſtrong ill ſcent if they be bruiſed between the fingers: In the midle riſeth up a reaſonable ſtrong Stalk a yard high at leaſt, beareth 3. or 4 Flowers at the top made ſomwhat like the Flowers of the Flower-de-luce with three upright Leaves of a dead Purpliſh Aſh-colour with ſome Veins diſcoloured in them, the other three do not fall down, nor the three other ſmal ones are ſo arched nor cover the lower leaves as the Flower-de-luce doth, but ſtand looſe, or aſunder from them: After they are paſt, there come up three ſquare hard Husks opening wide into three parts when they are ripe, wherin lie reddiſh ſeed, turning black when it hath abidden long: The Root is like that of the Flower-de-luce but reddiſh on the outſide, and whitiſh within, very ſharp and hot in taſt, of as evil a ſcent as the leavs.

Place.

This groweth as well on the upland grounds as alſo in moiſt places, in woods and ſhadowy places by the Sea ſide in many places of this Land, and is uſually nurſed up in Gardens.

Time.

It flowreth not until *July*, and the ſeed is ripe in *Auguſt* or *September*, yet the Huskes after they are ripe opening themſelves, will hold their ſeeds within them for 2. or 3. Months, and not ſhedd them.

Vertues and Uſe.

It is uſed by many countrey people to purge corrupt tough Flegm and Choller which they do

Flegm, Choler,

do by drinking the decoction of the Roots, and ſome to make it work more gently do but infuſe the ſliced roots in Ale, and ſome take the leavs w^ch ſerveth wel for the weaker ſtomachs. The Juyce herof put up, or ſnuffed up the noſe cauſeth neezing, & draweth from the head much corruption; & the pouder therof doth the ſame: The Pouder therof drunke in wine, helpeth thoſe that are troubled with Cramps, and Convulſion or w^th the Gout or *Sciatica* and giveth eaſ to thoſe that have any griping pains in their body or belly, and helpeth thoſe that have the Strangury: It is given w^th much profit to thoſe that have had long Fluxes by the ſharp & evil quality of humors, which it ſtayeth having firſt cleanſed & purged them by the drying and binding property therin. The Root boyled in wine and drunk doth effectually procure womens courſes, and uſed as a Peſſary worketh the ſame effects, but cauſeth Abortion in women with child. Half a dram of the ſeed beaten to pouder and taken in wine doth ſpeedily cauſ one to pis which otherwiſ cannot: The ſame taken with vinegar, deſſolveth the hardnes & ſwellings of the ſpleen. The Root is very effectual in all Wounds, and ſpecially of the head, as alſo to draw forth any ſplinters, Thornes, Broken bones, or any other thing ſticking in the fleſh without cauſing pain, being uſed with a little Verdigreeſe and Honey, and the great Centaury Root: The ſame boyled in Vinegar and laid upon any Tumor or Swelling, doth very effectually diſſolve and conſume them, yea even the ſwellings of the Throat called the Kings evil: The Juyce of the Leavs and Roots healeth the Itch and all running or ſpreading Scabs or Sores, and Blemiſhes or Scars in the Skin whereſoever they be.

Golden Rod.

Deſcription.

THis riſeth up with browniſh ſmal round Stalks two foot high and ſomtimes more, having thereon many narrow and long dark greene leaves very ſeldom with any dents about the edges, or any ſtrakes or white ſpots therin, yet they are ſomtimes ſo found; divided at the tops into many ſmall branches, with diverſ ſmall yellow flowers on every one of them, all which are turned one way, and being ripe do turn into down & are caried away with the wind. The Root conſiſteth of many ſmall fibres which grow not deep in the ground, but abideth all the winter therin, ſhooting forth new branches every yeer, the old ones dying downe to the ground.

Place.

It groweth in the open places of woods and Copſes both moyſt and dry grounds in many places of this Land.

Time.

It Flowreth about the Month of *July*.

Vertues and uſe.

Arnoldus de villa nova, commendeth it much againſt the Stone in the Reins and Kidneys, and to provoke Urine in abundance, whereby alſo the Gravel or Stone may be avoided. The Decoction of the Herb green or dry, or the diſtilled Water therof is very effectual for inward Bruiſes, as alſo to be outwardly applied, it ſtayeth bleedings in any part of the Body, and of Wounds alſo, the Fluxes of Humors, the Bloody Flux, and Womens Courſes; and is no leſs prevalent in all Ruptures or Burſtings, being drunk inwardly and outwardly applied. It is a Soveraign Wound Herb, inferior to none, both for inward and outward Hurts, green Wounds and old Sores and Ulcers are quickly cured therewith. It is alſo of eſpecial uſe in all Lotions for Sores or Ulcers in the Mouth, Throat, or privy parts of Man or Woman: The Decoction alſo helpeth to faſten the Teeth that are looſ in the Gums.

Teeth looſ,

Venus claims the Herb, and therefore to be ſure, it reſtores Beauty loſt.

Beauty loſt.

Goutwort, or Herb-Gerard.

Deſcription.

THis is a low Herb ſeldom riſing half a yard high, having ſundry Leavs ſtanding on browniſh green Stalks by threes, fnipped about, and of a ſtrong unpleaſant ſavour. The Umbels of Flowers are white, and the Seed blackiſh, the Root runneth in the Ground, quickly taking up a great deal of room.

Place.

It groweth by Hedg and Wall ſides, and often in the borders or Corners of Fields, and in Gardens alſo.

Time.

It Flowreth, and Seedeth about the end of *July*.

Vertues and uſe.

Goutwort had not his name for nothing, but upon good experience to help the cold Gout, and *Sciatica*, as alſo Joynt aches, and other cold Griefs.

Gout, Sciatica, Joynts,

The very bearing of it about one, eaſeth the pains of the Gout, and defends him that bears it from the Diſeaſ.

Gromel.

OF this I shall briefly describe three kinds which are principally used in Physick, the Vertues whereof are alike, though somwhat different in their manner and form of growing.

Description.

The greater *Gromel* groweth up with slender hard and hairy Stalks trailing and taking Root in the ground as it lieth thereon, and parted into many other smaller Branches with hairy dark green Leavs thereon. At the Joynts with the Leavs come forth very smal blew Flowers, and after them hard stony roundish Seed. The Root is long and woody abiding the Winter and shooting forth fresh Stalks in the Spring.

The smal wild *Gromel* sendeth forth divers upright hard branched Stalks two or three foot high, full of Joynts, at every of which groweth smal, long, hard, and rough Leavs, like the former but lesser, among which Leavs come forth small white Flowers, and after them grayish round Seed like the former. The Root is not very long, but with many Strings thereat.

The Garden *Gromel* hath divers upright slender woody hairy Stalks brown and crested, very little branched, with Leavs like the former, and white Flowers, after which in rough brown Husks is contained a white hard round Seed shining like Pearls, & greater than either of the former: The Root is like the first described, with divers Branches and Strings thereat, which continueth (as the first doth) all Winter.

Place.

The two first grow wild in barren or untilled places, and by the way sides in many places of this Land. The last is a Nursling in the Gardens of the curious.

Time.

They all Flower from *Midsummer* unto *September* somtimes, and in the mean time the Seed ripeneth.

Vertues and use.

These are accounted to be of as singular force as any other Herb or Seed whatsoever, to break the Stone, and to avoid it and the Gravel either in the Reins or Bladder; as also to provoke Urine being stopped, and to help the Strangury. The Seed is of greatest use, being bruised and boiled in white Wine, or in Broth, or the like, or the Pouder of the Seed taken therin: Two drams of the Seed in Pouder taken with Womens Breast-Milk, is very effectual to procure a speedy Delivery to such Women as have sore pains in their Travail and cannot be delivered. The Herb it self (when the Seed is not to be had) either boyled or the Juyce therof drunk, is effectual to all the purposes aforetaid but not so powerful or speedy in operation.

Stone, Gravel, Strangury, Travail in Women.

The Herbe belongs to Dame *Venus*, and therfore if *Mars* cauſ the Chollick or Stone, as usually he doth if in *Virgo*. this is your cure.

Winter Green.

Description.

THis sendeth forth 7. 8. or 9. Leaves from a smal browniſh creeping Root, every one standing upon a long Footstalk, which are almost as broad as long, round pointed, of a sad green colour and hard in handling, and like the Leaf of a Pear-tree, from whence ariseth a slender weak Stalk, yet standing upright, bearing at the top many smal, white and sweet smelling Flowers, laid open like a Star, consisting of five round pointed Leavs, with many yellowish threds standing in the middle, about a green Head, and a long stile with them, which in time groweth to be the Seed Vessel, which being ripe is found five square with a smal point at it, wherin is contained Seed as small as dust.

Place.

It groweth seldom in the Fields, but frequently in the Woods Northwards, *viz.* In *Yorkshire*, *Lancashire*, and *Scotland*.

Time.

It Flowreth about *June* or *July*.

Vertues and Use.

Winter-Green is a singular good Wound Herb and an especial Remedy for to heal green Wounds speedily, the green Leavs being bruised and applied, or the Juyce of them: A Salve made of the green Herbs stamped or the Juyce boyled with Hogs Lard, or with Sallet Oyl and Wax, and some Turpentine added unto it, is a Soveragn Salve, and highly extolled by the *Germans* who much use it to heal all manner of Wounds and Sores. The Herb boyled in Wine and Water and given to drink to them that have any inward Ulcers in their Kidneys or Neck of the Bladder, doth wonderfully help them: It staieth also all Fluxes whether of Blood or Humors, as the Lask, Bloody Flux, Womens Courses, and bleeding of Wounds, and taketh away any Inflamation on rising upon pains of the Heart. It is no less helpful for foul Ulcers hard to be cured, as also for Cankers or Fistulaes. The distilledWater of the Herb doth effectually perform the same things.

Wounds, Ulcers, Kidneys, Bladder, Flux, Bloodyflux, Terms stops, Inflamations, Cankers, Fistulaes.

Groundſel.

Description.

Our common *Groundſel* hath a round green, and ſomwhat browniſh Stalk, ſpread toward the top into Branches, ſet with long and ſomwhat narrow green Leavs cut in on the edges, ſomwhat like the Oak Leavs, but leſſer and round at the ends; at the tops of the Branches ſtand many ſmal green Heads, out of which grow ſmall yellow threds or thrums, which are the Flowers, and continue many daies blown in that manner before it paſs away into Down, and with the Seed is carried away in the wind, The Root is ſmal and threddy, and ſoon periſheth and as ſoon riſeth again of its own ſowing, ſo that it may be ſeen many Months in the Yeer, both green, and in Flower and Seed, for it will Spring and Seed twice in a yeer at leaſt if it be ſuffered in a Garden.

Place.

This groweth almoſt every where, as wel on the tops of Walls as at the foot among Rubbiſh, and untilled grounds, but eſpecially in Gardens.

Time.

It Flowreth as is ſaid before, almoſt in every Month through the yeer.

Vertues and Uſe.

The Decoction of the Herb (ſaith *Dioſcorides*) made with Wine and Drunk helpeth the pains in the Stomach proceeding of Choller (which it may well do by a Vomit, as daily experience ſheweth) the Juyce hereof taken in Drink, or the Decoction of it in Ale, gently performeth the ſame: It is good againſt the Jaundice and Falling-ſickneſs being taken in Wine, as alſo againſt difficulty of making Water, it provoketh Urin, expelleth Gravel in the Reins or Kidneys; a dram thereof given in Oximel, after ſome walking or ſtirring the Body; It helpeth alſo the *Sciatica*, griping of the Belly and the Chollick, helpeth the defects of the Liver, and provoketh Womens Courſes. The freſh Herb boyled and made into a Pultis and appled to the Breaſts of Women that are ſwollen with pain and heat, as alſo to the privy parts of Man or Woman, the Seat, or Fundament, or the Arteries, Joynts, and Sinews when they are inflamed and ſwoln, doth much eaſe them: and uſed with ſome Salt helpeth to diſſolve Knots or Kernels in any part of the Body. The Juyce of the Herb, or (as *Dioſcorides* ſaith) the Leavs and Flowers with ſome fine Frankincenſe in Pouder, uſed in Wounds of the Body, Nervs, or Sinews, doth ſingularly help to heal them. The Diſtilled Water of the Herb performeth well all the aforeſaid Cures, but eſpecially for Inflamations or watering of the Eyes by reaſon of the Defluxion of Rhewm into them.

Choller in the Stomach, Yellow Jaundice, Falling-ſickneſs, Diſury, Gravel, Sciatica, Chollick, Liver, Terms provokes, Womens Breaſts, Privy parts, Arteries Joynts & Sinews over heated, Kernels, Wounds in the Sinews,

Inflamations in the Eyes,

This Herb is *Venus* her Mrs. piece, and is as gallant an Univerſal Medicine for all Diſeaſes coming of heat whatſoever they be, or in what part of the Body ſoever they lie, as the Sun ſhines upon; 'tis very ſafe and friendly to the Body of Man, yet cauſeth Vomiting if the Stomach be afflicted, if not, it purging, and it doth it with more gentleneſs than can be expected. 'Tis moiſt and ſomwhat cold withal, thereby cauſing expulſion, and repreſſing the Heat cauſed by the motion of the internal parts in Purges and Vomits, Lay by your Learned Receipts, Take ſo much Senna, ſo much Scammony, ſo much Colocynthis, ſo much Infuſion of *Crocus Metallorum*, &c. This Herb alone preſerved in a Syrup, in a diſtilled Water, in an Oyntment ſhal do the deed for you in all hot Diſeaſes, and it ſhall do it, 1. Safely, 2. Speedily.

Harts-Tongue.

Description.

This hath diverſ Leavs riſing from the Root every one ſeverally which fold themſelvs in their firſt ſpringing and ſpreading; when they are full grown are about a foot long, ſmooth and green above, but hard and with little Sap in them, and ſtraked on the back athwart on both ſides of the middle Rib, with ſmal and ſomwhat long browniſh marks; the bottoms of the Leavs are a little bowed on each ſide of the middle Rib ſomwhat narrow with the length, and ſomwhat ſmal at the end. The Root is of many black threds, folded or interlaced together.

Time.

It is green all the Winter, but new Leavs ſpring every yeer.

Vertues and Uſe.

Harts-Tongue is much commended againſt the hardneſs and ſtoppings of the Spleen and Liver, and againſt the heat of the Liver and Stomach, and againſt Lasks and the Bloody Flux: The Diſtilled Water therof is alſo very good againſt the Paſſions of the Heart, and to ſtay the Hiccough, to help the falling of the Pallat, and ſtay the bleeding of the Gums being gargled in the mouth. *Dioſcorides* ſaith it is good againſt the ſtinging or biting of Serpents.

Spleen, Liver, Flux, Bloodyflux Hiccough, Gums, Venemous Beaſts.

Jupiter claims Dominion over this Herb, therfore is a ſingular Remedy for the Liver, both to ſtrengthen it when weak, and eaſ it when

T

when afflicted, 'tis no matter by what you ſhould do well to keep it in a Syrup all the yeer, for though my Author ſay 'tis green all the yeer, I ſcarce beleev it.

As for the uſe of it, my Directions at latter end will be ſufficient, and enough for thoſe that are ſtudious in Phyſick to whet their Brains upon for one year or two.

The Hazel Nut.

THeſe are ſo well known to every Boy, that they need no Deſcription.

Vertues and Uſe.

The parched Kernels made into an Electuary, or the Milk drawn from the Kernels with Mead or Honeyed Water, is very good to help an old Cough; and being parched and a little Pepper put to them and drunk, digeſteth the Diſtillations of Rhewm from the Head: The dried Husks and Shels to the weight of two drams taken in red Wine, ſtaieth Lasks, and Womens Courſes, and ſo doth the red Skin that covers the Kernels which is more effectual to ſtay Womens Courſes.

Cough, Phtiſick, Flux, Terms ſtops,

And if this be true as it is, then why ſhould the Vulgar ſo familiarly affirm, that eating Nuts cauſeth ſhortneſs of Breath than which nothing is falſer, for how can that which ſtrengthens the Lungues cauſe ſhortneſs of breath? I confeſs the Opinion is far older than I am, I knew Tradition was a Friend to Errors before, but never that he was the Father of Slanders, or are mens tongues ſo given to ſlandering one another that they muſt ſlander Nuts too, to keep their tongues in ure? If any thing of the Hazel Nut be ſtopping 'tis the Husks and Shels, and no body is ſo mad to eat them unleſs Phyſically, and the red Skin which covers the Kernel which you may eaſily pull off. And thus have I made an Apology for Nuts which cannot ſpeak for themſelves.

Hawkweed

Deſcription.

THis hath many large hairy leaves lying on the ground, much rent or torn on the ſides into many gaſhes like Dandelion but with greater parts more like the ſmooth ſow Thiſtle from among wch ariſeth a hollow rough ſtalk two or three foot high branched from the middle upward, wherin are ſet at every Joynt longer leaves, little or nothing rent or cut in, bearing at their top ſundry pale, yellow Flowers conſiſting of many ſmall narrow leavs, broad pointed and nicked in at the ends, ſet in a double row or more, the outermoſt beeing larger than the inner, which form moſt of the *Hawkweeds* (for there are many kinds of them) do hold, which turne into down, and with the ſmall browniſh ſeeds, is blown away with the wind: The Roote is long and ſomwhat greater with many ſmall fibres thereat. The whole is full of bitter milke.

Place.

It groweth in divers places about Field ſides, and the path waies in dry grounds.

Time.

It flowreth & flies away in the Sūmer Months.

Vertues and uſe.

Hawkweed (ſaith *Dioſcorides*) is cooling ſomwhat drying and binding, and therfore good for the heat of the ſtomach, and gnawings therein, for Inflamations and the hot fits of Agues. The Juice therof in wine helpeth digeſtion, diſcuſſeth wind, hindreth crudities abiding in the ſtomack, and helpeth the difficulty of making Water, the biting of Venemous Serpents, and ſting of the Scorpion, if the herb be alſo outwardly applyed to the place, and is very good againſt all other Poyſons. A ſcruple of the dryed Juyce given in wine and vinegar is profitable for thoſe that have the Dropſie. The decoction of the Herb taken with Honey, digeiſteth thin flegm in the cheſt or lungs, and with Hyſop helpeth the cough. The Decoction therof and of wild Succory made with wine and taken helpeth the wind chollick and hardneſs of the ſpleen, it procureth reſt and ſleep, hindereth venery and venereous dreams, cooleth, heats, purgeth the ſtomach, encreaſeth blood, & helpeth the diſeaſes of the Reins and Bladder. Outwardly applied it is ſingular good for all the defects and diſeaſes of the eyes, uſed with ſome womens Milke, and is uſed wth good ſucceſs in fretting or creeping ulcers, eſpecially in the beginning. The green Herb bruiſed and with a little Salt applyed to any place burnt with fire before bliſters do ariſe, helpeth them, as alſo inflamations St Anthonies fire and al Puſhes, and eruptions, heat, and ſalt Flegm. The ſame applyed with Meal and fair water in manner of a Poultis to any place affected with convulſions and the Cramp or ſuch as are out of Joynt doth give help and eaſe. The diſtilled water cleanſeth the skin and taketh away freckles, Spots, the Morphew or Wrinkles in the face.

Cools, Dries, Binds, Gnawing in the Stomach, Inflamations, Agues, Crudity, Diſury, Venemous Beaſts, Poyſon, Dropſie, Flegm, Chollick, Spleen, Watching, Luſt ſtops, Venerious Dreams, Reins, Bladder, Eyes, Ulcers, Burnings, Inflamations, St. Anthonies Fire, Heat, ſalt Flegm, Convulſion Cramp, Freckles, Spots, Morphew, Wrinkles.

The Hawthorn.

It is not my intent to trouble you with a Deſcription of this Tree which is ſo well known that it needeth none.

It

It is ordinarily but a Hedg Buſh, although being pruned and dreſſed it groweth to be a Tree of a reaſonable height.

As for the Hawthorn tree at Glaſtenbury, which is ſaid to flower yearly on Chriſtmas Day, it rather ſhews the ſuperſtition of thoſe who obſerve it for the time of its Flowring, than any great wonder, ſith the like may be found in diverſe other places of this land, as in Whey-ſtreet in Rumney Marſh, and neer unto Nantwiche in Cheſhire by a place called White-Green, where if the Winter be milde they will be white bloſſomes all over before and about *Chriſtmas*, as in *May*, if the weather be froſty, it Flowreth not until *January*, or that the hard weather be over.

Vertues and uſe.

Stone, Dropſie, Flux, Inward pains, Splinters, Thorns.

The Berries or the ſeeds in the Berries beaten to pouder and drunk in wine, are held ſingular good againſt the ſtone and are good for the dropſy. The diſtilled water of the Flowers ſtayeth the lask. The ſeeds cleared from the Down, bruiſed and boyled in wine & drunk is good for inward tormenting pains. If cloathes and ſpunges be wet in the ſaid diſtilled water and applyed to any place wherin thornes, ſplinters or the like do abide in the Fleſh, it will notably draw them forth.

And thus you ſee the thorn gives a medicine for his own pricking, and ſo doth almoſt every thing elſe.

Hemlock *Cicuta.*

Deſcription.

The Common great *Hemlock* groweth up with a green ſtalk four or five foot high or more, ful of red ſpots ſomtimes, and at the Joynts very large winged leavs ſet at them which are divided into many other winged leaves, one ſet againſt another dented about the edges, of a ſad green colour branched towards the top where it is full of Umbles of white Flowers, and afterwards with whitiſh flat Seed: The Root is long, white, and ſomtimes crooked and hollow within, the whol Plant and every part hath a ſtrong, heady, and ill favor'd ſcent, much offending the Senſes.

Place.

It groweth in all Countries of this Land by Wals and Hedges ſides, in waſt Grounds and untilled places.

Time.

It Flowreth and Seedeth in *July*, or thereabouts.

Vertues and Uſe.

Hemlock is exceeding cold and very dangerous, eſpecially to be taken inwardly: It may ſafely be applied to Inflamations, Tumors, and Swelling in any part of the Body (ſave the Privy parts) as alſo to St. Anthonies fire, Wheals, Puſhes, and creeping Ulcers that riſe of hot ſharp Humors, by cooling and repelling the heat. The Leavs bruiſed and laid to the Brow or Forehead, is good for their Eyes that are red and ſwollen, as alſo to take away a Pin and Web growing in the Eye, this is a tried Medicine; Take a ſmal Handful of the Herb and half ſo much Bay Salt beaten together, and applied to the contrary Wreſt of the Hand for twenty four Hours, doth remove it in thrice dreſſing. If the Root hereof be roaſted under the Embers, wrapped in double wet Papers, until it be ſoft and tender, and then applied to the Gout in the Hands or Fingers it will quickly help this evil. If any ſhall through miſtake eat the Herb *Hemlock* inſtead of Parſly, or the Root inſtead of a Parſnip (both which it is very like) whereby hapneth a kind of Phrenſie, or Perturbation of the ſenſes, as if they were ſtupified or drunk, The Remedy is as *Pliny* ſaith, to drink of the beſt and ſtrongeſt pure Wine, before it ſtrike to the Heart, or Gentian put into Wine, or a draught of good Vinegar, wherewith *Tragus* doth affirm that he cured a Woman that had eaten the Root.

Inflamations, St. Anthonies Fire, Tetters, Ring-worms, Eyes, Pin and Web, Gout,

Saturn claims Dominion over the Herb, yet I wonder why it may not be applied to the privities in a Priapiſmus, or continual ſtanding of the Yard, it being very beneficial for that Diſeaſ; I ſuppoſe my Authors Judgment was firſt upon the oppoſit Diſpoſition of *Saturn* to *Venus* in thoſe Faculties, and therfore he forbid the applying of it to thoſe parts that it might not cauſ Barrenneſs, or ſpoil the Spirit Procreative, which if it do, yet applied to the Privities it ſtops luſtful thoughts.

Lechery.

Hemp. *Cannabis*

Sax. Hamp. Kanuk. Canna calthemus arundo

THis is ſo well known to every good Huſwife in the Country, that I ſhal not need to writé any Deſcription of it.

Time.

It is ſown in the end of *March*, or beginning of *April*, and is ripe in *Auguſt* or *September*.

Vertues and uſe.

Wind, Cough, Jaundice,

The Seed of *Hemp* conſumeth Wind, and by the much uſe thereof diſperſeth it ſo much that it drieth up the natural Seed for Procreation; yet being boyled in Milk and taken, helpeth ſuch as have a hot dry Cough. The Dutch make an Emulſion out of the Seed, and give it with good ſucceſs to thoſe that have the Jaundice, eſpecially in the beginning of the Diſeaſ if there be no Ague accompanying it, for

Gall, Choller, openeth Obſtructions of the Gall, and cauſeth digeſtion of Choller. The Emulſion or Decoction of the Seed ſtaieth Lasks and continual Fluxes, eaſeth the Chollick, and allayeth the troubleſom Humors in the Bowels, and ſtaieth bleeding at the Mouth, Noſe, or other place, ſome of the Leavs being fried with the Blood of that bleed, and ſo given them to eat. It is held very good to kill the Worms in man or Beaſt, and the Juyce dropped into the Ears killeth Worms in them, and draweth forth Earwigs, or other living Creatures gotten into them. The Decoction of the Root allayeth Inflamations in the Head or any other parts; the Herb it ſelf, or the Diſtilled Water thereof doth the like: The Decoction of the Roots eaſeth the pains of the Gout, the hard Tumors, or Knots in the Joynts, the pains and ſhrinking of the Sinews, and the pains of the Hips: The freſh Juyce mixed with a little Oyl and Butter, is good for any place that hath been burnt with fire being thereto applied.

Flux, Chollick, Bleeding, Worms, Earwigs, Inflamation, Gout, Sinews ſhrunk.

It is a Plant of *Saturn*, and good for ſomething elſ you ſee than to make Halters only.

Henbane. *Gal. &c.*

Description.

OUr common *Henbane* hath very large, thick, ſoft, woolly Leavs lying upon the ground, much cut in or torn on the edges of a dark ill grayiſh green colour, among which riſe up diverſ thick & ſhort Stalks two or three foot high, ſpread into diverſ ſmaller Branches with leſſer Leavs on them, and many hollow Flowers ſcarce appearing above the Husks, and uſually torn on the one ſide, ending in five round points growing one above another, of a deadiſh yellow colour, ſomwhat paler toward the edges, with many purpliſh Veins therein, and of a dark yellowiſh purple in the bottom of the Flower, with a ſmal pointel of the ſame colour in the middle, each of them ſtanding in hard cloſe Husk, which after the Flower is paſt, groweth very like the Husk of Aſarabacca, and ſomwhat ſharp at he top Points, wherein is contained much ſmal Seed very like Poppy Seed, but of a duſky grayiſh colour. The Root is great, white and thick, branching forth diverſ waies under ground, ſo like a Parſnip Root (but that it is not ſo white) that it hath deceived diverſ. The whol Plant more than the Root hath a heavy ill ſoporiferous ſmell ſomwhat offenſive.

Place.

It commonly groweth by the way ſides, and under Hedg ſides and Wals.

Time.

It Flowreth in *July*, and ſpringeth again yeerly of its own Seed.

I doubt my Author miſtook *July* for *June*, if not for *May*.

Vertues and Uſe.

The Leavs of *Henbane* do cool all hot Inflamations in the Eyes or any other part of the Body; and are good to aſſwage all manner of Swellings of the Cods or Womens Breaſts, or elſ where, if they be boyled in Wine, and either applied themſelves or the Fomentation warm; it alſo aſſwageth the pain of the Gout, the *Sciatica* and all other pains in the Joynts which ariſe from an hot cauſ. And applied with Vinegar to the Forehead and Temples, helpeth the Headach and want of ſleep in hot Feavers. The Juyce of the Herb or Seed, or the Oyl drawn from the Seed doth the like. The Oyl of the Seed is helpful for the Deafneſs, Noiſ, and Worms in the Ears, being dropped therein; the Juyce of the Herb, or Root doth alſo the ſame. The Decoction of the Herb, or Seed, or both, killeth Lice in Man and Beaſt. The fume of the dried Herb Stalks and Seed burned, quickly healeth Swellings, Chilblains,, or Kibes in the Hands or Feet, by holding them in the fume thereof. The Remedy to help thoſe that have taken *Henbane* is to drink Goats Milk, Honyed Water or Pine Kernels, with Sweet Wine: or in the abſence of theſe, Fennel Seed, Nettle Seed, the Seed of Creſſes, Muſtard, or Radiſh, as alſo Onions, or Garlick taken in Wine, do all help to free them from danger, and reſtore them to their due temper again.

Inflamation, Gout, Sciatica, Joynts, Watching, Deafneſs, Noiſe in the Ears, Chilblains Kibes,

Take notice that this Herb muſt never be taken inwardly, outwardly, an Oyl, Oyntment, or Plaiſter of it, is moſt admirable for the Gout, to cool the Venerial heat of the Reins in the French Pox, to ſtop the Toothach being applied to the aching ſide, to allay all Inflamations, and to help the Diſeaſes before premiſed.

French-Pox.

I wonder in my Heart how Aſtrologers could take on them to make this an Herb of *Jupiter*, and yet *Mizaldus*, a man of a penetrating Brain, was alſo of this Opinion as wel as the reſt, the Herb is indeed under the Dominion of *Saturn*, and I prove it by this Argument.

All the Herbs which delight moſt to grow in Saturnine places, are Saturnine Herbs.

But *Henbane* delights moſt to grow in Saturnine places, and whol Cart loads of it may be found neer the places where they empty the common Jakes, and ſcarce a ſtinking Ditch to be found without, it growing by it.

Ergo 'tis an Herb of *Saturn*.

Herb

Herb Robert. or Shenfoy crane bill.

Description.

THis riseth up with a reddish stalk two foot high, having divers leaves thereon upon very long and reddish footstalkes, divided at the ends into three or five divisions, each of them cut in on the edges some deeper then others, and all dented likewise about the edges, which often tims turn reddish: At the tops of the stalk come forth divers flowers made of five leavs, much larger then the Doves foot, and of a more reddeish colour after which come beak heads as in others: The Roote is small and threddy, and smelleth as the whole plant very strong, almost stinking.

Place.

This groweth frequently every where by way sides, upon ditch banks, and wast grounds whersoever one goeth.

Time.

It flowreth in *June* and *July* chiefly, and the seed is ripe shortly after.

Vertues and use.

Herb Robert is commended not only against the stone, but to stay bloud, where or howsoever flowing; it speedily healeth all green wounds, and is effectual in old ulcers in the privy parts or else where.

Stone, Bleeding, Terms stops, wounds, Ulcers in the Privities.

You may perswade your self this is true and also conceive a good reason for it, if you you doe but consider 'tis an herb of *Venus* for al it hath gotten a mans name.

Herba paris Herb True-love, OR One-berry.

Description.

THe ordinary Herb True-love, hath a small creeping Root running under the upper crust of the ground, somwhat like a Coutchgrass Root but not so white, shooting forth stalks with leavs, some wherof carry no berries, though others do, every stalk smooth without Joynts and blackish green, rising about half a foot high if it bear berries otherwise seldom so high, bearing at the top four leaves set directly one against another in maner of a Cros or a Riband tied (as it is called) on a True-loues Knot: which are each of them a part: somwhat like unto a Nightshade Leaf, but somwhat broader, having somtimes but three Leavs, somtimes five, somtimes six, and these somtimes greater than in others. In the middle of the four Leavs riseth up one smal slender Stalk about an inch high, bearing at the top thereof one Flower spread open like a Star consisting of four small and narrow long pointed Leavs of a yellowish green colour, and four other lying between them lesser than they; in the middle wherof standeth a round dark purplish Button or Head, compassed about with eight smal yellow Mealy threds, with three colours make it the more conspicuous and lovely to behold: This Button or Head in the middle, when the other Leavs are withered, becometh a blackish Purple Berry full of Juyce of the bigness of a reasonable Grape, having within it many white Seeds: The whol Plant is without any manifest tast.

Place.

It groweth in Woods and Copses, and somtimes in the corners or borders of Fields and wast Grounds in very many places of this Land; and abundantly in the Woods, Copses, and other places about *Chisselhurst* and *Maidstone* in *Kent*.

Time.

They spring up in the middle of *April* or *May*, and are in Flower, soon after; The Berries are ripe in the end of *May*, and in some places in *June*.

Vertues and Use.

The Leavs or Berries hereof are effectual to expel poyson of all sorts, especially that of the Aconites, as also the Plague, and other Pestilential Diseases. Some have been holpen therby saith *Mathiolus*, that have lien long in a lingring sickness, and others that by Witchcraft (as it was thought) were become half foolish, by taking a dram of the Seeds or Berries hereof in Pouder every day for twenty daies together, they were restored to their former health. The Roots in Pouder taken in Wine easeth the pains of the Chollick speedily: The Leavs are very effectual as well for green Wounds, as to clense and heal up old filthy Sores and Ulcers; and is very powerful to discuss all Tumors, and Swellings in the Cods, privy Parts, or Groyn, or in any part of the Body, and speedily to ally all Inflamations. The Leavs or their Juyce applied to Felons, or those Nails of the Hands or Toes that have Imposthumes or Sotes gathered together at the Roots of them, healeth them in short space.

Poyson, Pestilence, Feavers, Witchcraft, Chollick, Wounds, ulcers, Swellings in the Groyn, Cods, and Privities, Inflamations, Imposthumes.

The Herb is not to be described for the premises, but is fit to be nourished in every good Womans Garden.

Venus owns it.

Hyssop.

THis is so well known to be an Inhabitant in every Garden, that it wil save me Labor in writing a Description thereof. The Vertues are as followeth.

Vertues and use.

Dioscorides saith that *Hyssop* boyled with Rue and Honey, and drunk, helpeth those that are troubled with Coughs, shortness of breath, wheesing, and Rhewmatick Distillations upon the Lungs: Taken also with Oximel, it purgeth gross Humors by the Stool; and with Honey killeth Worms in the Belly; and with fresh or new Figs bruised, helpeth to loosen the Belly, and more forcibly if the Root of Flower-de-luce and Cresses be added thereto. It amendeth and cherisheth the Native colour of the Body spoiled by the yellow Jaundice, and being taken with Figs and Nitre helpeth the Dropsie and the Spleen. Being boyled with Wine, it is good to wash Inflamations: and taketh away black and blew Spots and Marks that come by Strokes, Bruises, or Fals, being applied with warm Water. It is an excellent Medicine for the Quinsie, or Swelling in the Throat, to wash and gargle it, being boyled with Figs. It helpeth the Toothach, being boyled in Vinegar, and gargled therwith. The hot Vapors of the Decoction taken by a Funnel in at the Ears, easeth the Inflamations and singing noise of them: Being bruised and Salt, Honey, and Cummin Seed put to it, it helpeth those that are stung by Serpents. The Oyl thereof being anoynted killeth Lice, and taketh away Itching of the Head: It helpeth those that have the Falling-sickness which way soever it be applied: It helpeth to expectorate tough Flegm, and is effectual in al cold Griefs, or Diseases of the Chest and Lungs, being taken either in a Syrup or licking Medicine. The green Herb bruised and a little Sugar put thereto, doth quickly heal any cut, or green Wound, being thereunto applied.

Cough, shortueß of breath, Wheesing, Groß Humors, Worms, yellow Jaundice, Dropsie, Spleen, Inflamations, black and blue spots, Quinsie, Toothach, Noise in the Ears, Venemous Beasts, Lice, Itching of the Head, Falling-sickneß, Wounds.

The Herb is *Jupiters*, and the Sign *Cancer*; It strengthens all the parts of the Body under *Cancer* and *Jupiter*, which what they be may be found amply discoursed of in my *Astrological Judgement of Diseases.*

Hops.

THese are so well known that they need no Description, I mean the manured kind which every good Husband or Huswife is acquainted with.

The wild *Hop* groweth up as the other doth, ramping upon Trees or Hedges that stand next unto them, with rough branches, and Leavs like the former; but it giveth smaller Heads & in far less plenty than it, so that there is scarce a Head or two seen in a year on divers of this wild kind; wherein consisteth the chief difference.

Place.

They delight to grow on low moist grounds, and are found in all parts of this Land.

Time.

They spring not up until *April*, and Flower not until the latter end of *June*, the heads are not gathered until the middle or latter end of *September*,

Vertues and use.

This Physical operation is to open Obstructions of the Liver and Spleen to clens the Blood, to looſen the Belly, to clens the Reins from Gravel, and provoke Urine. The Decoction of the tops of Hops, as well of the tame as the wild, worketh the same effects. In clensing the Blood they help to cure the French Disease, and al manner of Scabs, Itch, and other breakings out in the Body, as also al Tetters, Ringworms, and spreading Sores, the Morphew, and all discolourings of the Skin. The Decoction of the Flowers and tops, do help to expel poyson that any one hath drunk: Half a dram of the Seed in Pouder taken in drink, killeth Worms in the Body, bringeth down Womens Courses, and expelleth Urin: A Syrup made of the Juyce and Sugar, cureth the yellow Jaundice, easeth the Headach that comes of Heat, and tempereth the heat of the Liver and Stomach, and is profitably given in long and hot Agues that rise of Choller and Blood. Both the wild and the manured are of one property, and alike effectual in al the aforesaid Diseases.

Obstructions, Liver, Spleen, Blood, Reins clenseth, French Pox, Scabs, Itch, Tetters, Ringworms, Morphew, Poyson, Worms, Terms provokes, Disury, yellow Jaundice, Liver, Stomach, Agues.

By all these Testimonies, Beer appears to be better than Ale.

Mars owns the Plant, and then Dr. *Reason* will tell you how it performs these actions.

Horehound

Description

COmmon *Horehound* groweth up with square hoary Stalks, half a yard or two foot high, set at the Joynts with two round crumpled rough Leavs, of a sullen hoary green colour, of a reasonable good scent, but a very bitter tast: The Flowers are smal, white and gaping, set in rough, hard, prickly Husks, round about the Joynts with the Leaves from the middle of the Stalk upwards, wherein afterwards is found smal round blackish Seed. The Root is blackish, hard, and woody,

woody, with many strings thereat, and abideth many years.

Place.

It is found in many parts of this Land, in dry grounds and wast green places.

Time.

It Flowreth in or about *July*, and the Seed is ripe in *Augst.*

Vertues and Use.

A Decoction of the dried Herb with the Seed, or the Juyce of the green Herb taken with Honey, is a Remedy for those that are pursie or short winded, or have a Cough or are fallen into a Consumption either through long sickness, or thin Distillations of Rhewm upon the Lungs. It helpeth to expectorate tough Flegm from the Chest, being taken with the Roots of Iris or Orris. It is given to Women to bring down their Courses, to expel the Afterbirth, and to them that have sore and long Travails, as also to those that have taken Poyson, or are stung or bitten by Venemous Serpents: The Leavs used with Honey purge foul Ulcers stay running or creeping sores, and the growing of the Flesh over the Nails. It also helpeth pains of the sides. The Juyce thereof with Wine and Honey helpeth to cleer the Eyesight, and snuffed up into the Nostrils, purgeth away the yellow Jaundice, and with a little Oyl of Roses dropped into the Ears easeth the pains of them. *Galen* saith it openeth Obstructions both of the Liver and Spleen, purgeth the Breast and Lungues of Flegm; and used outwardly, it both clenseth and digesteth. A Decoction of *Horehound* (saith *Mathiolus*) is available for those that have bad Livers, and for such as have Itches and running Tetters; The Pouder hereof taken, or the Decoction, killeth Worms. The green Leavs bruised and boyled in old Hogs Greas unto an Oyntment, healeth the biting of Dogs abateth the Swellings of Womens Breasts, and taketh away the Swelling and Pains that come by any pricking of Thorns, or such like means, and used with Vinegar it clenseth and healeth Tetters. There is a Syrup made of *Horehonnd* to be had at the Apothecaries, very good for old Coughs, to rid the tough Flegm, as also to avoid cold Rhewm from the Lungs of old Folks, and for those that are Asthmatick or short winded.

Difficulty of breath, Cough, Consumption, Flegm, Terms provokes, Afterbirth, Wearineß, Poyson, Venemous Beasts, Ulcers, Sides, Eyes, Yellow Jaundice, Ears, Obstructions of the Liver and Spleen. Liver, Itch, Tetters, Worms, Dogs bitings, Womens Breasts, Thorns, Asthmaes.

Cauda equina. Horstail. Equisetum.

Description.

OF this there are many kinds, but I shall not trouble you nor my self with any large Description of them, which to do, were but as the Proverb is, to find a knot in a Rush; All the kinds hereof being nothing else but knotted Rushes, some with Leavs and some without: Take the Description of the most eminent sort as followeth.

The greater *Horstail* at the first springing hath Heads somwhat like those of Asparagus, and after grow to be hard, rough, hollow Stalks, joynted at sundry places up to the top, a foot high, so made as if the lower part were put into the upper, whereat grow on each side a Bush of smal, long, Rush-like hard Leavs, each part resembling a Horse Tail (from whence it was so called) At the tops of the Stalks come forth smal Catkins like to those of Trees. The Root creepeth under ground having Joynts at sundry places.

Place.

This (as most of the other sorts hereof) groweth in wet grounds.

Time.

They spring up in *April*, and their blooming Catkins in *July*, seeding for the most part in *August*, and then perish down to the ground, rising afresh in the Spring.

Vertues and use.

Horstail, the smoother rather than the rough, and the Leaved rather than the Bare, are most-Physical: It is very powerful to stanch bleedings wheresoever, either inward or outward, the Juyce or Decoction thereof being drunk, or the Juyce, Decoction, or distilled Water applied outwardly: It staieth also al sorts of Lasks and Fluxes in Man or Woman, and the pissing of Blood, and healeth also not only the inward Ulcers, and excoriations of the Entrails, Bladder, &c. but al other sorts of foul, moist, and running Ulcers, and soon sodereth together the tops of green Wounds; It cureth also Ruptures in Children. The Decoction hereof in Wine being drunk, provoketh Urin, and helpeth the Stone and the Strangury; and the distilled Water thereof drunk two or three times in a day, a smal quantity at a time; as also easeth the Intrails or Guts, and is effectual against a Cough that cometh by distillation from the Head. The Juyce or distilled Water being warmed, and hot Inflamations, Pustules, or red Wheals, and other breakings out in the Skin, being bathed therewith doth help them, and doth no less ease the Swellings, heat, and Inflamations of the Fundament or Privy parts in Man or Woman.

The Herb is belonging to *Saturn* yet is very harmless, and excellent good for the Premises.

Bleeding, Flux, Terms stops, Pissing Blood, Inward Ulcers, Excoriations of the Bladder, Ulcers, Wounds, Ruptures, Disury, Stone, Strangury, Cough, Inflamations, Pimples, Red Faces.

Hous-

Housleeks, or Sengreen.

THese are so wel known unto my Country Men that I shal not need to write any Description of them.

Place.

It groweth commonly on Walls and Houss sides, and flowreth in *July*.

Vertues and *use*.

Heat, Eyes, Agues, Thirst, Salt Rhewms, Ears, Terms, stops, Fluxes, Inflamations, St. Anthonies Fire, Burnings, Scaldings, Tetters, Ringworms, Corns on the Hands and Feet, Headach, Frenzy, Watching, Bleeding, Nettles, Bees, &c.

Our ordinary *Housleek* is good for all inward heats, as wel as outward, and in the Eyes or other parts of the Body: A Posset made with the Juyce of *Housleek* is singular good in al hot Agues, for it cooleth and tempereth the Blood and Spirits, and quench the thirst; and is also good to stay al hot Defluxions of sharp and salt Rhewms in the Eyes, the Juyce being dropped into them, or into the Ears helpeth them; It helpeth also other Fluxes of Humors into the Bowels, and the immoderate Courses of Women. It cooleth and restraineth also all other hot Inflamations. St. Anthonies Fire, Scaldings and Burnings, the Shingles, fretting Ulcers, Cankers, Tetters, Ringworms and the like, and much easeth the pain of the Gout proceeding from an hot cause. The Juyce also taketh away Warts and Corns in the Hands or Feet, being often bathed therwith, and the Skin of the Leavs being laid on them afterwards. It easeth also the Headach, and distempered heat of the Brain in Phrensies, or through want of sleep, being applied to the Temples and Forehead. The Leavs bruised and laid upon the Crown or Seam of the Head staieth bleeding at the Nose very quickly. The distilled Water of the Herb is profitable for all the purposes aforesaid: The Leavs being gently rubbed on any place stung with Nettles or Bees, doth quickly take away the Pain.

It is an Herb of *Jupiter*, and it is reported by *Myzaldus* to preserve, it grows upon from Fire and Lightning.

Houndstongue.

Description.

THe great ordinary *Houndstongue* hath many long and somwhat narrow, soft, hairy darkish green Leavs, lying on the ground somwhat like unto Buglos Leavs, from among which riseth up a rough hairy Stalk about two foot high, with some smaller Leavs thereon, and branched at the top into divers parts, with a smal Leaf at the Foot of every Branch, which is somwhat long, with many Flowers set along the same, which Branch is crooked or turned inwards before it Flowreth and openeth by degrees as the Flowers do blow, which consist of four smal purplish red Leavs of a dead colour, scarce rising out of the Husk wherein they stand, with some threds in the middle: It hath somtimes a white Flower. After the Flowers are past there cometh rough flat Seed, with a smal pointel in the middle, easily cleaving to any Garment that it toucheth, and not so easily pulled off again: The root is black, thick, and long, hard to break, and ful of a clammy Juyce, smelling somwhat strong, of an evil scent as the Leavs also do.

Place.

It groweth in most places of this Land, in wast grounds, and untilled places by high way sides, Lanes, and Hedg sides.

Time.

It Flowreth about *May* and *June*, and the Seed is ripe shortly after.

Vertues and Use.

Eyes, Nose, Stomach, Lungs, shortness of breath, Mad Dogs

The Root is very effectually used in Pills, as wel as in Decoctions, or otherwise, to stay al sharp and thin Defluxions of Rhewm from the Head into the Eyes or Nose, or upon the Stomach or Lungs, as also for Coughs or shortness of breath. The Leaves boyled in Wine (saith *Dioscorides*) but others do rather appoint it to be made with Water, and to ad thereto Oyl and Salt, mollifieth or openeth the Belly downwards; it also helpeth to cure the biting of a mad Dog, some of the Leavs being also applied to the Wound: The Leavs bruised, or the Juyce of them boyled in Hogs Lard, and applied, helpeth the falling away of the Hair which cometh of hot and sharp humors; as also for any place that is scalded or burnt: The Leavs bruised and laid to any green Wound doth heal it up quickly. The Root baked under the Embers wrapped in Past, or wet Papers, or in a wet double Cloth, and thereof a Suppository made and put up into, or applied to the Fundament, doth very effectually help the painful Piles or Hemorrhoids. The distilled Water of the Herb and Roots, is very good to al the purposes aforesaid, to be used as wel inwardly to drink, as outwardly to wash any sore places, for it healeth al manner of Wounds and Punctures and those foul Ulcers that arise by the French Pox.

Scaldings, Burnings, Hemorrhoids, Wounds, Ulcers, French Pox.

Mizaldus ads to this, that the Leavs laid under the Feet wil keep the Dogs from barking at you, *Houdstongue* becaus it ties the Tongue of Hounds, whether it be true or not I never tried yet I have cured the biting of a mad Dog with this only Medicine.

St Johns

St. Johns-wort

Deſcription

THe common *St. Johns-wort* ſhooteth forth browniſh, upright, hard, round Stalks, two foot high, ſpreading many Branches from the ſides up to the tops of them with two ſmal Leavs ſet one againſt another at every place, which are of a deep green colour, ſomwhat like the Leavs of the leſſer Centaury, but narrower, and ful of ſmal holes in every Leaf, which cannot be ſo wel perceived as when they are held up to the light: At the tops of the Stalks and Branches ſtand yellow Flowers made of five Leavs apiece, with many yellow threds in the middle, which being bruiſed do yeild a reddiſh Juyce like blood, after which come ſmal round Heads wherein is contained ſmal blackiſh Seed ſmelling like Rozin: The Root is hard and woody with diverſ ſtrings and fibres at it, and of a browniſh colour which abideth in the ground many yeers, ſhooting anew every Spring.

Place.

This groweth in Woods and Copſes, as wel thoſe that are ſhady, as open to the Sun.

Time.

They Flower about Midſummer, and in *July*, and their Seed is ripe in the latter end of *July* or in *Auguſt*.

Vertues and uſe.

St. Johns-wort, is as ſingular a Wound Herb as any other whatſoever, either for inward Wounds, Hurts, or Bruiſes, to be boyled in Wine and drunk, or prepared into Oyl or Oyntment, Bath or Lotion outwardly: It hath power to open Obſtructions, to diſſolve Swellings to cloſe up the Lips of Wounds, and to ſtrengthen the parts that are weak & feeble. The Decoction of the Herb and Flowers, but of the Seed eſpecially in Wine being drunk; or the Seed made into Pouder and drunk with the Juyce of Knotgraſs, helpeth al manner of ſpitting and Vomiting of Blood, be it by any Vein broken inwardly, by Bruiſes, Falls, or howſoever: The ſame helpeth thoſe that are bitten or ſtung by any Venemous Creature: And is good for thoſe that are troubled with the Stone in their Kidneys, or that cannot make water; and being applied provoketh Womens Courſes. Two drams of the Seed of *St. Johns-wort* made into Pouder and drunk in a little Broth, doth gently expel Choller, or congealed Blood in the Stomach; The Decoction of the Leavs and Seeds being drunk ſomwhat warm before the Fits of Agues, whether they be Tertians, or Quartanes, doth alter the fits, and by often uſing doth take them quite away: The Seed is much commended being drunk for forty daies together, to help the *Sciatica*: the Falling ſickneſs, and the Palſey.

Wounds, Bruiſes, Obſtructions, Swellings, Spitting and Vomiting blood, Venemous Beaſts, Diſury, Choller, Agues, Sciatica, Falling-ſickneſs, Palſey.

It is under the Cœleſtial Sign *Leo*, and under the Dominion of the *Sun*, it may be if you meet with a Papiſt that is an Aſtrologer, he will tel you St. *John* made it over to him by a Letter of Attourney, eſpecially if withal he be a Lawyer alſo.

Ivy.

Deſcription.

THis is ſo well known to every Child alto grow in Woods upon the Trees, and upon the ſtone Walls of Churches, Houſes, &c. and ſomtimes to grow alone of it ſelf, though but ſeldom.

Time.

It Flowreth not until *July*, and the Berries are not ripe til Chriſtide that they have felt the Winter Froſts.

Vertues and uſe.

A pugil of the Flowers, which may be about a dram (ſaith *Dioſcorides*) drunk twice a day in red Wine, helpeth the Lask and Bloody Flux. It is an enemy to the Nerves and Sinews being much taken inwardly, but very helpful unto them being outwardly applied. *Pliny* ſaith that the yellow Berries are good againſt the Jaundice, and taken before one be ſet to drink hard, preſerveth from drunkenneſs, and helpeth thoſe that ſpit Blood: and that the white Berries being taken inwardly, or applied outwardly killeth the Worms in the Belly. The Berries are a ſingular Remedy to prevent the Plague, as alſo to free them from it that have got it, by drinking the Berries therof made in Pouder, for two or three daies together: They being taken in Wine do certainly help to break the Stone, provoke Urine and Womens Courſes. The freſh Leavs of Ivy boyled in Vinegar, and applied warm to the ſides of thoſe that are troubled with the Spleen, Ach, or Stitch in the ſides, doth give them much eaſ: The ſame applied with ſome Roſewater and Oyl of Roſes to the Temples and Forehead, eaſeth the Headach though it be of long continuace. The freſh Leavs boyled in Wine, and old filthy Ulcers that are hard to be cured waſhed therewith, doth wonderfully help to cleanſ and heal them, it alſo quickly healeth green Wounds, as alſo it is effectual to heal al Burnings and Scaldings, and all kind of eZuicerations coming thereby. or by Salt Elegm or hot Humors in other parts of the Body. The Juyce of the Berries or Leavs ſnuffed up into the Noſe, purgeth the Head

Flux, Bloody Flux, Jaundice, Spitting Blood, Worms, Drunkenneſs, Peſtilence, Stone, Diſury, Terms provokes, Spleen, Stitch, Headach, Ulcers, Wounds, Burnings, Scaldings, ſalt Flegm,

Rhewm, Sore Ears. and Brain of thin Rhewm that maketh Defluxions into the Eyes and Noſe, and cureth the Ulcers and Stench therin: The ſame dropped into the Ears helpeth the old and running Sores of them. Thoſe that are troubled with the Spleen ſhal find much eaſ by continual drinking out of a Cup made of Ivy, ſo as the drink may ſtand ſome ſmal time therin before it be drunk. *Cato* ſaith, that Wine put into ſuch a Cup wil ſoak through it, by reaſon of the Antipathy that is between them.

There ſeems to be a very Antipathy between Wine and Ivy, for if any have got a ſurfet by drinking Wine, his ſpeedieſt cure is to drink a draught of the ſame Wine wherein a handful of Ivy Leavs being firſt bruiſed have been boyled.

Kidneywort, or Wall-Penyroval.

Deſcription.

THis hath many thick, flat, and round Leavs growing from the Root, every one having a long Footſtalk faſtned underneth about the middle of it and a little unevenly waved ſomtimes about the edges, of a pale green colour, and ſomwhat hollow on the upper ſide like a Sawcer; from among which riſe one or more tender ſmooth hollow Stalks half a foot high with two or three ſmal Leavs thereon, uſually not round as thoſe below, but ſomwhat long and devided at the edges: The tops are ſomtimes devided into long Branches, bearing a number of Flowers, ſet round about a long ſpike one above another, which are hollow and like a little Bell, of a whitiſh green colour, after which come ſmal Heads containing very ſmal browniſh Seed,, which falling on the ground, wil plentifully ſpring up before Winter, if it have moiſture. The Root is round and moſt uſually ſmooth, grayiſh without and white within, having ſmal fibres at the head of the Root, and bottom of the Stalk.

Place.

It groweth very plentifully in many places of this Land, but eſpecially in all the Weſt parts thereof, upon ſtone and mud Wals, upon Rocks alſo, and in ſtony places upon the ground, at the Bottom of old Trees, and ſomtimes on the Bodies of them that are decayed and rotten.

Time.

It uſually Flowreth in the beginning of *May* and the Seed is ripening quickly after, ſheddeth it ſelf: ſo that about the end of *May* uſually, the Leavs and Stalks, are withered, dry, and gone until *September*, that the Leavs ſpring up again, and ſo abide all Winter.

Vertues and Uſe.

The Juyce or the diſtilled water being drunk is very effectual for al Inflamations and unnatural heats, to cool a fainting hot Stomach, or a hot Liver or the Bowels: The bruiſed Herb or the place bathed with the Juyce or diſtilled Water thereof and outwardly applied healeth Pimples, Redneſs, St. Anthonies Fire, and other outward heats and Inflamations. The ſaid Juyce or Water helpeth much alſo to heal ſore Kidneys, torn or fretted by the Stone, or exulcerated within, and eaſeth the pains; It alſo provoketh Urine, and is available for the Dropſie, and helpeth to break the Stone, cooling the Inflamed parts and other pains of the Bowels, and the bloody Flux; It is ſingular good to cool the painful Piles, or Hemorrhoidal Veins, the Juyce being uſed as a Bath unto them, or made into an Oyntment: It is no leſs effectual to give eaſ of pains to the hot Gout,, the *Sciatica*, and the Inflamations and Swellings in the Cods; It helpeth the Kernels or Knots in the Neck or Throat, called the Kings Evil; healeth Kibes and Chilblains if they be bathed with the Juyce, or anointed with an Oyntment made thereof, and ſome of the skin of the Leaf laid upon them; It is alſo uſed in green Wounds to ſtay the Blood, and to heal them quickly.

Inflamations, Pimples, Redneſs, St. Anthonies fire, Kidneys hurt by the Stone, Diſury, Dropſie, Stone, Bloodyflux, Piles, Hemorrhoids, Gout, Sciatica, Cods, Kings evil, Kibes, Chilblains.

Venus challengeth the Herb, under *Libra*.

Knapweed.

Deſcription.

The common ſort herof hath many long and ſomwhat broad darke green leaves, riſing from the Root deeply dented about the edges, and ſomtimes a little rent or torne on both ſides in two or three places, and ſomwhat hairy withal among which riſeth up a ſtrong round ſtalk four or five foot high, devided into many branches: at the tops wherof ſtand great ſcalygreen heads, & from the middle of them thruſt forth a number of dark purpliſh red thrumms or threds, which after they are withered and paſt, ther is found divers black Seeds: lying in a great deal of down, ſomwhat like unto a Thiſtle Seed, but ſmaller: The Root is white, hard and woody, with divers fibres annexed therunto, which periſheth not but abideth with leavs theron all the winter, ſhooting out freſh every Spring.

Place.

It groweth in moſt Feilds and Meadows, and about their borders and Hedges and in many waſt grounds alſo, almoſt every where.

Time.

Time.

It usually flowreth in *June* and *July*, and the seed is ripe shortly after.

Vertues and Use.

This *Knapweed* helpeth to stay Fluxes, both of blood at the mouth or nose, or other outward parts, and those veins that are inwardly broken, or inward wounds, as also the Fluxes of the belly; It stayeth the distillations of thin and sharp humors from the head upon the stomach and Lungs: it is good for those that are bruised by any fall, blowes, or otherwise. It is very profitable for those that are burstten and have a Rupture, by drinking the decoction of the Hearbe and roots in wine. and applying the same outwardly to the place. It is singular good in al running sores, cankrous and fistulous drying up the moysture and healing them up gently, without sharpness; it doth the like to running sores or scabs of the head or other parts. It is of special use for the soreness of the Throat, swelling of the Vvula and Jaws; and excellent good to stay the bleeding and heale up all green wounds.

Fluxes, Bleeding, Veins broken, Phtisick, Falls, Blows, Ruptures, Sores, Cankers, Fistulaes. Scabby head, Sore throat Vvula, Jaws.

Saturn challengeth the herb for his own.

Knot-grass.

Description.

THis is generally so wel known that it needeth no Description.

Place.

It groweth in every County of this Land, by the High-way sides and by foot paths in Fields, as also by the sides of old Walls.

Time.

It springeth up late in the Spring, and abideth until Winter, when all the branches perish.

Vertues and use.

The Juyce of the common kind of *Knot-grass*, is most effectuall to stay bleeding at the mouth, being drunke in steeled or red Wine: and the bleeding at the Nose, to be applyed to the Forehead and Temples or to be squirted up into the Nostrils. And no less effectuall to coole and temper that heat of the blood, & stomach and to stay any Flux of the blood or humors, as Lask, Bloody flux, Womens courses, and Running of the Reins. It is singular good to provoke Urine, helpe the strangurie, and allay the heate that cometh therby; and it is powerful by Urin to expel the Gravell, or stone in the kidneys or Bladder, a dram of the pouder of the Herb being taken in wine for many dayes together: Being boyled in wine and drunke, it is profitable to those that are stung or bitten by venemous creatures, and very effectual to stay al defluxions of rhewmatick humors upon the stomach, & killeth Worms in the belly or stomaek, quieteth inward paines that arise from the heat, sharpness & corruption of blood and Choller: The distilled water herof taken by it self, or with the pouder of the Herb or seed, is very effectual to al the purposes aforesaid, and is accounted as one of the most Soveraign remedies to cool all manner of inflamations, breakings out through heate, hot Swellings, and Impostumations Gangrenes, and Fistulous Cankers, or foule filthy Ulcers, being applyed or put into them; but especially for all sorts of Ulcers and Sores happening in the privie parts of men or women. It helpeth all fresh and green Wounds, and speedily helpeth them: The Juyce dropped into the Ears. cleanseth them being foule and having running matter in them.

Bleeding, Heat, Flux, Bloody Flux, Courses stops, Disury, Gravel, Venemous Beasts, Rhewm, Worms, Heat,

Choller, Inflamations, Apostums, Gangrenes Fistulaes, Cankers, Ulcers, Wounds Ears.

Saturn seems to me to own the Hearb, and yet some hold the *Sun*, out of doubt 'tis *Saturn*, it is very prevalent for the premises: as also for btoken Joynts, and Ruptures.

Ladies-Mantle

Description.

THis hath many leavs rising from the Root, standing upon long hairy footstalkes, being almost round, but a little cut in on the edges, into eight or ten parts more or less, making it seem like a Star, with so many corners and points, and dented round about, of a light green colour somwhat hard in handling, and as if it were folded, or plaited at first, and then crumpled in diverse places, and a little hairy as the Stalk is also, which riseth up among them to the height of two or three foot, with such like Leavs thereon but smaller, and being weak is not able to stand upright, but bendeth down to the Ground, devided at the top into two or three smal Branches, with smal yellowish green Heads, and Flowers of a whitish colour, breaking out of them; which being past, there cometh smal yellow Seed like Poppy Seed: The Root is somwhat long and black with many strings or fibres thereat.

Place.

It groweth naturally in many Pastures, and Wood sides, in *Hartfordshire*, *Wiltshire*, and *Kent*, and other places of this Land.

Time.

It Flowreth in *May* and *June*, and abideth after Seed time green al the Winter.

Vertues and Use.

Ladies-Mantle is very proper for those Wounds that have Inflamations, and is very effectual

Inflamations,

Bleeding, Vomiting, Fluxes, Bruiſes, Ruptures, Flagging Breaſts, Barrenneſs Women with Child.

effectual to ſtay Bleedings, Vomitings, Fluxes of al ſorts in man or woman, and Bruiſes by Fals or otherwiſe, and helpeth Ruptures, and ſuch Women or Maids as have over great Flagging Breaſts, cauſing them to grow leſs and hard, being both drunk, and outwardly applied: The diſtilled water drunk for twenty daies together helpeth Conception, and to retain the Birth, if the Woman do ſomtimes alſo ſit in a Bath made of the Decoction of the Herb. It is one of the moſt ſingular Wound Herbs that is, and therfore highly prized and praiſed by the *Germans*, who uſe in al Wounds inward and outward, to drink the Decoction thereof and waſh the Wounds therewith, or dip Tents therein and put them into the Wounds, which wonderfully drieth up al humidity of the Sores, and abateth Inflamations therein. It quickly healeth al green Wounds, not ſuffering any corruption to remain behind, and cureth old Sores though Fiſtulous and hollow.

Venus claims the Herb as her own.

Lavender.

THis is ſo wel known, being an Inhabitant in almoſt every Garden, that it needeth no Deſcription.

Time.

It flowreth about the end of *June* and beginning of *July*.

Vertues and Uſe.

Head, Brains, Apoplexie, Falling-ſickneſs, Lethargy, Cramps, Convulſions, Palſey both dead and ſhaking, Stomach, Liver, Spleen, Terms provokes, Chollick, Vertigo, loſs of voyce, Trembling, Fainting.

Lavender is of ſpecial good uſe, for all the Griefs and pains of the Head and Brains that proceed of a cold cauſ, as the Apoplexy, Falling-ſickneſs, the drowſie or ſluggiſh Malady, Cramps, Convulſions, Palſeys, and often Faintings. It ſtrengtheneth the Stomach, and freeth the Liver and Spleen from Obſtructions, provoketh Womens Courſes, and expelleth the dead Child and Afterbirth. The Flowers of Lavender ſteeped in Wine helpeth them to make water that are ſtopped, or are troubled with the Wind or Chollick, if the places be bathed therewith. A Decoction made with the Flowers of *Lavender*, Horehound, Fennel, and Aſparagus Roots, and a little Cinnamon is very profitably uſed to help the Falling-ſickneſs, and the giddineſs or turning of the Brain. To gargle the Mouth with the Decoction thereof is good againſt the Toothach. Two ſpoonfuls of the diſtilled Water of the Flowers taken, helpeth them that have loſt their voice; as alſo the tremblings and paſſions of the Heart, and faintings and ſwounings, not only being drunk, but applied to the Temples, or Noſtrils to be ſmelt unto but it is not ſafe to uſe it where the Body repleat with Blood and Humors, becauſ of the hot and ſubtil ſpirits wherewith it is poſſeſſed. The Chimical Oyl drawn from *Lavender*, uſually called Oyl of Spike, is of ſo fierce and piercing Spirits that it is cautiouſly to be uſed: ſome few drops being ſufficient to be given with other things, either for inward or outward Griefs.

Mercury owns the Herb, and it carries his effects very potently.

Lavender Cotten hath the ſame Vertues with Southernwood, which ſhal be ſhewed you when I come to ſpeak of it.

Lettice.

THis is ſo wel known being generally uſed as a Saller Herb, that it is altogether needleſs to write any Deſcription thereof.

Vertues and Uſe.

Watching, Head-ach, Indigeſtion, Thirſt, Milk enereaſeth, Choller, Luſt, Venerious Dreams, Heat of Urine.

The Juyce of *Lettice* mixed or boyled with Oyl of Roſes, and applied to the Forehead and Temples procureth Sleep, and eaſeth the Headach proceeding of an hot cauſ; being eaten boyled, it helpeth to looſen the Belly. It helpeth digeſtion, quencheth thirſt, encreaſeth Milk in Nurſes, eaſeth griping pains of the Stomach or Bowels, that come of Choler. It abateth Bodily luſt, repreſſeth Venereous Dreams, being outwardly applied to the Cods with a little Camphire: Applied in the ſame manner to the Region of the Heart, Liver or Reins, or by bathing the ſaid place with the Juyce or diſtilled Water, wherein ſome white Sanders and red Roſes are put alſo, it not only repreſſeth the heat and Inflamation therein, but comforts and ſtrengthens thoſe parts, and alſo tempereth the heat of Urine. *Galen* adviſeth old men to uſe it with Spices, and where Spices are wanting to ad Mints, Rocket and ſuch like hot Herbs, or elſ Citron, Lemmon, or Orange Seeds, to abate the cold of one, and heat of the other. The Seed and diſtilled Water of the Lettice work the like effects in al things: but the uſe of Lettice is chiefly forbidden to thoſe that are ſhort winded, or have any imperfection in their Lungs, or ſpit Blood.

The *Moon* owns them, and that's the reaſon they cool and moiſten what heat and drineſs *Mars* cauſeth, becauſe *Mars* hath his fall in *Cancer*, and they cool the Heart, becauſ the *Sun* rules it, between whom and the *Moon* is a Reception in the Generation of Man, as you may ſee in my *Guide for Women*.

The

The VVater-Lilly.

Description.

OF these there are two principally noted kinds, *Viz.* The *white*, and the *Tellow*.

The *White Lilly* hath very large, round and thick dark green Leavs lying on the Water, sustained by long and thick Footstalks, that rise from a great thick, round and long tuberous black Root, spungy or loos with many Knobs thereon like Eyes, and whitish within, from amidst the which rise other the like thick and great Stalks, sustaining one large white Flower thereon, green on the outside, but as white as Snow within, consisting of diverse rows of long, and somwhat thick and narrow Leavs, smaller and thinner the more inward they be, encompassing a head within wth ma ny yellow threds, or thrums in the middle, where after they are past, stand round Poppy-like Heads ful of broad, Oyly, and bitter Seed.

The yellow kind is little different from the former save only it hath fewer Leavs on the Flowers, greater and more shining Seed, and a whitish Root, both within and without: The Roots of both being somwhat sweet in tast.

Place.

They are found growing in great Pools and standing Waters, and somtimes in slow running Rivers and lesser Ditches of Water, in sundry places of this Land.

Time.

They Flower most commonly about the end of *May*, and their Seed is ripe in *August*.

Vertues and use.

The Leavs and Flowers of the *Water-Lillies* are cold and moist, but the Root and Seed is cold and dry: The Leavs do cool al Inflamations, and both outward and inward heats of Agues, and so doth the Flowers also, either, by the Syrup or Conserve; The Syrup helpeth much to procure rest, and to settle the Brains of Frantick persons, by cooling the hot distemperature of the Head. The Seed as wel as the Root is effectual to stay Fluxes of Blood or Humors, either of Wounds, or of the Belley; but the Roots are most used, some chusing the one, and some the other to be more effectual to cool, bind and restrain all Fluxes in Man or Woman, as also the running of the Reins, and the passage away of the Seed when one is asleep: but the frequent use hereof extinguisheth Venereous actions: The Root is likewise very good for those whose Urine is hot and sharp to be boyled in Wine or Water, and the Decoction drunk. The Distilled water of the Flowers is very effectual for al the Diseases aforesaid, both inwardly taken and outwardly applied, and is much commended to take away Freckles, Spots, Sunburn, and Morphew from the Face, or other parts of the Body. The Oyl made of the Flowers as Oyl of Roses is made, is profitably used to cool hot Tumors, and the Inflamations of Ulcers and Wounds and to eal the pains, and help the Sores.

Inflamations, Agues, Watching, Frenzy, Flux, Belly, Running of the Reins, Venery, Freckles, Spots, Sunburn, Morphew.

The Herb is under the Dominion of the *Moon*, and therefore cools and moistens like the former.

Liquoris.

Description.

OUr English *Liquoris* riseth up with diverse woody Stalks, whereon are set at several distances, many narrow long green Leavs, set together on both sides of the Stalk, and an od one at the end, very wel resembling a yong Ash-tree sprung up from the Seed: This by many yeers continuance in a place without removing, and not else, will bring forth Flowers, many standing together Spike fashion one above another upon the Stalks, of the form of Pease Blossoms, but of a very pale blue colour, which turn into long somwhat flat and smooth Rods, wherein is contained smal, round hard Seed: The Root runneth down exceeding deep into the ground, with diverse other smaller Roots and Fibres growing with them, and shoot out Suckers from the main Roots al about, wherby it is much encreased, of a browniish colour on the outside, and yellow within.

Place.

It is planted in Fields and Gardens in diverse places of this Land, and thereof good profit is made.

Vertues and use.

Liquoris boyled in fair Water with some Maidenhair and Figs, maketh a good Drink for those that have a dry Cough, or Hoarceness, Wheesing, shortness of breath; and for al the Griefs of the Breast and Lungs, Phtisick or Consumptions caused by the Distillation of Salt humors on them. It is also good in all pains of the Reins, the Strangury, and heat of Urine: The fine Pouder of *Liquoris* blown through a Quil into the Eyes that have a Pin and Web (as they cal it) or Rhewmatick Distillations into them, doth clens and help them: The Juyce of *Liquoris* is as effectual in al the Diseases of the Breast & Lungs, the Reins and Bladder, as the Decoction. The Juyce dissolved in Rose Water with some Gum-Tragacanth, is a fine licking Medicine for Hoarceness, Wheesings, &c.

Cough, Hoarseness, Phtisick, Consumption, Reins, Strangury, Heat of urine, Eyes, Bladder.

Liverwort.

Description.

THe Common *Liverwort*, groweth close and spreadeth much upon the ground in moyst and shadowy places, with many sad green leaves, or rather (as it were) sticking flat one to another, very unevenly cut in on the edges, and crumpled, from among which arise smal slender stalks an Inch or two high at most, bearing smal Starlike Flowers at the tops: The Roots are very fine and smal.

Vertues and use.

Liver, Inflamation, yellow Jaundice, Spleen, Running of the Reins, Whites, Tetters, Ring-worms, Surfets.

It is a singular good Herb for all the diseases of the Liver, both to cool and clense it, and helpeth the Inflamations in any part, and the yellow Jaundice likewise: Being bruised and boyled in small Beer and drunke, it cooleth the heat of the Liver and Kidneys, and helpeth the rũning of the Reins in men, & the Whites in Women: It is a singular remedy to stay the spreading of Tetters, Ringworms, and other fretting and running Sores & Scabs, and is an excellent remedy for such whose Livers are corrupted by surfets w^ch^ causeth their bodies to break out, for it fortifies the Liver exceedingly and make it impregnable.

It being under the command of *Jupiter*, and under the sign *Cancer*.

Loose-strife or Willow-Herb.

Description.

THe Common yellow *Loose-strife* groweth to be four or five foot high or more, with great round stalks a little crested, diversly branched from the middle of them to the tops, into great & long Branches, on al w^ch^ at the Joynts ther grow long and narrow Leavs, but broader below, and usually two at a Joynt, yet somtimes three or four somwhat like Willow Leaves, smooth on the edges, and of a faint green colour from the upper Joynts of the branches, and at the tops of them also stand many yellow Flowers of five Leaves a piece, with diverse yellow threeds in the middle, which turn into small round heads, containing small cornered Seeds: The Roots creepeth under ground, almost like Couchgrass, but greater, and shooteth up every Spring, browniſh heads, which afterwards grow up into stalks: It hath no scent nor taſt but only astringent.

Place.

It groweth in many places of this Land in moyst Meadowes and by water sides.

Time.

It Flowreth from *June* to *August*.

Vertues and use.

This Hearb is good to stay all manner of Bleeding at Mouth or Nose or Wounds, and all Fluxes of the Belly, and the bloody Flux, given either to drinke, or taken by Clyster; it stayeth also the abundance of Womens Courses: It is a singular good wound Hearb for green wounds, to stay the bleeding, and quickly to close together the lips of the Wound, if the herb be bruised and the Juyce only applyed: It is often used in Gargles for sore mouthes, as also for the secret parts: the smoke herof being burned driveth away Flyes and Gnats which use in the night-time to molest people inhabiting neere Marshes and in the Fenney Countryes.

Bleeding, Flux, Bloody Flux, Terms stops, Wounds, Sore, Mouth, Privities, Gnats.

Loose-strife, with Spiked Heads of Flowers.

Description.

THis groweth with many woody square stalkes, full of Joynts about three foot high at least, at everyone wherof stand two long Leaves, shorter, narrower, and of a deeper green colour than the former; and some browniſh. The stalkes are branched into many long stemmes of spiked Flowers, half a foot long, growing in Rundles one above another, out of smal husks very like the Spiked heads of Lavender, each of which Flowers have five round pointed Leaves of a Purple Violet Colour, or somwhat inclining to redness, in w^ch^ husks stand small round heads, after the Flowers are fallen, wherein is contained small seed: The Root creepeth under ground like unto the yellow, but is greater than it; and so is the heads of the Leaves when they first appear out of the ground and more brown than the other.

Place.

It groweth usually by Rivers, and Ditches sides in wet grounds, as about the Ditches at and neer Lambeth: and in many other places of this Land.

Time.

It Flowreth in the months of *June* and *July*.

Vertues and Use.

This Herb is no whit inferior unto the former; it having not only all the vertues which the former hath, but some particular vertues of its own found out by experience, as namely.

The

The distilled water is a present remedy for hurts and blows on the eyes and for blindness, so as the Christaline humor be not perished or hurt; and this hath been sufficiently proved true by the experience of a man of judgment, who kept it long to himself as a great secret. It also cleareth the Eyes of dust or any other thing gotten into them, and preserveth the Sight: It is also very much available against Wounds and Thrusts, being made into an Oyntment on this manner; To every ounce of the Water, ad two drams of *May* Butter without Salt, and of Sugar and Wax of each as much also, let them boyl gently all together: Let Tents be dipped in the Liquor that remaineth after it is cold, and put into the Wounds, and the place covered with a Linnen cloth doubled and anointed with the Oyntment, and this is also an approved Medicine. It likewise clenseth and healeth all foul Ulcers and Sores whersoever, and staieth their Inflamations by washing them with the Water, and laying on them a green Leaf or two in the Summer, or dry Leaves in the Winter. This Water gargled warm in the Mouth, and somtimes drunk also doth cure the Quinsie, or Kings Evil in the Throat. The said Water applied warm taketh away all Spots, Marks, and Scars in the Skin: And a little of it drunk quencheth thirst when it is extraordinary.

Eyes, Blindness,

Wounds,

Ulcers, Inflamations,

Quinsie, Kings Evil, Spots, Marks, Scars.

The Herb is an Herb of the *Moon*, and under the Sign *Cancer*, neither do I know a better Preserver of the Sight when 'tis well, nor a better Curer of sore Eyes than Eyebright taken inwardly, and this used outwardly, 'tis cold in quality.

Lovage.

Description.

THis hath many long and great Stalks, of large winged Leavs devided into many parts like Smallage, but much larger and greater, every Leaf being cut about the edges broadest forwards, and smallest at the Stalk, of a sad green colour, smooth and shining, from among which rise up sundry strong hollow green Stalks, five or six foot, yea somtimes seven or eight foot high, full of Joynts, but lesser Leavs set at them than grow below, and with them toward the tops come forth long Branches, bearing at their tops large Umbels, of yellow Flowers, and after them flat browniish Seed: The Root groweth thick, great and deep, spreading much and enduring long, of a browniish colour on the outside, and whitish within: The whol Plant, and every part of it smelleth strong, and Aromatically, and is of an hot sharp biting tast.

Place.

It is usually planted in Gardens, where if it be suffered it groweth huge and great.

Time.

It Flowreth in the end of *July*, and seedeth in *August*.

Vertues and Use.

It openeth, cutteth and digesteth Humors, and mightily provoketh Womens Courses and Urine. Half a dram at a time of the dried Root in Pouder taken in Wine, doth wonderfully warm a cold Stomach, helping digestion, and consuming all raw & superfluous moisture therein; easeth al inward gripings and pains, dissolveth wind, and resisteth Poyson and infection: It is a known and much practised Remedy to drink the Decoction of the Herb for any sort of Ague, and to help the pains and Torments of the Body and Bowels coming of cold. The Seed is effectual to al the purposes aforesaid (except the last) and worketh more powerfully, The distilled water of the Herb helpeth the Quinsie in the Throat, if the Mouth and Throat be gargled and washed therewith, and helpeth the Plurese, being drunk three or four times. Being dropped into the Eyes it taketh away the redness or dimness of them, it likewise taketh away Spots or Freckles in the Face. The Leavs bruised and fried with a little Hogs Lard & laid hot to any Botch or Boyl, wil quickly break it.

Humors, Terms provokes, Disury, Cold Stomach, Indigestion, Wind, Poyson, Epidemical Diseases. Agues, Belly-ach, Quinsie, Pleurese, Spots, Freckles, Boyls.

It is an Herb of the Sun under the Sign *Taurus*, if Saturn offend the Throat (as he alwaies doth if he be occasioner of the Malady and in Taurus in the Genesis) this is your cure.

Lungwort.

Description.

THis is a kind of Mos, that groweth on sundry sorts of Trees, especially Oaks, and Beeches, with broad grayish tough Leavs, diversly folded, crumpled, and gashed in on the edges, and somtimes spotted also, with many smal spots on the upper side: It was never seen to bear any Stalk or Flower at any time.

Vertues and Use.

This is of great use with many Physitians to help the Diseases of the Lungs, and for Coughs, Wheesings, and shortness of breath, which it cureth both in Man and Beast: It is very profitably put into Lotions that are taken to stay the moist Humors that flow to Ulcers, and hinder their healing, as also to wash all other Ulcers in the privy parts of Man or Woman.

Lungues, Coughs, Wheesings, shortness of breath, Ulcers in the Privities and elsewhere.

It is an excellent Remedy boyled in Beer for broken-winded Horses.

Jupiter seems to own the Herb.

Madder.

Madder.

Description.

THe Garden *Madder* shooteth forth many very long, weak four square reddish Stalks trailing on the Ground a great way, very rough or hairy and full of Joynts; At every of those Joynts come forth divers long, and somwhat narrow Leavs, standing like a Star about the Stalks, rough also and hairy, toward the tops whereof come forth many smal pale yellow Flowers: after which come smal round Heads, green at first, and reddish afterwards, but black when they are ripe, wherin is contained the Seed. The Root is not very great, but exceeding long, running down half a mans length into the grouund, red and very clear while it is fresh, spreading divers waies.

Place.

It is only manured in Gardens or larger Fields for the profit that is made thereof.

Time.

It Flowreth towards the end of Summer, and the Seed is ripe quickly after.

Vertues and Use.

Yellow Jaundice, Obstructions of the Liver and Gall, Spleen, Melancholly, Palsey, Sciatica, Bruises inward and outward, Terms provokes, Freckles, Morphew, Scurf.

It hath an opening quality, and afterwards to bind and strengthen. It is an assured Remedy for the yellow Jaundice by opening the Obstructions of the Liver and Gall, and clensing those parts: It openeth also the Obstructions of the Spleen, and diminisheth the Melancholick humor. It is available for the Palsey and *Sciatica*, and effectual for Bruises inward or outward, and is therfore much used in *Vulnerary* Drinks. The Root for all those aforesaid purposes, is to be boyled in Wine or Water, as the caus requireth, and some Honey or Sugar put therunto afterwards. The Seed herof taken with Vinegar and Honey, helpeth the Swellings and Hardness of the Spleen. The Decoction of the Leaves and Branches is a good Fomentation for Women to sit over thar have not their Courses. The Leavs and Roots beaten and applied to any part that is discoloured with Freckles, Morphew, the white Scurf, or any such deformity of the Skin, clenseth them throughly, and taketh them away.

Maidenhair.

Description.

OUr common *Maidenhair* doth from a number of hard black Fibres send forth a great many blackish shining brittle Stalks, hardly a span long; in many not half so long, on each side set very thick with smal round dark green Leavs, and spotted on the back of them like other Ferns.

Place.

It groweth much upon old Stone Wals in in the West parts, and *Wales*, in *Kent* and diverse other places of this Land; It joyeth likewise to grow by Springs, Wels, and rockie moist and shadowy places; and is alwaies green.

Wall-Rue; *Or ordinary* White Maidenhair.

Description.

THis hath very fine pale green Stalks, almost as fine as hairs, set confusedly with divers pale green Leavs on very short Footstalks, somwhat neer unto the colour of Garden Rue, and not much differing in form, but more diversly cut in on the edges, and thicket, smooth on the upper part and spotted finely underneath.

Place.

It groweth in many places of this Land, as at *Dartford*, and the Bridg at *Ashford* in *Kent*, at *Beconsfield* in *Buckinghamshire*, at *Wolley* in *Huntingtonshire*, on *Framingham* Castle in *Suffolk*, on the Church wals at *Mayfield* in *Sussex*, in *Somersetshire* and divers other places of this Land, and is green in Winter as well as in Summer.

Vertues and use.

The Vertues of both these are so neer alike; that although I have described them, and their places of growing, severally; yet I shall in writing the Vertues of them joyn them both together: as followeth.

Cough, Shortness of breath, the yellow Jaundice, Spleen, Disury, Stone, Terms provokes, Bleeding, Fluxes, Lungs, Swellings, Ulcers, Scurff, Sores, Baldness.

The Decoction of the Herb *Maidenhair* being drunk, helpeth those that are troubled with the Cough, shortness of breath, the yellow Jaundice, diseases of the Spleen, stopping of Urin, and helpeth exceedingly to break the Stone in the Kidneys: (in all which Diseases the *Wall Rue* is also very effectual) It provoketh Womens Courses, and staieth both Bleedings and Fluxes of the Stomach and Belly, especially when the Herb is dry, for being green, it loosneth the Belly, and avoideth Choller and Flegm from the Stomach and Liver, it clenseth the Lungs, and by rectifying the Blood causeth a good colour to the whol Body: The Herb boyled in Oyl of Chamomel, dissolveth Knots, allayeth Swellings, and drieth up moist Ulcers. The Ly made thereof is singular good to clens the head from Scurf, and from dry and running Sores; staieth the falling or shedding of the Hair, and causeth it to grow thick, fair, and wel coloured; for which purpose some boyl it in Wine and Lye, others in Water and Lye, and all commend it for good.

Wine putting some Smallage Seed thereto, and afterwards some Oyl. The Wall Rue is as effectual as Maidenhair in all Diseases of the Head, and falling or the recovering of Hair again; and generally for all the aforementioned Diseases: and besides, The Pouder of it taken in drink for fourty daies together, helpeth the burstings in Children.

Golden Maidenhair

Description.

TO the two former give me leave to ad this, and I shall do no more but only describe it unto you, and for the Vertues refer you unto the former, sith whatsoever is said of them, may be also said of this:

It hath many small browniſh red hayres to make up the form of Leavs growing about the ground from the Root, and in the middle of them in Summer, rise smal Stalks of the same colour, set with very fine yellowish green hairs on them, and bearing a smal gold yellow head, lesser than a Wheat Corn standing in a great Husk. The Root is very smal and threddy.

Place.

It groweth on Bogs and Mooriſh places, and also on dry shadow places at Hampstead Heath and elsewhere.

Mallows, and Marsh-Mallows.

THe Common *Mallowes* are generally so well known that they need no Description.

Our common *Marsh-mallows* have diverſ soft hoary white stalkes rising to be three or four foot high, spreading forth many Branches the Leavs wherof are soft and hairy, somwhat lesser then the other Mallow Leaves but longer pointed, cut (for the most part) into some few deivisions, but deep: The Flowers are many but smaller also then the other Mallows & white, or tending to a blush colour. After which come such like round cases and Seed as in the other Mallows. The Roots are many and long, shooting from one Head, of the bignes of a Thumb or Finger, very pliant, tough and bending like Liquoris, of a whitish yellow colour on the outside, and more white within, full of a slimy juyce which being, layd in water will thicken it as if it were gelly.

Place.

The Common Mallows grow in every countrey of this Land.

The Common Marsh Mallowes in most of the Salt Masshes from Woolwich, downe to the Sea, both on the Kentish anb Essex Shoares, and in diverse other places of this Land.

Time.

They Flower all the Summer Months, even until the Winter do pull them down.

Vertues and Use.

The Leavs of either of the sorts above named, and the Roots also boyled in Wine or Water, or in Broth, with Parsley or Fennel Roots, doth help to open the Body, and is very convenient in hot Agues or other distempers of the Body to apply the Leavs so boyled warm to the Belly; It not only voideth hot Chollerick and other offensive Humors, but easeth the pains and torments of the Belly coming thereby; and are therefore used in all Clysters conducing to those purposes: The same used by Nurses, procureth them store of Milk.

Agues, *Choller,* *Gripings in the Belly,* *Milk,*

The Decoction of the Seed of any of the common *Mallows*, made in Milk or Wine doth Mervelously help excoriations, the Phtisick, Plurisie, and other Diseases of the Chest and Lungues that proceed of hot causes, if it be continued taking for some time together: The Leavs and Roots work the same effects: They help much also in the excoriations of the Guts and Bowels and hardness of the Mother, and in all hot and sharp diseases thereof. The Juyce drunk in Wine, or the Decoction of them therein doth help Women to a speedy and easie Delivery. *Pliny* saith, That whosoever shall take a spoonful of any of the Mallows, shal that day be free from all Diseases that may come unto him; and that it is special good for the Falling-sickness. The Syrup also and Conserve made of the Flowers are very effectual for the the same Diseases, and to open the Body being costive: The Leavs bruised and laid to the Eyes with a little Honey, taketh away the Impostumations of them. The Leavs bruised or rubbed upon any place stung with Bees, Wasps or the like, presently taketh away the pains, redness, and Swellings that rise thereupon: and *Dioscorides* saith, The Decoction of the Leavs and Roots helpeth all sorts of Poyson, so as the Poyson be presently voided by Vomit. A Pultis made of the Leavs boyled and bruised, whereunto some Bean or Barley Flower and Oyl of Roses is an especial Remedy gainst all hard Tumors and Inflamations of Impostums and Swellings of the Cods and other parts, and easeth the pains of them; as *Cods* also against the hardness of the Liver or Spleen, being applied to the places. The Juyce of the Mallows boyled in old Oyl and applied, taketh away al roughnes of the Skin,

Travail in Women, *Falling sickness,* *Eyes,* *Bees, Wasps &c.* *Poyson,* *Hard swelling, Inflamation,* *Cods,* *Liver,* *Spleen,* *Roughness of the skin*

Scurff, Dandrif, Scabby Heads, as also the Scurf, Dandrif, or dry Scabs in the Head or other parts if they be anointed therewith, or washed with the Decoction, and preserveth the Hair from falling off. It is also effectual against Scaldings and Burnings, St. Anthonies fire, and all other hot, red, and painful Swellings in any part of the Body. The Flowers boyled in Oyl or Water (as every one is disposed) wherunto a little Honey and Allum is put, is an excellent Gargle to wash, clens, and heal any sore Mouth or Throat in a short space. If the Feet be bathed or washed with the Decoction of the Leavs, Roots, and Flowers, it helpeth much the Defluxions of Rhewm from the Head. If the Head be washed therewith, it staieth the falling and shedding of the Hair. The green Leavs (saith *Pliny*) beaten with Nitre and applied draweth out Thorns, or Pricks in the Flesh.

Scalding, Burning, St. Anthonies Fire, sore Mouth & Throat, Baldneß, Thorns,

The Marsh Mallows are more effectual in al the Diseases before mentioned: The Leavs are likewise used to loosen the Belly gently, and in Decoctions for Clysters, to eas al pains of the Body, opening the strait Passages, and making them slippery, whereby the Stone may descend the more easily and without pain, out of the Reins, Kidneys, and Bladder, and to eas the torturing pains thereof: But the Roots are of more especial use for those purposes, as well as for Coughs, Hoarsness, shortness of Breath, and Wheesings, being boyled in Wine or Honeyed Water and drunk. The Roots and Seeds hereof boyled in Wine or Water, is with good success used by them that have Excoriations in the Guts, or the bloody Flux, by qualifying the violence of the sharp fretting Humors, easing the pains, and healing the Soreness: It is profitably taken of them that are troubled with Ruptures, Cramps, or Convulsions of the Sinews; and boyled in white Wine for the Impostumes of the Throat, commonly called the Kings Evil, and of those Kernels that rise behind the Ears, and Inflamations or Swellings in Womens Breasts. The dried Roots boyled in Milk and drunk is special good for the Chin-Cough. *Hippocrates* used to give the Decoction of the Roots, or the Juyce therof to drink to those that were wounded, and ready to faint through loss of Blood, and applied the same, mixed with Honey and Rozin to the Wounds: As also the Roots boyled in Wine to those that had received any Hurt by Bruises, Falls, or Blows, or had any Bone or Member out of Joynt, or any Swelling pain, or ach in the Muscles, Sinews, or Arteries. The Muccilage of the Roots, and of Linseed, and of Fennugreek put together, is much used in Pultises, Oyntments, and Plaisters, to mollifie and digest all hard Swellings, and the Inflamation of them, and to eas pains in any part of the Body. The Seed either green or dry mixed with Vinegar clenseth the Skin of the Morphew, and al other discolourings, being sunburned, and bathed therewith in the Sun.

Belly, Stone, Reins, Kidneys, Bladder, Coughs, Hoarsneß, Shortneß of Breath, Wheesing, Excoriation of the Guts, Ruptures, Cramps, Convulsions, The Kings Evil, Kernels, Chincough, Wounds, Bruises, Falls, Blows, Muscles, Morphew, sunburning.

You may remember that not long since there was a raging Disease called the Bloody Flux, the Colledg of Physitians not knowing what to make of it, called it the Plague in the Guts, for their wits were at *ne plus ultra* about it. My son was taken with the same Disease, and the excoriation of his Bowels was exceeding great; my self being in the Country was sent for up, the only thing I gave him was Mallows bruised and boyled both in his Milk and Drink, in two daies (the blessing of God being upon it) it cured him, and I here to shew my thankfulness to God in communicating it to his Creatures, leav it to posterity.

Sweet Marjerom.

Majorana quorundam Origani species. Amaracus. Sampsychum. Origanum.

THis is so wel known being an Inhabitant in every Garden, that it is needless to write any Description thereof, neither of the Winter *Sweet Marjerom*, nor Pot *Marjerom*.

Place.

They grow commonly in Gardens; some sorts there are that grow wild in the Borders of Corn Fields, and Pastures in sundry places of this Land, but it is not my purpose to insist upon them: The Garden kinds being most used and useful.

Time.

They Flower in the end of Summer.

Vertues and use.

Our common *Sweet Marjerom* is warming and comfortable in cold Diseases of the Head, Stomach, Sinews, and other parts, taken inwardly, or outwardly applied: The Decoction thereof being drunk helpeth al the Diseases of the Chest which hinder the freeness of breathing; and is also profitable for the Obstructions of the Liver and Spleen: It helpeth the cold Griefs of the Womb, and the windiness thereof, and the loss of Speech, by resolution of the Tongue. The Decoction thereof made with som Pellitory of Spain, and long Pepper, or with a little Acorus or Origanum, being drunk, is good for those that are beginning to fall into a Dropsie, for those that cannot make Water, and against pains and torments in the Belly; it provoketh Womens Courses if it be put up as a Pessary. Being made into Pouder and mixed with Honey, it taketh away the black marks of Blows and Bruises, being therto applied. It is good for the Inflamations and watering of the Eyes, being mixed with fine Flower and laid unto them. The Juyce dropped into the Ears easeth the Pains and singing noise in them. It is profitably put into those Oyntments and Salves

Head, Stomach, Breast, Obstructions, Liver, Spleen, Womb, Wind, Dropsie, Bellyach, Terms provokes, Marks of Blows, Noise in the Ears,

that are made to warm and comfort the outward parts, as the Joynts and Sinews, for Swellings also and places out of Joynt. The Pouder thereof snuffed up into the Nose, provoketh neezing, and thereby purgeth the Brain; and chewed in the Mouth draweth forth much Flegm. The Oyl made thereof is very warming and comfortable to the Joynts that are stiff, and the Sinews that are hard to mollifie and supple them. *Marjerom* is much used in all odoriferous Waters, Pouders, &c. that are for Ornament or delight.

Joynts, Sinews, Swellings, Neesing, Flegm.

It is an Herb of *Mercury* and under *Aries*, and is therfore an excellent Remedy for the Brain and other parts of the Body and Mind, under the Dominion of the same Planet.

Marigolds. *calendula.*

THese being so pelentifull in every Garden are so well known that they need no Description

Time

They Flower al the Summer long, and sometimes in the Winter if it be mild.

Vertues and use

The Flowers either green or dryed are used much in Possets, broths, and drinkes, as a comforter of the Heart and spirits, and to expell any malignant or pestilential quality which might annoy them.

Heart, Vital Spirits, Pestilence, Smal Pox, Meazles, Hot swellings,

It is an Herb of the Sun and under *Leo* they strengthen the heart exceedingly, and are very expulsive, and little less Effectual in the smal pox and measles than Saffron. The Juyce of *Marigold* Leaves mixed with Vinegar, and any hot swelling bathed with it, instantly giveth ease and asswageth it.

A plaister made with the dry Flowers in pouder, hogs greas, Turpentine and Rozin, and applyed to the breast, strengthens and succours the heart infinitly in feavers whether pestilential or not pestilentiall.

Feavers, Pestilence.

Masterwort, *magyhranta. astrantium.*

Description.

Common *Masterwort* hath diverse stalks of winged Leaves devided into sundry parts, three for the most part standing together at a small footstalk on both sides of the greater, and three likewise at the end of the stalk, somwhat broad and cut in on the edges, into three or more devisions all of them dented about the brims, of a dark green colour, somwhat resembling the Leaves of Angelica, but that these grow lower to the ground, & on lesser stalks: among which rise up 2. or 3. short stalks about 2. foot high, and slender, with such like Leavs at the Joynts as grow below, but with lesser & fewer devisions, bearing Umbels of white Flowers, and after them small, thinne, flat, blackish seed bigger than Dil seeds: The Root is somwhat greater and groweth rather sideways than down deep into the ground, shooting forth sundry heads, which tast sharp, biting on the Tongue, and is the hottest and sharpest part of the Plant, and the seed next unto it, being somewhat blackish on the outside, and smelling well.

Place.

It is usually kept in Gardens with us in England.

Time.

It Flowreth and seedeth about the end of *August*.

Vertues and Use.

The Root of *Masterwort* is hotter than Pepper and very available in all cold Greifes and Diseases both of Stomach and body, dissolving very powerfully upward and downward: It is also used in a decoction with wind against all cold rhewms, or distillations upon the Lungs, and shortnes of breath, to be taken morning and evening; it also provoketh Urin and helpeth to break the Stone, and expel Greavell from the Kidneys, procureth womens Courses, and expelleth the dead birth; is singular good for the strangling of the Mother, and other such like Feminine Diseases. It is effectuall also against the Dropsie, Cramps, and the Falling sickness, for the decoction in wine being gargled in the Mouth draweth down much water and flegm from the brain, purging & easing it of what oppresseth it. It is of a rare quality against al sorts of cold poyson, to be taken as there is cause, It provoketh swear. But lest the tast herof, or of the seed (which worketh to the like effect though not so powerfully) should be too offensive; the best way is to take the water distilled both from the Herb and Root. The Juyce herof dropped or Tents dipped therin, and applyed either to green wounds, or filthy rotten Ulcers and those that come by invenomed Weapons, doth soon clens and heal them, or if they be bathed with the distilled water. The same is also very good to help the Gout coming of a cold cause.

Grefs, Cold, Stomach, Wind, Cold, Rhewms, Urine, Stone, Gravel, Womens Courses, Dead Child, Mother, Dropsie, Cramps, & Falling sickness, Cold, Sweat, Wounds, Rotten Ulcers, Gout.

It is an Herb of *Mars*.

Sweet Maudlin *Ageratum.*

Description.

Common *Maudlin* have somwhat long and narrow Leaves, snip'd about the edges: the stalks are two foot high, bearing at the

the topps many yellow flowers Set round together and all of an equal height, in umbles tufts like unto Tansy after which flowereth small whitish Seed almost as big as Wormseed The whol Herb is sweet and bitter.

Place and Time.

It groweth in Gardens, and Flowreth in *June* and *July*.

Vertues and use.

The Vertues hereof being the same with Costmary, or Alecost, I shal not trouble you to make any repetition thereof, lest my Book grow too big: but rather refer you unto Costmary for satisfaction.

The Medlar.

Description.

THis Tree groweth neer the bigness of the Quince Tree, spreading Branches reasonable large, with longer and narrower Leaves than either the Apple or Quince, and not dented about the edges: At the end of the Sprigs stand the Flowers made of Five white, great broad pointed Leavs, nicked in the middle, with some white threds also: after which cometh the Fruit, of a browniſh green colour, being ripe, bearing a Crown as it were on the top, which were the five green Leaves; and being rubbed off or fallen away, the head of the Fruit is seen to be somwhat hollow. The Fruit is very harsh before it be mellowed, and hath usually five hard Kernels within it.

There is another kind hereof differing nothing from the former, but that it hath some Thorns on it in several places, which the other hath not, and the Fruit is smal and not so pleasant.

Time.

They grow in this Land; and Flower in *May* for the most part, and bear ripe Fruit in *September*, and *October*.

Vertues and use.

Fluxes They are very powerful to stay any Fluxes of Blood or Humors in Man or Woman: the Leavs have also the like quality. The Fruit eaten by Women with Child, stayeth their longings after unusual meats, and is very effectual for them that are apt to miscarry, and be delivered before their time, to help that malady; and make them joyful Mothers. The Decoction of them is good to gargle and wash the Mouth, Throat and Teeth, when there is any defluxion of Blood to stay it, or of Humors, which causeth Pains and Swellings: It is a good bath for Women to sit over that have their Courses flow too abundantly; or for the Piles when they bleed too much. If a Pultis or Plaister be made with dried *Medlars* beaten and mixed with the Juyce of red Roses, whereunto a few Cloves and Nutmeg may be added, and a little red Correl also, and applied to the Stomach that is given to casting, or loathing of meat, it effectually helpeth. The dried Leavs in Pouder, strewed on fresh, bleeding Wounds, restraineth the Blood, and healeth up the Wound quickly: The *Medlar* stones made into Pouder and drunk in Wine, wherein some Parsley Roots have lien infused all night, or a little boyled, do break the Stone in the Kidneys, helping to expel it.

Stayeth Womens Longings *Hinders Miscarriage,* *Gargle,* *Womens Courses,* *Piles,* *Loathing of Meat, or Casting,* *Bleeding, Fresh Wounds,* *Sone in the Kidneys,*

The Fruit is old *Saturns*, and sure a better Medicine he hardly hath to strengthen the retentive faculty; therfore it staies Womens Longings, the good old Man cannot endure Womens minds should run a gadding: Also a Plaister made of the Fruit dried before they be rotten, and other convenient things, and applied to the Reins of the Back, stops Miscarriage in Women with Child. *Miscarriage.*

Melilot or Kings Claver.

Description.

THis hath many green Stalks two or three foot high, rising from a tough long white Root, which dieth not every yeer; set round about at the Joynts with smal and somwhat long wel smelling Leavs set three together, unevenly dented about the edges: The Flowers are yellow, and well smelling also, made like other Trefoyls, but smal, standing in long Spikes, one above another, for an hand breath long, or better, which afterwards turn into long crooked Cods, wherein is contained flat Seed, somwhat Brown.

Place.

It groweth plentifully in many places of this Land, as in the edg of *Suffolk* and in *Essex*, as also in *Huntingtonshire*, and in other places, but most usually in Corn Fields, in corners of Meadows.

Time.

It Flowreth in *June* and *July* and is ripe quickly after.

Vertues and Use.

Melilot boyled in Wine and applied mollifieth all hard Tumors and Inflamations that happen in the Eyes or other parts of the Body, as the Fundament or privy parts of Man or Woman; and somtimes the Yolk of a roasted Egg, or fine Flower or Poppy Seed, or Endive is added unto it: It helpeth the spreading Ulcers in the Head, it being washed with a Ly made thereof; It helpeth the pains of the Stomach being applied fresh, or boyled with any of the aforenamed things. It helpeth also the pains of the Ears being dropped into them;

Hard Tumors & Inflamations in the Eyes, or elswhere, *Ulcers in the Head,* *Stomach pained,*

them; and steeped in Vinegar and Rose-Water it mitigateth the Headach. The Flowers of Melilot and Chamomel are much used to be put together in Clisters to expel Wind, & to eas pains; also into Pultices for the same purpose, and to asswage Swellings or Tumors in the Spleen or other parts; & helpeth Inflamations in any part of the Body. The Juyce dropped into the Eyes is a singular good Medicine to take away any Film or Skin that cloudeth or dimmeth the Eyesight. The Head often washed with the distilled Water of the Herb and Flowers, or a Ly made therwith, is effectual for those that have suddenly lost their senses; as also to strengthen the Memory, to comfort the Head and Brains, and to preserve them from pains and the Apoplexie.

Hiadach, Wind, Spleen, Dimnes of sight, stupidity of senses, strengthen Memory, Apoplexy.

French, and Dogs Mercury.

Description.

THis riseth up with a square green stalk full of Joynts two foot high or ther abouts, with two Leaves at every Joynt and branches likewise from both sides of the stalk, set with fresh green Leaves somwhat broad and long, about the bigness of the Leaves of Bassell finely dented about the edges: towards the topps of the stalks and branches come forth at every Joynt in the Male *Mercury* two small round green heads, standing together upon a short footstalk which growing ripe are the seeds; not having any Flower: In the female; The stalk is longer, spike fashion, set round about with smal green husks, which are the Flowers made like smal branches of Grapes which give no seed, but abide long upon the stalks without shedding: The Root is composed of many smal Fibres, which perisheth every year at the first approach of winter, and riseth again of its own sowing, and where it once is suffered to sow it self, the ground will never want it afterwards even both sorts of it.

Dogs Mercury.

HAving described unto you that which is called *French Mercury*, I come now to shew you in a Description this kind also.

This is likewise of two kinds, Male and Female, having many stalks slenderer & lower than Mercury and without any branches at all upon them: The Male is set with two Leavs at every Joynt somwhat greater than the Female, but more pointed and full of Veins, and somwhat harder in handling, of a darker green colour, and less dented or snip'd about the edges: At the Joynts with the Leavs come forth longer Stalks than the former, with two hairy round Seeds upon them twice as big as those of the former Mercury: The tast hereof is Herby, and the smel somwhat strong and Virulent: The Female hath much harder Leavs standing upon longer Foot-stalks, and the stalks are also longer: From the Joynts come forth Spikes of Flowers, like the French Female Mercury, The Roots of them both are many, and full of smal Fibres, which run under ground, and mat themselves very much, not perishing as the former Mercuries do, but abiding the Winter, and shoot forth new Branches every yeer (for the old die down to the ground.

Place.

The Male and Female French Mercury are found wild in divers places of this Land; as by a Village called *Brookland* in *Rumney* Marsh in *Kent*.

The Dogs Mercury in sundry places of *Kent* also, and elswhere; but the Female more seldom than the Male.

Time.

They flourish in the Summer months, and therein give their Seed.

Vertues and Use.

The Decoction of the Leavs of Mercury, or the Juyce thereof in Broth, or Drunk with a little Sugar put to it, purgeth Chollerick and wateris Humors. *Hippocrates* commendeth it wonderfully for Womens Diseases; and applied it to the secret parts to eas the pains of the Mother; and used the Decoction of it both to procure Womens Courses, and to expel the Afterbirth: And gave the Decoction thereof with Mirrh or Pepper, or used to apply the Leavs outwardly against the Strangury, and Diseases of the Reins and Bladder. He used it also for sore and watering Eyes, and for the Deafnes and pain in the Ears, by dropping the Juyce therof into them, and bathing them afterwards in white Wine.

Purgeth Chollerick Humors, Womens sickneß, Mother, Womens Courses, strangury, sore Eyes, Agues, Fleegm, Rhewms and Catarrhes, Melancolly Humors,

The Decoction thereof made with Water and a Cock Chicken, is a most safe Medicine against the hot fits of Agues: It also clenseth the Breast and Lungs of Flegm, but a little offendeth the Stomach: The Juyce or distilled Water snuffed up into the Nostrils purgeth the Head and Eyes of Catarrhes and Rhewms. Some use to drink two or three ounces of the distilled water with a little Sugar put to it, in the morning fasting, to open and purge the Body of gros viscuous and Melancholly Humors. It is wonderful (if it be not Fabulous) that *Dioscorides* and *Theophrastus* do relate of it: *Viz.* That if Women use these Herbs either inwardly or outwardly for three daies together after Conception, and their Courses be past, they shal bring forth Male or Female Children, according to that kind of

Herb they use. *Mathiolus* saith, That the Seed of both the Male and Female Mercury boyled with Wormwood and drunk, cureth the yellow Jaundice in a speedy manner: The Leavs or the Juyce rubbed upon Warts, taketh them away: The Juyce mingled with some Vinegar, helpeth all running Scabs, Tetters, Ringworms and the Itch. *Galen* saith that being applied in manner of a Pultis, to any Swelling or Inflamation, it digesteth the Swelling and allayeth the Inflamation; and is therfore given in Clysters to evacuate the Belly from offensive Humors.

Yellow Jaundice, Warts, Scabs, Tetters, & Ring-worms, Swellings, Inflamations, Waterish & Melancholly Humors.

The Dogs Mercury, although it be less used yet may serve in the same manner to the same purpose to purge waterish and Melanchollick Humors.

Mercury they say owns this Herb, but I rather think 'tis Venus, and am partly confident of it too, for I never read that *Mercury* ever minded Womens businesses so much, I believe he minds his study more.

Mint.

Description.

OF all the kinds of *Mints*, the *Spear-Mint*, or *Heart-Mint*, being most useful; I shal only describe it: as followeth.

Spear-Mint, hath diverse round Stalks, and long, but narrowish Leavs set thereon; of a a dark green colour. The Flowers stand in Spiked Heads at the tops of the Branches, being of a pale blush colour. The smel or scent hereof is somwhat neer unto Bassil: It encreaseth by the Root under ground, as all the others do.

Place.

It is an usual Inhabitant in Gardens; And becaus it seldom giveth any good Seed, the defect is recompensed by the plentiful encreas of the Root, which being once planted in a Garden will hardly be rid out again.

Time.

It Flowreth not until the beginning of *August*, for the most part.

Vertues and Use.

Provokes Venery, stayeth Vomiting, Allayeth Choler, Impostums great Breasts, Mad Dogs biting, Pains of the Ears,

Dioscorides saith, It hath an heating, binding and drying quality, and therefore the Juyce taken with Vinegar staieth Bleeding: It stirreth up Venery or Bodily lust: Two or three Branches thereof taken with the Juyce of sowr Pomegranates stayeth the Hiccough, Vomiting, and allayeth Choller: It dissolveth Impostumes being laid too with Barley Meal. It is good to repress the Milk in Womens Breasts, and for such as have swollen, flagging, or great Breasts: applied with Salt, it helpeth the biting of a Mad Dog; with Mead or Honeyed Water, it easeth the pains of the Ears. and taketh away the roughness of the Tongue, being rubbed thereupon. It suffereth not Milk to curdle in the Stomach if the Leavs hereof be steeped or boyled in it before you drink it. Briefly it is very profitable to the Stomach: The often use hereof is a very powerful Medicine to stay Womens Courses, and the Whites. Applyed to the Forehead or Temples, it easeth pains of the Head. And is good to wash the Heads of yong Children therewith, against all manner of breakings out, Sores, or Scabs therein; and healeth the chops of the Fundament. It is also profitable against the Poyson of Venemous Creatures: The distilled Water of *Mints* is available to all the purposes aforesaid, yet more weakly.

Good for the Stomach, Pains of the Head, Sores & Scabs, Chops of the Fundament, Poyson,

But if a Spirit thereof be rightly and Chimically drawn, it is much more powerful than the Herb it self. *Simeon Sethi* saith, It helpeth a cold Liver, strengthneth the Belly and Stomach, causeth digestion, staieth Vomit and the Hiccough, is good against the Gnawings of the Heart, provoketh Appetite, taketh away Obstructions of the Liver, and stirreth up Bodily Lust: But thereof too much must not be taken, becaus it maketh the Blood thin and wheyish, and turneth it into Choller, and therfore Chollerick persons must obstain from it.

Helpeth Liver and Stomach, stayeth Vomiting and Hiccough, provoketh Lust, Spleen, Gravel, Stone, and Strangury, comforts the Head, sore Mouth, ill Breath, Pallet down,

It is is a safe Medicine for the biting of a Mad Dog, being bruised with Salt and laid thereon. The Pouder of it being dried and taken after Meat helpeth digestion, and those that are Splenetick: taken with Wine it helpeth Women in their Sore Travail in Childbearing; It is good against the Gravel and and Stone in the Kidneys, and the Strangury. Being smelled unto, it is comfortable for the Head and Memory. The Decoction thereof gargled in the Mouth cureth the Gums and Mouth that is sore, and mendeth an ill savoured Breath: as also with Rue and Coriander, causeth the Pallat of the Mouth, that is down to return to his place, the Decoction being gargled and held in the Mouth.

The Vertues of the wild or Horse *Mints*, such as grow in Ditches (whose Description I purposely omitted in regard they are well enough known) are especially to dissolve wind in the Stomach, to help the Chollick, and those that are short winded, and are an especial Remedy for those that have Venerious Dreams and pollutions in the Night being outwardly applied to the Testicles or Cods. The Juyce dropped into the Ears easeth the pains of them, and destroyeth the Worms that breed therein. They are good against the Venemous biting of Serpents. The Juyce laid on warm helpeth the Kings Evil, or Kernels in the Throat: The Decoction or distilled Water helpeth a stinking Breath proceeding from the corruption of the Teeth; and snuffed up into the Nose purgeth the Head. *Pliny* saith, That eating of the Leavs hath been found by experience

Wind, Venereal Dreams, & Nightly pollutions, Ears pained, biting of Serpents, Kings Evil, stinking Breath,

Lepry, rience to cure the Lepry, and applying ſome of them to the Face: and to help the Scurf or Dandrif of the Head uſed with Vinegar.

Dandrif.

They are extream bad for wounded people, and they ſay a wounded man that eats Mints his Wound will never be cured, and that's a long day.

Miſſelto.

Deſcription.

THis riſeth up from the Branch or Arm of the Tree whereon it groweth, with a woody Stem, parting it ſelf into ſundry Branches, and they again devided into many other ſmaller Twigs, interlacing themſelves one within another, very much covered with a grayiſh green Bark, having two Leaves ſet at every Joynt, and at the end likewiſe, which are ſomwhat long and narrow, ſmal at the bottom but broader toward the end: At the Knots or Joynts of the Boughs and Branches, grow ſmal yellowiſh Flowers, which turn into ſmal round white tranſparant Berries, three or four together, full of glutinous moiſture, with a blackiſh Seed in every of them, which was never yet known to ſpring being put into the ground or any where elſ to grow.

Place.

It groweth very rarely on Oaks with us, but upon ſundry other, as well Timber as Fruit-Trees, plentifully in Woods, Groves, and the like through all this Land.

Time.

It Flowreth in the Spring time, but the Berries be not ripe until *October*, and abide on the Branches all the Winter, unleſs the Black-Birds, and other Birds do devour them.

Vertues and Uſe.

Both the Leavs and Berries of *Miſleto* do heat and dry, and are of ſubtil parts: The Birdlime doth mollifie hard Knots, Tumors, and Impoſtumes, ripeneth and diſcuſſeth them; and draweth forth thick as well as thin Humors from the remote places of the Body, digeſting and ſeparating them: And being mixed with equal parts of Rozin and Wax, doth mollifie the hardneſs of the Spleen, and healeth old Ulcers and Sores: Being mixed with Sandarack, and Ortment, it helpeth to draw off foul Nails: and if quicklime and Wine Lees be added thereunto it worketh the ſtronger. The *Miſleto* it ſelf of the Oak (as the beſt) made into Pouder and given in drink to thoſe that have the Falling-ſickneſs, doth aſſuredly heal them as *Mathiolus* ſaith, but it is fit to uſe it for forty daies together. Some have ſo highly eſteemed of the Vertues hereof that they have called it *Lignum Sanctæ Crucis*, Wood of the holy Croſs, beleeving it to help the Falling-ſickneſs, Apoplexie, and Palſie very ſpeedily, not only to be inwardly taken, but to be hung at their Necks. *Tragus* ſaith, That the freſh Wood of any *Miſleto* bruiſed, and the Juyce drawn forth and dropped into the Ears that have Impoſtumes in them, doth help and eaſ them within a few daies.

Impoſtums

Spleen, Ulcers,

Falling-ſickneſs,

Apoplexy, Palſy,

Impoſtums

That it is under the Dominion of the *Sun*, I do not queſtion, and can alſo take for granted that that which grows upon Oaks participates ſomthing of the Nature of *Jupiter*, becauſ an Oak is one of his Trees; as alſo that which grows upon Pear-trees and Apple-trees, participates ſomthing of the Nature, becauſ he rules the Trees, and it draws ſap from the Trees, it grows upon having no Root of its own, but why that ſhould have moſt vertues that grows upon Oaks I know not, unleſs becauſ 'tis rareſt, and hardeſt to come by, and our Colledges Opinion is in this contrary to the Scripture which ſaith, *Gods tender Mercies are over all his Works*, and ſo 'tis, Let the Colledg of Phyſitians walk as contrary to him as they pleaſ, and that's as contrary as the Eaſt is to the Weſt. *Cluſius* affirms that which grows upon Pear-trees to be as prevalent, and give order that it ſhould not touch the ground after it is gathered, and alſo ſaith, That being hung about the Neck, it remedies Witchcraft.

Money-wort, *or* Herb Two-pence.

Deſcription.

THe common *Money-wort*, ſendeth forth from a ſmal threddy Root, diverſ long, weak, and ſlender Branches lying and running upon the ground two or three Foot long or more, ſet with Leavs two at a Joynt one againſt another at equal diſtances, which are almoſt round, but pointed at the ends, ſmooth and of a good green colour: At the Joynts with the Leavs from the middle forward come forth at every Joynt ſomtimes one yellow Flower, and ſomtimes two, ſtanding each on a ſmal Footſtalk, and made of five Leavs, narrow, and pointed at the ends, with ſome yellow threds in the middle: which being paſt, there ſtand in their places ſmal round Heads of Seed.

Place.

It groweth plentifully in almoſt all places of this Land; commonly in moiſt grounds by Hedg ſides, and in the middle of graſſy Fields.

Time.

They Flower in *June* and *July*, and their Seed is ripe quickly after.

Vertues and use.

Moneywort is singular good to stay all Fluxes in Men or Woman, whether they be Lasks, Bloody Fluxes, the Flowing of Womens Courses, Bleedings inwardly or outwardly, and the weakness of the Stomach that is given to casting. It is very good also for all Ulcers, or Excoriations of the Lungs or other inward parts. It is exceeding good for all Wounds, either fresh or green to heal them speedily; and for old Ulcers that are of a spreading nature: For all which purposes, The Juyce of the Herb, or the Pouder drunk in Water, wherein hot Steel hath been often quenched: Or the Decoction of the green Herb in Wine or Water drunk; Or the Seed, Juyce or Decoction used to the outward places to wash or bath them, or to have Tents dipped therein and put into them, are effectual.

Fluxes, Ulcers, Green Wounds Old Ulcers.

Moonwort. *Lunaria Minor*

Description.

This riseth up usually but with one dark green thick and fat Leaf standing upon a short footstalk, not a bove two fingers breadth; but when it will flower it may be said to beare a small slender stalk about four or five Inches high, having but one leaf set in the middle therof, w^ch^ is much devided on both sides into somtimes five or seven parts on a sid, somtimes more, each of which parts is small next the middle rib, but broad forwards and round pointed, resembling therein an half Moon from whence it took the name, the uppermost parts or divisions being less than the lowest: The Stalk riseth above this Leaf two or three inches, bearing many Branches of small long Tongues, every one like the spiky Head of Adders-Tongue, of a browniish colour, which whether I shall call them Flowers or the Seed, I well know not: which after they have continued a while resolve into a Mealy dust: The Root is smal and Fibrous. This hath somtimes diverse such like Leavs as are before Described, with so many branches or tops arising from one Stalk each devided from the other.

Place.

It groweth on Hills, and Heaths, yet where there is much Grass, for therein it delighteth to grow.

Time.

It is to be found only in *April* and *May*, for in *June* when any hot weather cometh for the most part it is withered and gone.

Vertues and use.

Moonwort is cold and drying more than Adders-tongue, and is therefore held to be more available for all Wounds both inward and outward: The Leavs boyled in red Wine and drunk stayeth the immoderate Flux of Womens Courses and the Whites: It also staieth Bleeding, Vomitings, and other Fluxes; It helpeth all Blows and Bruises, and to consolidate all Fractures and Dislocations. It is good for Ruptures: But it is chiefly used by most, with other Herbs to make Oyls or Balsoms to heal fresh or green Wounds (as I said before) either inward or outward, for which it is excellent good.

Womens Courses, Bleedings, Vomiting, Fluxes, Broken & disjoynted Bones, Green Wounds.

Moonwort is an Herb which they say will open Locks, and unshoo such Horses as tread upon it, this some laugh to scorn, and those no smal Fools neither, but Country people that I know, call it [Unshoo the Horse] besides I have heard Commanders say, That on White Down in *Devon.* neer *Tiverton*, there was found thirty Horse shoos, pulled off from the feet of the Earl of *Essex* his Horses being there drawn up in a Body, many of them being but newly shod, and no reason known, which caused much admiration; and the Herb described usually grows upon Heaths. The *Moon* owns the Herb.

Mosses. *Muscus. Usnea.*

I Shal not trouble the Reader with any Description of these, sith my intent is to speak only of two kinds as the most principal, *Viz. Ground-Moß*, and *Tree-Moß*, both which are very well know.

Place.

The *Ground-Moß*, growing in our moist Woods, and the bottoms of Hills, in boggy grounds, and in shadowy Ditches, and many other such like places.

The *Tree-Moß* groweth only on Trees.

Vertues and use.

The *Ground-Moß*, is held to be singular good to break the Stone, and to expel and drive it forth by Urin, being boyled in Wine and drunk: The Herb bruised and boyled in Water and applied easeth all Inflamations and pains coming of an hot cause; and is therfore used to eas the pains of the hot Gout.

Stone, Inflamations, Fluxes, Vomiting, Bleeding, Womens Courses,

The *Tree-Mosses* are cooling and binding, and partake of a digesting and mollifying quality withal, as *Galen* saith. But each *Moß* doth partake of the Nature of the Tree from whence it is taken; therefore that of the Oak is more Binding: and is of good effect to stay Fluxes in man or Woman, as also Vomitings or Bleedings, the Pouder thereof being taken in Wine: The Decoction thereof in Wine is very good for Women to be bathed with, or to sit in that are troubled with the overflowing of their Courses: The seme being drunk stayeth the Stomach that is troubled with casting,

of

or the Hiccough; and as *Avicenna* ſaith, it comforteth the Heart: The Pouder thereof taken in Drink for ſome time together, is thought available for the Dropſie. The Oyl of Roſes that hath had freſh Moſs ſteeped therein for a time, and after boyled and applied to the Temples and Forehead, doth Merveilouſly eaſe the Headach coming of a hot cauſe, as alſo the Diſtillations of hot Rhewm or Humors to the Eyes or other parts: The Antients much uſed it in their Oyntments and other Medicines againſt Laſſitude, and to ſtrengthen and comfort the Sinews. For which, if it was good then, I know no reaſon but it may be fonnd ſo ſtill.

Dropſie, *Headach,* *Sinews.*

Motherwort.

THis hath a hard, ſquare, browniſh, rough, ſtrong Stalk, riſing three or four foot high at the leaſt, ſpreading into many Branches, whereon grow Leavs on each ſide with long Footſtalks, two at every Joynt, which are ſomwhat broad and long as it were, rough, or crumpled, with many great Veins therein; of a ſad green colour, and deeply dented about the edges, and almoſt devided: From the middle of the Branches up to the tops of them (which are very long and ſmal) grow the Flowers round about them at diſtances in ſharp pointed rough hard Husks, of a more red or purple-colour than Balm or Horehound, but in the ſame manner and form as the Horehounds: after which come ſmal round blackiſh Seed in great plenty: The Root ſendeth forth a number of long Strings and ſmal Fibres, taking ſtrong hold in the Ground; of a dark yellowiſh or browniſh colour, and abideth as the Horehound doth; the ſmell of this being not much different from it.

Place.

It groweth only in Gardens with us in *England.*

Vertues and uſe.

Motherwort, is held to be of much uſe for the trembling of the Heart, and in faintings and ſwounings from whence it took the name *Cardiaca.* The Pouder thereof to the quantity of a ſpoonful drunk in Wine is a wonderful help to Women in their Sore Travails, as alſo for the ſuffocations or riſings of the Mother; and from theſe effects it is likely it took the name of Motherwort with us. It alſo provoketh Urine and Womens Courſes, clenſeth the Cheſt of cold Flegm oppreſſing it, and killeth the Worms in the Belly: It is of good uſe to warm and dry up the cold Humors, to digeſt and diſperſe them that are ſetled in the Veins, Joynts, and Sinews of the Body, and to help Cramps, and Convulſions.

Swounings, *Sore Travail,* *Mother,* *Urine,* *Womens Courſes,* *Flegm,* *Cold Flegm,* *Cramps,* *Convulſions,* *Melancholly* *Vapors.*

Venus owns the Herb, and it is under *Leo*, there is no better Herb to drive Melancholly Vapors from the Heart, to ſtrengthen it, and make a merry cheerful blith ſoul, than this Herb, it may be kept in a Syrup or Conſerve, therfore the Latins called it *Cardiaca*: Beſides, it makes Women joyful Mothers of Children, and ſettles their Womb as they ſhould be, therfore we call it *Motherwort.*

Mouſear.

Deſcription.

THis is a low Herb creeping upon the ground by ſmall ſtrings like the Strawberry Plant, whereby it ſhooteth forth ſmall Roots, whereat grow upon the Ground many ſmall and ſomwhat ſhort Leavs ſet in a round form together, hollowiſh in the middle where they are broadeſt, of an hoary colour all over, and very hairy, which being broken do give a white Milk: From among theſe Leavs ſpring up two or three ſmal hoary Stalks about a ſpan high, with a few ſmaller Leavs thereon; At the tops whereof ſtandeth uſually but one Flower, conſiſting of many pale yellow Leavs broad at the points, and a little dented in, ſet in three or four rows, the greater outermoſt, very like a Dandelyon Flower, and a little reddiſh underneath about the edges, eſpecially if it grow in a dry ground: which afrer they have ſtood long in Flower, do turn into Down, which with the Seed is carryed away with the Wind.

Place.

It groweth on Ditch Banks, and ſomtimes in Ditches if they be dry and in ſandy Grounds.

Time.

It flowreth about *June* and *July*, and abideth green all the Winter.

Vertues and Uſe.

The Juyce hereof taken in Wine or the Decoction thereof drunk doth help the Jaundice although of long continuance, to drink thereof morning and evening, and abſtain from other drink two or three hours after: It is a ſpecial Remedy againſt the Stone, and the tormenting pains thereof; as alſo other Tortures and griping pains of the Bowels; The Decoction thereof with Succory and Centaury, is held very effectual to help the Dropſie, and them that are inclining thereunto, and the Diſeaſes of the Spleen. It ſtayeth the Fluxes of Blood either at the Mouth or Noſe, and inward Bleedings alſo, for it is a ſingular Wound Herb for Wounds both inward and outward; It helpeth the Bloody Flux and ſtayeth the abundance of Womens Courſes:

Jaundice, *Stone,* *Bellyach,* *Dropſie,* *Flux,* *Wounds,* *Bloody* *Flux,* *Terms* *ſtops,*

There is a Syrup made of the Juyce hereof and Sugar by the Apothecaries of *Italy*, and other places, which is of much account with them, to be given to those that are troubled with the Cough or Phtisick: The same also is singular good for Ruptures or Burstings. The green Herb bruised and presently bound to any fresh cut or Wound, doth quickly soder the lips thereof. And the Juyce, Decoction, or Pouder of the dried Herb, is most singular to stay the Malignity of spreading and fretting Cankers and Ulcers wheresoever, yea in the Mouth, or secret parts: The distilled Water of the Plant is available in all the Diseases aforesaid, and to wash outward Wounds and Sores, and to apply Tents, or Cloaths wet therein.

Cough, Phtisick, Ruptures, Canker, Ulcers, spreading sores.

The *Moon* owns the Herb also, and though Authors cry out upon Alchymists for attempting to fix Quick Silver by this Herb and Moonwort: A Roman would not have judged a thing by the success, if it be to be fixed at all, 'tis by Lunar Influence.

Mugwort.

Description.

THe common *Mugwort* have divers Leavs lying upon the ground, very much devided, or cut deeply in about the Brims somwhat like Wormwood but much larger, of a dark green colour on the upper side and very hoary white underneath. The stalks rise to be four or five foot high, having on it such like Leavs as those below, but somwhat smaller, branching forth very much toward the top, whereon are set very smal pale yellowish Flowers like Buttons, which fall away, and after them come small Seed inclosed in round Heads: The Root is long and hard with many smal Fibres growing from it, whereby it taketh strong hold in the ground, but both Stalk and Leaf do die down every yeer, and the Root shooteth anew in the Spring. The whol Plant is of a reasonable good scent, and is more easily propogated by the Slips, than by the Seed.

Place.

It groweth plentifully in many places of this Land, by the way sides, as also by smal Water-Courses, and in diverse other places.

Time.

It Flowreth and Seedeth in the end of Summer.

Vertues and Use.

Mugwort is with good success put among other Herbs that are boyled for Women to sit over the hot Decoction, to draw down their Courses, to help the Delivery of the Birth, and expel the Afterbirth, as also for the Obstructions and Inflamations of the Mother. It breaketh the Stone, and causeth one to make water where it is stopped: The Juyce thereof made up with Mirrh, and put under as a Pessary, worketh the same effect, and so doth the Root also, being made up with Hogs Greas into an Oyntment, it taketh away Wens and hard Knots and Kernels that grow about the Neck and Throat, and easeth the pains about the Neck more effectually, if some Field Daisies be put with it. The Herb it self being fresh or the Juyce thereof taken, is a special Remedy upon the overmuch taking of Opium. Three drams of the Pouder of the dried Leavs taken in Wine, is a speedy and the best certain help for the Sciatica. A Decoction thereof made with Chamomel and Agrimony, and the place bathed therewith while it is warm, takoth away the pains of the Sinews and the Cramp.

Terms provokes, Birth, Afterbirth

Womb Inflamed, Wens, Kings Evil, pains in the Neck, Opium, Sciatica, Sinews pained, Cramp,

This is an Herb of *Venus*, therefore maintaineth the parts of the Body she rules, and Remedies the Diseases of the parts that are under her Signs, *Taurus* and *Libra*.

The Mulberry-Tree.

THis is so well known in the places where it groweth, that it needeth no Description.

It beareth Fruit in the Months of *July* and *August*.

The *Mulberry* is of different parts; the ripe Berries by reason of their Sweetness and slippery moisture, opening the Belly, and the unripe binding it, especially when they are dried, and then they are good to stay Fluxes, Lasks, and the abundance of Womens Courses. The Bark of the Root killeth the broad Worms in the Body. The Juyce, or the Syrup made of the Juyce of the Berries, helpeth all Inflamations and Sores in the Mouth or Throat, and the Pallet of the Mouth when it is fallen down. The Juyce of the Leavs is a Remedy against the biting of Serpents, and for those that have taken Aconite: The Leavs beaten with Vinegar is good to lay on any place that is burnt with fire. A Decoction made of the Bark and Leavs, is good to wash the Mouth and Teeth when they ach. If the Root be a little slit or cut, and a smal hole made in the ground next thereunto, in the Harvest time, it will give out a certain Juyce, which being hardned, the next day is of good use to help the Toothach, to dissolve Knots, and purge the Belly: The Leavs of *Mulberries* are said to stay bleeding at Mouth or Nose, or the Bleeding of the Piles, or of a Wound

Binding, Fluxes, Lasks, Terms, Inflamation, Uvula, sore Mouth & Throat, Toothach, Bleeding, Hemorrhoids,

Wound being bound unto the places. A Branch of the Tree taken when the *Moon* is at the full and bound to the Wrist of a Womans Arm whose Courses come down too much doth stay them in a short space.

Acurious secret.

Mercury rules the Tree, therefore are its effects variable as his are.

Mullein.

Description.

THe common white *Mullein* hath many fair large woolly white Leavs lying next the ground, somwhat longer than broad, pointed at the ends, and as it were dented about the edges: The Stalk riseth up to be four or five Foot high, covered over with such like Leavs, but lesser, so that no Stalk can be seen for the multitude of Leavs thereon up to the Flowers, which come forth on all sides of the Stalk, without any Branches for the most part, and are many set together in a long spike, in some of a gold yellow colour, in others more pale, consisting of five round pointed Leavs, which afterwards give smal round Heads, wherein is smal browniſh Seed contained: The Root is long, white, and Woody, perishing after it hath born Seed.

Place.

It groweth by the way sides, and in Lanes in many places of this Land.

Time.

It Flowreth in *July*, or thereabouts.

Vertues and use.

Flux, Ruptures, Cramp, Convulsion, Cough, Toothach, Hemorrhoids, Bloody Flux, Obstructions, Reins, Bladder, Sinews,

A smal quantity of the Root given in Wine, is commended by *Dioscorides* against Lasks and Fluxes of the Belly: The Decoction thereof drunk is profitable for those that are Burstен, and for Cramps and Convulsions, and for those that are troubled with an old Cough. The Decoction thereof gargled easeth the pains of the Toothach: An Oyl made by the often Infusion of the Flowers, is of very good effect for the Piles. The Decoction of the Root in Red Wine, or in Water (if there be an Ague) wherein red hot Steel hath been often quenched, doth stay the Bloody Flux. The same also openeth Obstructions of the Bladder and Reins when one cannot make water. A Decoction of the Leavs hereof, and of Sage, Marjerom and Camomil Flowers and the places bathed therewith that have Sinews stark with cold, or Cramps, doth bring them much eas, and comfort. Three ounces of the distilled water of the Flowers drunk morning and evening for some daies together is said to be the most excellent Remedy for the hot Gout, The Juyce of the Leavs and Flowers being laid upon rough Warts, as also the Pouder of the dried Roots rubbed on doth easily take them away; but doth no good to smooth Warts. The Pouder of the dried Flowers is an especial Remedy for those that are troubled with belly-aches or the pains of the Chollick. The Decoction of the Root, and so likewise of the Leavs is of great effect to dissolve the Tumors, Swellings, or Inflamation of the Throat. The Seed and Leavs boyled in Wine, and applied, draweth forth speedily Thorns, or Splinters gotten into the Flesh, easeth the pains, and healeth them also. The Leavs bruised and wrapped in double papers, and covered with hot Ashes and Embers to bake a while, and then taken forth and laid warm on any Botch or Boyl hapning in the Groyn or share, doth dissolve and heal them. The Seed bruised, and boyled in Wine and laid on any Member that hath been out of Joynt and is newly set again, taketh away all Swellings and pains thereof.

Gout, Warts,

Bellyach, Chollick, Inflamation, Thorns, Splinters, Boyls, Groyn, Disjunctures.

Mustard.

Description.

THe common *Mustard* hath large and broad rough Leavs, very much jagged with uneven, and unorderly gashes, somwhat like Turnip Leavs, but lesser and rougher: The Stalk riseth to be more than a foot high, and somtimes two foot high, being round, rough, and branched at the top, bearing such like Leavs thereon as grow below, but lesser, and less devided; and divers yellow Flowers one above another at the tops; after which come smal rough pods, with smal lank flat ends, wherein is contained round yellowish Seed, sharp, hot, and biting upon the Tongue: The Root is smal, long, and woody, when it beareth Stalks and perisheth every yeer.

Place.

This groweth with us in Gardens only, and other manured places.

Time.

It is an annual Plant, Flowring in *July*, and their Seed is ripe in *August*.

Vertues and use.

Heats, Dries, Splinters, Thorns, Terms provokes, Falling-sickness, Lethargy, Sneezing,

Mustard Seed hath the Vertue of Heating, discussing, rarefying and drawing out Splinters of Bones, and other things out of the Flesh. It is of good effect to bring down Womens Courses, for the Falling sickness or Lethargy, drousie forgetful evil, to use it both inwardly and outwardly: to rub the Nostrils, Forehead, and Temples, to warm and quicken the Spirits, for by the fierce sharpness it purgeth the Brain by sneezing, and drawing down Rhewm and other Viscuous Humors, which by their Distillations upon the Lungs and Chest procure coughing, and therefore with

with some Honey added thereto doth much good therein. The Decoction of the Seed made in Wine and drunk, provoketh Urine, resisteth the force of Poyson, the Malignity of Mushroms, and the Venom of Scorpions, or other Venemous Creatures, if it be taken in time: and taken before the cold fits of Agues, altereth, lesseneth, and cureth them. The Seed taken either by it self or with other things either in an Electuary or Drink, doth mightily stir up Bodily lust, and helpeth the Spleen and pains in the sides, and gnawing in the Bowels. And used as a Gargle, draweth up the Pallat of the Mouth being fallen down, and also it dissolveth the Swellings about the Throat, if it be outwardly applied. Being chewed in the Mouth, it oftentimes helpeth the Toothach: The outward application hereof upon the pained place of the *Sciatica*, discusseth the Humors, and easeth the pains, as also of the Gout, and other Joynt aches. And is much and often used to ease pains in the sides or loyns, the shoulders or other parts of the Body, upon the applying thereof to raise Blisters, and cureth the Disease by drawing it to the outward part of the Body: It is also used to help the falling of the Hair: The Seed bruised, mixed with Honey and applied, or made up with Wax, taketh away the Marks, and black and blue spots of Bruises or the like, the roughness or Scabbedness of the Skin, as also the Leprosie and lowsie evil: it helpeth also the crick in the Neck. The distilled Water of the Herb when it is in Flower is much used to drink inwardly to help in any the Diseases aforesaid, or to wash the Mouth when the Pallat is down, and for the Diseases of the Throat to gargle, but outwardly also for Scabs, Itch, or other like Infirmities, and clenseth the Face from Morphew, Spots, Freckles, and other Deformities.

Disury, Poyson, Mushroms Venemous Beasts, Agues, Lust provokes, Spleen, Vvula, Sciatica, Toothach, Pains, Hair, Bruises, Black and blue spots, roughness, Leprosie, Lowse Evil Morphew, Freckles, WryNecks.

It is an excellent Sawce for such whose Blood wants clarifying and for weak Stomachs being an Herb of *Mars* but naught for Chollerick people, though as good for such as are aged or troubled with cold Diseases, *Aries* claims something to do with it, therfore it strengthens the heart and resisteth poyson, let such whose Stomachs are so weak, they cannot digest their meat or appetite it, take of *Mustard* Seed a dram, Cinnamon as much, and having beaten them to Pouder ad half as much Mastich in Pouder, and with Gum Arabick dissolved in Rose Water, make it up into Troches, of which they may take one of about half a dram weight an hour or two before meals, let old men and women make much of this medicine, and they will either give me thanks, or manifest ingratitude.

Hedg-Mustard.

Description.

THis groweth up usually but with one blackish green Stalk, tongh, easie to bend but not break, branched into diverse parts, and somtimes with divers Stalks set full of Branches, whereon grow long, rough, or hard rugged Leavs, very much torn and cut on the edges into many parts, some bigger, and some lesser, of a dirty green colour: The Flowers are smal and yellow, that grow at the tops of the Branches, in long Spikes, flowring by degrees, so that continuing long in Flower the stalks will have smal round Cods at the bottom, growing upright and close to the Stalk, while the top Flowers yet shew themselvs; in which are contained smal yellow Seed, sharp and strong, as the Herb is also: The Root groweth down slender and woody, yet abiding, and springing again every yeer.

Place.

This groweth frequently in this Land by the Waies and Hedg sides, and somtimes in the open Fields.

Time.

It flowreth most usually about *July*.

Vertues and Use.

It is singular good in all the Diseases of the Chest and Lungs, hoarceness of voice, and by the use of the Decoction therof for a little space, those have been recovered who had utterly lost their voice, and almost their Spirits also. The Juyce threof made into a Syrup, or licking Medicine with Honey or Sugar is no less effectual for the same purpose, and for all other Coughs, Weesings, and shortness of Breath. The same is also profitable for those that have the Jaundice, the Plurese, pains in the Back and Loyns, and for torments in the Belly or the Chollick, being also used in Clysters. The Seed is held to be a special Remedy against Poyson and Venom: It is singular good for the Sciatica, the Gout, and all Joynt-aches, Sores and Cankers in the Mouth, Throat, or behind the Ears; and no less for the hardness and Swelling of the Testicles, or of Womens Breasts.

Mars owns this Herb also.

Breast, Lungs, Hoarceness Cough, Shortness of breath, Jaundice, Pleuresie, Back, Loyns, Belly, Chollick, Poyson, Sciatica, Gout, Joynts, Fistulaes, ulcers, Cankers, Testicles, Womens Breasts.

Nep,

Nep, or Catmint.

Description.

THe common garden *Nep* shooteth forth hard four square Stalks with a hoarineſs on them, a yard high or more, full of Branches, bearing at every Joynt two broad Leavs, somwhat like Balm but longer pointed, softer, whiter, and more hoary, nicked about the edges, and of a strong sweet scent. The Flowers grow in large tufts at the tops of the Branches, and underneath them likewise on the Stalks many together, of a whitish Purple colour. The Roots are composed of many long strings or Fibres, fastning themselves strongly in the ground, and abide with green Leavs thereon all the Winter.

Place.

It is only nursed up in our Gardens.

Time.

And it flowreth in *July* or thereabouts.

Vertues and use

Terms provokes, Barrenneß Womb, Wind, Mother, Cough, Rhewms, Vertigo, Cramp, Cold ach, Difficulty of breath, Bruiſes, Hemorrhoids, Scabby Heads.

Nep is generally used for Women to procure their Courses, being taken inwardly or outwardly, either alone or with other convenient Herbs in a decoction to bath them, or sit over the hot fumes thereof, and by the frequent use thereof it taketh away barrenness, and the wind and pains of the Mother. It is also used in pains of the Head coming of any cold cauſ, as Catarrh's, Rhewms, and for swimming and giddineſs thereof, and is of especial use for the windineſs of the Stomach and Belly. It is effectual for any Cramps or cold aches to dissolve the cold and wind that afflicteth the place, and is used for Colds, Coughs, and shortneſs of breath. The Juyce thereof drunk in Wine is profitable for those that are bruised by any accident. The green Herb bruised and applied to the Fundament, and lying there two or three hours, easeth the pains of the Piles. The Juyce also being made up into an Oyntment, is effectual for the same purpose: The head washed with a Decoction thereof, it taketh away Scabs; and may be effectual for other parts of the Body also.

It is an Herb of *Venus*.

Nettles.

THese are so well known that they need no Description at all, they may be found by the feeling in the darkest night.

Vertues and Use.

The Roots or Leavs boyled or the Juyce of either of them, or both, made into an Electuary with Honey or Sugar, is a safe and sure Medicine to open the Pipes and passages of the Lungs, which is the cauſ of wheesing and shortneſs of breath, and helpeth to expectorate tough Flegm, as also to raise the impostumated Pleureſie, and spend it by spitting; The same helpeth the swelling of the Almonds of the Throat, the Mouth and Throat being gargled therewith: The Juyce is also effectual to settle the Pallate of the Mouth in its place, and to heal and temper the Inflamations and soreneſs of the Mouth and Throat. The Decoction of the Leavs in Wine being drunk is singular good to provoke Womens Courses, and settle the suffocation or strangling of the Mother, and all other Diſeaſes thereof, as also applied outwardly with a little Mirrh. The same also, or the Seed provoketh Urine, and expelleth the Gravel and Stone in the Reins or Bladder often proved to be effectual in many that have taken it. The same killeth the Worms in Children, easeth pains in the sides, and dissolveth the windineſs in the Spleen, as also in the Body, although others think it only powerful to provoke Venery. The Juyce of the Leavs taken two or three daies together, staieth bleeding at the Mouth: The Seed being drunk is a Remedy against the stinging of Venemous Creatures, the biting of Mad Dogs The poysonful qualities of Hemlock, Henbane, Nightshade, Mandrake, or other such like Herbs that stupifie or dull the senses, as also the Lethargy, especially to use it outwardly to rub the Forehead and Temples in the Lethargy, and the places bitten or stung with Beasts, with a little Salt. The distilled water of the Herb is also effectual (although not so powerful) for the Diseases aforesaid, as for outward Wounds and Sores to wash them, and to clense the Skin from Morphew, Lepry, and other discolourings thereof: The Seed or Leaves bruised and put into the Nostrils, staieth the bleeding of them, and taketh away the Flesh growing in them called *Polipus*. The Juyce of the Leavs, or the Decoction of them, or of the Roots, is singular good to wash either old rotten and stinking sores, or Fistulaes and Gangrenes, and such as are fretting, eating, or corroding Scabs, Mainginess and Itch in any part of the Body, as also green Wounds by washing them therwith, or applying the green Herb bruised thereunto, yea although the Flesh were seperated from the Bones: The same applied to our wearied Members refresheth them, or to places that have been out of Joynt being first set again, strengthneth, drieth and comforteth them, as also those places troubled with Aches and Gouts, and the Defluxion of Humors upon the Joynts or Sinews, it easeth the pains, and drieth or dissolveth the

Lungs, wheeziug, shortneß of breath, Pleureſie, Almonds of the Ears, Ears, Throat, Mouth, Uvula, Terms provokes, Mother, Diſury, Gravel, Worms, Spleen, Bleeding, Venemous Beasts, Mad Dogs, Hemlock, Henbane, Night-shade, Mandrakes, Letharey, Morphew, Leproſie, Bleeeing, Polipus, ulcers, Fiſtulaes, Gangrenes Scabs, Itch, Wounds, wearineß, Disjunctures, Gout, Sciatica, Joynts.

Defluxions. An Ointment made of the Juyce, Oyl, and a little Wax, is singular good to rub cold and benummed Members. An handful of the Leavs of green Nettles, and another of Wallwort, or Danewort, bruised and applied simply of themselves to the Gout, Sciatica, or Joyntaches in any part hath been found to be an admirable help thereunto.

This also is an Herb *Mars* claims Dominion over, you know *Mars* is hot and dry, and you know as well that Winter is cold and moist; then you may know as well the reason why Nettle tops eaten in Spring consume the Flegmatick superfluities in the Body of man, that the coldness and moisture of Winter, hath left behind.

Nightshade.

Description.

COmmon *Nightshade* hath an upright, round, green, hollow stalk, about a Foot or half a yard high, bushing forth into many Branches, whereon grow many green Leavs, somwhat broad and pointed at the ends, soft and full of Juyce, somwhat like unto Bazil, but larger, and a little unevenly dented about the edges at the tops of the Stalks and Branches, come forth three or four or more white Flowers made of five smal pointed Leavs apiece, standing on a Stalk together, one above another with yellow pointels in the middle, composed of four or five yellow threds set together which afterwards turn into so many pendulous green Berries of the bigness of smal Pease, full of green Juyce, and smal whitish round flat Seed lying within it. The Root is white and a little woody when it hath given Flower and Fruit with many smal Fibres at it; The whol Plant is of a wateriſh insipide tast, but the Juyce within the Berries is somwhat viscuous, and of a cooling and binding quality.

Place.

It groweth wild with us, under old Walls, and in Rubbish, the common paths, and sides of Hedges and Fields, as also in our Gardens here in *England* without any planting.

Time.

It dieth down every yeer, and ariseth again of its own sowing, but springeth not until the latter end of *April* at the soonest.

Vertues and Use.

Inflamations, This Common *Nightshade* is wholly used to cool all hot Inflamations either inwardly or outwardly, being no way dangerous to any that shall use it, as most of the rest of the Nightshades are; yet it must be used moderately: The distilled water only of the whol Herb is fittest and safest to be taken inwardly. The Juyce also clarified and taken being mingled with a little Vinegar, is good to wash the Mouth and Throat that is inflamed: But outwardly the Juyce of the Herb or Berries with Oyl of Roses, and a little Vinegar and Ceruse labored together in a leaden Morter, is very good to anoint all hot Inflamations in the Eyes; It doth also much good for the Shingles, Ringworms, and in all running fretting, and corroding Ulcers, and in moist Fistulaes, if the Juyce be made up with some Hens dung and applied thereto: A Pessary dipp'd in the Juyce, and put up into the Matrix stayeth the immoderate Flux of Womens Courses: A Cloth wet therein and applied to the Testicles or Cods, upon any Swelling therein giveth much eas, as also to the Gout that cometh of hot and sharp Humors. The Juyce dropped into the Ears, easeth pains therin that arise of heat or Inflamation. And *Pliny* saith, it is good for hot Swellings under the Throat.

Inflamations, Eyes, Shingles, Ringworms, Terms stops, Testicles, Gouts, Ears.

Have a care you mistake not the deadly *Nightshade* for this; if you know it not, you may let them both alone and take no harm, having other Medicines sufficient in the Book.

The Oak.

THis is so well known (the Timber thereof being the Glory and Safety of this Nation by Sea) that it needeth no Description.

Vertues and use.

The Leavs and Bark of the Oak, and the Acorn Cups, do bind and dry very much: The inner Bark of the Tree, and the thin Skin that covereth the Acorn, are most used to stay the spitting of Blood, and the Bloody Flux: The Decoction of that Bark and the Pouder of the Cups, to stay Vomitings, spitting of blood, bleeding at Mouth, or other Flux of Blood in man or woman, Lasks also, and the involuntary Flux of Natural Seed. The Acorns in Pouder taken in Wine, pravoketh Urine, and resisteth the Poyson of Venemous Creatures. The Decoction of Acorns and the Bark made in Milk and taken resisteth the force of Poysonous Herbs and Medicines, as also the Virulency of Cantharides, when one by eating them, hath his Bladder exulcerated, and pisseth Blood.

Dry, Bind, Spitting Blood, Bloody Flux, Vomiting, Venerious Acts, Disury, Poyson, Venemous Beasts, Cantharides, Ulcers of the Bladder, Mother, Wounds,

Hippocrates saith, he used the fumes of Oak Leavs to Women that were troubled with the strangling of the Mother; and *Galen* applied them being bruised to cure green Wounds. The Distilled water of the Oaken Buds before they break out into Leavs, is good to be used

either inward, or outwardly, to asswage Inflamations and stop all manner of Fluxes in man or woman: The same is singular good in Pestilential and hot burning Feavers, for it resisteth the force of the infection, and allayeth the heat; it cooleth the heat of the Liver, breaketh the Stone in the Kidneys, and staieth womens Courses: The Decoction of the Leavs worketh the same effects. The water that is found in the hollow places of old Oaks, is very effectual against any foul or spreading Scab.

Inflamation, Flux, Pestilences, Epidemical Diseases, Liver, Stone, Terms stops, Scabs.

The Distilled Water (or Decoction which is better) of the Leavs is one of the best Remedies that I know for the Whites in Women.

Jupiter owns the Tree.

Oats.

THese are also so well known that they need no Description.

Vertues and Use.

Oats fryed with Bay-Salt, and applied to the sides, takes away the pains of Stitches and Wind in the sides or Belly: A Pultis made of the Meal of Oats, and some Oyl of Bays put thereto, helpeth the Itch, and the Leprosie, as also the Fistulaes of the Fundament, and dissolveth hard Imposthumes. The Meal of Oats boyled with Vinegar and applied, taketh away Freckles and Spots in the Face, or other parts of the Body.

Stitch, wind, Itch, Leprosie, Fistulaes, Apostums, Freckles.

One-blade.

Description.

THis smal Plant never beareth more than one Leaf, but only when it riseth up with his Stalk, which thereon beareth another, and seldom more, which are of a blewish green colour, pointed, with many Ribs or Veins therein, like Plantane: At the top of the Stalk, grow many smal white Flowers, Star-fashion, smelling somwhat sweet; after which come smal reddish Berries when they are ripe. The Root is small of the bigness of a Rush, lying and creeping under the upper crust of the Earth, shooting forth in diverse places.

Place.

It groweth in moist, shadowy, and grassy places of Woods, in many places of this Land.

Time.

It Flowreth about *May*, and the Berries be ripe in *June*, and then quickly perisheth until the next yeer, it springeth from the same Root again.

Vertues and use.

Half a Dram, or a Dram at most in Pouder of the Roots hereof taken in Wine and Vinegar, of each equal parts, and the party laid presently to sweat thereupon, is held to be a Soveraign Remedy for those that are infected with the Plague, and have a Sore upon them, by expelling the poyson and infection, and defending the Heart and Spirits from danger. It is a singular good Wound Herb, and is therupon used with other the like effects in making Compound Balms for the curing of Wounds, be they fresh and green, or old and Malignant, and especially if the Sinews be hurt.

Pestilence, Poyson, Epidemical Diseases, Wounds, Sinews cut.

Onions.

THese are so well known that I need not spend time about writing a Description of them.

Vertues and Vices.

Onions are Flatulent or Windy, yet they do somwhat provoke appetite, encreas thirst, eas the Belly and Bowels; provoke Womens Courses, help the biting of a mad Dog, and of other Venemous Creatures, to be used with Honey and Rue, and encreaseth Sperm, especially the Seed of them: They also kill the Worms in Children if they drink the Water fasting wherein they have been steeped all night. Being roasted under the Embers and eaten with Honey, or Sugar and Oyl they much conduce to help an invetetate Cough, and expectorate the tough Flegm. The Juyce being snuffed up into the Nostrils, purgeth the Head and helpeth the Lethargy (yet the often eating of them is said to procure pains in the Head) It hath been held with divers Country people a good preservative against Infection to eat Onions fasting with Bread and Salt: as also to make a great Onion hollow, filling the place with good Triacle, and after to roast it well under the Embers, which after taking away of the outermost skin thereof, being beaten together, is a Soveraign Salve for either Plague-Sore, or any other putrid Ulcer. The Juyce of Onions is good for either scalding, or burning by fire, water, or Gunpouder, and used with Vinegar, taketh away all Blemishes, Spots, and Marks in the Skin, and dropped into the Ears, easeth the pains and noise of them. Applied also with Figs beaten together, helpeth to ripen and break Imposthumes and other Sores.

Mad Dogs, Worms, Cough, Lethargy, Epidemical Diseases.

Leeks are as like them in quality as a Pome-water is like an Apple: They are a Remedy against a Surfeit of Mushroms, being baked

under the Embers and taken; and being boyled and applied warm helpeth the Piles; In other things they have the same property as the Onions, although not so effectual.

Mars owns them, and they have gotten this quality, to draw any corruption to them, for if you pill one and lay him upon a Dunghil, you shall find him rotten in half a day, by drawing putrifaction to it, then being bruised and applied to a Plague-Sore 'tis very probable 'twill do the like.

Orpine.

Description.

COmmon *Orpine* riseth up with diverse round brittle Stalks, thick set with fat and fleshy Leavs without any order, and little or nothing dented about the edges, of a pale green colour; The Flowers are white or whitish growing in tufts, after which come small chaffy Husks, with Seed like dust in them. The Roots are diverse thick, round white tuberous clogs; and the Plant groweth not so big in some places as in others where it is found.

Place.

It is frequent almost in every Country of this Land, and is cherished in Gardens with us, where it groweth greater than that which is wild, and groweth in the shadowy sides of Fields and Woods.

Time.

It Flowreth about *July* and the Seed is ripe in *August*.

Vertues and Use.

Excoriation of Bowels, Phtisick, Womb, Bloody Flux, Wounds, Inflamation, Scalding, Burnings, Quinsie, Ruptures.

Orpine is seldom used in inward Medicines with us, although *Tragus* saith from experience in *Germany* that the distilled water thereof is profitable for gnawings or excoriations in the Stomach or Bowels, and for Ulcers in the Lungs, Liver, or other inward parts, as also in the Matrix, and helpeth all those Diseases, being drunk for certain daies together: And that it stayeth the sharpness of Humors in the Bloody Flux, and other Fluxes in the Body, or in Wounds: The Root thereof also performeth the same effect. It is used outwardly to cool any heat or Inflamation upon any Hurt or Wound, and easeth the pains of them: as also to heal Scaldings or Burnings: The Juyce thereof beaten with some green Sallet Oyl, and anointed: The Leaf also bruised and laid to any green Wound in the Hands or Legs, doth heal them quickly; and being bound to the Throat, much helpeth the Quinsie, It helpeth also Ruptures and Burstiness.

If you please to make the Juyce into a Syrup with Honey or Sugar, you may safely take a spoonful or two at a time (let my Author say what he will) for a Quinsie, and you shall find the Medicine more pleasant, and the Cure more speedy, than if you took a Dogs-turd which is the Learned Colledges vulgar Cure.

The *Moon* owns the Herb, and he that knows but her Exaltation, knows what I say is true.

Parsley.

THis is so well known to be an Inhabitant in every Garden, that it is needless to write any Description of it. The vertues of it being many are as followeth.

Vertues and use.

Stomach, Disury, Terms provokes; Liver, Spleen, Falling-sickness, Stone, wind, Venemous Beasts, Cough, Sucking Children, Eyes, Womens Breasts, Curdled Milk, Black and blue marks Jaundice, Falling-sickness, Dropsie,

It is very comfortable to the Stomach, and helpeth to provoke Urine and Womens Courses, and to break wind both in the Stomach and Bowels, and doth a little open the Body, but the Root much more, and openeth Obstructions both of the Liver and Spleen, and is therfore accounted one of the five opening Roots; *Galen* commendeth it against the Falling-sickness, and to provoke Urine mightily, especially if the Roots be boyled and eaten like Parsnips. The Seed is effectual to provoke Urine and Womens Courses, to expel wind, to break the Stone, and eas the pains and torments thereof, or of any other part in the Body occasioned by Wind. It is also effectual against the Venom of any poysonfull Creature, and the danger that cometh to them that have taken Litharge, and is good against the Cough. The distilled water of *Parsley* is a familiar Medicine with Nurses to give their Children when they are troubled with wind in the Stomach or Belly, which they call the frets, and is also much available to them that are of greater yeers. The Leavs of Parsley laid to the Eyes that are inflamed with heat or swoln, doth much help them, if it be used with Bread or Meal; and being fryed with Butter and applied to Womens Breasts that are hard through the curdling of their Milk, it abateth the hardness quickly, and also it taketh away black and blue marks coming of Bruises or Falls. The Juyce thereof dropped into the Ears with a little Wine easeth the pains. *Tragus* setteth down an excellent Medicine to help the Jaundice and Falling-sickness, the Dropsie, and Stone in the Kidneys, in this manner: Take of the Seeds of *Parsley*, *Fennel*, *Annis*, and *Caraways* of each an ounce; of the Roots of *Parsley*, *Burnet*, *Saxifrage*, and *Carawaes*, of each one ounce and an half, the Seeds be bruised, and the Roots washed and cut smal: Let them lie all night in steep in a pottle of white

white Wine, and in the morning be boyled in a cloſe earthen Veſſel until a third part or more be waſted, which being ſtrained and cleared: take four ounces thereof morning and evening firſt and laſt, abſtaining from drink after it for three hours: This openeth Obſtructions of the Liver and Spleen, and expelleth the Dropſie and Jaundice by Urine.

Obſtructions of the Liver & Spleen.

Parſnip.

THe Garden kind hereof is ſo well known (the Root being commonly eaten) that I ſhal not trouble you with any Deſcription of it. But the wild kind being of more Phyſical uſe, I ſhall in this place deſcribe unto you.

Diſcription.

The wild *Parſnip* differeth little from the Garden kind, but groweth not ſo fair and large, nor hath ſo many Leavs; and the Root is ſhorter, more woody and not ſo fit to be eaten, and therefore the more Medicinable.

Place.

The name of the firſt ſheweth the place of its growth, *Viz.* In Gardens.

The other groweth wild in diverſ places, as in the Marſhes by *Rochester* and elſwhere, and flowreth in *July*; the Seed being ripe about the beginning of *Auguſt*, the ſecond yeer after the ſowing: for if they do flower the firſt yeer the Country people call them Madneps.

Vertues and uſe.

The Garden *Parſnep* nouriſheth much, and is good and wholſom Nouriſhment, but a little windy, whereby it is thought to procure bodily luſt: but it fatneth the Body much if much uſed. It is conducible to the Stomach and Reins, and provoketh Urine. But the wild *Parſnep* hath a cutting, attenuating, clenſing and opening quality therein: It reſiſteth and helpeth the bitings of Serpents, eaſeth pains and Stitches in the ſides, and diſſolveth wind both in the Stomach and Bowels, which is the Chollick, and provoketh Urine. The Root is often uſed, but the Seed much more.

Luſt provokes, Diſury, Clenſe, Open, Venemous Beaſts, Chollick, Diſury.

The wild being better than the tame ſhews Dame *Nature* is the beſt Phyſitian.

Cow-Parſnep.

Deſcription.

THis groweth with three or four large ſpread, winged, rough, Leavs, lying often on the Ground, or elſe raiſed a little from it, with long, round, hairy footſtalks under them, parted uſually into five deviſions, the two couples ſtanding each againſt other, and one at the end, and each Leaf being almoſt round, yet ſomwhat deeply cut in on the edges in ſome Leavs, and not ſo deep in others, of a whitiſh green colour, ſmelling ſomwhat ſtrongly: among which ariſeth up a round creſted hairy Stalk two or three foot high with a few Joynts and Leavs thereon, and branched at the top, where ſtand large Umbels of white, and ſomtimes reddiſh Flowers, and after them, flat, whitiſh, thin winged Seed, two alwaies joyned together. The Root is long and white with two or three long ſtrings growing down into the ground, ſmelling likewiſe ſtrongly, and unpleaſant.

Place.

It groweth in moiſt Meadows, and the borders and corners of Fields, and neer Ditches, generally through this Land.

Time.

It Flowreth in *July*, and Seedeth in *Auguſt*.

Vertues and Uſe.

The Seed hereof as *Galen* ſaith is of a ſharp and cutting quality, and is therefore a fit Medicine for the Cough and ſhortneſs of Breath, the Falling-ſickneſs and the Jaundice. The Root is available to all the purpoſes aforeſaid, and is alſo of great uſe to take away the hard ſkin that groweth on a Fiſtula, if it be but ſcraped upon it. The Seed hereof being drunk clenſeth the belly from tough Flegmatick matter therein: eaſeth them that are Liver-grown, and Womens paſſions of the Mother, as well being drunk as the ſmoke thereof received underneath, and likewiſe raiſeth ſuch as are fallen into a deep ſleep, or have the Lethargy, by burning it under their Noſe: The Seed and Root boyled in Oyl, and the Head rubbed therewith, helpeth not only thoſe that are fallen into a Frenzy, but alſo the Lethargy or Drowſie evil; and thoſe that have been long troubled with the Headach, if it be likewiſe uſed with Rue: It helpeth alſo the running Scab and the Shingles: The Juyce of the Flowers dropped into the Ears that run and are ful of matter, it clenſeth and healeth them.

Cough, Difficulty of breath, Falling-ſickneſs, Jaundice, Fiſtula, Flegm, Liver, Mother, Lethargy, Frenzy, Headach, Scabs, Shingles.

The Peach-tree.

Deſcription.

THe *Peach-tree* groweth not ſo great as the Apricock-tree, yet ſpreadeth Branches reaſonable well, from whence ſpring ſmaller reddiſh twigs, whereon are ſet long and narrow green Leavs dented about the edges. The Bloſſoms are greater than the Plum, and of a light Purple colour. The Fruit round, and ſomtimes as big as a reaſonable Pippin, others are ſmaller, as alſo differing in colours and

tasts, as russet, red, or yellow, wateriſh or firm, with a frieze or Cotton all over, with a cleft therein like an Apricock, and a rugged furrowed great Stone within it, and a bitter Kernel within the Stone: It sooner waxeth old, and decayeth, than the Apricock, by much.

Place.

They are nurſed up in Gardens and Orchards through this Land.

Time.

They Flower in the Spring, and Fructifie in *Autumn.*

Vertues and Use.

Worms, Open, Humors, Wounds, The Leavs of *Peaches* bruiſed and laid on the Belly killeth Worms; and ſo they do alſo being boyled in Ale and drunk, and open the Belly likewiſe; and being dried is a ſafe Medicine to diſcuſs Humors. The Pouder of them ſtrewed upon freſh bleeding Wounds, ſtayeth their bleeding and cloſeth them up. The Flowers ſteeped all night in a little Wine ſtanding warm, ſtrained forth in the morning and drunk faſting, doth gently open the Belly and move it downwards: A Syrup made of them as the Syrup of Roſes is made, worketh more forcibly than that of Roſes, for it provoketh Vomiting, and ſpendeth wateriſh and Hydropick Humors by the continuance thereof. The Flowers made into a Conſerve worketh the ſame effect. The Liquor that droppeth from the Tree being wounded, is given in the Decoction of Coltsfoot, to thoſe that are troubled with the Cough or ſhortneſs of breath, by adding thereto ſome ſweet Wine; and putting ſome Saffron alſo therein, it is good for thoſe that are hoarce or have loſt their voice; helpeth all defects of the Lungs, and thoſe that vomit or ſpit blood. Two drams thereof given in the Juyce of Lemmons or of Radiſh, is good for thoſe that are troubled with the Stone. The Kernels of the Stones do wonderfully eaſe the pains and wringings of the Belly through wind or ſharp Humors, and help to make an excellent Medicine for the Stone upon all occaſions, on this manner: Take fifty Kernels of Peach Stones, and one hundred of the Kernels of Cherry Stones, a handful of Elder Flowers, freſh or dried, and three pints of Muſcadine, ſet them in a cloſed pot into a bed of Horſe dung for ten daies, which after diſtill in Glaſs with a gentle fire, and keep it for your uſe; you may drink upon occaſion three or four ounces at a time. The Milk or Cream of theſe Kernels being drawn forth with ſome Vervain Water, and applied to the Forehead and Temples, doth much help to procure reſt and ſleep to ſick perſons wanting it. The Oyl drawn from the Kernels, the Temples being therewith anointed doth the like: The ſaid Oyl put into Clyſters eaſeth the pains of the wind Chollick, and anointed on the lower part of the Belly doth the like, and dropped into the Ears eaſeth the pains of them: The Juyce of the Leavs doth the like: being alſo anointed on the Forhead and Temples, it helpeth the Megrim and all other pains in the Head: If the Kernels be bruiſed and boyled in Vinegar until they become thick, and applied to the Head, it mervelouſly procure the Hair to grow again upon bald places or where it is too thin.

Dropſie, Cough, ſhortneſs of Breath, Vomiting, & ſpitting of Blood, Stone, wind, Chollick,

Watching,

Ears,

Baldneſs.

Lady *Venus* owns this Tree, and by it oppoſeth the ill effects of *Mars*, and indeed for Children and yong people, nothing is better to purge Choller, and the Jaundice, than the Leavs and Flowers of this Tree, being made into a Syrup or Conſerve, let ſuch as delight to pleaſe their luſt regard the Fruit, but ſuch as love their health and their Childrens, let them regard what I ſay, they may ſafely give two ſpoonfuls of the Syrup at a time, 'tis as gentle as *Venus* her ſelf.

The Pear-tree.

THeſe are ſo well known that they need no Deſcription.

Vertues and Use.

For their Phyſical uſe they are beſt diſcerned by their tasts: All the ſweet or luſhious ſorts whether manured or wild, do help to move the Belly downward more or leſs: Thoſe that are harſh and ſowr do on the contrary bind the Belly as much; and the Leavs do ſo alſo. Thoſe that are moiſt do in ſome ſort cool, but harſh or wild ſorts much more, and are very good in repelling Medicines: as if the wild ſorts be boyled with Muſhroms, it maketh them the leſs dangerous. The ſaid Pears boyled with a little Honey, helpeth much the oppreſſed Stomach, as al ſorts of them do, ſome more, ſome leſs; but the harſher ſorts do moſt cool and bind, ſerving well to be bound to green wounds to cool and ſtay the Blood, and heal up the wound without further trouble or Inflamation; as *Galen* ſaith he hath found by experience. And wild Pears do ſooner cloſe up the Lips of green Wounds than the others.

Muſhroms

Stomach,

Inflamations, Cool, Bind, Wounds.

Schola Salerni adviſeth to drink much Wine after Pears, or elſ (they ſay) they are as bad as poyſon, nay and they curſ the Tree for it too, but if a poor man find his Stomach oppreſſed by eating Pears 'tis but working hard and it will do as wel as drinking Wine. The Tree belongs to *Venus*, and ſo doth the Apple-tree.

Pellitory

Pellitory of the Wall.

Description.

THis riseth up with many brownish, red, tender and weak, clear, and almost transparent stalks about two foot high, upon which grow at the several Joynts, two Leavs somwhat broad and long, of a dark green colour, which afterwards turn brownish, smooth on the edges, but rough and hairy as the Stalks are also: At the Joynts with the Leavs from the middle of the stalks upwards, wher it spreadeth into some branches, stand many smal pale, purplish Flowers, in hairy rough Heads or Husks; after which come smal black and rough Seed, which will stick to any cloth or Garment that shall touch it. The Root is somwhat long with many smal Fibres thereat, of a dark reddish colour, which abideth the Winter, although the Stalks and Leavs perish and spring afresh every yeer.

Place.

It groweth wild generally through this Land, about the borders of Fields, and by the sides of Walls, and among Rubbish; It will endure well being brought into Gardens, and planted on the shady side, where it will spring of its own sowing.

Time.

It flowreth in *June* and *July*, and the Seed is ripe soon after.

Vertues and Use.

The dried Herb *Pellitory* made up into an Electuary with Honey, or the Juyce of the Herb, or the Decoction thereof made up with Sugar or Honey, is a singular Remedy for any old or dry Cough, the shortness of breath, and Wheesing in the Throat. Three ounces of the Juyce thereof taken at a time, doth wonderfully help stopping of the Urine, and to expel the Stone or Gravel in the Kidneys or Bladder; and is therfore usually put among other Herbs, used in Clisters to mitigate pains in the Back, Sides, or Bowels proceeding of wind, stopping of Urine, the Gravel or Stone as aforesaid: If the bruised Herb sprinkled with some Muskadine be warmed upon a Tile; or in a Dish upon a few quick coals in a Chafing-dish, and applied to the Belly, it worketh the same effect. The Decoction of the Herb being drunk, easeth pains of the Mother, and bringeth down Womens Courses; it also easeth those griefs that arise from Obstructions of the Liver, Spleen, and Reins: The same Decoction with a little Honey added thereto is good to gargle a sore Throat. The Juyce held a while in the Mouth, easeth pains in the Teeth. The distilled water of the Herb drunk with some Sugar worketh the same effects; and clenseth the Skin from Spots, Freckles, Purples, Wheals, Sunburn, Morphew, &c.

Old or dry Cough, Shortness of Breath, Stone and Gravel,

Mother, Womens Courses, Obstructions, Sore Throat, Teeth,

Freckles, Wheals, Sunburn, Morphew,

The Juyce dropped into the Ears easeth the noise in them, and taketh away the pricking and shooting pains therein: The same or the distilled Water, aswageth hot and swelling Impostumes, Burnings and Scaldings by fire or Water, as also all other hot Tumors and Inflamations, or breakings out of Heat, being bathed often with wet Cloathes dipped therein. The said Juyce made into a Liniment with Cerus and Oyl of Roses and anointed therewith, clenseth foul rotten Ulcers, and stayeth spreading or creeping Ulcers, and the running Scabs or Sores in Childrens Heads; and helpeth to stay falling of the Hair from off the Head. The said Oyntment, or the Herb applied to the Fundament openeth the Piles and easeth their pains; and being mixed with Goats Tallow, helpeth the Gout. The Juyce is very effectual to clens Fistulaes, and to heal them up safely; or the Herb it self bruised, and applied with a little Salt. It is likewise so effectual to heal any green Wound, that if it be bruised and bound thereto for three daies, you shall need no other Medicine to heal it further. A Pultis made hereof with Mallows, and boyled in Wine, with Wheat Bran, and Bean Flower, and some Oyl put thereto, and applied warm to any bruised Sinew, Tendon, or Muscle, doth in a very short time restore them to their strength, taking away the pains of the Bruises; and dissolveth the congealed Blood coming of Blows or Falls from high places.

Piles, Gout, Fistulaes, Green Wounds, Bruised, Tendon or Muscle.

The Juyce of *Pellitory of wall* clarified and boyled into a Syrup with Honey, and a spoonful of it drunk every morning by such as are subject to the Dropsie, if continuing that cours though but once a week, if ever they have the Dropsie, let them come but to me, and I will cure them *gratis*.

Peny-royal.

Description.

THis is so well known unto all (I mean the common kind) that it needeth no Description.

There is a greater kind than the ordinary sort found wild with us, which so abideth being brought into Gardens, and differeth not from it but only in the largeness of the Leavs and Stalks, in rising higher, and not creeping upon the ground so much. The Flowers whereof are Purple, growing in Rundles about the Stalk like the other.

Place.

The first which is common in Gardens,

groweth also in many moist and watery places of this Land.

The second is found wild in *Essex* in divers places by the High-way from *London* to *Colechester*, and thereabouts more abundantly than in other Countries, and is also planted in their Gardens in *Essex*.

Time.

They Flower in the latter end of Summer, about *August*.

Vertues and Use.

Dioscorides saith, That *Peny-royal* maketh thin, tough Flegm, warmeth the coldness of any part whereto it is apylied, and digesteth raw or corrupt matter: Being boyled & drunk, it provoketh Womens Courses and expelleth the dead Child and afterbirth, and staieth the disposition to Vomit, being taken in Water and Vinegar mingled together. And being mingled with Honey and Salt it avoideth Flegm out of the Lungs, and purgeth Melancholly by the Stool. Drunk with Wine it helpeth such as are bitten or stung with Venemous Beasts: and applied to the Nostrils with Vinegar, reviveth those that are fainting and swouning. Being dried and burnt it strengtheneth the Gums; It is helpful to those that are troubled with the Gout being applied of it self to the place until it wax red: and applied in a Plaister, it taketh away spots or marks in the Face: Applied with Salt, it profiteth those that are Splenetick or Liver-grown. The Decoction doth help the Itch, if washed therwith: Being put into Baths for Women to sit therein, it helpeth the Swelling and hardness of the Mother. The green Herb bruised and put into Vinegar cleanseth foul Ulcers, and taketh away the marks and bruises of blows about the Eyes, and all discolourings of the Face by fire, yea and the Leprosie, being drunk and outwardly applied: Boyled in Wine with Honey and Salt, it helpeth the Toothach. It helpeth the cold Griefs of the Joynts, taking away the pains, and warming the cold parts, being fast bound to the place after a bathing, or sweating in an hot house. *Pliny* addeth that *Penny-royal* and Mints together help faintings or swounings, being put into Vinegar, and put to the Nostrils to be smelled unto, or a little thereof put into the Mouth. It easeth the Headach, and the pains of the Breast and Belly, stayeth the gnawing of the Stomach, and inward pains of the Bowels; being drunk in Wine it provoketh Womens Courses, and expelleth the dead child and afterbirth: Being given in Wine it helpeth the Falling-sickness: Put into unwholsom or stinking Water that men must drink (as at Sea, and where other cannot be had) it maketh them the less hurtful: It helpeth Cramps or Convulsions of the Sinews being applied with Honey, Salt, and Vinegar. It is very effectual for the Cough, being boyled in Milk and drunk, and for Ulcers or Sores in the Mouth. *Mathiolus* saith, The Decoction thereof being drunk, helpeth the Jaundice and Dropsie, and all pains of the Head and Sinews that come of a cold cause, and that it helpeth to clear and quicken the Eye-sight. Applied to the Nostrils of those that have the Falling-sickness, or the Lethargy, or put into the Mouth, it helpeth them much, being bruised and with Vinegar applied. And applied with Barley Meal, it helpeth Burnings by fire, and put into the Ears, easeth the pains of them.

Tough Flegm, Terms provokes, Dead Child, & Afterbirth Vomiting, Melancholly, Venemous Beasts, Fainting and Swouning, Gums, Gout, Marks in the Face, Toothach, Pains in the Joynts, Headach, pains of the Belly & Breast, Falling-sickness, Stinking Water, Cramps & Convulsions, Sore Mouth, Jaundice, Dropsie, pains of the Head & Sinews, Eyesight, Lethargy, Burnings.

The Herb is under *Venus*.

Peony, Mas. & Femina

THE Male *Peony* riseth up with many browniish Stalks, whereon grow many fair green and sometimes reddish Leavs, one set against another upon a Stalk without any particular devision in the Leaf at all. The Flowers stand at the tops of the Stalks, consisting of five or six broad Leavs, of a fair purplish red colour, with many yellow threds in the middle standing about the Head, which after riseth to be the Seed Vessels, devided into two, three, or four rough crooked Pods like Horns, which being ful ripe, open, and turn themselves down one edge to another backward, shewing within them divers round, black shining Seed, having also many red or Crimson grains, intermixed with the black, whereby it maketh a very pretty shew. The Roots are great, thick, and long, spreading and running down reasonable deep in the Ground.

The ordinary Female *Peony* hath many Stalks and more Leavs on them than the Male: the Leavs not so large but nicked diversly on the edges, some with great and deep, others with smaller cuts and devisions, of a dark or dead green colour. The Flowers are of a strong heady scent, most usually smaller and of a more purple colour than the Male, with yellow thrums about the Head as the Male hath. The Seed Vessels are like Horns as in the Male, but smaller, the Seed also is black but less shining. The Roots consist of many thick and short tuberous clogs, fastned at the ends of long strings and all from the Head of the Root which is thick and short, and of the like scent with the Male.

Place and Time.

They grow in Gardens; and Flower usually about *May*.

Vertues and Use.

The Root of the Male *Peony* fresh gathered, hath been found by experience to cure the Falling-

Falling sickness,

Falling-sickness; but the surest way is (besides hanging it about the Neck, by which Children have been cured) to take the Root of the Male Peony washed clean and stamped somwhat smal, and lay it to infuse in Sack for twenty four Hours, at the least, after strain it, and take first and last, morning and evening a good draught for sundry daies together before and after a full Moon, and this will also cure older persons, if the Disease be not grown too old and past cure, especially if there be a due and orderly preparation of the Body, with Posset drink made of Betony &c. The Root is also effectual for Women that are not sufficiently clensed after Childbirth, and such as are troubled with the Mother; for which likewise the black Seed beaten to Pouder and given in Wine, is also available. The black Seed also taken before bed time, and in the morning, is very effectual for such as in their sleep are troubled with the Disease called *Ephialtes* or *Incubus*, but we do commonly cal it the Night-Mare; a disease which Melancholly persons are subject unto; It is also good against Melancholick Dreams. The Distilled water, or Syrup made of the Flowers, worketh the same effects that the Root and the Seed do, although more weakly. The Female is often used for the purposes aforesaid, by reason the Male is so scarce a Plant that it is possessed by few, and those great Lovers of Rarities in this kind.

Women not clensed in Childbirth; Mother, Ephialtes, or the Night-Mare, Melancholick Dreams.

It is an Herb of the *Sun*, and under the *Lyon*, Physitians say Male Peony Roots are best, but Dr. *Reason* told me, male Peony was best for men, and female Peony for women, and he desires to be judged by his brother Dr. *Experience*. The Roots are held to be of most Vertue, then the Seeds next the Flowers, and last of all the Leavs.

Pepperwort, or Dittander.

Description.

OUr common *Pepper-wort* sendeth forth somwhat long and broad Leavs, of a light blewish green colour, finely dented about the edges, and pointed at the ends, standing upon round hard Stalks three or four foot high, spreading many Branches on all sides, and having many smal white Flowers at the tops of them, after which follow small Seed in small Heads: The Root is slender running much under ground, and shooting up again in many places; and both Leavs and Root, are very hot and sharp of tast like Pepper, for which caus it took the name.

Place.

It groweth Naturally in many places of this Land, as at *Clare* in *Essex*, neer also unto *Exceter* in *Devonshire*, upon *Rochester* common in *Kent*; in *Lancashire* and diverse other places; but is usually kept in *Gardens*.

Time.

It Flowreth in the end of *June*, and in *July*.

Vertues and use.

Pliny and *Paulus Ægineta* say that *Pepperwort* is very effectual for the *Sciatica*, or any other Gout pain in the Joynts, or any other inveterate grief; the Leavs hereof to be bruised and mixed with old Hogs grease and applied to the place; and to continue thereon four hours in Men, and two hours in women, the place being afterwards bathed with Wine and Oyl mixed together, and then wrapped with Wool or Skins after they have sweat a little. It also amendeth the Deformities or discolourings of the Skin, and helpeth to take away Marks, Scars, and Scabs, or the foul marks of burning with fire or iron. The Juyce hereof is in some places used to be given in Ale to drink to women with child, to procure them a speedy delivery in Travail.

Sciatica, Gout, pains in the Joynts, Distolourings of the Skin, Marks & Scars by Burning, Speedy Delivery.

Here's another Martial Herb for you, make much of it.

Perwinkle.

Description.

THe common sort hereof hath many Branches trayling, or running upon the ground shooting out smal Fibres at the Joynts as it runneth, taking thereby hold in the ground and Rooteth in diverse places, At the Joynts of these Branches stand two small dark green shining Leavs, somwhat like Bay Leavs, but smaller, and with them come forth also the Flowers (one at a Joynt standing upon a tender Footstalk) being somwhat long and hollow, parted at the brims, somtimes into four somtimes five Leavs, the most ordinary sort are of a pale blue colour, some are pure white, and some of a dark reddish Purple colour. The Root is little bigger than a Rush, bushing in the ground, and creeping with his Branches far about, whereby it quickly possesseth a great compass, and is therfore most usually planted under Hedges, where it may have room to run.

Place.

Those with the pale blue, and those with the white Flowers grow in Woods and Orchards by the Hedg sides in diverse places of this Land. But those with the Purple Flowers in Gardens only.

Time.

They Flower in *March* and *April*.

Vertues and Uſe.

Stanch bleeding, Womens Courſes, Flux of the Belly.

The *Perwincle* is a great binder, ſtaying bleeding both at Mouth and Noſe, if ſome of the Leavs be chewed: The French uſe it to ſtay Womens Courſes. *Dioſcorides*, *Galen*, and *Ægineta* commend it againſt the Lask, and Fluxes of the Belly to be drunk in Wine.

Venus owns this Herb, and ſaith that the Leavs eaten by man and wife together, cauſeth love between them.

St. Peters-wort.

Name.

IF Superſtition had not been the Father of Tradition, as well as Ignorance the Mother of Devotion, this Herb as well as St. Johns wort had found ſome other name to be known by; but we may ſay of our Fore-fathers as St. *Paul* of the *Athenians*, I perceive that in many things you are too Superſtitious: Yet ſeing it is come to that paſs, that Cuſtom having gotten poſſeſſion pleads Preſcription for the name, I ſhall let it paſs, and come to the Deſcription of the Herb, which take as followeth.

Deſcription.

It miſeth up with ſquare upright Stalks for the moſt part, ſomwhat greater and higher than St. Johns wort (and good reaſon too, St. *Peter* being the greater Apoſtle (ask the Pope elſe) for though God would have the Saints equal, the Pope is of another Opinion) but brown in the ſame manner, having two Leavs at every Joynt, ſomwhat like, but larger than St. Johns wort, and a little rounder pointed with few or no Holes to be ſeen therein, and having ſomtimes ſome ſmaller Leavs riſing from the Boſom of the greater, and ſomtimes a little hairy alſo: At the tops of the Stalks ſtand many Starlike Flowers, with yellow threds in the middle very like thoſe of St. Johns wort, inſomuch that this is hardly diſcerned from it but only by the largeneſs of height, the Seed being alſo alike in both. The Root abideth long ſending forth new ſhoots every yeer.

Place.

It groweth in many Groves and ſmall low Woods, in diverſ places of this Land, as in *Kent*, *Huntington*, *Cambridg*, and *Nothampton ſhires*, as alſo neer water Courſes in other places.

Time.

It Flowreth in *June* and *July*, and the Seed is ripe in *Auguſt*.

Vertues and Uſe.

It is of the ſame property with St. Johns wort, but ſomwhat weak, and therefore more ſeldom uſed. Two drams of the Seed taken at a time in Honeyed water, purgeth Chollerick Humors (as ſaith *Dioſcorides*, *Pliny*, and *Galen*) and thereby helpeth thoſe that are troubled with the *Sciatica*: The Leavs are uſed as St. Johns wort, to help thoſe places of the Body that have been burnt with Fire.

Chollerick Humors, Sciatica, Burnings.

There is not a ſtraw to chuſe between this and St. Johns wort, only St. *Peter* muſt have it, leſt he ſhould lack Pot-herbs.

Pimpernel.

COmmon *Pimpernel* hath diverſe weak ſquare Stalks lying on the ground beſet all along with two ſmal and almoſt round Leavs at every Joynt one againſt another, very like Chickweed, but hath no Footſtalks, for the Leavs do as it were compaſs the Stalk: The Flowers ſtand ſingly each by themſelvs at them and the Stalks, conſiſting of five round ſmall pointed Leavs of a fine pale red colour, tending to an Orange, with ſo many threds in the middle, in whoſe places ſucceed, ſmooth round Heads, wherein is contained ſmal Seed. The Root is ſmal and fibrous periſhing every yeer.

Place.

It groweth every where almoſt, as well in the Meadows and Cornfields, as by the Way-ſides, and in Gardens ariſing of it ſelf.

Time.

It Flowreth from *May* unto *Auguſt*, and the Seed ripeneth in the mean time and falleth.

Vertues and Uſe.

This is of a cleanſing and attractive quality, whereby it draweth forth Thorns or Splinters, or other ſuch like things gotten into the Fleſh, and put up into the Noſtrils purgeth the Head; and *Galen* ſaith alſo they have a drying faculty, whereby they are good to ſoder the lips of Wounds, and to cleanſ foul Ulcers. The diſtilled Water or Juyce is much eſteemed by French Dames to cleanſe the Skin from any roughneſs, deformity, or diſcolouring thereof: Being boyled in Wine, and given to drink, it is a good Remedy againſt the Plague, and other Peſtilential Feavers, if the Party after taking it warm lie in his bed and ſweat for two hours after, and uſe the ſame twice at leaſt. It helpeth alſo all ſtingings and bitings of Venemous Beaſts or mad Dogs, being uſed inwardly and applied outwardly: The ſame alſo openeth the Obſtructions of the Liver, and is very available againſt the Infirmities of the Reins, it provoketh Urine, and helpeth to expel the Stone and Gravel out of the Kidneys and Bladder; and helpeth

Thorns or Splinters, purgeth the Head, Wounds & Ulcers, cleanſeth Face, Plague & Peſtilential Feavers, Venemous Beaſts, Mad Dogs biting, Obſtructions, Urine, Stone & Gravel,

Wounds & Ulcers, Clouds or Mists in the Eyes, Toothach, Hemorrhoids.

helpeth much in all inward Wounds and Ulcers. The Decoction or distilled Water is no less effectual to be applied to all Wounds that are fresh and green, or old filthy fretting and running Ulcers, which it very effectually cureth in short spaces. A little Honey mixed with the Juyce and dropped into the Eyes clenseth them from cloudy mists, or thick Films which grow over them and hinder the sight: It helpeth the Toothach being dropped into the Ear on the contrary side of the pain. It is also effectual to eas the pains of the Hemorrhoids or Piles.

Ground Pine, or Chamepitys.

Description.

Our common *Ground Pine* groweth low, seldom rising above an handbreadth high, shooting forth divers smal Branches, set with slender smal long narrow grayish or whitish Leavs somwhat hairy; and devided into three parts many times many bushing together at a Joynt, and somtimes some growing scatteredly upon the Stalks, smelling somwhat strong like unto Rozin; the Flowers are somwhat smal and of a pale yellow colour growing from the Joynts of the Stalks all along among the Leavs, after which come small, long, and round Husks: The Root is smal woody perishing every yeer.

Place.

It groweth more plentifully in *Kent* than in any other Country of this Land; as namely, in many places from on this side *Dartford*, along to *Southfleet*, *Cotham*, and *Rochester*, and upon *Chattam* down hard by the Beacon, and half a mile from *Rochester* in a Field nigh a Houf called *Selsey*.

Time.

It Flowreth and giveth Seed in the Summer Months.

Vertues and use.

Strangury, Obstructions, Mother, Womens, Courses, Dead Child and Afterbirth

The Decoction of Ground Pine drunk, doth wonderfully prevail against the Strangury or any inward pains arising from the Diseases of the Reins and Urine, and is especial good for all Obstructions of the Liver and Spleen and gently openeth the Body, for which purpose they were wont in former times to make Pills with the Pouder thereof, and the Purple Figs. It marveilously helpeth all the Diseases of the Mother used inwardly, or applied outwardly, procuring Womens Courses, and expelling the dead Child and afterbirth, yea it is so powerful upon those Feminine parts that it is utterly forbidden to Women with Child, in that it will caus abortment or delivery before the time: It is as effectual also in all pains and Diseases of the Joynts, as Gouts, Cramps, Palseys, Sciatica, and Aches; either the Decoction of the Herb in Wine taken inwardly, or applied outwardly, or both for some time together, for which purpose the Pills made with the Pouder of Ground Pine, and of Hermodactils with Venice Turpentine are very effectual. These Pills also are special good for those that have the Dropsie, to be continued for some time. The same is a special good help for the Jaundice. and for griping pains in the Joynts, Belly, or inward parts; It helpeth also all Diseases of the Brain proceeding of cold and Flegmatick Humors and Distillations, as also for the Falling-sickness. It is an especial Remedy for the Poyson of the Aconites of all sorts, and other poisonful Herbs, as also against the stinking of any Venemous Creature: It is a good Remedy for a cold Cough, especially in the beginning. For all this purposes aforesaid, the Herb being tunned up in new Drink and drunk is almost as effectual, but far more acceptable to weak and dainty Stomachs. The Distilled Water of the Herb hath the same effects, but more weakly. The Conserve of the Flowers doth the like, which *Mathiolus* much commendeth against the Palsey. The green Herb or the Decoction thereof being applied, dissolveth the hardness of Womens Breasts, and all other hard Swellings in any other part of the Body. The green Herb also applied, or the Juyce thereof with some Honey, not only clenseth putrid, stinking foul and Malignant Ulcers and Sores of all sorts, but healeth and sodereth up the lips of green Wounds in any part also.

Gouts, Cramps, Palseys, Sciatica, Aches &c. Dropsie, poyson of the Aconites, Venemous Creatures, Cold Cough Palsie, Hard Breasts, & hard Swellings, Ulcers & old Sores, Green Wounds.

Let Women forbear it if they be with Child, for it works violently upon the Fœminine part; and *Mars* owns it, I tell them but so.

Plantane.

This groweth so familiarly in Meadows and Fields, and by Pathways, and is so well known that it needeth no Description.

Time.

It is in its beauty about *June*, and the Seed ripeneth shortly after.

Vertues and Use.

Pains in the Guts, Distillation of Rhewm, Fluxes, & Woments Courses,

The Juyce of Plantane clarified and drunk for divers daies together, either of it self or in other drink prevaileth wonderfully against all torments or Excoriations in the Guts or Bowels, helpeth the distillations of Rhewm from the Head, and staieth all manner of Fluxes even Womens Courses when they flow too abundantly; It is good to stay spitting of

spitting Blood or Bleeding at Mouth, or Nose or of Wounds, phtisick, Consumption or Ulcers in the Lungs, Tertian Ague, Dropsie, & Falling-sickness, Toothach, pin and web in the Eyes, pains in the Ears, Inflamations, Burning or Scalding, Hollow Ulcers, Cankers, and sore Mouth, or privy parts, Piles, pains of the Head, Lunacy & phrensie, Biting of Serpents, or Mad Dogs, Hot Gouts Bones out of Joynt, Worms in the Belly, or in ulcers, Scabs and Itch, Tetters, Ring-worms, shingles, & fretting sores, Wounds.

Blood, and all other Bleedings at the Mouth, or the making of foul or bloody water by reason of any Ulcer in the Reins or Bladder, and also stayeth the too free bleeding of Wounds. It is held an especial Remedy for those that are troubled with the Phtisick, or Consumption of the Lungs, or Ulcers in the Lungs, or Coughs that come of heat. The Decoction or Pouder of the Roots or Seed, is much more binding for all the purposes aforesaid than the Leavs. *Dioscorides* saith, That three Roots boyled in Wine and taken helpeth the Tertian Ague, and four the Quartan Ague: But (letting pass the number as Fabulous) I conceive the Decoction of diverse Roots may be effectual. The Herb (but especially the Seed) is held to be profitable against the Dropsie, the Falling-sickness, the yellow Jaundice, and stoppings of the Liver and Reins. The Roots of Plantane and Pellitory of Spain beaten to Pouder and put into hollow Teeth, taketh away the pains of them: The clarified Juyce or distilled Water dropped into the Eyes cooleth the Inflamations in them, and taketh away the Pin and Web; and dropped into the Ears easeth pains in them, and helpeth and restoreth the Hearing: The same also with Juyce of Houfleek is profitable against all Inflamations and breakings out in the Skin, and against Burnings or Scaldings by fire or Water. The Juyce or Decoction made either of it self or other things of like nature is of much use and good effect for old and hollow Ulcers that are hard to be cured, and for Cankers and Sores in the Mouth or privy parts of Man or Woman; and helpeth also the pains of the Piles in the Fundament. The Juyce mixed with Oyl of Roses, and the Temples and Forhead anointed therewith, easeth the pains of the Head proceeding from heat, and helpeth Lunatick, and Phrenetick persons very much; as also the bitings of Serpents or a Mad Dog: The same also is profitably applied to all hot Gouts in the Feet or Hands, especially in the beginning. It is also good to be applied where any Bone is out of Joynt to hinder Inflamations, Swellings and Pains that presently rise thereupon. The Pouder of the dried Leavs taken in drink, killeth Worms of the Belly, and boyled in Wine killeth Worms that breed in old and foul Ulcers. One part of Plantane Water, and two parts of the brine of pouder'd Beef boyled together and clarified, is a most sure Remedy to heal all spreading Scabs and Itch in the Head or Body, all manner of Tetters, Ringworms, the Shingles, and all other running and fretting Sores. Briefly the Plantanes are singular good Wound Herbs to heal fresh, or old Wounds and Sores either inward or outward.

Its true *Myrsaldus* and others yea almost all Astrologo-Physitians hold this to be an Herb of *Mars*, and they give a verisimile of a truth for it too, *Viz.* becaus it cures diseases of the Head and privities which are under the Houses of *Mars*, *Aries*, and *Scorpio*: All Diseases of the Head comming of heat are caused by *Mars*, for *Venus* is made of no such hot mettle, or at least deals in inferior parts. The truth is, it is under the command of *Venus*, and cures the Head by Antipathy to *Mars*, and the Privities by Sympathy to *Venus*, neither is there hardly a Martial Diseas but it cures, If I were to fortifie my Body against a Martial Diseas I would do it by this Herb as soon as by any, and may do it (it may be) when time shal serve.

Plums.

THese are so well known that they need no Description.

Vertues and Use.

As there is great diversity of the kinds, so is there in the operations of Plums, for some that are sweet, moisten the Stomach and make the Belly soluble; those that are sowr quench thirst more and bind the Belly; the moist and waterish do sooneſt corrupt in the Stomach, but the firm do nourish more and offend less: The dried Fruit sold by the Grocers under the name of *Damask Prunes*, do somwhat loosen the Belly, and being stewed are often used both in health and sickness, to rellish the Mouth and Stomach to procure Appetite, and a little to open the Body, allay Choller, and cool the Stomach: *Plum-tree* Leavs boyled in Wine, is good to wash and gargle the Mouth and Throat to dry the Flux of Rhewm coming to the Pallat, Gums, or Almonds of the Ears. The Gum of the Trees is good to break the Stone. The Gum or Leavs boyled in Vine-gar and applied, killeth Tetters and Ring-worms. *Mathiolus* saith, The Oyl pressed out of the Kernels of the Stones, as Oyl of Almonds is made, is good against the inflamed Hoarsness, Piles, the Tumors or Swellings of Ulcers, Hoarsness of the voice, roughness of the Tongue and Throat, and likewise the pains in the Ears. And that five ounces of the said Oyl taken with one ounce of Muscadine, driveth forth the Stone, and helpeth the Chollick.

Open the Belly, Quench Thirst, & pind the Belly, procure Appetite, Allay Choller, Cool the Stomach, Rhewm, Stone, Tetters, & Ring-worms, Piles, Ulcers, Hoarsness, and pains in the Ears Stone and Chollick.

All *Plums* are under *Venus*, and are like Women, some better, some worse.

Pollipody

Pollipody of the Oak. *Polypodium*

πολυπόδιον, q. d. cyrrhos instar polypi Rabeal.

Deſcription.

THis is a ſmal Herb conſiſting of nothing but Roots and Leavs: bearing neither Stalk, Flower, nor Seed as it is thought. It hath three or four Leavs riſing from the Root, every one ſingly by it ſelf, of about a hand length, which are winged, conſiſting of many ſmal narrow Leavs, cut into the middle rib ſtanding on each ſide of the Stalk, large below, and ſmaller up to the top, not dented or notched on the edges at all, as the Male Fern hath; of a ſad green colour and ſmooth on the upper ſide, but on the underſide ſomwhat rough, by reaſon of certain yellowiſh ſpots ſet thereon: The Root is ſmaller than ones little finger lying aſlope, or creeping along under the upper cruſt of the earth, browniſh on the outſide, and greeniſh within, of a ſweetiſh harſhneſs in taſt, ſet with certain rough Knags on each ſide thereof, having alſo much Moſſineſs or yellow hairineſs upon it, and ſome Fibres underneath it, whereby it is nouriſhed.

Place.

It groweth as well upon old rotten ſtumps, or trunks of Trees, as Oak, Beech, Hazel; Willow, or any other, as in the Woods under them; and upon old Mud Wals, as alſo in Moſſie, Stony, and gravelly places, neer unto Woods; That which groweth upon Oaks is accounted the beſt, but the quantity thereof is ſcarce ſufficient for the common uſe.

Time.

It being alwaies green, may be gathered for uſe at any time.

Vertues and uſe.

Dryeth & purgeth Humors, purgeth burnt Choller, Flegm, Melancholly, Quartan Agues, Spleen, Chollick,

Meſues (who is called the Phyſitians Evangeliſt, for the certainty of his Medicines, and the truth of his Opinions) ſaith, That it drieth up thin Humors, digeſteth thick and tough, and purgeth burnt Choller, and eſpecially tough and thick Flegm, and thin Flegm alſo, even from the Joynts; and is therfore good for thoſe that are troubled with Melancholly, or Quartan Agues, eſpecially if it be taken in Whey, or Honeyed Water, or in Barley water, or the Broth of a Chicken with Epithimum, or with Beets and Mallows. It is alſo good for the hardneſs of the Spleen and for prickings or Stitches in the ſides, as alſo for the Chollick, ſome uſe to put to it ſome Fennel Seeds, or Annis Seeds or Ginger to correct that loathing it bringeth to the Stomach, which is more than needeth, it being a ſafe and gentle Medicine fit for al perſons at al ſeaſons, which daily experience confirmith; And an ounce of it may be given at a time in a Decoction, if there be not Sæna or ſome other ſtrong purger put with it. Adram or two of the Pouder of the dried Roots, taken faſting in a cup of Honeyed water, worketh gently, and for the purpoſes aforeſaid. The diſtilled water both of Roots and Leavs is much commended for the Quartan Ague, to be taken for many daies together, as alſo againſt Melancholly, or fearful or troubleſom ſleeps or Dreams, and with ſome Sugar Candy diſſolved therein, is good againſt the Cough, ſhortneſs of breath and Wheeſings, and thoſe diſtillations of thin Rhewm upon the Lungs, which cauſ Phtiſicks, and oftentimes Conſumptions. The freſh Roots beaten ſmal: or the Pouder of the dried Roots mixed with Honey and applied to any Member that is out of Joynt, doth much help it: Applied alſo to the Noſe cureth the Diſeaſ called *Polipus*, which is a piece of Fleſh growing therein which in time ſtoppeth the paſſage of breath through that Noſtril; And it helpeth thoſe clefts or Chops that come between the fingers or Toes.

Troublesom ſleeps, Cough, ſhortneſs of Breath, and wheesings, Lungs, phtiſick, Member, out of Joynt, pollipus or Diſeaſ in the Noſe, Chops in the Fingers or Toes.

And why I pray muſt *Pollipodium* of the Oak only be uſed, Gentle Colledg of Phyſitians, can you give me but a glimps of a reaſon for it? is it only becauſ it is deareſt? will you never leave your covetouſneſs till your lives leave you? The Truth is, that which grows upon the Earth is beſt ('tis an Herb of *Saturn* and he ſeldom climbs trees) to purge Melancholly, if the humor be otherwiſe, chuſe your Pollipodium accordingly.

vid guido 136.

The Poplar-Tree.

Populus a πολύς. multus q. ex eius varijs quibusdam pullos et arbores, ſaltem ſic dict. ὅτι πολλὰ παιδία τῷ ἀνέρι ἀγείρουσι Deſcription. q. ſobria eius quoque vento agitantur. pvor. trembles Eſp. an aſpen leaf.

THere are two ſorts of *Poplars* which are moſt familiar with us, *Viz.* The *Black*, and the *White*, both which I ſhall here deſcribe unto you.

The white *Poplar* groweth great and reaſonable high, covered with a thick ſmooth white Bark, eſpecially the Branches, having large Leavs cut into ſeveral deviſions almoſt like a Vine Leaf, but not of ſo deep a green on the upper ſide, and hoary white underneath, of a reaſonable good ſcent, the whol form repreſenting the Leaf of Coltsfoot. The Catkins which it bringeth forth before the Leavs, are long, and of a faint reddiſh colour, which fall away bearing ſeldom good Seed with them. The Wood hereof is ſmooth, ſoft, and white, very finely waved, whereby it is much eſteemed.

The Black *Poplar* groweth higher and ſtraiter than the White, with a grayiſh Bark bearing broad and green Leaves ſomwhat like Ivy

Leavs not cut in on the edges like the White, but whol and dented, ending in a point, and not white underneath, hanging by ſlender long Footſtalks, which with the Air are continually ſhaken like as the Aſpin Leavs are: The Catkins hereof are greater than of the White, compoſed of many round green Berries as it were ſet together in a long Cluſter, containing much downice matter, which being ripe is blown away with the wind, The clammy Buds hereof before they ſpread into Leavs, are gathered to make the *Unguentum Populeon*, and are of a yellowiſh green colour and ſmal, ſomwhat ſweet, but ſtrong. The Wood is ſmooth, tough, and white, and eaſie to be cloven: On both theſe Trees groweth a ſweet kind of Musk, which in former times was uſed to be put into ſweet Oyntments.

Place.

They grow in moiſt Woods and by water ſides in ſundry places of the Land, yet the white is not ſo frequent as the other.

Time.

Their time is likewiſe expreſſed before, The Catkins coming forth before the Leavs and ripen in the end of Summer.

Vertues and Uſe.

Sciatica, Strangury, pain in the Ears, Dull ſight, Gout, Falling-ſickneſs, Warts, Puſhes, & Wheals, Heat, & Inflamations, Dryeth Womens Milk.

The White *Poplar*, ſaith *Galen*, is of a clenſing property: The weight of one ounce in Pouder of the Bark thereof being drunk ſaith *Dioſcorides* is a Remedy for thoſe that are troubled with the Sciatica, or the Strangury: The Juyce of the Leavs dropped warm into the Ears eaſeth the pains in them: The yong clammy Buds or Eyes before they break out into Leavs, bruiſed, and a little Honey put to them, is a good Medicine for a dull Sight. The Black *Poplar* is held to be more cooling than the White, and therefore the Leavs bruiſed with Vinegar and applied, helpeth the Gout; The Seed drunk in Vinegar is held good againſt the Falling-ſickneſs. The Water that droppeth from the hollow places of this Tree, taketh away Warts, Puſhes, Wheals, and other the like breakings out in the Body. The yong black *Poplar* Buds, ſaith *Mathiolus*, are much uſed by Women to beautifie their hair, bruiſing them with freſh Butter and ſtraining them after they have been kept for ſome time in the Sun. The Oyntment called *Populeon*, which is made of this Poplar, is ſingular good for all heat, or Inflamation in any part of the Body, and tempereth the heat of Wounds: It is much uſed to dry up the Milk in Womens Breaſts, when they have weyned their Children.

Poppy.

Of this I ſhal deſcribe three kinds, The White and Black, of the Garden, and the Erratick, wild *Poppy*, or Corn Roſe.

Diſcription.

The white *Poppy* hath at firſt four or five whitiſh green Leavs lying upon the ground, which riſe with the Stalk, compaſſing it at the bottom of them, and are very large, much cut or torn in on the edges, and dented alſo beſides: The Stalk which is uſually four or five foot high, hath ſomtimes no Branches at the top, & uſually but two or three at moſt bearing every one but one Head, wrapped in a thin Skin, which boweth down before it be ready to blow, and then riſing and being broken, the Flower within it ſpreadeth it ſelf open, and conſiſteth of four very large White round Leavs, with many whitiſh round threds in the middle, ſet about a ſmall round green Head, having a Crown, or Star-like cover at the Head thereof, which growing ripe becometh as large as a great Apple, wherein are contained a great number of ſmal round Seed, in ſeveral partitions or deviſions next unto the ſhell, the middle thereof remaining hollow and empty. All the whol Plant, both Leavs, Stalks and Heads, while they are freſh, yong, and green, yield a Milk when they are broken, of an unpleaſant bitter taſt, almoſt ready to provoke caſting, and of a ſtrong heady ſmel, which being condenſate is called *Opium*. The Root is white, and woody, periſhing as ſoon as it hath given ripe Seed.

The Black Poppy little differeth from the former, until it beareth his Flower, which is ſomwhat leſs, and of a black Purpliſh colour, but without any purple ſpots in the bottom of the Leaf. The Head of Seed is much leſs than the former, and openeth it ſelf a little round about the top under the Crown, ſo that the Seed which is very black will fall out if one turn the Head thereof downwards.

The wild *Poppy*, or Corn Roſe, hath long and narrow Leavs very much cut in on the edges into many deviſions, of a light green colour, and ſomtimes hairy withal; The Stalk is blackiſh and hairy alſo, but not ſo tall as the Garden kinds, having ſome ſuch like Leavs thereon as grow below, parted into three or four Branches ſomtimes, whereon grow ſmal hairy Heads bowing down before the Skin break, wherein the Flower is incloſed, which when it is ful blown open, is of a fair yellowiſh red or crimſon colour, and in ſome much paler, without any ſpot in the bottom of the Leavs, having many black ſoft threds in the middle compaſſing a ſmal green Head, which when it

is

is ripe, is not bigger than ones little finger end, wherin is contained much black Seed, smaller by half than that of the Garden. The Root perisheth every yeer, and springeth again of its own sowing. Of this kind there is one lesser in all the parts thereof, and differeth in nothing else.

Place.

The Garden kinds do not naturally grow wild in any place, but are all sown in Gardens where they grow.

The Wild *Poppy*, or Corn Rose is plentiful enough, and many times too much in the Corn Fields of all Countries through this Land, and also upon Ditch Banks, and by Hedg sides: The smaller wild kind is also found in Corn Fields, and also in some other places, but not so plentiful as the former.

Time.

The Garden kinds are usually sown in the Spring, which then Flower about the end of *May*, and somwhat earlier, if they spring of their own sowing.

The Wild kinds Flower usually from *May* untill *July*, and the Seed of them is ripe soon after the Flowring.

Vertues and use.

Procure-sleep, Catarrhs, and defluxions of Rhewm stayeth, Hoarsneß, Flux of the Belly and Womens Courses, Inflamations and St. Anthonies Fire, paints in the Head, Phrensies, Toothach,

The Garden *Poppy* Heads with Seeds made into a Syrup, is frequently and to good effect used to procure rest and sleep in the sick and weak, and to stay Catarrh's and Defluxions of hot thin Rhewms from the Head into the Stomach, and upon the Lungs, causing a continual Cough, the Fore-runner of a Consumption: It helpeth also Hoarsnes of the Throat, and when one hath lost their voice, which the Oyl of the Seed doth likewise. The black Seed boyled in Wine and drunk, is said also to stay the Flux of the Belly and Womens Courses. The empty shels of the Poppy Heads are usually boyled in water and given to procure rest and sleep; so do the Leavs in the same manner; as also if the Head and Temples be bathed with the Decoction warm, or with the Oyl of Poppies, the green Leaves or Heads bruised and applied with a little Vinegar, or made into a Pultis with Barley Meal, or Hogs Greas, it cooleth and tempereth al Inflamations, as also the Diseas called St. Anthonies Fire. It is generally used in Treacle and Methridate, and in all other Medicines that are made to procure rest and sleep, and to eas pains in the Head as well as in other parts; It is also used to cool Inflamations, Agues, or Phrensies, and to stay Defluxions which caus a Cough or Consumption, and also other Fluxes of the Belly, or Womens Courses; It is also put into hollow Teeth to eas the pain, and hath been found by experience to eas the pain of the Gout.

Falling-sickneß,

The Wild Poppy, or Corn Rose (as *Mathiolus* saith) is good to prevent the Falling-sickness. The Syrup made with the Flowers is with good effect given to those that have the Plurese; and the dried Flowers also, either boyled in water, or made into Pouder and drunk either in the Distilled Water of them, or in some other Drink worketh the like effect. The Distilled Water of the Flowers, is held to be of much good use against Surfets, being drunk evening and morning; It is also more cooling than any of the other Poppies, and therefore cannot but be as effectual in hot Agues, Phrensies, and other Inflamations either inward or outward, the Syrup or Water to be used therein, or the green Leavs used outwardly, either in an Oyntment, as it is in *Populeon*, a cooling Oyntment, or any other waies applied. *Galen* saith the Seed is dangerous to be used inwardly.

Pluriſie, Surfets, Agues and Inflamations.

The Herb is *Lunar*, and of the Juyce of it is made *Opium*, only for lucre of Money they cheat you, and tell you 'tis a kind of Tear, or some such like thing that drops from Poppies when they weep, and that is some where beyond the Sea, I know not where, beyond the *Moon*.

Purslane.

THE Garden Purslane (being used as a Sallet Herb) is so well known that it needeth no Description; I shal therefore only speak of its Vertues, as followeth.

Vertues and use. It is good to cool any heat in the Liver, Blood, Reins, and Stomach, and in hot Agues, nothing better; It stayeth hot and Chollerick Fluxes of the Belly, Womens Courses, the Whites, and Gonorrhea, or running of the Reins, the Distillations from the Head, and pains therein proceeding of heat, want of sleep, or the Phrensie. The Seed is more effectual than the Herb, and is of singular good use to cool the heat and sharpnes of Urine, and the outragious Lust of the Body, Venerious Dreams, and the like, insomuch that the overfrequent use hereof, extinguisheth the Heat and Vertue of Natural Procreation. The Seed bruised and boyled in Wine and given to Children, expelleth the Worms. The Juyce of the Herb is held as effectual to all the purposes aforesaid, as also to stay Vomitings; and taken with some Sugar or Honey, helpeth an old and dry Cough, shortnes of Breath, and the Phtisick, and stayeth immoderate Thirst. The Distilled water of the Herb is used by many (as the more pleasing) with a little Sugar, to work the same effects. The Juyce also is singular good in the Inflamations and Ulcers of the secret parts in man or woman, as also of the Bowels and Hemorrhoids, when they are Ulcerous, or Excoriations

Cooleth heat of Blood in hot Agues, Chollerick Fluxes, Womens Courses, the Whites & Genorrhea, Distillations, Phrensie, Heat of Urine, Lust, and Venereous Dreams, Worms, Vomiting, old, dry Cough, Short Breath, & Phtisick, Ulcers, in the secret parts,

tions in them. The Herb bruised and applied to the Forehead and Temples, allayeth excessive heat therein, hindring rest and sleep; and applied to the Eyes taketh away the redness and Inflamation in them, and those other parts, where Pushes, Wheals, Pimples, St. Anthonies Fire and the like break forth, especially if a little Vinegar be put to it: And being laid to the Neck with as much of Galls and Linseed together, taketh away the pains therein, and the Crick in the Neck. The Juyce is used with Oyl of Roses for the said causes, or for Blastings by Lightning, and Burnings by Gun-Pouder, or for Womens sore Breasts, and to allay the heat in all other Sores or Hurts: applied also to the Navels of Children that stick forth, it helpeth them: It is also good for sore Mouths, and Gums that are swollen to fasten loos Teeth. *Camerarius* saith, That the distilled water used by some, took away the pain of their Teeth when all other Remedies failed, and that the thickned Juyce made in Pills with the Pouder of Gum Tragacanth, and Arabick, being taken prevaileth much to help those that make a bloody water. Applied to the Gout, it easeth pains thereof, and helpeth the hardness of Sinews if it come not of the Cramp, or a cold caus.

'Tis an Herb of the *Moon*. See Lettice.

Redness of the Eyes, and Inflamations, Crick, or pain in the Neck, Blastings by Lightning, Burning by Gun-pouder, Sore Breasts, Childrens Navils, Sore Mouths, & swollen Gums, Fastneth Teeth, Toothach, Bloody Urine, Gout, Cramp, & stiffness of the Sinews.

Primroses.

THese are so well known that they need no Description.

Of the Leavs of Primroses is made as fine a Salve to heal green Wounds as any is that I know: you shall be taught to make Salves of any Herb at the latter end of the Book, make this as you are taught there, and do not (you that have any Ingenuity in you) see your poor Neighbors go with wounded Limbs when a Halfpenny cost will heal them.

Privet.

Description.

OUr common Privet is carried up with many slender Branches, to a reasonable height and breadth, to cover Arbours, Bowrs, and Banquetting Houses, and brought, wrought, and cut into many forms, of Men, Horses, Birds, &c. which though at first supported, groweth afterwards strong of it self: It beareth long and narrow green Leavs by couples, and sweet smelling white Flowers in tufts at the ends of the Branches, which turn into smal black Berries that have a Purplish Juyce within them, and some Seeds that are flat on the one side, with a hole or dent therein.

Place.

It groweth in this Land in divers Woods.

Time.

Our *Privet* Flowreth in *June* and *July*; The Berries are ripe in *August* and *September*.

Vertues and Use.

It is little used in Physick with us in these times, more than in Lotions to wash Sores, and Sore Mouths, and to cool Inflamations and dry up Fluxes. Yet *Mathiolus* saith it serveth to all the uses for which *Ciprus* or the East *Privet* is appointed by *Dioscorides* and *Galen*. He further saith, That the Oyl that is made of the Flowers of *Privet* infused therin, and set in the Sun, is singular good for the Inflamations of Wounds, and for the Headach coming of an hot caus. There is a sweet water also distilled from the Flowers that is good for all those Diseases that need cooling and drying, and therefore helpeth all Fluxes of the Belly or Stomach. Bloody Fluxes, and Womens Courses, being either drunk or applied, as also for those that void Blood at their Mouth or at any other place, and for Distillations of Rhewms into the Eyes especially if it be used with *Tutiæ*.

Lotions to wash sore Mouths & Throats, Cool Inflamations, Dry Fluxes, Inflamation in Wounds, Headach, Fluxes, & Womens Courses, Voiding Blood, Rhewm in the Eyes.

Queen of the Meadows, Meadow-sweet, or Mead-sweet.

Description.

THe Stalks of this are reddish, rising to be three foot high, somtimes four or five foot, having at the Joynts thereof large winged Leavs, standing one above another at distances, consisting of many and somwhat broad Leavs, set on each side of a middle rib, being hard, rough, or rugged, crumpled much like to Elm Leavs, having also some smaller Leavs with them (as Agrimony hath) somewhat deeply dented about the edges, of a sad green colour on the upper side, and graish underneath, of a pretty sharp scent and tast, somwhat like unto Burnet, and a Leaf hereof put into a Cup of Claret Wine giveth also a fine relish to it: At the tops of the Stalks and Branches stand many tufts of small white Flowers, thrust thick together, which smel much sweeter than the Leavs: and in their places, being fallen, come crooked and cornered Seed; The Root is somwhat woody, and blackish on the outside and,

and browniſh within, with diverſe greater ſtrings, and leſſer Fibres ſet thereat, of a ſtrong ſcent, but nothing ſo pleaſant as the Flowers and Leavs and periſheth not, but abideth many yeers, ſhooting forth anew every Spring.

Place.

It groweth in moiſt Meadows, that lie much wet, or neer the Courſes of Water.

Time.

It Flowreth in ſome place or other all the three Summer Months, that is, *June*, *July*, and *Auguſt*, and their Seed is ripe quickly after.

Vertues and Uſe.

Bleedings, Fluxes, Vomitings Womens Courſes, and the Whites, Quartan Ague, Chollick, Opens the Belly, Old Ulcers healeth, Sore Mouths, or Secrets, Raiſe Bliſters, Inflamation in the Eyes.

It is uſed to ſtay all manner of Bleedings, Fluxes, Vomitings, and Womens Courſes, and alſo their Whites, It is ſaid to alter and take away the fits of Quartan Agues, and to make a merry heart, for which purpoſe ſome uſe the Flowers, and ſome the Leavs. It helpeth ſpeedily thoſe that are troubled with the Chollick, being boyled in Wine; and with a little Honey taken warm, it openeth the Belly: but boyled in red Wine and drunk it ſtayeth the Flux of the Belly. Being outwardly applied, it healeth old Ulcers that are Cankrous or eaten, or hollow and Fiſtulous, for which it is by many much commended, as alſo for the Sores in the Mouth or ſecret parts.

The Leavs when they are full grown being laid upon the Skin, will in a ſhort time raiſe Bliſters thereon, as *Tragus* ſaith. The water thereof helpeth the heat and Inflamation in the Eyes.

Venus claims dominion over the Herb.

The Quince-Tree.

Deſcription.

THe Ordinary *Quince-tree* groweth often to the height and bigneſs of a reaſonable Apple-tree, but more uſually lower and crooked with a rough Bark, ſpreading Arms and Branches far abroad. The Leavs are ſomwhat like thoſe of the Apple-tree, but thicker, harder, and fuller of Veins, and white on the under ſide, nor dented at all about the edges. The Flowers are large and white, ſomtimes daſh'd over with a Bluſh: The Fruit that followeth is yellow, being neer ripe, and covered with a white Freez or Cotton, thick ſet on the yonger, and growing leſs as they grow to be through ripe; bunched out often times in ſome places, ſome being liker an Apple and ſome a Pear, of a ſtrong heady ſcent, and not durable to keep, and is ſowr, harſh, and of an unpleaſant taſt to eat freſh, but being ſcalded, roaſted, baked, or preſerved, becometh more pleaſant.

Place and Time.

It beſt likes to grow neer Ponds and Waterſides, and is frequent through this Land; and Flowreth not until the Leavs be come forth. The Fruit is ripe in *September* or *October*.

Vertues and Uſe.

Fluxes, Lasks, &c. Provoketh Appetite, ſtayeth Vomiting, Fainting Spirits, Choller, Flegm, Poyſon, Womens Breaſts, Plague Sores, Preſerveth Hair.

Quinces when they are green, helps all ſorts of Fluxes in man or Woman, and Chollerick Lasks, Caſtings, and whatſoever needeth Aſtriction more than any way prepared by fire: Yet the Syrup of the Juyce, or the Conſerve, are much conducible, much of the binding quality being conſumed by the fire: If a little Vinegar be added, it ſtirreth up the languiſhing Appetite, and the Stomach given to caſting; Some Spices being added, it comforteth and ſtrengthneth the decayed and fainting Spirits, and helpeth the Liver oppreſſed; that it cannot perfect the digeſtion, and correcteth Choller and Flegm: If you would have them Purging, put Honey to them inſtead of Sugar; and if more Laxative, for Choller, Rubarb; for Flegm, Turbith; for watery Humors, Scammony, but if more forcibly to bind, uſe the unripe *Quinces* with Roſes, and Acacia, or Hypociſtis, and ſome torrefied Rubarb. To take of the crude Juyce of *Quinces*, is held a Preſervative againſt the force of deadly poyſon; for it hath been found moſt certain true, that the very ſmel of a *Quince* hath taken away all the ſtrength of the Poyſon of White Hellebore. If there be need of any outward binding and cooling of any hot Fluxes; The Oyl of *Quinces*, or other Medicines that may be made thereof are very available to anoint the Belly, or other parts therewith: It likewiſe ſtrengtheneth the Stomach and Belly, and the Sinews that are looſned by ſharp Humors falling on them, and reſtraineth immoderate ſweatings. The Muccilage taken from the Seeds of *Quinces* boyled a little in Water, is very good to cool the Heat and heal the Sore Breaſts of Women. The ſame with a little Sugar is good to lenefie the harſhneſs and hoarſneſs of the Throat, and roughneſs of the Tongue. The Cotton or Down of *Quinces* boyled and applied to Plague Sores, healeth them up; and laid as a Playſter made up with Wax, it bringeth hair to them that are bald, and keepeth it from falling if it be ready to ſhed.

Radish and Horse-Radish.

THe Garden *Radish* is so wel known that it needeth no Description.

Description.

The *Horse-Radish* hath his first Leavs that rise before Winter, about a foot and a half long, very much cut in or torn on the edges into many parts of a dark green colour, with a great Rib in the middle: After these have been up a while, others follow, which are greater, rougher, broader, and longer whol, and not devided as the first, but only somwhat roundly dented about the edges: The Stalk when it beareth Flowers (which is but seldom) is great rising up with some few lesser Leavs thereon to three or four foot high, spreading at the top many smal Branches of whitish Flowers, made of four Leavs apiece after which come smal Pods like those of Shepheards-Purs, but seldom with any Seed in them. The Root is great, long, white, and rugged shooting up divers Heads of Leavs, which may be parted for encreas, but it doth not creep within ground nor run above ground, and is of a strong sharp and bitter tast, almost like Mustard.

Place.

It is found wild in some places of this Land, but is chiefly planted in Gardens where it joyeth in a moist and shadowy place.

Time.

It Flowreth but seldom, but when it doth, it is in *July*.

Vertues and Use.

The Juyce of *Horse-Radish* given in drink is held to be very effectual for the Scurvy. It killeth the Worms in Children being drunk, and also laid upon the Belly. The Root bruised and laid to the place grieved with the Sciatica, Joynt-ach, or the hard Swellings of the Liver and Spleen doth wonderfully help them all. The Distilled water of the Herb and Roots is more familiar to be taken with a little Sugar for all the purposes aforesaid.

Scurvy, Worms, Sciatica, Liver, & Spleen,

Garden *Radishes* are in wantonness by the Gentry eaten as Sallet, but they breed but scurvy Humors in the Stomach, and corrupt the Blood, and then send for a Physitian as fast as you can, this is one caus, makes the owners of such nice Pallats so unhealthful, yet for such as are troubled with the Gravel, Stone, or stoppage of Urine, they are good Physick if the Body be strong that takes them, you may make the Juyce of the Roots into a Syrup if you pleas for that use, they purge by Urine exceedingly.

Stone, Disury.

I know not what Planet they are under, I think none of all the Seven will own them.

Jacobæa. Ragwort.

Description.

THe greater common Ragwort hath many large and long dark green Leavs lying on the ground, very much rent and torn on the sides into many pieces, from among which rise up somtimes but one, and somtimes two or three square or crested blackish or browniish Stalks three or four foot high, somtimes branched bearing diverse such like Leavs upon them at several distances unto the tops, where it brancheth forth into many Stalks bearing yellow Flowers, consisting of diverse Leaves set as a Pale or Border, with a dark yellow thrum in the middle, which do abide a great while, but at last are turned into Down, and with the smal blackish gray Seed are carried away with the wind. The Root is made of many Fibres, whereby it is firmly fastned into to the ground, and abideth many yeers.

There is another sort hereof different from the former only in this, That it riseth not so nigh; the Leavs are not so finely jagged, nor of so dark a green colour, but rather somwhat whitish, soft and woolly, and the Flowers usually paler.

Place.

They grow both of them wild in Pastures, and untilled grounds in many places, and oftentimes both of them in one Field.

Time.

They Flower in *June* and *July*, and the Seed is ripe in *August*.

Vertues and Use.

Ragwort, Clenseth, Digesteth, and Discusseth. The Decoction of the Herb to wash the Mouth or Throat that have Ulcers or Sores therein; and for Swellings, hardness, or Impostumations, for it throughly clenseth and healeth them; as also the Quinsie and the Kings Evil: It helpeth to stay Catarrhes, & Defluxions from the Head into the Eyes, Nose, or Lungs. The Juyce is found by experience to be singular good to heal green Wounds, and to clense and heal all old and filthy Ulcers in the Privities and in other parts of the Body; as also inward Wounds and Ulcers, and stayeth the Malignity of fretting or running Cankers and hollow Fistulaes, not suffering them to spread further. It is also much commended to help Aches and pains either in the Fleshy parts or in the Nervs and Sinews; as also the Sciatica, or pain of the Hips or Huckle-Bone, to bath the

Sore Mouth or Throat, Swellings and Imposthumes, Quinsie & Kings Evil, Catarrhs & Defluxions, Green Wounds & Ulcers in the privy Parts, Running Cankers, & hollow Fistulaes, Aches & pains, Sciatica.

places

places with the Decoction of the Herb, or to anoint them with an Oyntment made of the Herb bruised and boyled in old Hogs Suet, with some Mastich and Olibanum in Pouder, added unto it after it is strained forth.

In *Sussex* we call it *Ragweed*.

Rattle-grass.

OF this there are two kinds, which I shall speak of, *Viz.* The Red and yellow.

Description. crista galli

The common red *Rattle*, hath sundry reddish hollow Stalks, and sometimes green rising from the Root, lying for the most part on the ground, yet some growing more upright, with many smal reddish or greenish Leavs set on both sides of a middle Rib finely dented about the edges: The Flowers stand at the tops of the Stalks and Branches, of a fine purplish red colour, like smal gaping hoods, after which come flat blackish Seed in small Husks, which lying loose therein, will Rattle with shaking. The Root consists of two or three small whitish strings, with some fibres thereat.

The common Yellow *Rattle* hath seldom above one round green Stalk rising from the Root, about half a yard or two foot high, and but few Branches theron having two long and somwhat broad Leavs set at a Joynt, deeply cut in on the edges, resembling the Comb of a Cock, broadest next to the Stalk and smaller to the end: The Flowers grow at the tops of the Stalks with some shorter Leavs with them, hooded after the same manner that the others are, but of a fair yellow colour in most, or in some paler, and in some more white. The Seed is contained in large Husks, and being ripe will rattle or make a noise with lying loose in them. The Root is small and slender perishing every yeer.

Place.

They grow in our Meadows and Woods, generally through this Land.

Time.

They are in Flower from Midsummer until *August* be past sometimes.

Vertues and use

Fistulaes, & hollow Ulcers, The Red *Rattle* is accounted profitable to heal up Fistulaes, and hollow Ulcers and to stay the Flux of Humors to them, as also the abundance of *Womens Courses,* or any other Flux of Blood, being boyled in red Wine and drunk.

Fluxes, The Yellow *Rattle* or Cocks Comb is held to be good for those that are troubled with a *Cough,* Cough, or with Dimness of Sight, if the *Dim sight.* Herb being boyled with Beans, and some Honey put thereto, be drunk, or dropped into the Eyes. The whol Seed being put into the Eyes draweth forth any Skin, Dimness, or Film from the sight without trouble or pain.

Rest-Harrow, or Cam-moak.

Description.

THE common *Rest-Harrow* riseth up with diverse rough woody twigs, half a yard, or a yard high, set at the Joynts without order, with little roundish Leavs somtimes more than two or three at a place, of a dark green colour, without thorns while they are yong, but afterwards armed in sundry places with short and sharp Thorns. The Flowers come forth at the tops of the twigs and Branches whereof it is ful, fashioned like Peas, or Broom Blossoms, but lesser, flatter, and somwhat closer, of a faint purplish colour; after which come smal Pods, containing smal, flat, and round Seed: The Root is blackish on the outside and whitish within, very tough and hard to break when it is fresh and green, and as hard as an Horn when it is dried, thrusting down deep into the ground, and spreading likewise, every piece being apt to grow again if it be left in the ground.

Place.

It groweth in many places of this Land, as well in the Arable as wast ground.

Time.

It Flowreth about the beginning or middle of *July*, and the Seed is ripe in *August*.

Vertues and use.

Urine stopped, Stone, It is singular good to provoke Urine when it is stopped, and to break and drive forth the Stone, which the Pouder of the Bark of the Root taken in Wine performeth effectually. *Mathiolus* saith, the same helpeth the Disease called *Hiernia Carnosa*, the Fleshy Rupture by taking the said Pouder for some Months toge- *Fleshy Rupture,* ther constantly, and that it hath cured some which seemed incurable by any other means than by cutting or burning. The Decoction thereof made with some Vinegar and gargled in the Mouth, easeth the Toothach, especially *Toothach,* when it comes of Rhewm; and the said Decoction is very powerful to open Obstructions of the Liver and Spleen, and other parts. *Liver & Spleen Obstructed* A Distilled Water made in *Balneo Mariæ* with four pound of the Roots hereof first sliced smal, and afterwards steeped in a Gallon of *Canary* Wine, is singular good for all the purposes aforesaid and to clense the passages of the Urine. The Pouder of the said Root made into an Electuary or Lozenges with Sugar: as also the Bark of the fresh Roots boyled tender and afterwards beaten into a Conserve with Sugar, worketh the like effect. The Pouder of

Ulcers. the Roots strewed upon the Brims of Ulcers, or mixed with any other convenient thing and applied consumeth the hardness and causeth them to heal the better.

Rocket.

IN regard the garden *Rocket* is rather used as a Sallet Herb than to any Physical purposes, I shall omit it, and only speak of the common wild *Rocket*: The Description whereof take as followeth.

Description.

The common wild *Rocket*, hath longer and narrower Leavs much more devided into slender cuts and jags on both sides of the middle Rib, than the Garden kinds have, of a sad overworn green colour, from among which riseth up diverse stiff Stalks two or three foot high, somtimes set with the like Leavs but smaller, and smaller upwards, branched from the middle into diverse stiff Stalks, bearing sundry yellow Flowers on them made of four Leavs apiece, as the others are, which afterwards yield smal reddish Seed, in smal long Pods, of a more bitter and hot biting tast than the Garden kinds, as the Leavs are also.

Place.

It is found wild in diverse places of this Land.

Time.

It Flowreth about *June* and *July*, and the Seed is ripe in *August*.

Vertues and Use.

Increaseth Sperm & Venery, Helps Digestion, Provokes Urine, Biting of Serpents &c. Cough in Children, Increaseth Milk, Clenseth the Face, Scars, Blue spots, Marks of smal Pox.

The Wild *Rocket* is more strong and effectual to encreas Sperm and Venereous qualities, whereunto also the Seed is more effectual than the Garden kinds: It serveth also to help Digestion and provoketh Urine exceedingly. The Seed is used to cure the bitings of Serpents, the Scorpion, and the Shrew-Mouse, and other Poysons, and expelleth Worms and other noisom Creatures that breed in the Body. The Herb boyled or stewed, and some Sugar put thereto, helpeth the Cough in Children being taken often. The Seed also taken in drink taketh away the ill scent of the Armpits, encreaseth Milk in Nurses, and wasteth the Spleen. The Seed mixed with Honey, and used on the face, clenseth the Skin from Spots, Morphew and other discolourings therein: and used with Vinegar taketh away Freckles and redness in the Face or other parts, and with the Gall of an Ox, it amendeth foul Scars, black and blew Spots, and the marks of the smal Pox.

The Wild *Rockets* are forbidden to be used alone in regard their sharpness fumeth into the Head, causing ach and pain therein: and are no less hurtful to hot and Chollerick persons, for fear of inflaming their Blood, and therfore for such we may say, a little doth but a little harm. For angry *Mars* rules them, and he somtimes will be testy when he meets with Fools.

Winter Rocket, or Cresses.

Description.

Winter Rocket, or *Winter Cresses*, hath diverse somwhat large sad green Leavs lying upon the ground, torn or cut into diverse parts, somwhat like unto *Rocket*, or Turnep Leavs with smaller pieces next the bottom, and broad at the ends which so abide all Winter (if it spring up in *Autumn*, when it is used to be eaten) from among which riseth up diverse smal round Stalks full of branches, bearing many smal yellow Flowers of four Leavs apiece, after which come smal long Pods with reddish Seed in them: The Root is somwhat stringy, and perisheth every yeer after the Seed is ripe.

Place.

It groweth of its own accord in Gardens and Fields by the way sides in diverse places, and particularly in the next Pasture to the Conduit-Head behind *Grayes-Inne* that brings Water to Mr. *Lamb*'s Conduit in *Holbourn*.

Time.

It Flowreth in *May*, and Seedeth in *June*, and then perisheth.

Vertues and Use.

Strangury, Gravel & Stone, Scurvy, Wounds, Ulcers, & Sores.

This is profitable to provoke Urine, and helpeth the Strangury. and to expel Gravel and the Stone; It is also of good effect in the Scurvey: It is found by experience to be a singular good Wound Herb, to clense inward Wounds, the Juyce or Decoction being drunk, or outwardly applied to wash foul Ulcers and Sores, clensing them by sharpness, and hindring or abating the dead Flesh from growing therein, and healing them by the drying qualrty.

Roses.

I Hold it altogether needless to trouble the Reader with a Description of any of these, sith both the Garden *Roses*, and the Wild *Roses* of the Bryars are well enough known; Take therefore the Vertues of them as follo-

weth

weth: And firſt I ſhal begin with the Garden kinds.

Vertues and uſe.

The White and the Red *Roſes* are cooling and drying, yet the White is taken to exceed the Red in both thoſe properties, but is ſeldom uſed inwardly in any Medicine. The bitterneſs in the Roſes when they are freſh, eſpecially the Juyce purgeth Choller, and watery Humors, but being dried and that heat which cauſed the bitterneſs being conſumed, they have then a binding and aſtringent quality; Thoſe alſo that are not ful blown do both cool and bind more than thoſe that are full blown, and the White Roſes more than the Red. The Decoction of Red Roſes made with Wine and uſed, is very good for the Headach, and pains in the Eyes, Ears, Throat, and Gums, as alſo for the Fundament, the lower Bowels, and the Matrix, being bathed, or put into them. The ſame Decoction with the Roſes remaining in it is profitably applyed to the Region of the Heart to eaſe the Inflamation therin; as alſo St. Anthonies fire, and other Diſeaſes of the Stomach. Being dried and beaten to Pouder, and taken in ſteeled Wine or Water, it helpeth to ſtay Womens Courſes. The yellow threds in the middle of the red Roſes (wch are erroniouſly called the Roſe Seeds) being poudered and drunk in the diſtilled water of Quinces, ſtayeth the overflowing of Womens Courſes, and doth wonderfully ſtay the Defluxions of Rhewm upon the Gums and Teeth, preſerving them from corruption, and faſtning them if they be looſe, being waſhed and gargled therewith, and ſome Vinegar of Squils added thereto. The Heads with Seed being uſed in Pouder or in a Decoction, ſtayeth the Lask, and ſpitting of Blood. Red Roſes do ſtrengthen the Heart, the Stomack, and the Liver, and the retentive Faculties, they mitigate the pains that ariſe from Heat, aſſwage Inflamations, procure reſt and ſleep, ſtay both Whites and Reds in Women, the Gonorrhea, running of the Reins, and the Fluxes of the Belly. The Juyce of them doth purge and clenſ the Body from Choller and Flegm: The Husks of the Roſes with the Beards and Nails of the Roſes are binding and cooling, and the Diſtilled Water of either of them is good for the Heat and redneſs in the Eyes, and to ſtay and dry up the Rhewms and watering of them. Of the Red Roſes are uſually made many Compoſitions all ſerving to ſundry good uſes; *Viz.* Electuary of Roſes; Conſerve both moiſt and dry, which is more uſually called Sugar of Roſes; Syrup of dryed Roſes, and Honey of Roſes; The Cordial Pouder called *Diarbodon Abbatis*, and *Aromatica Roſarum*; The Diſtilled Water of Roſes, Vinegar of Roſes, Oyntment and Oyl of Roſes, and the Roſe Leavs dried, which although no Compoſition, yet of very great uſe and effect.

Choller, & watcriſh Humors, Headach, Pains in the Ears, Eyes, Throat & Gums, Fundament, Bowels, & Matrix. St Anthonies fire, ſtomach, Womens Courſes, Defluxions, faſneth Teeth, Lask & ſpitting of Blood, Heat & Inflamations, Reſt & ſleep, Whites & Reds in Women, Choller & Flegm, Redneſs & watering of the Eyes,

To write at large of every one of theſe would make my Book ſwel too big, it being ſufficient for a Volum by it ſelf to ſpeak fully of them: But briefly; The Electuary is purging, whereof two or three Drams taken by it ſelf in ſome convenient Liquor is a Purge ſufficient for a weak Conſtitution; but may be encreaſed to ſix drams according to the ſtrength of the Patient. It purgeth Choller without trouble, and is good in hot Feavers, and pains of the Head ariſing from hot Cholerick Humors, and heat in the Eyes, the Jaundice alſo, and Joynt Aches proceeding of hot Humors. The moiſt Conſerve is of much uſe, both binding and Cordial, for until it be about two years old it is more binding than Cordial, and after that, more Cordial than Binding: Some of the yonger Conſerve taken with *Methridatum* mixed together, is good for thoſe that are troubled with Diſtillations of Rhewm from the Brain to the Noſe, and Defluxions of Rhewm into the Eyes, as alſo for Fluxes, end Lasks of the Belly; and being mixed with the Pouder of Maſtick is very good for the Running of the Reins, and for other looſneſs of Humors in the Body. The old Conſerve mixed with *Aromaticum Roſarum* is a very good Cordial againſt Faintings, Swounings, Weakneſs, and Tremblings of the Heart, ſtrengthning both it, and a weak Stomach, helpeth digeſtion, ſtayeth caſting, and is a very good Preſervative in the time of Infection. The dry Conſerve which is called Sugar of Roſes, is a very good Cordial to ſtrenthen the Heart and Spirits; as alſo to ſtay Defluxions. The Syrup of dried Red Roſes ſtrengthneth a Stomack given to caſting, cooleth an overheated Liver and the Blood in Agues, comforteth the Heart and reſiſteth putrefaction and infection, and helpeth to ſtay Lasks and Fluxes. Honey of Roſes is much uſed in Gargles and Lotions to waſh Sores either in the Mouth, Throat, or other parts, both to clenſ and heal them, and to ſtay the Fluxes of Humors falling upon them; it is alſo uſed in Cliſters both to cool and clenſ. The Cordial Pouders called *Diarbodon Abbatis* and *Aromaticum Roſarum* do comfort and ſtrengthen the Heart and Stomach, procure an Appetite, help Digeſtion, ſtayeth Vomiting; and is very good for thoſe that have ſlippery Bowels to ſtrengthen them, and to dry up their moiſture. Red Roſe Water is of well known and familiar uſe in all occaſions (and better than Damask Roſe Water) being cooling and Cordial, refreſhing and quickning the weak and faint Spirits, uſed either in meats or broths, to waſh the Temples, or to ſmel to at the Noſe, or to ſmel the ſweet vapors therof out of a perfuming Pot or caſt on a hot Fire-ſhovel: It is alſo of much good uſe againſt the redneſs and Inflamations in the eyes to bath them therwith, and the Temples of

A Purge for Choller, Hot Feavers, Pains of the Head, Heat of the Eyes, Jaundice, & Joynt Aches, Diſtillations, & Defluxions of Rhewm, Fluxes, & Lasks, running of the Reins, Faintings, ſwounings & trembling of the Heart, Helpeth Digeſtion, Stayeth caſting, Infection, Cooleth the Liver & Blood, reſiſteth Putrefaction, & Infection, ſore Mouths, Throats, &c. Comfort the Heart & ſtomach, ſtay Vomiting, Faint Spirits, Redneſs of Eyes,

the Head alſo againſt pain and ach. for which purpoſe alſo Vinegar of Roſes is of much good uſe, and to procure reſt and ſleep, if ſome thereof and Roſewater together be uſed to ſmel unto, or the Noſe and Temples moiſtned therewith, but more uſually to moiſten a piece of Red Roſe Cake cut fit for the purpoſe, and heated between a double folded Cloth, with a little beaten Nutmeg and Poppy Seed ſtrewed on the ſide that muſt lie next to the Forehead & Temples, & ſo bound therto for al night. The Oyntment of Roſes is much uſed againſt heat & Inflamations in the Head, to anoint the forhead & temples, & being mixed with *Unguentum Populeon*, to procure reſt; as alſo it is uſed for the heat of the Liver, of the Back and Reins, and to cool and heal Puſhes, Wheals and other red Pimples riſing in the Face or other parts. Oyl of Roſes is not only uſed by it ſelf to coole any hot Swellings or Inflamations, and to bind and ſtay Fluxes of Humors unto Sores, but is alſo put into Oyntments and Plaiſters that are cooling and binding, and reſtraining the Flux of Humors. The dried Leavs of the Red Roſes are uſed both inward and outwardly, both cooling, binding, and Cordial, for with them are made both *Aromaticum Roſarum*, *Diarhodon Abbatis*, and *Saccharum Roſarum*, each of whoſe Properties are before declared. Roſe Leavs and Mints heated and applied outwardly to the Stomach, ſtayeth caſtings, and very much ſtrengthneth a weak Stomach; and applyed as a Fomentation to the Region of the Liver and Heart, doth much cool and temper them, and alſo ſerveth inſtead of a Roſe Cake (as is ſaid before) to quiet the over hot ſpirits and cauſe reſt and ſleep. The Syrup of Damask Roſes is both Simple and Compound, and made with Agrick. The Simple Solutive Syrup, is a familiar, ſafe, gentle, and eaſie Medicine, purging Choller, taken from one ounce to three or four; yet this is remarkable herein, That the diſtilled Water of this Syrup ſhould notably bind the Belly; The Syrup with Agrick is more ſtrong and effectual, for one ounce thereof by it ſelf will open the Body more than the other, and worketh as much on Flegm as Choller. The Compound Syrup is more forcible in working on Melancholick Humors, and available againſt the Lepry, Itch, Tetters, &c. and the French Diſeaſ: Alſo Honey of Roſes Solutive is made of the ſame infuſion that the Syrup is made of, and therefore worketh the ſame effect both in opening and purging, but is oftener given to Flegmatick than Chollerick perſons, and is more uſed in Clyſters than in Potions, as the Syrup made with Sugar is. The Conſerve and Preſerved Leavs of theſe Roſes are alſo operative, in gently opening the Belly. The Simple Water of the Damask Roſes is chiefly uſed for ſumes to ſweeten things, as the dried Leavs thereof to make ſweet Pouders, and fill ſweet Bags, and little uſe they are put to in Phyſick, although they have ſome purging quality; The wild Roſes alſo are few or none of them uſed in Phyſick, but yet are generally held to come neer the Nature of the Manured Roſes. The Fruit of the wild Bryar which are called Heps being throughly ripe and made into a Conſerve with Sugar beſides the pleaſantneſs of the taſt doth gently bind the Belly, and ſtay Deſluxions from the Head upon the Stomach, drying up the moiſture thereof, and helpeth digeſtion. The Pulp of the Heps dried unto a hard conſiſtence, like to the Juyce of Liquoris, or ſo dried that it may be made into Pouder and taken in drink ſtayeth ſpeedily the Whites in Women. The Bryar Ball is often uſed being made into Pouder and drunk to break the Stone, to provoke Urine when it is ſtopped, and to eaſe and help the Chollick; ſome appoint it to be burnt, and then taken for the ſame purpoſe. In the middle of theſe Balls are often found certain white Worms, which being dried and made into Pouder, and ſome of it drunk, is found by experience of many to kill and drie forth the Worms of the Belly.

Procure ſleep,

Heat of the Liver, Back & Reins, Puſhes, Wheals & Pimples, Fluxes of Humors,

Weak ſtomach,

Purge Choller,

Bind the Belly,

Melancholick, Humors, Lepry, Itch Tetters, French Pox,

Opens the Belly,

Bind the Belly, & ſtay Deſluxions,

Whites in Women, Stone, provoke Urine, Chollick,

Worms.

What a quarter have Authors made with Roſes, what a racket have they kept? I ſhall ad, Red Roſes are under *Jupiter*, Damask under *Venus*, and White under the *Moon*, and Province under the King of *France*.

Roſa Solis, *or* Sun-dew.

Deſcription.

THis hath diverſe ſmal round hollow Leavs, ſomwhat greeniſh, but full of certain red hairs, which makes them ſeem red, every one ſtanding upon its own Footſtalk, reddiſh hairy likewiſe. The Leavs are continualty moiſt in the hotteſt day, yea the hotter the Sun ſhines on them the moiſter they are, with a certain ſlimineſs that will rope (as we ſay) the ſmal hairs alwaies holding this moiſture: Among theſe Leavs riſe up ſmall ſlender ſtalks, reddeſh alſo, three or four fingers high, bearing diverſe ſmal white Knobs one above another which are the Flowers, after which in the Heads are certain ſmal Seeds. the Root is a few ſmall hairs.

Place.

It groweth uſually on Bogs, and in wet places, and ſomtimes in moiſt Woods.

Time.

It Flowreth in *June*, and then the Leavs are fitteſt to be gathered.

Vertues and uſe.

Roſa Solis is accounted good to help thoſe that have ſalt Rhewm diſtilling on their Lungs which breedeth a Conſumption, and therfore the

Diſtillations of Rhewm,

the Distilled water thereof in Wine is held fit and profitable for such to drink, which Water will be of a gold yellow colour: The same Water is held to be good for all other Diseases of the Lungs, as Phtisicks, Wheesing, shortness of Breath, or the Cough; as also to heal the Ulcers that happen in the Lungs, and it comforteth the Heart and fainting Spirits; The Leavs outwardly applied to the Skin will raise Blisters, which hath caused some to think it, dangerous to be taken inward; but there are other things which will also draw Blisters, yet nothing dangerous to be taken inwardly. There is an usual Drink made hereof with *Aqua vitæ* and Spices frequently, and without any offence or danger, but to good purpose used in qualms and passions of the Heart.

Phtisick, Wheesings, shortness of breath, Cough, Ulcers in the Lungs, Comfort the Heart, Raise Blisters. Passions of the Heart.

The *Sun* rules it, and 'tis under the Sign *Cancer*.

Rosemary.

OUr Garden *Rosemary* is so well known, that I need not here describe it.

It Flowreth in *April* and *May* with us, and sometimes again in *August*.

Vertues and Use.

It is an Herb of as great use with us in these daies, as any whatsoever, not only for Physical but Civil purposes. The Physical use of it (being my present Task) is very much, both for inward and outward Diseases; For by the warming and comforting heat thereof it helpeth all cold Diseases, both of the Head, Stomach, Liver, and Belly. The Decoction thereof in Wine helpeth the cold Distillations of Rhewm into the Eyes, and all other cold Diseases of the Head and Brain, as the Giddiness or swimming therein, Drowsiness, or Dulness of the mind and senses, like a stupidness, the dumb Palsey, or loss of speech, the Lethargy, and Falling-sickness, to be both drunk and the Temples bathed therewith. It helpeth the pains in the Gums and Teeth, by Rhewm falling into them, or by putrefaction causing an evil smel from them, or a stinking Breath. It helpeth a weak Memory, and quickneth the Senses. It is very comfortable to the Stomach in all the cold Griefs thereof, helping both retention of meat, and digestion, the Decoction or Pouder being taken in Wine: It is a Remedy for the windiness in the Stomach or Bowels, and expelleth it powerfully, as also Wind in the Spleen. It helpeth those that are Livergrown, by opening the Obstructions thereof. It helpeth dim Eyes, and procureth a cleer sight, the Flowers thereof being taken all the while it is Flowring, every morning fasting with bread and Salt. Both *Dioscorides* and *Galen* say, That if a Decoction be made thereof with Water and they that have the yellow Jaundice do exercise their Bodies presently after the taking thereof, it will certainly cure it: The Flowers and the Conserve made of them, is singular good to comfort the Heart, and to expel the contagion of the Pestilence; to burn the Herb in Houses and Chambers correcteth the Air in them: Both the Flowers and the Leavs are very profitable for Women that are troubled with the Whites, if they be daily taken. The dried Leavs shred smal and taken in a Pipe like as Tobacco is taken, helpeth those that have any Cough or Phtisick, or Consumption, by warming and drying the thin Distillations which cause those Diseases. The Leavs are much used in Bathings, and made into Oyntments or Oyls, is singular good to help cold benummed Joynts, Sinews, or Members. The Chimical Oyl drawn from the Leavs and Flowers, is a Soveraign help for all the Diseases aforesaid; to touch the Temples and Nostrils with two or three drops, for all the Diseases of the Head and Brains spoken of before; as also to take a drop two or three as the cause requireth for the inward griefs, yet must it be done with Descretion, for it is very quick and piercing, and therefore but a very little must be taken at a time. There is also another Oyl made by insolation in this manner: Take what quantity you will of the Flowers, and put them into a strong Glass close stopped, tie a fine linnen cloth over the Mouth, and turn the Mouth down into another strong Glass, which being set in the Sun, an Oyl will distil down into the lower Glass, to be preserved as precious for diverse uses, both inward and outward as a Sovereign Balm to heal the Diseases before mentioned, to cleer a dim sight, and to take away spots, marks and scars in the skin.

Cold Diseases, Rhewm, Swimming of the Head, Drowsiness, Stupidity, Dumb Palsey, Lethargy & Falling-sickness, Toothach, stinking breath, Weak Memory. Stomach, Retention of Meat, Wind, Liver-grown, Dim sight, Yellow Jaundice, Pestilence, Whites in Women, Cough, Phtisick, or Consumption, benummed Joynts, spots and scars in the Skin.

The *Sun* claims Privilege in it and 'tis under the Cœlestial *Ram*.

Rubarb, or Rhapontick.

DO not start, and say this grows you know not how far off; and then ask me, How it comes to pass that I bring it among our English Simples: for though the name may speak it Forreign yet it grows with us in *England*, and that frequent enough in our Gardens, and when you have throughly perused its Vertues, you will conclude it nothing inferior to that which is brought us out of *China*, & by that time this hath been as much used as that hath been, the name which the other

hath gotten will be eclipſed by the fame of this: Take therefore a Deſcription at large of it, as followeth.

Deſcription.

At the firſt appearing out of the ground when the Winter is paſt, it hath a great round browniſh head riſing from the middle or ſides of the Root, which openeth it ſelf into ſundry Leavs one after another, very much crumpled or folded together at the firſt, and browniſh, but afterward it ſpreadeth it ſelf and becometh ſmooth very large and almoſt round, every one ſtanding on a browniſh Stalk of the thickneſs of a mans Thumb, when they are grown to their fulneſs, and moſt of them two foot and more in length, eſpecially when they grow in any moiſt or good Ground; and the Stalk of the Leaf alſo from the bottom thereof to the Leaf it ſelf, being alſo two Foot, The breadth thereof from edg to edg in the broadeſt place, being alſo two foot, of a ſad or dark green colour, of a fine tart, or ſowriſh taſt, much more pleaſant than the Garden or Wood ſorrel. From among theſe riſeth up ſome but not every yeer, a ſtrong thick Stalk, not growing ſo high as the Patience or Garden Dock, with ſuch round Leavs as grow below, but ſmaller, at every Joynt up to the top, and among the Flowers which are white ſpreading forth into many Branches, and conſiſting of five or ſix ſmall white Leavs apiece, hardly to be diſcerned from the white threds in the middle, and ſeeming to be all threds, after which come browniſh three ſquare Seed like unto other Docks, but larger whereby it may be plainly known to be a Dock. The Root groweth in time to be very great, with diverſ and ſundry great ſpreading Branches from it, of a dark, browniſh, or reddiſh colour on the outſide, with a pale yellow skin under it which covereth the inner ſubſtance or Root, which rind and Skin being pared away, the Root appeareth of ſo freſh and lively a colour, with fleſh-colour'd Veins running through it, that the choiceſt of that *Rubarb* that is brought us from beyond the Seas cannot excel it: Which Root if it be dried carefully and as it ought (which muſt be in our Countrey by the gentle heat of a fire in regard the Sun is not hot enough here to do it, and every piece kept from touching one another) will hold his colour almoſt as well as when it is freſh; and hath been approved of and commended by thoſe who have oftentimes uſed them.

Place.

It groweth in Gardens, and Flowreth about the beginning or middle of *June*, and the Seed is ripe in *July*.

Time.

The Roots that are to be dried and kept all the yeer following, are not to be taken up before the Stalk and Leavs be quite withered and gone, and that is not until the middle or end of October; and if they be taken a little before the Leavs do ſpring, or when they are ſprung up, the Roots will not have half ſo good a colour in them.

I have given the precedence unto this, becauſ in vertues alſo it hath the preheminence; I come now to deſcribe unto you that which is called *Patience*, or *Monks Rubarb*; and next unto that, the great round Leav'd *Dock*, or *Baſtard Rubarb*; for the one of theſe may happily ſupply in the abſence of the other; being not much unlike in their Vertues, only one more powerful and efficacious than the other; And laſtly, ſhall ſhew you the Vertues of all the three Sorts.

Hippolapathum.

Garden Patience, or Monks Rubarb. Rol. 3. d.

Deſcription.

THis is a Dock, bearing the name of *Rubarb*, for ſome purging quality therein, and groweth up with large tall Stalks, ſet with ſomwhat broad and long fair green Leavs, not dented at all; The tops of the Stalks being devided into many ſmal Branches, bear reddiſh or purpliſh Flowers, and three ſquare Seed like unto other Docks. The Root is long, great and yellow like unto the wild Docks, but a little redder, and if it be a little dried ſheweth leſs ſtore of diſcoloured veins, than the next doth when it is dry.

Great round leav'd Dock, OR, Baſtard Rubarb.

Deſcription.

THis hath diverſ large, round, thin, yellowiſh green Leavs, riſing from the Root, a little waved about the edges, every one ſtanding on a reaſonable thick, and long browniſh Footſtalk; from among which, riſeth up a pretty big Stalk about two foot high, with ſome ſuch like Leavs growing thereon, but ſmaller. At the top whereof ſtand in a long Spike many ſmal browniſh Flowers, which turn into hard three ſquare ſhining brown Seed, like the Garden *Patience* before deſcribed. This Root groweth greater than that, with many Branches or great Fibres thereat, yellow on the outſide, and ſomwhat pale yellow within, with ſome diſcoloured veins like to the Rubarb which is firſt deſcribed, but much leſs than it, eſpecially when it is dry.

Place and Time.

Theſe alſo grow in Gardens, and Flower and Seed at or neer the ſame time that our true *Rubarb* doth, *Viz.* they Flower in *June*, and the Seed is ripe in *July*.

Vertues

Vertues and uſe

A dram of the dried Root of *Monks Rubarb*, with a ſcruple of Ginger made into Pouder and taken faſting in a draught or meſs of warm Broth, purgeth Choller and Flegm downward very gently, and ſafely without danger: The Seed thereof contrarily doth bind the Belly, and helpeth to ſtay any ſort of Lask or Bloody Flux. The diſtilled water thereof is very profitably uſed to heal Scabs, as alſo foul Ulcerous Sores, and to allay the Inflamations of them: The Juyce of the Leavs or Roots, or the Decoction of them in Vinegar is uſed as a moſt effectual Remedy to heal Scabs and running Sores.

Purge Choller & Flegm, ſtay Lasks and bloody Flux, Scabs & Ulcerous Sores, Running Sores,

The *Baſtard Rubarb* hath all the properties of the *Monks Rubarb*, but more effectual for both inward and outward Diſeaſes. The Decoction thereof with Vinegar dropped into the Ears, taketh away the pains: gargled in the Mouth, taketh away Toothach, and being drunk healeth the Jaundice. The Seed thereof taken eaſeth the gnawing and griping pains of the Stomach, and taketh away the loathing thereof unto Meat: The Root thereof helpeth the ruggedneſs of the Nails, and being boyled in Wine helpeth the Swellings of the Throat, commonly called the Kings evil, as alſo the Swellings of the Kernels of the Ears: It helpeth them that are troubled with the Stone; provoketh Urine, and helpeth the dimneſs of the Sight. The Roots of this *Baſtard Rubarb* are uſed in opening and purging Diet Drinks with other things, to open the Liver, and to cleanſe and cool the Blood.

Pains of the Ears, Toothach, Jaundice, pains of the Stomach & loathing of Meat, Kings Evil, Stone, Urine, Dim ſight, Liver & Blood, Choller & Flegm, Obſtructions, Jaundice,

The properties of that which is called the *Engliſh Rubarb*, are the ſame with the former, but much more effectual, and hath all the properties of the true *Indian Rubarb*, except the force in purging, wherein it is but of half the ſtrength thereof, and therfore a double quantity muſt be uſed: it likewiſe hath not that bitterneſs and aſtriction; in other things it worketh almoſt in an equal quality, which are theſe: It purgeth the Body of Choller and Flegm, being either taken of it ſelf, made into Pouder and drunk in a draught of white Wine, or ſteeped therein all night and taken faſting, or put among other Purgers, as ſhall be thought convenient, cleanſing the Stomach, Liver, and Blood, opening Obſtructions, and helping thoſe griefs that come thereof; as the Jaundice, Dropſie, ſwelling of the Spleen, Tertian and day Agues, and the pricking pain of the ſides, and alſo it ſtayeth ſpitting of Blood. The Pouder taken with Caſſia diſſolved, and a little waſh'd *Venice* Turpentine, cleanſeth the Reins and ſtrengthneth them afterwards, and is very effectual to ſtay the running of the Reins or Gonorrea. It is alſo given for the pains and ſwellings in the Head, for thoſe that are troubled with Melancholly, and helpeth the Sciatica, the Gout, and the Cramp. The Pouder of *Rubarb* taken with a little Mummia and Madder Roots in ſome red Wine, diſſolveth clotted Blood in the Body, hapning by any fall or bruiſe, and healeth burſtings and broken parts as well inward as outward: The Oyl likewiſe wherein it hath been boyled, worketh the like effects, being anointed. It is uſed to heal thoſe Ulcers that happen in the Eyes and Eyelids, being ſteeped and ſtrained; as alſo to aſſwage the Swellings and Inflamations; and applied with Honey, or boyled Wine, it taketh away all black and blue Spots or Marks that happen therein. Whey, or white Wine are the beſt Liquors to ſteep it in, and thereby it worketh more effectually in opening Obſtructions, and purging the Stomach and Liver. Many do uſe a little *Indian* Spicknard as the beſt Corrector thereof.

Cramp, Clotted Blood, Ulcers in the Eyes, or Eyelids, ſwellings & Inflamations, Black & blue ſpots, Purge the Liver & Stomach.

Mars claims Predominancy over all theſe wholſom Herbs, you cry out upon him for an infortune, when God created him for your good (only he is angry with Fools) what diſhonor is this, not to *Mars*, but to God Himſelf.

Meadow Rue.

Deſcription.

THis riſeth up with a yellow ſtringy Root, much ſpreading in the ground, and ſhooting forth new ſprouts round about, with many Herby green Stalks two foot high, creſted all the length of them, ſet with Joynts here and there, and many large Leavs on them as well as below, being devided into ſmaller Leavs, nicked or dented in the forepart of them, of a ſad green colour on the upperſide, and pale green underneath: Toward the top of the Stalk there ſhooteth forth diverſ ſhort Branches, on every one thereof there ſtand two, three, or four ſmal round Heads or Buttons, which breaking the skin that incloſeth them ſhew forth a tuft of pale greeniſh yellow threds, which falling away there comes in their places ſmall three cornre'd Cods, wherein is contained ſmal, long, and round Seed. The whol Plant hath a ſtrong unpleaſant ſcent.

Place.

It groweth in many places of this Land; in the Borders of moiſt Meadows, and by Ditch ſides.

Time.

It Flowreth about *July* or the beginning of *Auguſt*.

Vertues and Uſe.

Dioſcorides ſaith that this Herb bruiſed and applied perfectly healeth old Sores: and the diſtilled water of the Herb and Flowers doth the like. It is uſed by ſome among other Pot-

Old ſores,

herbs to open the Body and make it soluble; but the Roots washed clean, and boyled in Ale and drunk provoketh to the Stool more than the Leavs; but yet very gently. The Root boyled in Water, and the places of the Body most troubled with Vermine or Lice, washed therewith while it is warm, destroyeth them utterly. In *Italy* it is used against the Plague, and in *Saxony* against the Jaundice, as *Camerarius* saith.

Open the Body, Lice & Vermine, Plague, Jaundice.

Garden Rue. *Ruta*

THis is so well known, both by this name, and the Name *Herb of Grace*, that I shal not need to write you any further Description of it: But shall only shew you the Vertues of it as followeth.

Vertues and Use.

It provoketh Urine and Womens Courses, being taken either in Meat or Drink. The Seed thereof taken in Wine, is an Antidote against all dangerous Medicines or deadly Poysons. The Leavs taken either by themselves, or with Figs and Walnuts is called *Methridates* his Counter poyson, against the Plague and causeth all Venemous things to become harmless: Being often taken in Meat or Drink it abateth Venery, and destroyeth the ability to beget Children. A Decoction made thereof with some dried Dill Leavs and Flowers, easeth all pains and torments inwardly to be drunk, and outwardly to be applied warm to the place grieved. The same being drunk helpeth the pains both of the Chest and Sides, as also Coughs, hardness of breathing, the Inflamations of the Lungs, and the tormenting pains of the Sciatica, and the Joynts, being anointed or laid to the places, as also the shaking Fits of Agues, to take a draught before the Fit come: Being boyled or infused in Oyl it is good to help the wind Chollick, the hardness or windiness of the Mother, and fresh women from the strangling or suffocation thereof, if the Share and the Parts thereabouts be anointed therewith: It killeth and driveth forth the Worms of the Belly, if it be drunk after it is boyled in Wine to the half with a little Honey: It helpeth the Gout or pains in the Joynts of Hands, Feet, or Knees applied thereunto: and with Figs it helpeth the Dropsie being bathed therewith: being bruised and put into the Nostrils it staieth the Bleeding thereof. It helpeth the swelling of the Cods if they be bathed with a Decoction of Rue and Bay Leaves. It taketh away Wheals and Pimples if being bruised with a few Mittle Leavs, if it be made up with Wax, and applied: It cureth the Morphew and taketh away all sorts of Warts, if boyled in Wine with some Pepper and Nitre and the places rubbed therewith: and with Allum and Honey, helpeth the dry Scab or any Tetter or Ringworm: The Juyce thereof warmed in a Pomegranate Shel or Rind, and dropped into the Ears helpeth the pains of them. The Juyce of it and Fennel with a little Honey, and the Gall of a Cock put thereto, helpeth the dimness of the Eyesight. An Oyntment made of the Juyce therof with Oyl of Roses, Ceruss, and a little Vinegar, and anointed cureth St. Anthonies Fire, and all foul running Sores in the Head; and the stinking Ulcers of the Nose, or other parts. The Antidote used by *Methridates* every morning fasting to secure himself from any Poyson or Infection, was this. Take twenty Leavs of Rue, a little Salt, a couple of Walnuts, and a couple of Figs beaten together into a Mass with twenty Juniper Berries, which is the quantity appointed for every day. Another Electuary is made thus; Take of Nitre, Pepper, and Cummin Seed, of each equal Parts, of the Leaves of Rue clean picked, as much in weight as all the other three weighed, beat them well together, and put to as much Honey as will make it up into an Electuary; (but you must first steep your Cummin seed in Vinegar twenty four hours, and then dry it, or rather toast it in a hot Fire-shovel, or in an Oven) and it is a Remedy for the pains or griefs of the Chest or Stomach, of the Spleen, Belly or Sides, by Wind or Stitches; of the Liver by Obstructions, of the Reins and Bladder by the stopping of Urine, and helpeth also to extenuate fat corpulent Bodies.

Morphew & Warts, Scab, Tetter & Ring-worm, Pains of the Ears, Dimsight, St. Anthonies fire, Running Sores of the Head, Ulcers of the Nose, Antidote, pains of the Chest, Stomach, Spleen, Belly Obstructions,

What an Infamy is cast upon the Ashes of *Methridates* (or *Methradates*, as the *Augustanes* read his name) by unworthy people; they that deserve no good report themselves, love to give none to others, *Viz.* That that renowned King of *Pontus* fortified his Body by Poyson against Poyson (*He cast out Devils by Beelzebub the Prince of Devils*) what a sot is he that knows not if he had accustomed his Body to cold Poysons hot Poysons would have dispatch'd him, or the contrary if not, corrosions would have done it, the whol world is at this very time beholding to him for his Studies in Physick, and he that useth the quantity of but a Hazel Nut of that Recept every morning, to which his name is adjoyned shall to admiration preserve his Body in health, if he do but consider that Rue is an Herb of the *Sun* and under *Leo*; and gather it and the rest accordingly.

Rupture wort.

Description.

THis spreadeth very many threddy Branches round about upon the ground, about a span long, devided into many other smaller parts, full of small Joynts set very thick together, whereat come forth two very small Leavs of a fresh yellowish green colour branches and all, where groweth forth also a number of exceeding smal yellowish Flowers, scarce to be discerned from the Stalks and Leavs, which turn into Seed as smal as the very dust: The Root is very long and smal, thrusting down deep into the ground: This hath neither smel nor tast at first, but afterward hath a little astringent tast, without any manifest heat, yet a little bitter and sharp withal.

Place.

It groweth in dry, sandy, and Rockie places.

Time.

It is fresh and green all the Summer.

Vertues and Use.

Ruptures, Fluxes, Running of the Reins, Strangury, Stone or Gravel, Stitches, Yellow Jaundice, Worms, Wounds, Defluxions, Foul Ulcers.

Rupture wort hath not his name in vain, for it is found by experience to cure the Rupture, not only in Children but also in Elder Persons, if the Disease be not too inveterate, by taking a dram of the Pouder of the dried Herb every day in Wine for certain daies together; Or the Decoction made in Wine and drunk: Or the Juyce or distilled water of the green Herb taken in the same manner; and helpeth all other Fluxes either in men or Women; Vomitings also, and the Gonorrhea or running of the Reins, being taken any of the waies aforesaid. It doth also most assuredly help those that have the Strangury, or have their Urine stopped, or are troubled with the Stone or Gravel in their Reins or Bladder. The same also helpeth much all Stitches in the Side, all griping pains in the Stomach or Belly, the Obstructions of the Liver, and cureth the yellow Jaundice likewise: It killeth also the Worms in Children: Being outwardly applied it conglutineth Wounds notably, and helpeth much to stay Defluxions of Rhewm from the Head to the Eyes, Nose, and Teeth, being bruised green and bound thereto; Or the Decoction of the dried Herb, to bath the Forehead and Temples, or the Nape of Neck behind: It also drieth up the moisture of Fistulous Ulcers, or any others that are foul and spreading.

They say *Saturn* causeth Ruptures, if he do, he doth no more than he can cure, if you want wit he will teach you though to your cost, this Herb is *Saturns* own, and is a notable Antivenerian.

Rushes.

ALthough there are many kinds of *Rushes*, yet I shall only here insist upon those which are best known, and most Medicinal, as the *Bulrushes*, and other of the soft and smooth kinds; which grow so commonly in almost every place of this Land, and are so generally noted, that I suppose it needless to trouble you with any Description of them: Briefly then take the Vertues of them as followeth.

Vertues and Vices.

The Seeds of these soft *Rushes*, saith *Dioscorides* and *Galen*, toasted (saith *Pliny*) being drunk in Wine and Water, stayeth the Lask and Womens Courses, when they come down too abundantly: but it causeth Headach: It provoketh sleep likewise but must be given with caution, lest the party that takes it wake not until the Resurrection: *Pliny* saith, The Root boyled in water to the consumption of one third, helpeth the Cough.

Thus you see that Conveniences have their Inconveniences, and Vertue is seldom unaccompanied with some Vices. What I have written concerning *Rushes* is to satisfie my Country-mens Question, *Are our Rushes good for nothing?* Yes, and as good let alone as taken; There are Remedies enough without them for every Disease, and therfore as the Proverb is, I care not a *Rush* for them, or rather they will do you as much good as if one had given you a Rush.

Rye.

THis is so well known in all the Countries of this Land, and especially to the Country people who feed much thereon, that if I should describe it, they would presently say, I might well have spared that Labor: Its Vertues follow.

Vertues and Use.

Imposthums Boyls & Swellings, Pains of the Head, Chops of the Hands or Feet.

Rye is more digesting than Wheat; The Bread and the Leaven thereof ripeneth and breaketh Impostumes, Boyls, and other Swellings: The Meal of *Rye* put between a double cloth, and moistned with a little Vinegar, and heated in a Pewter dish, set over a Chafing-dish of coals, and bound fast to the Head while it is hot, both much eas the continual pains of the Head. *Mathiolus* saith, That the ashes of *Rye* straw put into Water and suffered therein a day and a night, and the Chops of the Hands or Feet washed therewith, doth heal them.

Saffron.

THe Herb needs no Description it being known generally where it grows.

Place.

It grows frequently at *Walden* in *Essex*, and in *Cambridg-shire*

Vertues and use.

It is an Herb of the *Sun*, and under the *Lion*, and therfore you need not demand a reason why it strengthens the heart so exceedingly: Let not abov ten grains be given at one time, for if the *Sun* which is the Fountain of Life, may dazle the Eyes and make them blind, a Cordial being taken in an immoderate quantity may hurt the Heart instead of helping it. It quicken the Brain, for the Sun is exalted in ♈ as well as he hath his House in ♌ it help Consumption of the Lungs, help difficulty of breathing: it is an excellent thing in Epidemical Diseases, as Pestilences, smal-Pox, and Measles: It is a notable expulsive Medicine, and a notable Remedy for the yellow Jaundice. My own Opinion is (but I have no Author for it) that Hermodactils is nothing else but the Roots of Saffron dried, and my reason is, that the Roots of all Crocus both white and yellow purge Flegm as Hermodactils do, and if you please to dry the Roots of any Crocus, neither your eye nor your tast shal distinguish it from Hermodactils.

Sage.

OUr ordinary Garden Sage needeth no Description.

Time.

It Flowreth in or about *July*.

Vertues and Use.

Provoke Urine, Womens Courses, Expel the Dead Child & After-birth, stanch Bleeding, Clense Ulcers & sores, Itching of the Cods,

A Decoction of the Leavs and Branches of *Sage* made and drunk, saith *Dioscorides* provoketh Urine, bringeth down Womens Courses, helpeth to expel the dead Child, and causeth the hairs to become black; It staieth the bleeding of Wounds, and clenseth foul Ulcers or Sores; The said Decoction made in Wine taketh away the itching of the Cods if they be bathed therwith. *Agrippa* saith, That if Women that cannot conceive by reason of the moist slipperines of their Wombs shall take a quantity of the Juyce of *Sage* with a little Salt for four daies before they company with their Husbands, it will help them not only to Conceive, but also to retain the Birth without miscarrying. *Orpheus* saith, Three spoonfuls of the Juyce of *Sage* taken fasting with a little Honey, doth presently stay the spitting or casting up of Blood. For them that are in a Consumption, these Pills are much commended. Take of Spicknard and Ginger of each two drams; of the Seed of *Sage* toasted at the fire, eight drams, of long Pepper twelve drams, all these being brought into fine Pouder, put thereto so much Juyce of *Sage* as may make them into a Mass for Pills, taking a dram of them every morning fasting, and so likewise at night, drinking a little pure Water after them. *Mathiolus* saith, it is very profitable for all manner of pains of the Head coming of cold and Rhewmatick Humors, as also for all pains of the Joynts, whether used inwardly or outwardly, and therfore helpeth the Falling-sickness, the Lethargy, such as are dull and heavy of spirit, the Palsey, and is of much use in all Defluxions of Rhewm from the Head, and for the Diseases of the Chest or Breast. The Leavs of *Sage* and Nettles bruised together, and laid upon the Impostume that riseth behind the Ears, doth aswage it much: The Juyce of Sage taken in warm water, helpeth a Hoarsness and the Cough. The Leavs sodden in Wine and laid upon the place affected with the Palsey helpeth much, if the Decoction be drunk also. *Sage* taken with Wormwood is used for the bloody Flux. *Pliny* saith, it procureth Womens Courses, and stayeth them coming down too fast, helpeth the stinging and biting of Serpents, and killeth the Worms that breed in the Ears and in Sores. *Sage* is of excellent use to help the Memory, warming and quickning the senses; and the Conserve made of the Flowers is used to the same purpose, and also for all the former recited Diseases. The Juyce of *Sage* drunk with Vinegar hath been of good use in the time of Plague at all times. Gargles likewise are made with Sage, Rosemary, Honeysuckles, and Plantane boyled in Wine or Water, with some Honey and Allum put thereto, to wash sore Mouthes and Throats, Cankers, or the secret parts of man or woman as need requireth. And with other hot and comfortable Herbs. *Sage* is boyled to bath the Body or Legs in the Summer time, especially to warm cold Joynts or Sinews troubled with the Palsey or Cramp, and to comfort and strengthen the parts. It is much commended against the Stitch or pains in the side coming of Wind, if the place be fomented warm with the Decoction thereof in Wine, and the Herb after the boyling be laid warm also thereunto.

Help Conception & hinder Miscarriage, spitting Blood, Consumption, Pains of the Head & Joynts, Falling-sickness, Lethargy, Dulness of spirit, Palsey, Defluxions of Rhewm, Impostume behind the Ears, Hoarsness & Cough, Bloody Flux, Biting of Serpents, Worms in the Ears, or Sores, Quicken the senses, & help Memory, Sore Mouths & Throats, Cankers, Palsey or Cramp, Stitch in the side.

Jupiter claims this, and bid me tell you it is good for the Liver, and to breed good Blood.

Wood-

VVood-Sage.

Description.

VVOod-*Sage* riseth up with square hoary Stalks two foot high at the least, with two Leavs set at every Joynt, somwhat like other Sage Leavs, but smaller, softer, whiter, and rounder, and a little dented about the edges and smelling somwhat strongly: At the tops of the Stalks and Branches stand the Flowers on a slender long Spike turning themselves all one way when they blow, and are of a pale and whitish colour, smaller than Sage, but hooded and gaping like unto them: The Seed is blackish and round, four usually set in a husk together: The Root is long and stringy, with diverse Fibres thereat, and abideth many yeers.

Place.

It groweth in Woods, and by Wood-sides, as also in diverse Fields and by-Lanes in this Land.

Time.

It Flowreth in *June*, *July*, and *August*.

Vertues and use.

Provokes Urine, & Womens Courses, & sweat, Swellings in the flesh, French Pox, Vein broken, Burstenes, Palsey, Ulcers & Sores, Green Wounds.

The Decoction of *Wood-Sage* provoketh Urine and Womens Courses; it also provoketh Sweat, digesteth Humors, and discusseth Swellings, and Nodes in the Flesh, and is therefore thought to be good against the French Pox. The Decoction of the green Herb made with Wine is a safe and sure Remedy for those who by falls, bruises, or Blows, doubt some Vein to be inwardly broken, to disperse and avoid the congealed blood, and to consolidate the Vein; It is also good for such as are inwardly or outwardly burssten, the drink used inwardly, and the Herb applied outwardly: The same used in the same manner is found to be a sure Remedy for the Palsey: The Juyce of the Herb or the Pouder thereof dried, is good for moist Ulcers and Sores in the Legs or other parts, to dry them, and caus them to heal the more speedily: It is no less effectual also in green Wounds to be used upon any occasion.

Solomons Seal.

Description.

THe common *Solomons Seal* riseth up with a round Stalk about half a yard high, bowing or bending down to the top, set with single Leavs one above another, somwhat large and like the Leavs of the Lilly-Convalley, or May Lilly, with an eye of blewish upon the green, with some ribs therein, and more yellowish underneath: At the foot of every Leaf almost from the bottom up to the top of the Stalk come forth small long white and hollow pendulous Flowers, somwhat like the Flowers of May-Lilly, but ending in five long points, for the most part two together, at the end of a long Footstalk, and sometimes but one, and sometimes also two Stalks with Flowers at the Foot of a Leaf, which are without any scent at all, and stand all on one side of the Stalk: After they are past, come in their places, smal round Berries, green at the first, and blackish green, tending to blewness when they are ripe, wherein lie smal white hard and stony Seed: The Root is of the thickness of ones finger or Thumb, white and knobbed in some places, with a flat round circle representing a Seal, whereof it took the name, lying along under the upper crust of the Earth, and not growing downward but with many fibres underneath.

Place.

It is frequent in diverse places of this Land, as namely in a Wood two miles from *Canterbury*, by Fishpool-Hill: as also in a bushy Close belonging to the Parsonage of *Alderbury* neer *Clarindon*, two miles from *Salisbury*; in *Chesson* Wood, on *Chesson* Hill, between *Newington* and *Sittingborn* in *Kent*, and in diverse other places, in *Essex* and other Counties.

Time.

It Flowreth about *May*, The Root abideth, and shooteth anew every yeer.

Vertues and Use.

The Root of *Solomons Seal* is found by experience to be available in Wounds, Hurts, and outward Sores, to heal and close up the lips of those that are green, and to dry up and restrain the Flux of Humors to those that are old: It is singular good to stay Vomitings, and Bleedings whereseever, as also al Fluxes in man or woman, whether the Whites or Reds in Women, or the running of the Reins in men; also to knit any Joynt which by weakness useth to be often out of place, or will not stay in long, when it is set: also to knit and joyn broken Bones in any part of the Body, the Roots being bruised and applied to the place: Yea it hath been found by late experience that the Decoction of the Root in Wine, or the bruised Root put in Wine or other drink, and after a nights infusion strained forth hard and drunk, hath holpen both man and Beast whose Bones have been broken by any occasion, which is the most assured refuge of help to people of diverse Countries of this Land, that they can have: It is no less effectual to help Rupture and Burstings, the Decoction in Wine, or the Pouder in Broth or Drink being inwardly taken and outwardly applyed to the place: The same is also available for inward

Wounds & Sores, Vomiting & Bleeding, Fluxes, Running of the Reins, Knit Joynts, & broken Bones in man & beast, Ruptures,

or outward Bruises, Falls or Blows, both to dispel the congealed blood, and to take away both the pains and the black and blew Marks that abide after the hurt. The same also or the distilled water of the whol Plant used to the Face or other part of the Skin, clenseth it from Morphew, Freckles, Spots; or Marks whatsoever, leaving the place fresh, fair, and Lovely, for which purpose it is much used by the *Italian* Dames.

Bruises & Falls, black & blew Marks, Beautifie the Face.

Saturn owns this Plant for he loves his Bones well.

Sampire.

Description.

THe Rock *Sampire* groweth up with a tender green Stalk, about half a yard or two foot high at the most, branching forth almost from the very bottom, and stored with sundry thick, and almost round somwhat long Leavs, of a deep green colour, somtimes three together, and somtimes more on a Stalk, and are sappy; and of a pleasant, hot, or spicy taste: At the tops of the Stalk and Branches, stand Umbels of white Flowers, and after them come large Seed bigger than Fennel Seed, yet somwhat alike. The Root is great, white, and long, continuing many yeers, and is of a hot spicy taste likewise.

Place.

It groweth on the Rocks that are often moistened at the least, if not overflown with the Sea water.

Time.

And it Flowreth and Seedeth in the end of *July* and *August*.

Vertues and use.

Helps digestion, Opens Obstructions, provokes Urin Expel Gravel and the Stone.

It is a safe Herb, very pleasant both to the taste and Stomach, helping digestion, and in some sort opening the Obstructions of the Liver and Spleen, provoking Urine, and helping thereby to wash away the Gravel and Stone ingendred in the Kidneys or Bladder.

Sanicle.

Description.

THe ordinary *Sanicle* sendeth forth many great round Leavs standing upon long browniſh stalkes, every one somewhat deeply cut or divided into five or six parts, and some of those also cut in, somwhat like the Leaf of a Crowfoot, or Doves-foot, and finely dented about the edges, smooth, and of a dark green shining colour, and somtimes reddish about the Brims, from among which riseth up smal round green Stalks without any Joynt or Leaf thereon, saving at the top, where it brancheth forth into Flowers, having a Leaf devided into three or four parts at that Joynt with the Flowers, which are smal and whit, starting out of smal round greenish yellow heads, many standing together in a tuft; in which afterward are the Seeds contained, which are smal round rough Burs, somwhat like the Seeds of Cleavers, and stick in the same manner upon any thing that they touch: The Root is composed of many black strings or fibres set together, at a little long head, which abideth with the green Leavs all the Winter and perish not.

Place.

It is found in many shadowy Woods, and other places of this Land.

Time.

It Flowreth in *June*, and the Seed is ripe shortly after.

Vertues and Use.

Green Wounds, Ulcers, Impostumes, Inward Bleedings, Swellings, Ulcers in the Mouth, Throat, & Privities, Womens Courses, Fluxes of Blood, Lasks, Ulcers in the Kidneys, Running of the Reins, Rupture.

It is exceeding good to heal all green Wounds speedily, or any Ulcers, Impostumes, or bleedings inwardly: It doth wonderfully help those that have any Tumors in any part of their Bodies, for it represseth and dissipateth the Humors, if the Decoction or Juyce thereof be taken, or the Pouder in drink, and the Juyce used outwardly; For there is not found any Herb that can give such present help either to Man or Beast when the Disease falleth upon the Lungs or Throat, and to heal up all the putrid Malignant Ulcers in the Mouth, Throat, and Privities, by gargling or washing with the Decoction of the Leavs and Root, made in Water, and a little Honey put thereto. It helpeth to stay Womens Courses, and all other Fluxes of Blood either by the Mouth, Urine or Stool, and Lasks of the Belly, the Ulceration of the Kidneys also, and the pains in the Bowels, and the Gonorrhea or running of the Reins, being boyled in Wine or Water, and drunk: The same also is no less powerful to help any Ruptures or Burstings, used both inwardly and outwardly, and briefly it is effectual in binding, restraining, consolidating, heating, drying, and healing; as Comfry, Bugle, Self-heal, or any other of the Consounds, or Vulnerary Herbs whatsoever.

This is one of *Venus* her Herbs to cure either Wounds, or what other mischiefs *Mars* inflicteth upon the Body of Man.

Sarasens Consound.

Description.

THis groweth very high somtimes with browniſh Stalks, and other whiles with green and hollow to a mans height, having many long and narrow green Leavs snip'd about the edges, somwhat like those of the Peach-Tree,

Tree, or Willow Leavs, but not of such a white green colour: The tops of the Stalks are furnished with many pale yellow Starlike Flowers standing in green heads, which when they are fallen, and the Seed ripe, which is somwhat long, smal, and of a yellowish brown colour wrapped in down, is therewith carried away with the wind: The Root is composed of many strings or fibres, set together at a head, which perish not in Winter, but abide, although the Stalks dry away, and no Leaf appeareth in Winter. The tast hereof is strong and unpleasant, and so is the smel also.

Place.

It groweth in moist and wet grounds by Wood sides, and somtimes in the moist places of shady Groves, as also by the water side.

Time.

It Flowreth in *July*, and the Seed is soon ripe, and carryed away with the wind.

Vertues and Use.

Among the Germans, this Wound Herb is preferred before all others of the same quality. Being boiled in Wine and drunk, it helpeth the indisposition of the Liver, and freeth the Gall from Obstructions, whereby it is good for the yellow Jaundice, and for the Dropsie in the beginning of it, for all inward Ulcers of the Reins, or elswhere, and inward Wounds and Bruises: And being steeped in Wine and then distilled, the Water thereof drunk is singular good to ease all gnawings in the Stomach, or other pains of the Body, as also the pains of the Mother: And being boyled in Water it helpeth continual Agues; And this said Water, or the simple Water of the Herb distilled, or the Juyce or Decoction, are very effectual to heal any green Wound or old sore or Ulcer whatsoever, clensing them from corruption and quickly healing them up: It is no less effectual for the Ulcers in the mouth or Throat, be they never so foul or stinking, by washing and gargling them therewith; and likewise for such Sores as happen in the privy parts of man or Woman: Briefly whatsoever hath been said of Bugle or Sanicle, may be found herein.

Obstructions, yellow Jaundice, Dropsie, Ulcers of the Reins, Inward Wounds & Bruises, Pains in the Body, Mother, Agues, Green Wounds, Old Sores or Ulcers, Ulcers in the Mouth or Throat, Sores in the Privy Parts.

Saturn owns this Herb, and 'tis of sober condition like him.

Sawce alone, *or* Jack by the Hedg.

Description.

THe lower Leavs of this are rounder than those that grow towards the tops of the Stalks, and are set singly one at a Joynt, being somwhat round and broad, and pointed at the ends, dented also about the edges, somwhat resembling Nettle Leavs for the form but of a fresher green colour, and not rough or pricking: The Flowers are very smal and white, growing at the tops of the Stalks one above another, which being past, there follow smal and long round pods, wherein are cantained, smal round Seed somwhat blackish: The Root is stringy and threddy, perishing every yeer after it hath given Seed, and raiseth it self again of its own sowing: The Plant or any part thereof being bruised, smelleth of Garlick, but more pleasantly, and tasteth somwhat hot and sharp, almost like unto Rocket.

Place.

It groweth under Walls, and by Hedg sides, and Pathwaies in Fields, in many places.

Time.

It Flowreth in *June*, *July*, and *August*.

Vertues and use.

This is eaten by many Country people as Sawce to their Salt-fish, and helpeth well to digest the crudities and other corrupt Humors ingendred thereby, it warmeth also the Stomach, and causeth digestion: The Juyce thereof boyled with Honey, is accounted to be as good as Hedg-Muster for the Cough, to cut and expectorate the tough Flegm. The Seed bruised and boyled in Wine is a singular good Remedy for the Wind Chollick, or the Stone, being drunk warm; It is also given to Women troubled with the Mother, both to drink, and the Seed put into a Cloth and applied while it is warm is of singular good use. The Leavs also or Seed boyled is good to be used in Clysters to ease the pains of the Stone: The green Leavs are held to be good to heal the Ulcers in the Legs.

Helps digestion, Cough, Tough Flegm, Wind-Chollic Stone, Ulcers in the Legs.

VVinter and Summer Savory.

BOth these are so well known (being entertained as constant Inhabitants in our Gardens) that they need no Description.

Vertues and Use.

They are both of them hot and dry, especially the Summer kind, which is both sharp and quick in tast, expelling Wind in the Stomach and Bowels, and is a present help for the rising of the Mother procured by Wind, provoketh Urine end Womens Courses, and is much commended for Women with Child to take inwardly, and to smell often unto. It cutteth tough Flegm in the Chest and Lungs, and helpeth to expectorate it the more easily; It quencheth the dull spirits in the Lethargy, the Juyce thereof being snuffed, or cast up into the Nostrils: The Juyce dropped into the Eyes cleareth a dull sight, if it proceed of thin

Expelleth Wind, Mother, provokes Urine & Womens Courses, Tough Flegm, Lethargy, Dull sight.

cold humors distilling from the Brain: The Juyce heated with a little Oyl of Roses, and dropped into the Ears easeth them of the noise and singing in them, and of deafness also: Outwardly applied w^th white flower in manner of a Pultis, it giveth ease to the Sciatica, and Palsey'd Members, heating and warming them, and taketh away their pains: It also taketh away the pain that comes of stinging by Bees, Wasps, &c.

Singing in the Ears & Deafness, Sciatica & Palsey, stinging of Bees &c.

Mercury claims the Dominion over this Herb, neither is there a better Remedy against the Chollick and Illiack passions than this Herb, keep it dry by you all the yeer if you love your selves, and your ease, as 'tis an hundred pound to a penny if you do not: keep it dry, make Conserves and Syrups of it for your use; and withal, take notice that the Summer kind is the best.

Chollick, Illiack passion.

The common white Saxifrage.

Saxifragia alba.

Description.

THis hath a few smal reddish Kernels or Roots, covered with some Skins lying among diverse smal blackish Fibres, which send forth diverse round, faint, or yellowish green Leavs, and grayish underneath, lying above the ground unevenly dented about the edges, & somwhat hairy, every one upon a little footstalk from whence riseth up a round brownish hairy green stalk, two or three foot high, with a few such like round Leaves as grow below, but smaller, and somwhat branched at the top, whereon stand pretty large white Flowers of five Leaves apiece, with some yellow threds in the middle, standing in long crested brownish green Husks: After the Flowers are past there ariseth somtimes a round hard head by, forked at the top, wherein is contained small blackish Seed, but usually they fall away without any Seed; and it is the Kernels or grains of the Root which are usually called the white *Saxifrage* Seed, and so used.

Place.

It groweth in many places of our Land, as well in the lower moist, as in the upper dry corners of Meadows, and grassy sandy places; It used to grow neer *Lambs* Conduit, on the back side of *Grayes-Inn*.

Time.

It Flowreth in *May*, and is then gathered as well for that which is called the Seed, as to distil, for it quickly perisheth down to the ground when any hot weather comes.

Vertues and use.

It is very effectual to clense the Reins and Bladder, and to dissolve the Stone ingendred in them, and to expel it and the Gravel by Urine, to provoke Urine also being stopped, and to help the Strangury: for which purposes the Decoction of the Herb or Roots in white Wine, or the Pouder of the smal Kernelly Roots which is called the Seed taken in white Wine, or in the same Decoction made with white Wine is most usual. The Distilled water of the whol Herb, Roots, and Flowers, is most familiar to be taken: It provoketh also Womens Courses, and freeth and clenseth the Stomach and Lungs from thick and tough Flegm that troubles them. There is not many better Medicines to break the Stone than this.

Clenseth the Reins, Stone, *Gravel, provoke Urine,* *Womens Courses* *Tough Flegm.*

Burnet Saxifrage.

Description.

THe greater sort of our English *Burnet Saxifrage* groweth up with diverse long Stalks of winged Leavs, set directly opposite one to another on both sides, each being somwhat broad, a little pointed and dented about the edges, of a sad green colour. At the tops of the Stalks stand Umbels of white Flowers, after which comes small and blackish Seed: The Root is long and whitish, abiding long.

Our lesser *Burnet Saxifrage*, hath much finer Leaves than the former, and very smal, and set one against another, deeply jagged about the edges, and of the same colour as the former: The Umbels of Flowers are white, and the Seed very small, and so is the Root, being also somwhat hot and quick in tast.

Place.

These grow in most Meadows of this Land, and are easie to be found, being well sought for among the Grass, wherein many times they lie hid scarcely to be discern'd.

Time.

They Flower about *July*, and their Seed is ripe in *August*.

Vertues and use.

These *Saxifrages* are as hot as Pepper, and *Tragus* saith by his experience they are more wholsom: They have the same properties that the Parsleys have, but in provoking Urine, and easing the pains thereof, or of the Wind and Chollick, are much more effectual; The Roots or Seed being used either in Pouder, or in Decoction, or any other way; and likewise helpeth the Windy pains of the Mother, and to procure their Courses, to break and avoid the Stone in the Kidneys, to digest cold, viscuous, and tough Flegm in the Stomach, and is a most especial Remedy against all kind of Venom. *Castoreum* being boyled in the distilled water hereof, is singular good to be given to those that are troubled with

Provoke Urine, Ease Wind & Collick, Mother, Womens Courses, Stone, Tough Flegm, Venom,

Cramps & Convulſions; Wounds in the Head, Freckles & ſpots.

with Cramps and Convulſions: ſome do uſe to make the Seed into Comfits (as they do Caraway Seed) which is effectual to all the purpoſes aforeſaid. The Juyce of the Herb dropped into the moſt grievous Wounds of the Head, drieth up their moiſture and healeth them quickly. Some Women uſe the diſtilled Water, to take away Freckles or Spots in the Skin or Face: and to drink the ſame ſweetned with Sugar for all the purpoſes aforeſaid.

Scabioſa. Scabious, three ſorts.

Deſcription.

THe common Field *Scabious* groweth up with many hairy ſoft, whitiſh green Leaves, ſome whereof are but very little, if at all jagged on the edges, others very much rent and torn on the ſides, and have threds in them, which upon the breaking may be plainly ſeen: from among which riſe up diverſe hairy green Stalks three or four foot high, with ſuch like hairy green Leavs on them, but more deeply and finely devided, branched forth a little: At the tops hereof which are naked and bare of Leaves for a good ſpace, ſtand round Heads of Flowers, of a pale bleWiſh colour ſet together in a head, the outermoſt whereof are larger than the inward, w^th^ many threds alſo in the middle, ſomwhat flat at the top, as the Head with Seed is likewiſe: The Root is great, white, & thick growing down deep into the ground, and abideth many yeers.

There is another ſort of Field *Scabious*, different in nothing from the former, but only it is ſmaller in all reſpects.

The Corn *Scabious*, differeth little from the firſt, but that it is greater in all reſpects and the Flowers more declining to Purple: And the Root creepeth under the upper cruſt of the Earth, and runneth not deep in the ground as the firſt doth.

Place.

The firſt groweth moſt uſually in Meadows, eſpecially about *London* every where.

The ſecond in ſome of the dry Fields about this City, but not ſo plentiful as the former.

The third, in the ſtanding Corn, or Fallow Fields, and the borders of ſuch like Fields.

Time.

They Flower in *June* and *July*, and ſome abide Flowring until it be late in *Auguſt*, and the Seed is ripe in the mean time.

There are many other ſorts of *Scabious*, but I take thoſe which I have here deſcribed to be moſt familiar with us; The vertues both of theſe and the reſt being much alike, take them as followeth.

Vertues and Uſe.

Scabious is very effectual for all ſorts of Coughs, ſhortneſs of Breath, and all other Diſeaſes of the Breaſt and Lungs, ripening and digeſting cold Flegm, and other tough humors, voiding them forth by Coughing and ſpitting: It ripeneth alſo all ſorts of inward Ulcers and Impoſtumes, the Pluriſie alſo, if the Decoction of the Herb dry or green, be made with Wine, and drunk for ſome time together: four ounces of the clarified Juyce of *Scabious* taken in the morning faſting, with a dram of Methridate, or Venice Treacle, freeth the heart from any infection of Peſtilence, if after the taking of it, the party ſweat two hours in their Beds; and this Medicine be again and again repeated if need require: The green Herb bruiſed and applied to any Carbuncle or Plague ſore, is found by certain experience to diſſolve or break it in three hours ſpace. The ſame Decoction alſo drunk, helpeth the pains and Stitches in the ſides. The Decoction of the Roots taken for fourty daies together, or a dram of the Pouder of them taken at a time in Whey, doth (as *Mathiolus* ſaith) wonderfully help thoſe that are troubled with running or ſpreading Scabs, Tetters, or Ringworms, yea though they proceed of the French Pox, which he ſaith he hath tryed by experience: The Juyce or Decoction drunk, helpeth alſo Scabs and breakings out in Irch and the like: The Juyce alſo made up into an Oyntment and uſed, is effectual for the ſame purpoſe. The ſame alſo helpeth all inward Wounds by the drying, clenſing, and healing quality therein: A Syrup made of the Juyce and Sugar is very effectual to all the purpoſes aforeſaid, and ſo is the diſtilled water of the Herb and Flowers made in due ſeaſon; eſpecially to be uſed when the green Herb is not in force to be taken. The Decoction of the Herb and Roots outwardly applied, doth wonderfully help al ſorts of hard or cold Swellings in any part of the Body; and is as effectual for any ſhrunk Sinew or Vein. The Juyce of *Scabious* made up with the Pouder of Borax and Camphire, clenſeth the Skin of the Face or other part of the Body, not only from Freckles and Pimples, but alſo from Morphew and Lepry. The Head waſhed with the ſame Decoction, clenſeth it from Dandrif, Scurf, Sores Itches, and the like, being uſed warm. Tents alſo dipped in the Juyce or Water thereof not only healeth all green Wounds, but old Sores and Ulcers alſo: The Herb alſo bruiſed and applied doth in ſhort time looſen, and cauſe to be drawn forth any Splinter, broken bone, Arrow head, or other ſuch like thing lying in the Fleſh.

Coughs & ſhortneſs of Breath; Cold Flegm, Inward Ulcers & Impoſtumes, Pluriſie, Infection, Carbuncle or Plague ſores; Pains or ſtitches in the ſide; Scabs, tetters, Ringworms, Itch, inward Wounds, Cold ſwellings, ſhrunk Sinews; Freckles & Pimples Morphew & Lepry, Dandriff & Scurf, Green Wounds, Old ſores & Ulcers, Splinters, Thorns, & broken Bones &c.

Scurvy-grass.

Description.

Our ordinary English *Scurvygrass* hath many thick fat Leavs, more long than broad, and somtimes longer and narrower, somtimes also smooth on the edges, and somtimes a little waved, somtimes plain, smooth, and pointed, somtimes a little hollow in the middle and round pointed, of a sad green, and somtimes browniſh colour, every one standing by it self upon a long Footstalk, which is browniſh or greeniſh also: from among which rise smal slender Stalks, bearing a few Leaves thereon like the other, but longer and lesser for the most part: At the tops whereof grow many whitish Flowers, with yellow threds in the middle, standing about a green head which becometh the Seed Vessel, which will be somwhat flat when it is ripe, wherein is contained reddish Seed tasting somwhat hot: The Root is made of many white strings, which stick deeply in the mud, wherein it chiefly delighteth: yet it will well abide in the more upland and dryer grounds, and tasteth a little brackish or Salt, even there, but not so much as where it hath the Salt water to feed upon.

Place.

It groweth all along the Thames side, both on the *Essex* and *Kentish* Shoars, from *Woolwich* round about the Sea Coasts to *Dover*, *Portsmouth*, and even to *Bristol*, where it is had in plenty: The other with round Leavs groweth in the Marshes in *Holland* in *Lincolnshire*, and other places of *Lincolnshire* by the Sea side.

Description.

There is also another sort called *Dutch Scurvy-Grass*, which is most known and frequent in Gardens, which hath diverse fresh green, and almost round Leaves rising from the Root, nothing so thick as the former, yet in some rich ground, very large, even twice so big as in others, not dented about the edges, nor hollow in the middle, every one standing upon a long Footstalk: from among these rise up diverſ long slender weak Stalks higher than the former, and with more white Flowers at the tops of them, which turn into smaller pods, and smaller browniſh Seed than the former: The Root is white, smal, and threddy: The tast of this is nothing Salt at all, but hath an hot Aromatical spicy tast.

Time.

They Flower in *April* or *May*, and give their Seed ripe quickly after.

Vertues and Use.

The English *Scurvey-grass* is more used for the Salt tast it beareth, which doth somwhat open and clense, but the Dutch *Scurvey-grass* is of better effect, and chiefly used (if it may be had) by those that have the Scurvey, especially to purge and clense the Blood, the Liver, and the Spleen, for all which Diseases it is of singular good effect by taking the Juyce in the Spring every morning fasting in a cup of Drink: The Decoction is good for the same purpose, and the Herb tunned up in new Drink, either by it self or with other things, for it openeth Obstructions, evacuateth cold clammy and Flegmatick Humors both from the Liver and the Spleen, wasting and consuming both the swelling and hardness thereof, and thereby bringing to the Body a more lively colour. The Juyce also helpeth all foul Ulcers and Sores in the Mouth, if it be often gargled therewith; and used outwardly, clenseth the Skin from spots, marks, or Scars, that happen therein.

Scurvy, Liver & Spleen,

flegmatick Humors, Foul ulcers & sore Mouths, Spots & Scars in the Skin.

Self-heal.

Description.

The common *Self-heal* is a small low creeping Herb, having many small roundish pointed Leavs somwhat like the Leaves of Wild Mints, of a dark green colour without any dents on the edges, from among which rise diverse square hairy Stalks scarce a foot high, which spread somtimes into Branches with diverse such smal Leaves set thereon, up to the tops, where stand brown spiked Heads, of many smal browniſh Leaves like scales and Flowers set together, almost like the Head of *Cassidony*, which Flowers are gaping, and of a blewish purple, or more pale blew, in some places sweet, but not so in others: The Root consists of many strings or fibres downward, and spreadeth strings also, whereby it encreaseth: The smal stalks with the Leaves creeping upon the ground, shoot forth fibres taking hold of the ground, whereby it is made a great tuft in short time.

Place.

It is found in Woods and Fields every where.

Time.

It Flowreth in *May*, and somtimes in *April*.

Vertues and Use.

As *Self-heal* is like Bugle in form, so also in the Qualities and Vertues serving for al the purposes whereto Bugle is applied with good succes either inwardly or outwardly, for inward Wounds or Ulcers wheresoever within the Body, for Bruises and Falls and such like hurts: if it be accompanied with Bugle, Sanicle, and other the like Wound Herbs it will be the more effectual, and to wash or inject into

Inward Wounds & Ulcers, Bruises,

into Ulcers in the parts outwardly where there is cause to repress the heat and sharpness of Humors flowing to any sore Ulcer, Inflamation, Swelling or the like, or to stay the Flux of blood in any Wound or Part, this is used with good success, as also to cleanse the foulness of Sores, and cause them more speedily to be healed. It is an especial Remedy for all green Wounds to soder the lips of them, and to keep the place from any further inconveniences: The Juyce hereof used with Oyl of Roses to anoint the Temples and Forehead, is very effectual to remove the Headach: and the same mixed with Honey of Roses, cleanseth and healeth all Ulcers in the Mouth and Throat, and those also in the secret parts. And the Proverb of the Germans, French, and others is verified in this, *That he needeth neither Physitian nor Chyrurgion, that hath* Self-heal *and* Sanicle *to help himself.*

Flux of Blood; Foul sores Green wounds;

Headach; Sores in the Mouth or Throat & secret parts.

Here is another Herb of *Venus*, *Self-heal* whereby when you hurt, you may heal your self, 'tis indeed a special Herb for inward and outward Wounds, take it inwardly in Syrups for inward Wounds, outwardly in Unguents and Plaisters for outward.

The Service-tree.

THis is so well know in the places where it grows that it needeth no Description.

Time.

It Flowreth before the end of *May*, and the Fruit is ripe in *October*.

Vertues and use.

Services when they are mellow are fit to be taken to stay Fluxes, Scowring, and Castings, yet less than Medlars: if they be dried before they be mellow, and kept all the yeer, they may be used in Decoctions for the said purpose, either to drink, or to bath the parts requiring it: and is profitably used in that manner to stay the bleeding of Wounds, and at the Mouth or Nose, to be applied to the Forehead and Nape of the Neck.

Fluxes, Scowrings & Castings;

Bleeding of wounds or at Mouth & Nose.

Smallage.

THis also is very well known, and therefore I shall not trouble the Reader with any Description thereof.

Place.

It groweth naturally in wet and Marsh grounds, but if it be sown in Gardens it there prospereth very well.

Time.

It abideth green all the Winter, and Seedeth in *August*.

Vertues and Use.

Smallage is hotter, dryer, and much more Medicinable than Parsley, for it much more openeth Obstructions of the Liver and Spleen rarifieth thick Flegm, and cleanseth it and the Blood withal. It provoketh Urine and Womens Courses, and is singular good against the yellow Jaundice: It is very effectual against Tertian and Quartan Agues, if the Juyce thereof be taken; but especially made into a Syrup. The Juyce also put to Honey of Roses, and Barley Water, is verey good to Gargle the Mouth and Throat of those that have Sores and Ulcers in them, and will quickly heal them: The same Lotion also cleanseth and healeth all other foul Ulcers and Cankers elswhere if they be washed therewith. The Seed is especially used to break and expel wind, to kill Worms and to help a stinking Breath: The Root is effectual to all the purposes aforesaid, and is held to be stronger in operation than the Herb, but especially to open Obstructions, and to rid away an Ague, if the Juyce thereof be taken in Wine, or the Decoction thereof in Wine be used.

Liver & spleen; Urine & womens Courses, Yellow Jaundice, Agues;

sore Mouths & throats Ulcers & Cankers wind worms stinking Breath.

Sopewort, or Bruise-wort.

Description.

THe Root creepeth under ground far and neer, with many Joynts therein, of a brown colour on the outside and yellowish within, shooting forth in diverse places many weak round Stalks, full of Joynts, set with two Leaves apiece at every one of them on the contrary side, which are ribbed somwhat like unto Plantane, and fashioned like the common field white Campion Leaves, seldom having any Branches from the sides of the Stalks, but set with diverse Flowers at the top standing in long Husks like the wild Campions, made of five Leavs apiece, round at the ends, and a little dented in the middle, of a pale Rose colour, almost white, somtimes deeper, and somtimes paler, of a reasonable good scent.

Place.

It groweth wild in many low and wet grounds of this Land, by the Brooks, and sides of running Waters.

Time.

It Flowreth usually in *July*, and so continueth all *August*, and part of *September* before they be quite spent.

Vertues and use.

Cut Fingers, provokes Urine, Expels Gravel & Stone, Dropsie, French Pox.

The Country people in diverse places do use to bruise the Leaves of *Sopewort*, and lay it to their Fingers, Hands, or Legs when they are cut, to heal them up again. Some make great boast thereof that it is Diuretical to provoke Urine, and thereby to expel Gravel and the Stone in the Reins or Kidneys: and do also account it singular good to avoid Hydropical waters thereby to cure the disease of the Dropsie: And they no less extol it to perform an absolute cure in the French Pox, more than either *Sarsaparilla*, *Guiacum*, or *China* can do, which how true it is, I leave to others to judg.

Sorrel.

Our ordinary *Sorrel*, which groweth in Gardens, and also wild in the Fields, is so well known that it needeth no Description.

Vertues and Use.

Cooleth Inflamations, & heat of Blood; Agues, Quench thirst, Provoke Appetite, Killworms Womens Courses; Fluxes Poyson Jaundice, Gravel & stone Black Jaundice, Inward Ulcers; Itch, Tetters & Ringworms Kernels in the Throat Sore Mouth Impostume Boyl or Plague sore.

Sorrel is prevalent in all hot Diseases, to cool any Inflamation and heat of Blood in Agues Pestilential or Chollerick, or other sicknesses and fainting, rising from heat, and to refresh the overspent Spirits with the violence of furious or fiery fits of Agues, to quench Thirst, and procure an Appetite in fainting or decayd Stomachs: for it resisteth the putrefaction of the Blood, killeth Worms, and is as a Cordial to the heart which the Seed doth more effectually being more drying and binding, and thereby stayeth the hot Fluxes of Womens Courses, or of Humors in the Bloody Flux, or Flux of the Stomach. The Roots also in a Decoction, or in Pouder, is effectual for all the said purposes. Both Roots and Seed as well as the Herb is held powerful to resist the poyson of the Scorpion. The Decoction of the Roots is taken to help the Jaundice, and to expel Gravel and the Stone in the Reins or Kidneys. The Decoction of the Flowers made with Wine and drunk helpeth the black Jaundice, as also the inward Ulcers of the Body or Bowels. A Syrup made with the Juyce of *Sorrel* and *Fumitary* is a Soveraign help to kill those sharp Humors that cause the Itch. The Juyce thereof with a little Vinegar serveth well to be used outwardly for the same cause, and is also profitable for Tetters, Ringworms &c. It helpeth also to discuss the Kernels in the Throat, and the Juyce gargled in the Mouth helpeth the Sores therein. The Leaves wrapped up in a Colewoort Leaf, and roasted under the Embers, and applied to a hard Impostume, Botch, Boyl, or Plague Sore, both ripeneth and breaketh it. The Distilled water of the Herb is of much good use for all the purposes aforesaid.

Venus owns it, and she will never deny the Herb that follows.

Wood Sorrel.

Description.

This groweth low upon the ground, having a number of Leaves coming from the Root, made of three Leaves like a Trefoyl but broad at the ends and cut in the middle, of a faint yellowish green colour, every one standing on a long Footstalk, which at their first coming up are close folded together to the Stalk, but opening themselves afterwards, and are of a fine sowr rellish, and yeelding a Juyce which will turn red when it is clarified, and maketh a most dainty clear Syrup: Among these Leavs riseth up diverse slender weak Footstalks, with every one of them a Flower at the top, consisting of five small pointed Leaves Star fashion, of a white colour in most places, and in some dash'd over with a small shew of blush, on the back side only: After the Flowers are past follow smal round heads, with small yellowish Seed in them: The Roots are nothing but smal strings fastned to the end of a smal long piece, all of them being of a yellowish colour.

Place.

It groweth in many places of our Land, in Woods and Wood sides, where they be moist and shadowed, and in other places not too much open to the Sun.

Time.

It Flowreth in *April* and *May*.

Vertues and Use.

Ulcers Inflamations procure Appetite stay Vomiting Pestilential Feavers Hot swellings Canker or Ulcer in the Mouth wounds or Defluxions.

Wood Sorrel, serveth to all purposes that the other *Sorrels* do, and is more effectual in hindring the putrefaction of Blood, and Ulcers in the Mouth and Body, and in cooling and tempering heats & Inflamations, to quench thirst, to strengthen a weak Stomach, to procure an appetite, to stay Vomiting, and very excellent in any contagious sicknes, or Pestilential Feavers. The Syrup made of the Juyce is effectual in all the causes afore said, and so is the Distilled Water of the Herb also. Spunges or Linnen Cloathes wet in the Juyce and applied outwardly to any hot Swellings or Inflamations, doth much cool and help them: The same Juyce taken and gargled in the Mouth, and after it is spit forth, fresh taken, doth wonderfully help a foul stinking Canker, or Ulcer therein. It is singular good in Wounds, Thrusts, and Stabs in the Body, to stay bleeding, and to clense and heal the Wounds speedily; and helpeth to stay any hot Defluxions into the Throat or Lungs.

Sow-

Sow-Thistles.

THese are generally so well known that they need no Description.

Place.

They grow in our Gardens and manured Grounds; and sometimes by old Walls, the path sides of Fields and High-waies.

Vertues and use.

Pains & heat of the Stomach, short wind & wheesing, Gravel & Stone, stinking Breath, speedy Delivery, Strangury, Milk increased, Deafness & singing in the Ears, Inflamed Eyes, wheals, & Blisters Hemorrhoids, Cleer the Face.

Sow-thistles are cooling and somwhat binding, and are very fit to cool an hot Stomach, and to ease the gnawing pains thereof; The Herb boyled in Wine is very helpful to stay the dissolutions of the Stomach: And the Milk that is taken from the Stalks when they are broken, given in drink, is beneficial to those that are short Winded and have a wheesing withal: *Pliny* saith that it hath caused the Gravel and Stone to be voided by Urine, and that the eating thereof helpeth a stinking breath: Three spoonfuls of the Juyce thereof taken in white Wine warmed, and some Oyl put thereto causeth Women in Travel to have so easie and speedy delivery, that they may be able to walk presently after: The said Juyce taken in warm drink, helpeth the Strangury and pains in making water.

The Decoction of the Leaves and Stalks, causeth abundance of Milk in Nurses, and their Children to be well coloured, and is good for those whose Milk doth curdle in their Breasts. The Juyce boiled or throughly heated with a little Oyl of Bitter Almonds in the Pill of a Pomegranate, and dropped into the Ears, is a sure Remedy for Deafness, singings, and all other Diseases in them. The Herb bruised or the Juyce is profitably applied to all hot Inflamations in the Eyes, or wheresoever else; and for Wheals, Blisters, or other the like eruptions of heat in the Skin; as also for the heat and itching of the Hemorrhoids, and the heat and sharpness of Humors in the Secret parts of man or Woman: The distilled water of the Herb, is not only effectual for all the Diseases aforesaid to be taken inwardly, with a little Sugar (which Medicine the daintiest Stomach will not refuse) but outwardly, by applying Cloathes or Spunges wetted therein: It is wonderful good for Women to wash their Faces therewith, to cleer the Skin, and give a lustre thereto.

Southernwood.

THis is so well known to be an Ordinary Inhabitant in our Gardens, that I shall not need to trouble you with any Description thereof. The Vertues are as followeth.

Time.

It Flowreth for the most part in *July* and *August*.

Vertues and use.

Dioscorides saith, That the Seed bruised, heated in warm Water & drunk, helpeth those that are Burstен, or troubled with Cramps, or Convulsions of the Sinews, the Sciatica, or difficulty in making water, and bringeth down Womens Courses. The same taken in Wine is an Antidote or Counter poyson against all deadly Poyson, and driveth away Serpents, and other Venemous Creatures; as also the smel of the Herb being Burnt, doth the same. The Oyl thereof anointed on the Backbone before the Fits of Agues come taketh them away: it taketh away Inflamations in the Eyes, if it be put with some part of a roasted Quince and boyled with a few crums of bread and applied. Boyled with Barley Meal it taketh away Pimples, Pushes, or Wheals, that rise in the Face or other part of the Body. The Seed as well as the dried Herb is often given to kill the Worms in Children: The Herb bruised and laid to, helpeth to draw forth Splinters, and Thorns out of the Flesh. The Ashes thereof dryeth up and healeth old Ulcers that are without Inflamation, although by the sharpness thereof it biteth sore and putteth them to sore pains: as also the Sores in the privy Parts of man or woman. The Ashes mingled with old Sallet Oyl, helpeth those that have their hair fallen and are bald, causing the hair to grow again either on the Head or Beard. *Durantes* saith, That the Oyl made of *Southernwood* and put among the Oyntments that are used against the French Disease, is very effectual, and likewise killeth Lice in the Head. The Distilled Water of the Herb is said to help them much that are troubled with the Stone, as also for the Diseases of the Spleen and Mother. The Germans commend it for a singular Wound Herb, and therefore call it *Stabwort*. It is held by all Writers, Antient and Modern to be more offensive to the stomach than Wormwood.

Burstен, Cramps & Convulsions, Sciatica, Strangury, womens Courses, Poyson, Agues, Inflamed Eyes, Pimples, Pushes & Wheals, Worms, Splinters & Thorns, Old Ulcers Sores in the Privities, Baldness, French pox, Stone, Spleen & Mother.

Spignel.

Description.

THe Roots of common *Spignel* do spread much and deep in the ground, many strings or branches growing from one Head which is hairy at the top, of a blackish brown colour on the outside and white within, smelling well, and of an Aromatical taste, from whence rise sundry long stalks of most fine cut Leaves like hairs, smaller than Dill, set thick on both sides of the Stalks, and of a good scent. Among these Leaves rise up round stif stalks, with few Joynts and Leaves at them, and at the tops an Umbel of fine pure white Flowers, at the edges whereof somtimes will be seen a shew of reddish blush colour, especially before they be full blown, and are succeeded by smal somwhat round Seed, bigger than the ordinary Fennel, and of a browner colour, devided into two parts, and crested on the back, as most of the Umbelliferous Seeds are.

Place.

It groweth wild in *Lancashire*, *Yorkshire*, and other Northern Countries, and is also planted in Gardens.

Vertues and Use.

Galen saith, The Roots of *Spignel* are available to provoke Urine and Womens Courses, but if too much thereof be taken it causeth Headach: The Roots boyled in Wine or Water and drunk, helpeth the Strangury, and stoppings of the Urine, the Wind, swellings and pains in the Stomach, pains of the Mother, and all Joynt Aches. If the Pouder of the Roots be mixed with Honey, and the same taken as a licking Medicine, it breaketh tough Flegm, and drieth up the Rhewm that falleth on the Lungs. The Roots are accounted very effectual against the stinging or biting of any Venemous Creature, and is one of the Ingredients in *Methridate*, and other Antidotes for the same,

Provokes Urine & Womens Courses, Strangury, pain in the stomach, Mother, Joynt aches; Tough flegm, Venemous Creatures.

Spleenwort, or Ceterach.

Description.

THe smooth *Spleenwort* from a black, threddy and bushy Root, sendeth forth many long single Leaves, cut in on both sides into round dents, almost to the middle, which is not so hard as that of Pollipodie, each devision being not alwaies set opposite unto the other, but between each, smooth, and of a light green on the upper side, and a dark yellowish roughness on the back, folding or rolling it self inward at the first springing up.

Place.

It groweth as well upon stone walls as moist and shadowy places about *Bristol* and other the West parts plentifully; as also on *Framingham* Castle, on *Beckonsfield* Church in *Barkshire*, at *Strowde* in *Kent*, and elsewhere, and abideth green all the Winter.

Vertues and Use.

It is generally used against infirmities of the Spleen, it helpeth the strangury and wasteth the Stone in the Bladder, and is good against the yellow Jaundice and the Hiccough; but the use of it in Women hindreth Conception. *Mathiolus* saith, That if a dram of the dust that is on the back side of the Leaves, be mixed with half a dram of Amber in Pouder, and taken with the Juyce of Purslane or Plantane, it will help the running of the Reins speedily, and that the Herb and Root being boyled and taken, helpeth all Melancholick Diseases, and those especially that arise from the French Disease. *Camerarius* saith, That the Distilled water thereof being drunk is very effectual against the Stone in the Reins and Bladder: and that the Ly that is made of the Ashes thereof being drunk for some time together, helpeth Splenetick persons: It is used in outward Remedies for the same purpose.

Spleen, strangury stone, yellow Jaundice; Running of the Reins, Melancholly Diseases.

Star-thistle.

Description.

THe common *Star-thistle* hath diverse long and narrow Leaves lying next the ground, cut or torn on the edges, somwhat deeply, into many almost even parts, soft or a little woolley all over the green, among which rise up diverse weak stalks parted into many Branches all lying, or leaning down to the ground, that it seemeth a pretty Bush, set with diverse the like devided Leaves up to the tops, where severally do stand long and small whitish green heads, set with very sharp and long white pricks (no part of the Plant being else prickly) which are somwhat yellowish: out of the middle whereof riseth the Flower composed of many small reddish purple threds; and in the Heads after the Flowers are past, come small whitish round Seed lying in down, as others do. The Root is small, long, and woody, perishing every yeer, and rising again of its own sowing.

Place.

It groweth wild in the Fields about *London* in many places, as at *Mile-end-Green*, in *Finsbury* Fields beyond the Wind-mils, and many other places.

Time.

Time.

It Flowreth early, and Seedeth in *July*, and somtimes in *August*.

Vertues and use.

The Seed of this *Star-thistle* made into Pouder and drunk in Wine, provoketh Urine, and helpeth to break the Stone, and drive it forth. The Root in Pouder and given in Wine and drunk, is good against the Plague or Pestilence, and drunk in the mornings fasting for some time together, is very profitable for a Fistula in any part of the Body. *Baptista Sardus* doth much commend the distilled Water hereof being drunk, to help the French Disease, to open Obstructions of the Liver, and clense the Blood from corrupted Humors, and is profitably given against Quotidian or Tertian Agues.

Provokes Urine, stone, plague, fistula, french pox Obstructions, Agues.

Strawberries. *fragaria*

fragum

THese are so well known through this Land, that they need no Description.

Time.

They Flower in *May* ordinarily, and the Fruit is ripe shortly after.

Vertues and use.

Strawberries when they are green, are cold and dry, but when they are ripe they are cold and moist: The Berries are excellent good to cool the Liver, the Blood and the Spleen, or an hot Chollerick stomach, to refresh & comfort the fainting Spirits, & to quench Thirst: They are good also for other Inflamations, yet it is not amiss to refrain them in a Feaver, lest by their putrefying in the Stomach they encrease the Fits. The Leavs and Roots boyled in Wine and Water and drunk, do likewise cool the Liver and Blood, and asswage all Inflamations in the Reins and bladder, provoketh Urine, and allayeth the heat and sharpness thereof: The same also being drunk stayeth the Bloody Flux, and Womens Courses, and helpeth the Swellings of the Spleen. The Water of the Berries carefully distilled is a Soveraign Remedy and Cordial in the panting and beating of the Heart, and is good for the yellow Jaundice. The Juyce dropped into foul Ulcers, or they washed therewith, or the Decoction of the Herb and Root, doth wonderfully clense, and help to cure them. Lotions and Gargles for sore Mouthes, or Ulcers therin, or in the privy Parts, or elswhere, are made with the Leaves and Roots hereof; which is also good to fasten loose Teeth, and to heal spungy foul Gums: It helpeth also to stay Catarrhs or Defluxions of Rhewm into the Mouth, Throat, Teeth, or Eyes; The Juyce or Water is singular good for hot and red Inflamed Eyes, if dropped into them, or they bathed therewith; it is also of excellent property for all Pushes, Wheals, and other breakings forth of hot & sharp Humors in the Face and Hands, or other parts of the Body, to bath them therewith; and to take away any redness in the Face, or Spots, or other Deformities in the Skin, and to make it cleer and smooth. Some use this Medicine, Take so many *Strawberries* as you shall think fitting, and put them into a Distillatory or body of Glass fit for them, which being well closed, set it in a bed of Horsdung for twelve or fourteen daies, and afterwards distill it carefully and keep it for your use: It is an excellent water for hot inflamed Eyes, and to take away any film or Skin that beginneth to grow over them, and for such other defects in them as may be helped by any outward Medicine.

Venus owns the Herb.

Cool the Liver, Spleen, & stomach, Quench Thirst, Inflamations, Provoke Urine, stay the Bloody flux & Womens Courses, panting of the heart Yellow Jaundice, Ulcers, sore Mouths or Ulcers in the privities Loos teeth, Catarrhs & Defluxions, Inflamed Eyes

pushes & wheals Red face, Deformities in the skin, films over the Eyes.

Succory. *Cichorium* σκίχωριον

Description.

THe Garden *Succory* hath longer and narrower Leaves than *Endive*, and more cut in or torn on the edges, and the Root abideth many yeers: It beareth also blew Flowers like *Endive*, and the Seed is hardly distinguished from the Seed of the smooth or ordinary *Endive*.

The wild *Succory* hath diverse long Leaves lying on the ground very much cut in or torn on the edges, on both sides even to the middle rib ending in a point; somtimes it hath a red Rib down the middle of the Leaves, from among which riseth up a hard, round, woody stalk spreading into many Branches, set with smaller and lesser devided Leaves on them up to the tops where stand the Flowers, which are like the Garden kind as the Seed is also (only take notice that the Flowers of the Garden kind are gone in one Sunny day, they being so cold that they are not able to endure the Beams of the Sun; and therfore most delight in the shadow.) The Root is white, but more hard and woody than the Garden kind: The whol Plant is exceeding bitter.

Place.

This groweth in many places of our Land, in wast, untilled, and barren Fields. The other only in Gardens.

Vertues and Use.

Garden *Succory* as it is more dry, and less cold than Endive, so it openeth more: An handful of the Leavs or Roots boyled in Wine or Water, and a draught thereof drunk fasting, driveth forth Cholerick and Flegmatick Humors; openeth Obstructions of the Liver Gall, and Spleen, helpeth the yellow Jaundice, the Heat of the Reins and of the Urin,

Chollerick & flegmatick Humors, Obstructions, Yellow Jaundice, Hot Reins & Urine,

Dropsie, the Dropsie also, and those that have an evil disposition in their Bodies by reason of long sickness, evil Diet &c. which the Greeks call Καχεξία, *Cachexia*. A Decoction thereof made with Wine and drunk, is very effectual against long lingring Agues: and a dram of the Seed in Pouder drunk in Wine before the Fit of an Ague, helpeth to drive it away: The Distilled Water of the Herb and Flowers (if you can take them in time) hath the properties, and is especial good for hot Stomachs, and in Agues, either Pestilential or of long continuance, for swounings and Passions of the Heart, for the heat and Headach in Children, and to the blood and Liver. The said water or the Juyce, or the bruised Leaves applied outwardly, allayeth Swellings, Inflamations, St. Anthonies Fire, Pushes, Wheals, and Pimples, especially used with a little Vinegar, as also to wash pestiferous Sores. The said Water is very effectual for sore Eyes that are inflamed with redness, and for Nurses Breasts that are pained by the abundance of Milk.

The wild *Succory* as it is more bitter, so it is more strengthning to the Stomach and Liver.

Agues, passions of the Heart, Headach, Swellings & Inflamations, St. Anthonies fires, pushes, wheals & pimples, Inflamed Eyes, Too much Milk.

English Tobacco.

Description.

THis riseth up with a thick round Stalk about two foot high, whereon do grow thick fat green Leaves, nothing so large as the other *Indian* kinds, somwhat round pointed also, and nothing dented about the edges: The Stalk brancheth forth, and beareth at the tops divers Flowers set in green Husks, like the other but nothing so large, scarce standing above the Brims of the Husks, round pointed also, and of a greenish yellow colour. The Seed that followeth is not so bright, but larger, contained in the like great Heads. The Roots are neither so great, nor woody, and perishing every yeer with the hard Frosts in Winter, but riseth generally of its own sowing.

Place.

This came from some parts of *Brassile* as is thought, and is more familier to our Country, than any of the other sorts, early giving ripe Seed, which the others seldom do.

Time.

It Flowreth from *June* sometimes to the end of *August*, or later, and the Seed ripeneth in the mean time.

Vertues and Use.

It is found by good experience to be available to expectorate tough Flegm from the Stomach, Chest, and Lungs: The Juyce thereof made into a Syrup, or the distilled water of the Herb drunk with some Sugar, or without if you will: Or the smoke taken by a Pipe as is usual, but fasting. The same helpeth to expel Worms in the Stomach and Belly, and to ease the pains in the Head or Meagrim, and the griping pains in the Bowels: It is profitable for those that are troubled with the Stone in the Kidneys, both to ease pains and by provoking Urine to expel Gravel and the Stone ingendred therein, and hath been found very effectual to expel windiness and other Humors which cause the strangling of the Mother: The Seed hereof is very effectual to help the Toothach, and the Ashes of the burnt Herb, to clense the Gums, and make the Teeth white. The Herb bruised and applied to the place grieved with the Kings Evil (as they call it) helpeth it in nine or ten daies effectually: *Monardus* saith it is a Counter-poyson for the biting of any Venemous Creature; the Herb also being outwardly applied to the hurt place: The distilled water is often given with some Sugar before the Fit of an Ague to lessen them, and take them away in three or four times using. If the Distilled fieces of the Herb having been bruised before the Distillation, and not distilled dry be set in warm dung for fourteen daies, and afterwards hung up in a Bag in a Wine Celler; that liquor that distilleth therefrom is singular good to use for Cramps, Aches, the Gout, and Sciatica, and to heal Itches, Scabs, and running Ulcers, Cankers, and foul Sores whatsoever: The Juyce is also good for all the said griefs, and likewise to kill Lice in Childrens Heads. The green Herb bruised and applied to any green Wound, cureth any fresh Wound or cut whersoever: and the Juyce put into old Sores both clenseth and healeth them. There is also made hereof a singular good Salve to help Impostumes, hard Tumors, and other swellings by blows or falls.

worms, Meagrim, pains in the Bowels, Gravel & Stone, wind, Mother, toothach, Kings Evil, Venemous Creature, Ague, Cramps & Aches, Sciatica, Itch, Scabs & Ulcers, Cankers & foul Sores, Lice, Fresh wound, Old sores, Impostums & hard Swellings.

The Tamarisk-Tree.

THis is so well known in the places where it grows that it needeth no Description.

Time.

It Flowreth about the end of *May*, or in *June*, and the Seed is ripe and blown away in the beginning of *September*.

Vertues and Use.

If the Root, Leaves, or yong Branches be boyled in Wine or Vinegar and drunk, and applied outwardly, it is very powerful against the hardness of the spleen. The Leaves boyled in Wine and drunk is good to stay the bleeding of the Hemorrhoidal Veins, the spitting of Blood, and Womens too abounding Courses, and helpeth the Jaundice, the Chollick, and the

Spleen, Hemorrhoids, spitting Blood, womens Courses, Jaundice, & Chollick

Venemous Serpents, the bitings of all Venemous Serpents, except the Aſp. The Bark is as effectual if not more to all the purpoſes aforeſaid; and both it and the Leaves boyled in Wine, and the Mouth and Teeth waſhed therewith helpeth the Toothach; being dropped into the Ears eaſeth the pains, and is good for the redneſs and watering of the Eyes. The ſaid Decoction with ſome Honey put thereto is good to ſtay Gangrenes and fretting Ulcers, and to waſh thoſe that are ſubject to Nits and Lice. The Wood is very effectual to conſume the Spleen, and therefore to drink out of Cups and Cans made thereof is good for Splenetick perſons. The Aſhes of the Wood are uſed for all the purpoſes aforeſaid, and beſides doth quickly help the Bliſters raiſed by Burnings or Scaldings, by fire or water. *Alpinus* and *Veſlingius* do affirm, That the *Ægyptians* do with as good ſucceſs uſe the Wood hereof to cure the French Diſeaſe, as others do *Lignum Vitæ*, or *Gujacum*; and give it alſo to ſuch as are poſſeſſed with Lepry, Scabs, Puſhes, Ulcers, or the like, and is available alſo to help the Dropſie, ariſing from the hardneſs and Obſtruction of the Spleen, as alſo for Melancholly, and the black Jaundice that ariſeth thereof.

Toothach, Pain in the Ears, watering Eyes, Gangrenes & Ulcers, Nits & Lice, Spleen, Burning & Scalding, French Pox, Lepry & Scabs, Dropſie, Melancholly, Black Jaundice.

Garden Tanſie.

Tanacetum vel Athanaſia

THis alſo is ſo well known, that it needeth no Deſcription.

Time.

It Flowreth in *June* and *July*.

Vertues and Uſe.

Thee Decoction of the common Tanſie, or the Juyce drunk in Wine is a ſingular Remedy for all the griefs that come by ſtopping of the Urine, helpeth the Strangury and thoſe that have weak Reins and Kidneys: It is alſo very profitable to diſſolve and expel Wind in the Stomach, Belly, or Bowels, to procure Womens Courſes, and expel windineſs in the Matrix. If it be bruiſed and often ſmelled unto, as alſo applied to the lower part of the Belly, it is very profitable for ſuch Women as are given to miſcarry in Childbearing, to cauſe them to go out their full time: It is uſed alſo againſt the Stone in the Reins, eſpecially to men. The Herb fried with Eggs (as is accuſtomed in the Spring time) which is called a Tanſie, helpeth to digeſt, and carry downward thoſe bad Humors that trouble the Stomach: The Seed is very profitably given to Children for the Worms, and the Juyce in Drink is as effectual. Being boyled in Oyl it is good for the ſinews ſhrunk by Cramps, or pained with cold, if thereto applied.

Diſury, Strangury, Reins, Kidneys, wind, Womb, Miſcarriage, Stone, Stomach, Worms, Cramps.

Dame *Venus* was minded to pleaſure Women with Child by this Herb, for there grows not an Herb fitter for their uſes than this is, it is juſt as though it were cut out for the purpoſe, the Herb bruiſed and applied to the Navil ſtaies miſcarriage, I know no Herb like it for that uſe; boyled in ordinary Beer, and the Decoction drunk, doth the like, and if her Womb be not as ſhe would have, this Decoction will make it as ſhe would have it, or at leaſt as ſhe ſhould have it; let thoſe Women that deſire Children love this Herb, 'tis their beſt Companion, their Husband excepted. Alſo it conſumes the Flegmatick Humors, the cold and moiſt conſtitution of Winter moſt uſually infects the Body of Man with, and that was the firſt reaſon of eating Tanſies in the Spring, at laſt the world being over run with Popery, a Monſter called *Superſtition* perks up his head, and as a juſt Judgment of God obſcures the bright beams of Knowledg by his diſmal looks (Pyſitians ſeeing the Pope and his Imps ſelfiſh they began to be ſo too) and now forſooth Tanſies muſt be eaten only on Palm and Eaſter Sundaies, and their neighbor daies; as laſt Superſtion being too hot to hold, and the ſelfiſhneſs of Phyſitians walking in the clouds, after the Fryars and Monks had made the people ignorant, the Superſtion of the time was found out, but the Vertue of the Herb hidden, and now 'tis almoſt, if not altogether, left off: Surely our Phyſitians are beholding to none ſo much as they are to Monks and Fryars, for want of eating this Herb in Spring, make people ſickly in Summer, and that makes work for the Phyſitian. If it be againſt any man or womans Conſcience to eat a Tanſie in the Spring, I am as unwilling to burden their conſciences as I am that they ſhould burden mine, they may boyl it in Wine and drink the Decoction, it will work the ſame effect.

VVild Tanſie, or Silver-weed.

Argentina

THis alſo is ſo well known that it needeth no Deſcription.

Place.

It groweth almoſt in every place.

Time.

It Flowreth in *June* and *July*.

Vertues and uſe.

Wild Tanſie ſtayeth the Lask, and all Fluxes of Blood in men or women, which ſome ſay it will do if the green Herb be worn in the ſhoos, ſo it be next the Skin, and 'tis true enough that 'twil ſtop the Terms if worn ſo, and the Whites too for ought I know. It ſtayeth alſo ſpitting or Vomiting of Blood. The

Flux, Terms, ſtops, Spitting Vomiting of Blood,

Whites, Ruptures, Belly-ach, Sciatica, Joynts, toothach, Loos teeth Gums, Ulcers in the Mouth wounds, Sore Legs, pimples, Freckles, Sunburning.

Pouder of the dried Herb taken in some of the distilled Water helpeth the Whites in women, but more especially if a little Coral and Ivory in Pouder be put to it: It is also much commended to help Children that are burstten, and have a Rupture being boyled in Water and Salt. Being boyled in Wine and drunk, it easeth the griping pains of the Bowels, and is good for the Sciatica and Joynt Aches. The same boyled in Vinegar with Honey and Allum, and gargled in the Mouth, easeth the pains of the Toothach, fastneth loose Teeth, helpeth the Gums that are sore, and setleth the pallat of the Mouth in its place when it is fallen down: It clenseth and healeth the Ulcers in the Mouth or secret parts, and is very good for inward Wounds, and to close the lips of green Wounds; as also to heal old, moist, corrupt running Sores in the Legs or elswhere: Being bruised and applied to the Soles of the Feet, and the Hand-wrests, it wonderfully cooleth the hot fits of Agues, be they never so violent. The distilled water clenseth the skin of all discolourings therein, as Morphew, Sunburning &c. as also Pimples, Freckles, and the like; and dropped into the Eyes or cloaths wet therein and applied, taketh away the heat, and Inflamations in them.

Now Dame *Venus* hath fitted women with two Herbs of one name, one to help Conception, the other to maintain beauty, and what more can be expected of her? What now remains for you but to love your Husbands, and not to be wanting to your poor Neighbors.

Thistles.

OF these there are many kinds growing here in *England*, which are so well known that they need no Description: Their difference is easily known by the places where they grow: *Viz.*

Place.

Some grow in Fields, some in Meadows, and some among the Corn: others, on Heaths, Greens, and waste grounds in many places.

Time.

They all Flower in *July* and *August*, and their Seed is ripe quickly after.

Vertues and Use.

Dissury, Ill smel, stinking Breath, Stomach.

All these Thistles are good to provoke Urine, and to amend the stinking smell thereof; as also the rank smel of the Armpits, or of the whol Body, being boyled in Wine and drunk; and are said also to help a stinking breath and to strengthen the Stomach. *Pliny* saith that the Juyce bathed on the place that wanteth hair, it being fallen off, will cause it to grow again speedily.

Sure *Mars* rules it, it is such a prickly business.

The Melancholly Thistle.

Description.

THis riseth up with a tender single hoary green Stalk, bearing thereon four or five long hoary green Leaves, dented about the edges, the points whereof are little or nothing prickly, and at the top usually but one Head, yet somtimes from the bosom of the uppermost Leaf there shooteth forth another smaller Head, scaly and somwhat prickly; with many reddish Purple Thrums or Threds in the middle, which being gathered fresh will keep the colour a long time, and fadeth not from the Stalk in a long time, while it perfecteth the Seed, which is of a mean bigness lying in the Down: The Root hath many long Strings fastned to the Head, or upper part, which is blackish and perisheth not.

There is another sort little differing from the former, but that the Leaves are more green above and more hoary underneath; and the Stalk being about two foot high beareth but one large scaly Head, with threds and Seeds as the former.

Place.

They grow in many moist Meadows of this Land, as well in these Southern, as in the Northern parts.

Time.

They Flower about *July*, or *August*, and their Seed ripeneth quickly after.

Vertues and Use.

Their Vertues are but a few, but those not to be despised, for the Decoction of the Thistle in Wine being drunk, expels superfluous Melancholly out of the Body, and make a man as merry as a Cricket, superfluous Melancholly causeth care, fear, sadness, despair, envy, and many evils more besides, but Religion, teacheth to wait upon Gods Providence, and cast our care upon Him, who careth for us; what a fine thing were it if men and women could live so? and yet seven yeers care and fear makes a man never the wiser, nor a farthing the richer. *Dioscorides* saith, the Root born about one doth the like, and removes all diseases of Melancholly. Modern Writers laugh at him, let them laugh that wins, my Opinion is, that 'tis the best Remedy against all Melancholly Diseases that grows, they that please may use it: 'tis under *Capricorn*, and therefore under both *Saturn* and *Mars*, one rids Melancholly by Sympathy, the other by Antipathy.

Melancholly.

Our

Our Ladies Thistle.

Spina alba Bodoguas.

Description.

THis hath diverse very large and broad Leaves lying on the ground, cut in, and as it were crumpled, but somwhat hairy on the edges, of a white green shining colour, wherein are many lines and strakes of a milky white colour, running all over, and set with many sharp and stiff prickles all about; Among which riseth up one or more strong, round, and prickly stalks, set full of the like Leaves up to the top, where at the end of every Branch, cometh forth a great prickly Thistle like head, strongly armed with pricks, and with bright purple Thrums rising out of the middle of them; after they are past, the Seed groweth in the said heads, lying in a great deal of soft white Down, which is somwhat flattish and shining, large and brown. The Root is great, spreading in the ground, with many strings, and smal fibres fastned thereto. All the whol Plant is bitter in tast.

Place.

It is frequent on the Bank of almost every Ditch.

Time.

It Flowreth and Seedeth in *June*, *July*, and *August*.

Vertues and Use.

Our *Ladies Thistle* is thought to be as effectual as *Carduus Benedictus* for Agues, and to prevent and cure infection of the Plague, as also to open Obstructions of the Liver and Spleen; and thereby is good against the Jaundice; It provoketh Urine, breaketh and expelleth the Stone, and is good for the Dropsie: It is effectual also for the pains in the sides, and many other inward pains and gripings: The Seed and distilled water are held powerful to all the purposes aforesaid; and besides, it is often applied both inwardly to drink, and outwardly with Cloathes or Spunges to the Region of the Liver to cool the distemperature thereof, and to the Region of the Heart, against swounings and passions of it.

gues, Plague, Obstructions, Liver Spleen, Stone, Dropsie, Stitches in the side, Liver, Blood.

It clenseth the blood exceedingly, and in Spring if you please to boyl the tender Plant, (but cut off the Prickles, unless you have a mind to choak your self), it will change your blood as the season changes, and that's the way to be safe, as to change as the times change is the way to live secure, and that Flatterers and Weather-cocks know wel enough.

The Woolley, or Cotton Thistle.

Description.

THis hath many large Leaves lying on the ground, somwhat cut in, and as it were crumpled on the edges, of a green colour on the upper side, but covered over with a long hairy Wool or Cottony Down, set with most sharp and cruel pricks; from the middle of whose heads of Flowers come forth many purplish crimson threds, and somtimes white, although but seldom: The Seed that followeth in these white downy heads is somwhat large, long, and round, resembling the Seed of Ladies Thistle, but paler: The Root is great, and thick, spreading much, yet usually dieth after Seed time.

Place.

It groweth on diverse Ditch Banks, and in the Cornfields and High-wayes, generally throughout the Land; and is often found growing in Gardens.

Time.

It Flowreth and beareth Seed about the end of Summer, when other Thistles do Flower and Seed.

Vertues and use.

Dioscorides and *Pliny* write, That the Leavs and Roots hereof taken in drink, helpeth those that have a Crick in their Neck, that they cannot turn it unless they turn their whol Body. *Galen* saith, That the Root and Leaves hereof are good for such persons that have their Bodies drawn together by some Spasm or Convulsion, or other Infirmities, as the Rickets (or as the Colledg of Physitians would have it, the *Rachites*, about which name they have quarrel'd sufficiently) in Children; being a Disease that hindereth their growth, by binding their Nerves, Ligaments, and whol structure of their Body.

The Fullers Thistle, or Teasel.

Dipsacus sativus Silv. lib. 16. Labrum Veneris Iuga pastoris

THis is so well known that it needeth no Description, being used by the Cloathworkers.

The wild Teasel is in all things like the former but that the prickles are smal, soft, and

upright, not hooked or stiff; and the Flowers of this are of fine blush or pale Carnation colour, but of the Manured kind whitish.

Place.

The first groweth being sown in Gardens or Fields for the use of Cloathworkers: The other neer Ditches and Cills of water in many places of this Land.

Time.

They Flower in *July*, and are ripe in the end of *August*.

Vertues and Use.

Dioscorides saith, That the Root bruised and boyled in Wine until it be thick, and kept in a brazen Vessel or Pot, ond after spread as a Salve and applied to the Fundament, doth heal the clefts thereof, as also Cankers and Fistulaes therein, as also taketh away Warts and Wens: The Juyce of the Leaves dropped into the Ears, killeth Worms in them. The distilled water of the Leaves dropped into the Eyes, taketh away redness and mists in them that hinder the sight; and is often used by women to preserve their beauty, and to take away redness and Inflamations, and all other heat or discolourings.

Treacle Mustard.

Description.

THis riseth up with a hard round stalke about a foot high, parted into some branches, having divers soft green leaves somewhat long and narrow set thereon, waved, but not cut in on the edges, broadest towards the ends, and somewhat round pointed: The flowers are white that grow at the tops of the branches, spike fashion one above another, after which come large round pouches, parted in the middle with a furrow, having one blackish brown seed in either side, somewhat sharp in tast, and smelling of Garlick, especially in the fields where it is naturall, but not so much in gardens: The roots are small and threddy, perishing every yeare. And here give me leave to adde Methridate Mustard, although it may seem more properly by the name to belong to the Alphabet *M*.

Methridate Mustard.

THis groweth higher then the former, spreading more and longer branches, whose leaves are smaller and narrower, sometimes unevenly dented about the edges; the Flowers are smal and white, growing on long branches, with much smaller and rounder seed vessels after them, and parted in the same manner, having smaller browne seeds then the former, and much sharper in taste: The root perisheth after seed time, but abideth the first winter after the springing.

Place.

They grow in sundry places of this Land, as halfe a mile from Hatfield by the river side under a hedge as you go to Hatfield, and in the street of Peckham on Surry side.

Time.

They flowre and seed from *May* to *August*.

Vertues and Use.

These Mustards are said to purge the body both upwards and downwards, and procureth Womens Courses so abundantly, that it suffocateth the birth: It breaketh inward Impostumes being taken inwardly, and used in Glisters, helpeth the *Sciatica*, the seed applied outwardly doth the same. It is an especiall ingredient unto Methridate and Treacle, being of it selfe an Antidote resisting poyson, venome, and putrefaction: It is also availeable in many causes for which the common Mustard is used, but somewhat weaker.

The Black-Thorne, or, Sloe-Bush.

THis is so well knowne, that it needeth no description.

Place.

It groweth in every place and Countrey, in the hedges and borders of fields.

Time.

It flowreth in *Aprill*, and sometimes in *March*, but ripeneth the fruit after all other plums whatsoever, and is not fit to be eaten until the Autumne frost have mellowed it.

Vertues and Use.

All the parts of the Sloe-Bush are binding, cooling, and drying, and all effectuall to stay bleeding at the nose and mouth, or any other place; the Lask of the belly, or stomach, or the Eloody Flux, the two much abounding of womens Courses, and helpeth to ease the paines in the sides, bowels, and guts, that come by over-much scowring, to drink the decoction of the barke of the roots, or more usually the decoction of the Berries either fresh or dried. The Conserve is also of very much use, and most familiarly taken for the purposes aforesaid: But the distilled water of the Flowers first steeped in Sack for a night, and drawne there-from by the heat of *Balneum Angliceabaths*, is a most certaine remedy tried and approved to ease all manner of gnawings in the stomach, the sides and bowels, or

Binds, cools, dries Bleeding Flux, Bloody Flux, gnawings in bowels and stomach.

or any griping pains in any of them, to drink a ſmal quantity when the extremety of pain is upon them: The Leaves alſo are good to make Lotions, to gargle and waſh the Mouth and Throat, wherein are Swellings, Sores, or Kernels, and to ſtay the Defluxions of Rhewm to the Eyes or other parts, as alſo to cool the heat and Inflamations in them, and to eaſe hot pains of the Head, to bath the Forehead and Temples therewith. The ſimple diſtilled water of the Flowers is very effectual for the ſaid purpoſes, and is the condenſate Juyce of the Sloes. The diſtilled water of the green Berries is uſed alſo for the ſaid effects.

Sore Mouth & Throat,

Headach.

Thoroughwax.

Perfoliata.

Deſcription.

THe common *Throughwax* ſendeth forth one ſtraight round Stalk, and ſomtimes more, two foot high and better, whoſe lower Leaves being of a blewiſh green colour are ſmaller and narrower than thoſe up higher, and ſtand cloſe thereto, not compaſſing it; but as they grow higher, they do more and more encompaſs the Stalk, until it wholly (as it were) paſs through them, branching toward the top into many parts, where the Leaves grow ſmaller again, every one ſtanding ſingly, and never two at any Joynt: The Flowers are very ſmal and yellow, ſtanding in tufts at the heads of the Branches, where afterwards grow the Seed, ſmal and blackiſh, many thick thruſt together: The Root is ſmal, long, and woody, periſhing every yeer after Seed time, and riſing again plentifully of its own ſowing,

Place.

al Aſpeby It is found growing in many Corn Fields, and Paſture grounds in this Land.

Time.

It Flowreth in *July*, and the Seed is ripe in *Auguſt*.

Vertues and uſe.

Thoroughwax is of a ſingular good uſe, for all ſorts of Bruiſes and Wounds either inward or outward, and old Ulcers and Sores likewiſe, if the Decoction of the Herb with water or Wine be drunk, and the places waſhed therwith, or the Juyce or green Herb bruiſed or boyled either by it ſelf, or with other Herbs in Oyl or Hogs Greaſe, to be made into an Oyntment to ſerve all the yeer: The Decoction of the Herb, or the Pouder of the dried Herb taken inwardly, and the ſame or the green Leaves bruiſed and applied outwardly, is ſingular good to cure Ruptures and Burſtings, eſpecially in Children, before it be two old. Being alſo applied with a little Flower and Wax to Childrens Navils that ſtick forth it helpeth them.

Bruiſes, Wounds, Ulcers,

Ruptures, Navils ſticking out.

Tormentil. *Tormentilla.*

Deſcription.

THis hath many reddiſh ſlender weak Branches riſing from the Root, lying upon the ground, or rather leaning than ſtanding upright, with many ſhort Leaves that ſtand cloſer to the Stalks than Cinkfoyl doth (which this is very like) with the Footſtalk encompaſſing the Branches in ſeveral places, but thoſe that grow next to the ground are ſet upon long Footſtalks, each whereof are like the Leaves of Cinkfoyl, but ſomwhat longer and leſſer, and dented about the edges, many of them devided but into five Leaves, but moſt of them into ſevens whence it is alſo called *Setfoyl*; yet ſome may have ſix and ſome eight, according to the fertility of the Soyl: At the tops of the Branches ſtand diverſe ſmal yellow Flowers conſiſting of five Leaves, like thoſe of Cinkfoyl, but ſmaller. The Root is ſmaller than Biſtort, ſomwhat thick, but blacker without, and not ſo red within, yet ſomtimes a little crooked, having many blackiſh fibres thereat.

Place.

It groweth as well in Woods and ſhadowy places, as in the open Champion Country, about the borders of Fields in many places of this Land, and almoſt in every Broom Field in *Eſſex*.

Time.

It Flowreth all the Summer long.

Vertues and uſe.

Tormentil is moſt excellent to ſtay all kind of Fluxes of Blood or Humors, in man or woman, whether at Noſe, Mouth, Belly, or any Wound in the Veins or elſwhere: The Juyce of the Herb or Root taken in drink, not only reſiſteth all Poyſon and Venom of any Creature, but of the Plague it ſelf, and Peſtilential Feavers, and contagious Diſeaſes, as the Pox, Meaſels, Purples, &c. expelling the Venom and Infection from the Heart by ſweating, if the green Root be not at hand to be had, the Pouder of the dry Root is as effectual, a dram thereof being taken every morning: The Decoction likewiſe of the Herbs and Roots made in Wine and drunk worketh the ſame effect; and ſo doth the diſtilled water of the Herb and Root being ſteeped in Wine for a night, and then diſtilled in *Balneo Mariæ*. This Water thus diſtilled taken with ſome Venice Treacle, and the party preſently laid to ſweat will certainly (with Gods help) expel any Venom or poyſon, or the Plague, Feaver, &c. for it is an ingredient of eſpecial reſpect in all Antidotes or Counterpoyſons. There is not found any Root more effectual to

Flux, Bleeding, Veins cut, terms ſtops, Feavers, Peſtilence, Smal pox Meaſels Purples,

Poyſon

help any Flux of the Belly, Stomach, Spleen, or Blood than this, to be taken inwardly, or applied outwardly. The Juyce taken doth wonderfully open Obstructions of the Liver and Lungs, and thereby in short space helpeth the yellow Jaundice. Some use to make Cakes hereof as well to stay all Fluxes, as to restrain all Chollerick Belchings, and much Vomitings with Loathings in the Stomach: The Pouder of the dried Root made up with the white of an Egg and baked upon a hot Tile will do it.

Spleen, Blood Inflamed, Liver, Lungs, Yellow Jaundice,

Andreus Valesius is of opinion, That the Decoction of this Root is no less effectual to cure the French Pox, than *Guajacum*, or *China* and 'tis not unlikely, because it so mightily resisteth putrefaction: *Lobel* saith, That *Rondelitius* used it as *Hermodactils* for Joynt-aches: The Pouder also, or Decoction to be drunk, or to sit therein as a Bath is an assured Remedy against abortion in Women, if it proceed from the over Fluxibility or weakness of the inward retentive faculty: as also a Plaister made therewith and Vinegar applyed to the Reins of the Back, doth much help not only this but also those that cannot hold their Water, the Pouder being taken in the Juyce of Plantane; and it is also commended against the worms in Children. It is very powerful in Ruptures and Burstings: as also for Bruises and Falls, to be used as well outward as inwardly. The Root hereof made up with Pellitory of Spain and Allum, and put into an hollow Tooth, not only asswageth the pain, but staieth the Flux of Humors which caused it, *Tormentil* is no less effectual and powerful a Remedy for outward Wounds, Sores, and Hurts, than for inward, and is therefore a special Ingredient meet to be used in all Wound drinks, Lotions, and Injections for foul corrupt rotten Sores and Ulcers, of the Mouth, Secrets, or other parts of the Body. And to put either the Juyce or Pouder of the Root into such Oyntments, Plaisters, and such things that are to be applied to Wounds and Sores: it also dissolveth all Knots, Kernels, and hardness gathered about the Ears, the Throat, and Jaws and the Kings Evil if the Leaves and Roots be bruised and applied thereto: The same also easeth the pains of the Sciatica or Hip-gout by restraining the sharp Humors that flow thereto. The Juyce of the Leaves and Roots used with a little Vinegar, is also a special Remedy against the running Sores of the Head or other parts, Scabs also and the Itch, or any such eruptions in the Skin proceeding of Salt and sharp Humors: The same also is effectual for the Piles or Hemorrhoids if they be washed and bathed therwith, or with the Distilled water of the Herb and Roots: It is found also helpful to dry up any sharp Rhewm that distilleth from the Head into the Eyes causing, redness, pain, waterings, Itchings, or the like, if a little prepared *Tutia*, or white *Amber* be used with the Distilled water hereof: Many Women use this Water as a secret to help themselves and others when they are troubled with the too much flowing of the Whites or Reds, both to drink it, and inject it with a Syringe. And here's enough, only remember, the *Sun* challengeth the Herb.

ἡλιοτρόπιον ab ἥλιος ἐλίσσω, νοῦσος σκορπίουρον. Vernica qa valet contra vermes.

Description.

THe greater *Turnsole* riseth up with one upright Stalk about a foot high or more, deviding it self almost from the bottom into diverse smaller Branches of a hoary colour: at each Joynt of the Stalk and Branches grow two smal broad Leaves somwhat white or hoary also: At the tops of the Stalks and Branches stand many small white Flowers consisting of four and somtimes five very small Leaves, set in order one above another, upon a smal crooked spike which turneth inwards like a bowed finger, opening by degrees as the Flowers blow open; after which in their places come smal corner'd Seed, four for the most part standing together. The Root is smal and threddy perishing every yeer, and the Seed shedding every yeer, raiseth it again the next Spring.

Place.

It groweth in Gardens, and Flowreth and Seedeth with us in *England*, notwithstanding it is not natural to this Land, but to *Italy*, *Spain*, and *France*, where it groweth plentifully.

Vertues and Use.

Dioscorides saith, That a good Handful of this, which is called the greater *Turnsole*, boyled in Water and drunk, purgeth both Choller and Flegm: And boyled with Cummin and drunk, helpeth the Stone in the Reins, Kidneys, or Bladder, provoketh Urine and Womens Courses, and causeth an easie and speedy delivery in Childbirth. The Leaves bruised and applied to places pained with the Gout, or that have been out of joynt and newly set are full of pain, do give much ease. The Seed, and the Juyce of the Leaves also being rubbed with a little Salt upon Warts, Wens, and other hard Kernels in the Face, Eyelids, or any other part of the Body, will by often using take them away.

'Tis an Herb of the *Sun*, and a good one too.

Choller, Flegm, Stons, Disury, Terms provokes, Gout, Warts, Wens, Disjunctures.

Meadow

Meadow Trefoyl, or Honeysuckles. *Trifolium* Τριφύλλον

THese are so well known, especially by the name of Honeysuckles, White and Red, that I need not describe them.

Place.

They grow almost every where in this Land.

Vertues and use.

Dodoneus saith, The Leaves and Flowers are good to ease the griping pains of the Guts, *Belly-ach,* the Herb being boyled and used in a Clyster: If the Herb be made into a Pultis and applied to Inflamations, it will ease them. The Juyce *Inflamations,* dropped into the Eyes is a familier Medicine with many Country people to take away the *Pin & Web,* Pin and Web (as they call it) in the Eyes, it also allayeth the Heat and bloodshooting of *Eyes,* them: Country people do also in many places drink the Juyce hereof against the biting of an Adder, and having boyled the Herb in water, they first wash the place with the Decoction, and then lay some of the Herb also to the hurt place. The Herb also boyled in Swines Grease and so made into an Oyntment, is good to apply to the biting of any Venemous Crea- *Venemous Beast,* ture. The Herb also bruised and heated between two Tiles, and applied hot to the share, causeth them to make water who had it stop'd *Disury,* before: It is held likewise to be good for Wounds, and to take away Scars. The De- *Wounds, Scars,* coction of the Herb and Flowers with the Seed and Root taken for some time, helpeth Women that are troubled with the Whites. *Whites,* The Seed and Flowers boyled in Water, and after made into a Pultis with some Oyl and applied, helpeth hard Swellings and Impo- *Swellings,* stumes.

Apostums. Of *Trefoyl* or three leaved Grass, there are very many sorts described by Authors, but one I have found out which I never red of, the Leaf is but small and it beareth a small yellow Flower, in the midst of each Leaf of the Herb, is a perfect picture of a Heart in red colour, it grows plentifully in a Field between *Longford* and *Bow*; also I found one Root in the High-way between *Chadwel* and *Rumford* in *Essex*, as also another in the High-way between *Horn-Church* and *Upminster* in the same County, the taste is something more hot and spicy than the taste of the rest is.

Tutsan, or Park Leaves.

Description.

THis hath many browniſh shining round Stalks, crested all the length thereof, rising to be two and sometimes three foot high, branching forth even from the bottom, having diverse Joynts, and at each of them two fair large Leaves standing, of a dark blewish green colour on the upper side, and of a yellowish green underneath, turning reddish towards *Autumn*, but abiding on the Branches all the Winter: At the tops of the Stalks and Branches stand large yellow Flowers, and Heads with Seed, which being greenish at the first, and afterwards reddish, turn to be of a blackish purple colour when they are through ripe, with smal browniſh Seed within them, and then yield a reddish Juyce or Liquor, of a reasonable good scent, somwhat resinous, and of an harsh or stiptich taste, as the Leaves also and the Flowers be, although much less, but do not yield such a cleer Claret Wine Liquor as some say it doth: The Root is browniſh, somwhat great, hard, and woody, spreading well in the ground.

Place.

It groweth in many Woods, Groves, and Wooddy Grounds, as Parks and Forrests, and by Hedg sides in many places of this Land, as in Hampsted Wood, by *Railey* in *Essex*, in the Wild of *Kent*, and in many other places needless to recite.

Time.

It Flowreth later than St. Johns, or St. Peters wort.

Vertues and use.

Tutsan purgeth Chollerick Humors as St. Peters wort is said to do, for therein it worketh the same effects, both to help the Sciatica and Gout, and to heal burnings by fire: It stayeth also the bleeding of Wounds, if either *Choller,* the green Herb be bruised, or the pouder of *Sciatica,* the dry be applied thereto. It hath been ac- *Gout,* counted and certainly is a Soveraign Herb to *Burning,* heal any Wound or Sore either outwardly or *Bleeding,* inwardly, and therfore alwaies used in Drinks, *Wounds,* Lotions, Balms, Oyls, Oyntments for any *Ulcers,* sort of green Wound, or old Ulcers and Sores, in all which the continual experience of former Ages hath confirmed the use thereof to be admirable good, though it be not so much in use now as when Physitians and Chirurgeons were so wise as to use Herbs more than now they do.

It is an Herb of *Saturn* and a most noble Antivenerian.

Garden Valerian.

Description.

THis hath a thick short grayish Root lying for the most part above ground, shooting forth on all sides other such like small pieces or Roots, which have all of them many long and great strings or fibres under them, in the ground, whereby it draweth nourishment. From the Heads of these Roots spring up many green Leaves, which at first are somewhat broad and long without any devision at all in them, or denting on the edges, but those that rise up after are more and more devided on each side, some to the middle Rib, being winged, as made of many Leaves together on a Stalk, & those upon the Stalk in like manner are more devided, but smaller towards the top than below: The Stalk riseth to be a yard high or more, sometimes branched at the top, w^th many smal whitish Flowers, sometimes dash'd over at the edges with a pale purplish colour, of a little scent: which passing away there followeth small brownish white Seed that is easily carried away with the wind. The Root smelleth more strong than either Leaf or Flower, and is of more use in Medicine,

Place.

It is generally kept with us in our Gardens.

Time.

It Flowreth in *June* and *July*, and continueth Flowring until the Frosts pull it down.

Vertues and Use.

Dioscorides saith, That the *Garden Valerian* hath a warming Faculty, and that being dryed and given to drink, it provoketh Urine and helpeth the Strangury: The Decoction thereof taken doth the like also, and taketh away pains of the sides, provoketh Womens Courses and is used in Antidotes. *Pliny* saith, That the Pouder of the Root given in drink, or the Decoction thereof taken, helpeth all stoppings and stranglings in any part of the Body, whether they proceed of pains in the Chest or sides, and taketh them away. The Root of *Valerian* boyled with Liquoris, Raisons, and Annis Seed, is singular good for those that are short winded, and for those that are troubled with the Cough, and helpeth to open the passages, and to expectorate Flegm easily. It is given to those that are bitten or stung by any Venemous Creature, being boyled in Wine. It is of especial Vertue against the Plague, the Decoction thereof being drunk, and the Root being used to smell unto; It helpeth also to expel the wind in the Belly. The green Herb with the Root taken fresh, being bruised and applied to the Head taketh away the pains and prickings therein, staieth Rhewms and thin Distillations; and being boyled in white Wine, and the drop thereof put into the eye, taketh away the dimness of the sight, or any Pin or Web therein: It is of excellent property to heal any inward Sores or Wounds, as also for outward Hurts or Wounds, and draweth any Splinter or Thorn out of the Flesh.

Disury Strangury — *Stitch terms provokes* — *Breast* — *short wind Cough Flegm* — *Pestilence* — *Wind*

Vervain. *Verbena.*

Description.

THe common *Vervain*, hath somwhat long and broad Leaves next the ground deeply gash'd about the edges and some only deeply dented or cut all alike, of a blackish green colour on the upper side, and somwhat gray underneath: The Stalk is square branched into several parts, rising about two foot high, especially if you reckon the long spike of Flowers at the tops of them, which are set on all sides one above another, and somtimes two or three together, being small and gaping, of a Purplish blew colour, and white intermixt; after which come small round Seed in small and somwhat long Heads: The Root is small and long, but of no use.

Place.

It groweth generally throughout this Land in diverse places by the Hedges and way sides, and other waste grounds.

Time.

It Flowreth about *July*, and the Seed is ripe soon after.

Vertues and use.

Vervain is hot and dry, bitter, opening Obstructions, clensing, and healing, It helpeth the yellow Jaundice, the Dropsie, and the Gout, clenseth the defects of the Reins and Lungs, and generally, all inward pains and torments of the Body, the Leaves being boyled and drunk; The same is held to be good against the bitings of Venemous Serpents, and other Venemous Beasts; and against the Plague, and both Tertian and Quartane Agues, killeth and expelleth Worms in the Belly, and causeth a good colour in the Face and Body, strengthneth as well as correceth the Diseases of the Liver and Spleen, is very effectual in all Diseases of the Stomach and Lungs, as Coughs, shortness of Breath and Wheesings, and is singular good against the Dropsie, to be drunk with some Peony Seeds, bruised and put thereto; and is no less prevalent for the defects of the Reins and Bladder Bladder, to clense them of those Humors that ingender the Stone, and helpeth to break the Stone and to expel Gravel: It consolidateth and healeth also all Wounds both inward and outward,

Obstructions — *Clensing* — *Healing* — *Yellow-Jaundice* — *Venemous Beasts* — *Pestilence* — *Agues* — *Worms* — *Cough* — *shortness of Breath* — *Wheesing* — *Stone* — *Gravel* — *Reins* — *Bladder*

Womb, Dropsie, Bleeding, Wounds, Ulcers, Fistulaes, Headach, Frenzie, Morphew, Freckles, Eyes.

outward, and stayeth bleedings, and used with some Honey healeth all old Ulcers and Fistulaes in the Legs or other parts of the Body, as also those Ulcers that happen in the Mouth,; or used with old Hogs grease it helpeth the Swellings and pains of the secret parts in man or Woman, as also for the Piles and Hemorrhoids: Applied with some Oyl of Roses and Vinegar unto the Forehead and Temples, it easeth the inveterate pains and ach of the Head, and is good for those that are Frenetick. The Leaves bruised, or the Juyce of them mixed with some Vinegar doth wonderfully cleanse the Skin, and taketh away Morphew, Freckles, Pustulaes, and other such like Inflamations and deformities of the Skin in any part of the Body. The distilled water of the Herb when it is in his full strength, dropped into the Eyes, cleanseth them from Films, Clouds, or mists that darken the sight, and wonderfully strengtheneth the Optick Nerves; The said Water is very powerful in all the Diseases aforesaid either inward or outward, whether they be old corroding Sores, or green Wounds.

This also is an Herb of *Venus*, and an excellent Herb for the Womb, to strengthen it and remedy all the cold griefs of it, as Plantane doth the hot, the Herb bruised and hung about the Neck helps the Headach.

The Vine.

Sore Mouth, Inflamations, Womens Longing, Stone, Teeth black.

THe Leaves of the English *Vine* (I do not intend to send you to the *Canaries* for a Medicine) being boyled make a good Lotion for sore Mouths, being boyled with Barley Meal into a Pultis, it cools Inflamations of Wounds, the droppings of the *Vine* when 'tis cut in the Spring, which Country people call Tears, being boyled into a Syrup with Sugar and taken inwardly, is excellent to stay Womens longings after every thing they see, which is a Disease many Women with Child are subject too; the Decoction of *Vine* Leaves in white Wine doth the like: also the Tears of of the *Vine* drunk, two or three spoonfuls at a time, breaks the Stone in the Bladder: This is a very good Remedy, and it is discreetly done to kill a Vine to cure a Man, but the Salt of the Leaves is held to be better.

The Ashes of the burnt Branches will make Teeth that are as black as a coal to be as white as snow if you do but every morning rub them with it.

Violets. *Viola.*

THese, both Tame and Wild, are so well known that they need no Description.

Time.

They Flower until the end of *July*, but are best in *March* and the beginning of *April*.

Vertues and Use.

All the *Violets* are cold and moist while they are fresh and green, and are used to cool any heat or distemperature of the Body, either inwardly or outwardly, as Inflamations in the Eyes, in the Matrix or Fundament, in Impostumes also and hot Swellings, to drink the Decoction of the Leaves or Flowers made with Water or Wine, or to apply them Pultis wise to the grieved place, it likewise easeth pains in the Head, caused through want of sleep; or in any other place arising of heat, being applied in the same manner, or with Oyl of Roses. A dram weight of the dried Leaves of the Flowers of *Violets* (but the Leaves more strongly) doth purge the Body of Chollerick Humors, and asswageth the heat being taken in a draught of Wine or any other Drink: The Pouder of the purple Leaves of the Flowers only pick'd and dried, and drunk in Water is said to help the Quinsie, and the Falling-sickness in Children, especially in the beginning of the Disease. The Flowers of the White *Violets* ripeneth and dissolveth Swellings. The Herb or Flowers while they are fresh, or the Flowers when they are dry, are effectual in the Plurisie, and all Diseases of Lungs, to lenefie the sharpness of hot Rhewms, and the Hoarseness of the Throat, the heat also, and sharpness of Urine, and all pains of the Back, or Reins and the Bladder: It is good also for the Liver and the Jaundice, and in al hot Agues to cool the Heat and quench the Thirst: But the Syrup of Violets is of most use and of better effect, being taken in some convenient Liquor; and if a little of the Juyce or Syrup of Lemmons be put to it, or a few drops of the Oyl of Vitriol, it is made thereby the more powerful to cool the heat and to quench the Thirst, and giveth to the drink a Clarret Wine colour, and a fine tart rellish, pleasing the taste. *Violets* taken, or made up with Honey doth more cleanse than cool, and with Sugar contrary-wise. The dryed Flowers of *Violets* are accounted among the Cordial Drinks, Pouders, and other Medicines especially where cooling Cordials are necessary:

Inflamation, Eyes, Womb, Head-ach, Watching, Choller, Quinsie, Falling-sickness, Swellings, Pleurisie, Flegm, Hoarseness, Throat, Back, Reins, Bladder, Thirst, Heart.

The green Leaves are used with other Herbs, to make Plaisters and Pultises for Inflamations and Swellings, and to ease pains wheresoever, arising of heat, and for the Piles also, being fried with Yolks of Eggs and applied thereto.

Pansies or Heartsease are like unto *Violets* in all their operations but somwhat hotter and dryer, yet very temperate, and by viscuous Juyce therein doth somwhat mollifie, yet less than Mallows: It is conducing in like manner as Violets to the hot Diseases of the Chest and Lungs: for Agues, Convulsions, and Falling-sickness in Children. The Decoction helpeth Itch and Scabs being bathed therwith: It is said also to soder green Wounds, and to help old Sores, the Juyce or distilled Water thereof being drunk.

Vipers Bugloss.

Description.

THis hath many long rough Leaves lying on the ground, from among which rise up diverse hard round Stalks, very rough, as if they were thick set w^th prickles or hairs, wherin are set such like long rough hairy or prickly sad green Leavs, somwhat narrow; the middle Rib for the most part being white. The Flowers stand at the tops of the Stalks, branched forth into many long spiked Leaves of Flowers, bowing or turning like the Turnsole, all of them opening for the most part on the one side, which are long and hollow, turning up the Brims a little, of a Purplish Violet colour in them that are fully blown, but more reddish while they are in the Bud, as also upon their decay and withering; but in some places of a paler purple colour, with a long pointel in the middle, feathered or parted at the top: After the Flowers are fallen the Seeds growing to be ripe, are blackish, cornered and pointed somwhat like unto the Head of a Viper. The Root is somwhat great and blackish, and woolly, when it groweth toward Seed time; and perisheth in the Winter.

There is another sort little differing from the former, only in that it beareth white Flowers.

Place.

The first groweth wild almost every where. That with white Flowers, about the Castle Walls of *Lewes* in *Sussex*.

Time.

They Flower in Summer, and their Seed is ripe quickly after.

Vertues and Use.

Venemous Beasts, Poyson,

It is an especial Remedy against the biting of the Viper, and of all other Venemous Beasts or Serpents, as also against poyson and poysonful Herbs. *Dioscorides* and others say, That whosoever shall take of the Herb or Root before they be bitten, shall not be hurt by the poyson of any Serpent. The Roots or Seeds are thought to be most effectual to comfort the Heart, and expel Sadness, or cause less Melancholly, it tempers the Blood, and allayeth the hot Fits of Agues: The Seed drunk in Wine procureth abundance of Milk in Womens Bresis. The same also being taken easeth the pains in the Loyns, Back, and Kidneys: The distilled Water of the Herb when it is in Flower, or his chiefest strength, is excellent to be applied either inwardly or outwardly for all the Griefs aforesaid. There is a Syrup made hereof very effectual for the comforting of the Heart, and expelling Sadness and Melancholly.

Heart, Sadness, Melancholly, Agues, Milk, Loyns, Back, Kidneys.

VVall-Flowers, or Winter Gilly-flowers.

THe Garden kinds are so wel known that they need no Description.

Description.

The common single *Wall-Flowers* which grow wild abroad, hath sundry smal long, narrow, and dark green Leaves, set without order upon smal round whitish woody Stalks which bear at the tops diverse single yellow Flowers one above another, every one having four Leaves apiece, and of a very sweet scent: after which come long Pods containing reddish Seed. The Root is white, hard and threddy.

Place.

It groweth upon old Church Walls, and old Walls of many Houses, and on other stone Walls in diverse places. The other sorts in Gardens only.

Time.

All the single kinds do Flower many times in the end of *Autumn*, and if the Winter be mild, all the Winter long, but especially in the Months of *February*, *March*, and *April*, and until the heat of the Spring do spend them: But the double kinds continue not Flowring in that manner all the yeer along, although they Flower very early somtimes, and in some places very late.

Vertues and use.

Galen in his seventh Book of Simple Medicines saith, That the yellow Wall-flowers worketh more powerfully than any of the other kinds, and is therefore of more use in Physick; It cleanseth the Blood and freeth the Liver and Reins from Obstructions, provoketh Womens Courses, expelleth the Secondine

Obstructions, Liver, Terms provokes, Afterbirth

dine and dead Child, helpeth the hardneſs and pains of the Mother, and of the Spleen alſo, ſtayeth Inflamations and Swellings, comforteth and ſtrengthneth any weak part, or out of Joynt: helpeth to clenſe the Eyes from miſtineſs and Films on them, and to clenſe foul and filthy Ulcers in the Mouth or any other part, and is a ſingular Remedy for the Gout, and all Aches and Pains in the Joynts and Sinews. A Conſerve made of the Flowers is uſed for a Remedy both for the Apoplexie and Palſey.

Dead Child, Spleen, Weakneſs Diſjuncture, Gout, Sinews, Apoplexy, Palſey.

The VValnut-Tree.

THis is ſo well known, that it needeth no Deſcription.

Time.

It Bloſſometh early, before the Leaves come forth, and the Fruit is ripe in *September.*

Vertues and Uſe.

The Bark of the Tree, doth bind and dry very much, and the Leaves are much of the ſame temperature, but the Leaves when they are older, are heating and drying the Second Degree, and harder of digeſtion than when they are freſh, which by reaſon of their ſweetneſs are more pleaſing and better digeſting in the Stomach, and taken with ſweet Wine they move the Belly downwards; but being old, they grieve the Stomach, and in hot Bodies cauſe Choller to abound, and the Headach, and are an enemy to thoſe that have the Cough: But are leſs hurtful to thoſe that have colder Stomachs, and are ſaid to kill the broad Worms in the Belly or Stomach. If they be taken with Onions, Salt, and Honey, they help the biting of a Mad Dog, or the Venom or infectious poyſon of any Beaſt &c. *Oneus Pompeius* found in the Treaſury of *Methridates* King of *Pontus*, when he was overthrown, a Scrowl of his own Hand-writing, containing a Medicine againſt any Poyſon and Infection, which is this: Take two dry Walnuts, and as many good Figgs, and twenty Leaves of Rue bruiſed and beaten together with two or three Corns of Salt, and twenty Juniper Berries, which taken every morning faſting, preſerveth from danger of Poyſon or Infection, that day it is taken. The Juyce of the outer green Husks, boyled up with Honey, is an excellent gargle for ſore Mouths, the Heat and Inflamations in the Throat and Stomach: The Kernels when they grow old are more Oyly, and therfore not ſo fit to be eaten, but are then uſed to heal the Wounds of the Sinews, Gangrenes, and Carbuncles; The ſaid Kernels being burned, are then very aſtringent, and will then ſtay Lasks and Womens Courſes, being taken in red Wine; and ſtay the falling of the Hair and make it fair, being anointed with Oyl and Wine; The green Husks will do the like being uſed in the ſame manner. The Kernels beaten with Rue and Wine, being applied, helpeth the Quinſie; and bruiſed with ſome Honey and applied to the Ears, caſeth the pains and Inflamations of them: A piece of the green Husk put unto a hollow Tooth, eaſeth the pains. The Catkins hereof taken before they fall off, dried and given a dram thereof in Pouder with white Wine, wonderfully helpeth thoſe that are troubled with the riſing of the Mother. The Oyl that is preſſed out of the Kernels, is very profitably taken inward like Oyl of Almonds, to help the Chollick, and to expel wind very effectually, an ounce or two thereof may be taken at a time. The yong green Nuts taken before they be half ripe and preſerved with Sugar, are of good uſe for thoſe that have weak Stomachs, or Defluxions thereon. The diſtilled water of the green Husk before they be half ripe, is of excellent uſe to cool the heat of Agues being drunk an ounce or two at a time, as alſo to reſiſt the Infection of the Plague, if ſome thereof be alſo applied to the Sores thereof: The ſame alſo cooleth the heat of green Wounds and old Ulcers, and healeth them being bathed therewith: The diſtilled Water of the green Husks being ripe when they are ſhelled from the Nuts, being drunk with a little Vinegar, is alſo found by experience to be good for thoſe that are infected with the Plague, ſo as before the taking thereof a Vein be opened. The ſaid Water is very good againſt the Quinſin being gargled and bathed therewith, and wonderfully helpeth Deafneſs, the Noiſe, and other pains in the Ears. The Diſtilled water of the yong green Leaves in the end of *May* performeth a ſingular cure on foul running Ulcers and Sores, to be bathed with wet Cloathes or Spunges applied to them evening and morning.

Binds, Dries, Worms, Poyſon, Epidemical Diſeaſes, Inflamation in the Throat, wounds of the Sinews Gangrenes Carbuncles Flux, Terms ſtops, Baldneſs, Quinſie, Toothach, Mother, Chollick, Wind, Agues, Deafneſs, Ears.

VVold, VVeld, *or* Dyers VVeed.

Deſcription.

THe common kind groweth buſhing with many Leaves, long, narrow, and flat upon the ground, of a dark, blewiſh, green colour, ſomwhat like unto Woad, but nothing ſo large, a little crumpled and as it were round pointed which do ſo abide the firſt yeer: And the next Spring from among them riſe diverſe round Stalks two or three foot high, beſet with many ſuch like Leaves thereon, but ſmaller, and ſhooting forth ſome ſmal Branches,

which with the Stalks carry many ſmal yellow Flowers in a long ſpiked Head at the tops of them where afterwards come the Seed, which is ſmall and black incloſed in Heads that are devided at the tops into four parts. The Root is long, white, and thick, abiding the Winter: The whol Herb changeth to be yellow after it hath been in Flower a while.

Place.

It groweth every where by the way ſides in moiſt grounds as well as dry, in Corners of Fields and by Lanes: and ſomtimes all over the Field; in *Suſſex* and *Kent* they call it Greenweed.

Time.

It is in Flower about *June*.

Vertues and Uſe.

Mathiolus ſaith, That the Root hereof cutteth tough Flegm, digeſteth raw Flegm, thinneth groſs Humors, diſſolveth hard Tumors, and openeth Obſtructions. Some do highly commend it againſt the bitings of Venemous Creatures, to be taken inwardly and applyed outwardly to the hurt place; as alſo for the Plague or Peſtilence. The People in ſome Countries of this Land do uſe to bruiſe the Herb and lay it to Cuts or Wounds in the Hands or Legs to heal them.

Flegm, Humors, Tumors, Venemous Beaſts, Peſtilence, Worms.

Wheat.

THe ſeveral kinds hereof are ſo well known unto almoſt all people that it is altogether needleſs to write any Deſcription thereof.

Vertues and uſe.

Dioſcorides ſaith, That to eat the Corns of green Wheat is hurtful to the Stomach, and breedeth Worms. *Pliny* ſaith, That the Corns of Wheat toaſted upon an Iron Pan and eaten, is a pleaſant Remedy for thoſe that are chilled with cold. The Oyl preſſed from Wheat between two thick Plates of Iron or Copper heated, healeth all Tetters and Ringworms being uſed warm, and hereby *Galen* ſaith he hath known many to be cured. *Mathiolus* commendeth the ſame Oyl to be put into hollow Ulcers to heal them up, and it is alſo good for Chops in the Hands or Feet, and to make a rugged Skin ſmooth. The green Corns of Wheat being chewed, and applied to the place bitten by a mad Dog, healeth it: Slices of Wheat Bread ſoaked in Red Roſe-water, and applied to the Eyes that are hot, red, and inflamed, or blood-ſhotten, helpeth them. Hot Bread applyed for an hour at a time three daies together, perfectly healeth the Kernels in the Throat commonly called the Kings Evil. The Flower of Wheat mixed with the Juyce of Henbane, ſtayeth the Flux of Humors to the Joynts being laid thereon: The ſaid Meal boyled in Vinegar helpeth the ſhrinking of the Sinews ſaith *Pliny*; and mixed with Vinegar and Honey boyled together, healeth all Freckles, Spots, and Pimples on the Face. Wheat Flower, mixed with the Yolk of an Eg, Honey, and Turpentine, doth draw, clenſe, and heal, any Boyl, Plague Sore, or foul Ulcer. The Bran of Wheat Meal ſteeped in ſharp Vinegar, and then bound in a Linnen Cloth, and rubbed on thoſe places, that have the Scurf, Morphew, Scabs, or Leproſie, wil take them away, the Body being firſt well purged and prepared. The Decoction of the Bran of Wheat or Barley, is of good uſe to bath thoſe places that are Burſten by a Rupture: and the ſaid Bran boyled in good Vinegar, and applied to ſwollen Breaſts, helpeth them, and ſtayeth all Inflamations; it helpeth alſo the bitings of Vipers (which I take to be no other but our Engliſh Adder) and all other Venemous Creatures. The Leaves of Wheat Meal applied with ſome Salt, taketh away hardneſs of the Skin, Wharts, and hard Knots in the Fleſh. Starch moiſtned with Roſewater and laid to the Cods taketh away their Itching. Wafers put in Water and drunk, ſtayeth the Lask and Bloody Flux, and is profitably uſed both inward and outwardly for the Ruptures in Children: Boyled in Water unto a thick Gelly and taken, it ſtayeth ſpitting of Blood: and boyled with Mints and Butter it helpeth the hoarſneſs of the Throat.

Sinews, Peſtilence, Scabs, Leproſie, Venemous Beaſts, Cods, Hoarſeneſs.

The VWillow-tree. *Salix.*

THeſe are ſo well known that they need no no Deſcription: I ſhall therefore only ſhew you the Vertues thereof.

Vertues and Uſe.

Both the Leaves, Bark, and the Seed are uſed to ſtanch bleeding of Wounds, and at Mouth and Noſe, ſpitting of Blood, and all other Flnxes of Blood in man or woman, and to ſtay Vomiting, and provocation thereunto, if the Decoction of them in Wine be drunk. It helpeth alſo to ſtay thin, hot, ſharp, ſalt Diſtillations from the Head upon the Lungs cauſing a Conſumption: The Leaves bruiſed with ſome Pepper and drunk in Wine, much helpeth the wind Chollick. The Leaves bruiſed and boyled in Wine and drunk ſtaieth the heat of Luſt in man or woman, and quite extinguiſheth it, if it be long uſed; The Seed is alſo of the ſame effect. The Water that is gathered from the Willow when it Flowreth, the Bark being ſlit, and a fitting Veſſel ſet to receive it, is very good for redneſs and dimneſs of Sight, for Films that grow over the Eyes, and ſtay the Rhewms that fall into them, to provoke Urin being

Stanch Bleeding, Spitting of Blood, Fluxes of Blood, Vomiting, Diſtillations on the Lungs, Wind Chollick, Heat of Luſt, Dimneſs of ſight, & other Diſeaſes in the Eyes,

Cleer the Face, Dry up Humors, being ſtopped if it be drunk, and to cleer the Face and Skin from Spots and Diſcolourings. *Galen* ſaith, The Flowers have an admirable faculty in drying up Humors, beeing a Medicine without any ſharpneſs or corroſion: You may boyl them in white Wine, and drink as much as you will (ſo you drink not your ſelf drunk.) The Bark work the ſame effects, if uſed in the ſame manner, and the Tree hath alwaies Bark upon it though not alwaies Flowers: The Burnt aſhes of the Bark, being mixed with Vinegar taketh away Warts, Corns, and Superfluous Fleſh being applied to the place. The Decoction of the Leaves or Bark in Wine, takes away Scurf or Dandrif by waſhing the place with it: 'Tis a fine cool Tree, The Boughs of which are very convenient to be placed in the Chamber of one ſick of a Feaver.

Warts, Corns & ſuperfluous fleſh, Scurf or Dandriff

Feaver.

Woad, *Isatis glaſtum*

IT hath diverſe large Leaves, long, and ſomwhat broad withal, like to thoſe of the greater Plantane, but larger, thicker, of a greeniſh colour and ſomwhat blew withal: From among which Leaves riſeth up a luſty Stalk three or four foot high, with diverſe Leaves ſet thereon; The higher the Stalk riſeth, the ſmaller are the Leaves, at the top it ſpreadeth into diverſe Branches, at the ends of which appear pretty little yellow Flowers, and after they paſs away like other Flowers of the Field, come Husks, long, and ſomwhat flat withal, in form they reſemble a Tongue, in colour they are black, and they hang bobbing downwards. The Seed contained within theſe Husks (if it be a little chewed) gives an Azure colour. The Root is white and long.

Place.

It is ſowed in Fields for the benefit of it, where thoſe that ſow it cut it three times a yeer.

Time.

It Flowreth in *June*, but is long after before the Seed is ripe.

Vertues and uſe.

Some People affirm the Plant to be deſtructive to Bees, which if it be I cannot help it: They ſay it poſſeſſeth Bees with a Flux, but that I can hardly beleeve, unleſs Bees be contrary to all other Creatures, I ſhould rather think it poſſeſſeth them with the contrary Diſeaſe, the Herb being exceeding drying and binding. However, if any Bees be diſeaſed thereby, the cure is to ſet Urine by them, but ſet it in ſuch a Veſſel that they cannot drown themſelves, which may be remedied if you put pieces of Cork in it. I told you before the Herb was drying and binding, and ſo drying and binding that it is not fit to be given inwardly. An Oyntment made thereof ſtancheth Bleeding: A Plaiſter made thereof and applied to the Region of the Spleen (and I pray you take notice, that the Spleen lies on the left ſide) takes away the hardneſs and pains thereof: The Oyntment is excellent good in ſuch Ulcers as abound with moiſture, and takes away the corroding and fretting Humors: It cools Inflamations, quencheth St. Anthonies fire, and ſtayeth Defluxions of Blood to any part of the Body.

Bleeding Spleen ulcers Inflamations, St. Anthonies fire defluxions of Blood.

Woodbind, *or* Honeyſuckles.

THe Plant is ſo common that every one that hath Eyes knows them, and he that hath none cannot reade a Deſcription if I ſhould write it.

Time.

They Flower in *June*, and the Fruit is ripe in *Auguſt*.

Vertues and uſe.

Doctor *Tradition*, that grand Introducer of Errors, that Hater of Truth, that Lover of Folly, and that mortal Foe to Doctor *Reaſon*, hath taught the common People to uſe the Leaves and Flowers of this Plant in Mouth Waters, and by long continuance of time hath ſo grounded it in the Brains of the Vulgar that you cannot beat it out with a Beetle: All Mouth Waters ought to be cooling and drying, but *Honeyſuckles* are clenſing, conſuming, and digeſting, and therefore no waies fit for Inflamations, Thus Doctor *Reaſon*. Again, If you pleaſe we will leave Dr. *Reaſon* a while and come to Dr. *Experience*, a learned Gentleman, and his Brother; Take a Leaf and chew it in your Mouth, and you will quickly find it likelier to cauſe a ſore Mouth or Throat than to cure it. Well then, if it be not good for this, What is it good for? 'Tis good for ſomthing: For God and Nature made nothing in vain: It is an Herb of *Jupiter* and apropriated to the Lungs, the Cœleſtial Crab claims Dominion over it; neither is it a Foe to the Lyon: If the Lungs be afflicted by *Mercury*, this is your Cure: It is fitting a Conſerve made of the Flowers of it were kept in every Gentlewomans Houſe; I know no better cure for an Aſthma than this; Beſides, It takes away the evil of the Spleen, provokes Urine, procures ſpeedy Delivery to Women in Travail, helps Cramps, Convulſions and Palſeys, and whatſoever griefs comes of cold or ſtopping: If you pleaſe to make uſe of it in an Oyntment, it will cleer your Skin of Morphew,

Lungs afflicted Aſthma Spleen provokes Urine & ſpeedy Delivery in Childbirth Cramps Convulſions & Palſeys,

Freckles & Sunburning.

phew, Freckles, and Sunburning, or whatsoever else discolours it, and then the Maids will love it. I have done, when I have told you what Authors say, and cavelled a little with them, They say the Flowers are of more effect than the Leaves, and that's true; but they say, The Seeds are of least effect of all: But Dr. *Reason* told me, That there was a Vital Spirit in every Seed to beget its like; and Dr. *Experiense* told me, That there was a greater heat in a Seed than there was in any other part of a Plant, and withal, That Heat was the Mother of action, and then judg if old Dr. *Tradition* (who may well be honor'd for his Age, but not for his Goodness) have not so poysoned the World with his Errors before I was born, that it was never well in its wits since, and there is great fear it will die mad.

Wormwood.

Description.

THree *Wormwoods* are familiar with us; One I shall not describe, another I shall describe, and the Third be Critical at. And I care not greatly if I begin with the last first.

Sea *Wormwood* hath gotten as many Names as Vertues (and perhaps one more) *Seriphion*, *Santonicon*, *Belgicum*, *Narbonense*, *Xantonicum*, *Misnense*, and a matter of twenty more, which I will not blot Paper withal: A Papist got the Toy by the end, and he called it *Holy Wormwood*; and in truth I am of Opinion, Their giving so much holiness to Herbs is the Reason there remains so little in themselves.

The Seed of this *Wormwood* is that which usually Women give their Children for the Worms: Of all *Wormwoods* that grow here, this is the weakest; I but Doctors commend it, and Apothecaries sell it, the one must keep his Credit, and the other get Money, and that's the key of the work. The Herb is good for somthing, because God made nothing in vain; Will you give me leave to weigh things in the Ballance of Reason; Then thus, The Seeds of the common Wormwood are far more prevalent than the Seed of this, to expell Worms in Children, or People of ripe age: Of both, some are weak, some are strong. The *Seriphian* Wormseed is the weakest, & happily may prove to be fittest for weakest Bodies (for it is weak enough in all conscience) Let such as are strong take the common Wormseed, for the other will do but little good. Again, neer the Sea many people live, and *Seriphium* grows neer them, and therfore is more fitting for their Bodies because nourished by the same Air; and this I had from Dr. *Reason*. In whose Body Dr. *Reason* dwels not, dwels Dr. *Madness*, and he brings in his Brethren, Dr. *Ignorance*, Dr. *Folly*, and Dr. *Sickness*, and these together make way for Dr. *Death*, and the latter end of that man is worse than the beginning. Pride was the cause of *Adam*'s Fall, Pride begate a Daughter, I do not know the Father of it unless the Divil, but she christned it, and call'd it *Appetite*, and sent her Daughter to tast these Wormwoods, who finding this the least bitter, made the squeamish Weneh extol it to the Skies, though the Vertues of it never reached to the middle Region of the Air. Its due praise is this; It is weakest, therefore fitter for weak Bodies, and fitter for those Bodies that dwell neer it than those that live far from it: my reason is, The Sea (as those that live far from it, know when they comt neer it) casteth not such a smel as the Land doth: The tender Mercies of God being over all his Works, hath by his eternal Providence planted *Seriphium* by the Sea side, as a fit Medicine for the Bodies of those that live neer it. Lastly, It is known to all that know any thing in the Course of Nature, That the Liver delights in sweet things; if so, it abhors bitter; then if your Liver be weak, it is none of the wisest courses to plague it with an Enemy: if the Liver be weak a Consumption follows; Would you know the Reason? 'tis this, A mans Flesh is repaired by Blood, by a third concoction which transmutes Blood into Flesh ('tis well I said [Conction] for if I had said [Boyling] every Cook would have understood me.) The Liver makes Blood, and if it be weakned that it makes not enough the Flesh wasteth, and why must Flesh alwaies be renewed? Because the eternal God when he made the Creation, made one part of it in continual dependency upon another: And why did he so? Because Himself is only Permanent, to teach us, That we should not fix our affections upon what is transitory, but upon what endures for ever. The result of all is this, If the Liver be weak and cannot make Blood enonough (I would have said [Sanguifie] if I had written only to Schollers) The *Seriphian* which is the weakest of Wormwoods is better than the best. I have been Critical enonough (if not too much.

Place.

It grows familiarly in *England* by the Sea side.

Description.

It starts up out of the earth with many round woody hoary Stalks from one Root, its height is four foot high, or three at the least. The Leaves in Longitude are long, in Latitude narrow, in Colour white, in Form hoary, in Similitude like Southernwood, only broader and longer, in Taste, rather salt than bitter, because it grows so neer the Salt Water: At the joynts with the Leaves toward the tops it

bears

bears little yellow Flowers. The Root lies deep and is woody.

Common *Wormwood* I shall not describe, for every Boy that can eat an Eg knows it.

Romane Wormwood; And why *Romane*, seeing it grows familiarly in *England?* It may be it was so called because 'tis special good for a stinking Breath, which the Romans cannot be very free from maintaining so many Baudy Houses by Authority of his Holiness.

Description.

The Stalks are slenderer and shorter than the common *Wormwood* by one foot at least; the Leaves are more finely cut and devided than they are but somthing smaller; both Leaves and Stalks are hoary; the Flowers of a pale yellow colour, it is altogether like the common Wormwood, save only in bigness, for 'tis smaller; in taste, for 'tis not so bitter, in smell, for it is spicy.

Place.

It groweth upon the tops of the Mountains (it seems 'tis aspiring) there 'tis Natural; but usually nursed up in Gardens for the use of the Apothecaries in *London*.

Time.

All Wormwoods usually Flower in *August*, a little sooner or later.

Vertues and Use.

Will you give me leave to be Critical a little? I must take leave; Wormwood is an Herb of *Mars*, and if *Pontanus* say otherwise he is beside the Bridg. I prove it thus: What delights in Martial places is a Martial Herb, But Wormwood delights in Martial places, (for about Forges and Iron Works you may gather a Cart load of it) *Ergo* it is a Martial Herb. It is hot and dry in the first degree, *Viz*, Just as hot as your Blood and no hotter: It remedies the evils Choller can inflict on the Body of man by Sympathy. It helps the evils *Venus* and her wanton Girls produce, by Antipathy; and it doth somthing else besides; It clenseth the Body of Choller (and who dares say *Mars* doth no good?) It provokes Urine, helps Surfets, Swellings in the Belly; it causeth an Appetite to meat, because *Mars* rules the Attractive faculty in Man: The Sun never shone upon a better Herb for the yellow Jaundice than this is: Why should men cry out so much upon *Mars* for an Infortune (or *Saturn* either?) Did God make Creatures to do the Creation a mischief? This Herb testifies that *Mars* is willing to cure all the Diseases he causes; the truth is, *Mars* loves no Cowards, nor *Saturn* Fools, nor I, either. Take of the Flowers of Wormwood, Rosemary, and black Thorn, of each a like quantity, half that quantity of Saffron, boyl this in Renish Wine, but put not in the Saffron till it is almost boyled, This is the way to keep a Mans Body in health, appointed by *Camerarius* in his Book intituled, *Hortus Medicus*, and 'tis a good one too. Besides all this, Wormwood provokes the Terms. I would willingly teach Astrologers, and make them Physitians (if I knew how) for they are most fitting for the Calling, if you will not beleeve me, ask Dr. *Hippocrates*, and Dr. *Galen*, a couple of Gentlemen that our Colledg of Physitians keep to vapor with, not to follow. In this one Herb I shall give the Pattern of a Rule to the Sons of Art, rough cast, yet as neer the Truth as the men of Benjamin could throw a stone; whereby my Brethren of the Society of Astrologers may know by a penny how a shilling is coyned: (as for the Colledg of Physitians they are too stately to learn, and too proud to continue, They say a Mouse is under the Dominion of the *Moon*, and that's the reason they feed in the night: The House of the *Moon* is *Cancer*: (Rats are of the same nature with Mice but that they are a little bigger.) *Mars* receives his fall in *Cancer*, *Ergo* Wormwood being an Herb of *Mars* is a present Remedy for the biting of Rats and Mice. Mushroms (I cannot give them the title of *Herba*, *Frutex*, or *Arbor*) are under the Dominion of *Saturn* (and take them one time with another they do as much harm as good:) if any have poyson'd himself by eating them, *Wormwood* an Herb of *Mars* cures him, because *Mars* is exalted in *Capricorn* the House of *Saturn*, & this it doth by Sympathy as it did the other by Antipathy. Wheals, Pushes, black & blew Spots coming either by bruises or beatings, Wormwood an Herb of *Mars* helps, because *Mars* (as bad as you love him, & as ill as you hate him) will not break your Head, but he'l give you a Plaister. If he do but teach you to know your selves, his Courtesie is greater than his Discourtesie: The greatest Antipathy between the Planets is between *Mars* and *Venus*, one is hot, the other cold, one Diurnal, the other Nocturnal; one dry, the other moist, their Houses are opposite, one Masculine the other Feminine, one publick the other private, one is valiant, the other effeminate, one loves the light, the other hates it, one loves the Field, the other the Sheets; then the Throat is under *Venus*, the Quinsie lies in the Throat and is an Inflamation there: *Venus* rules the Throat (it being under *Taurus* her Sign) *Mars* eradicates all Diseases in the Throat by his Herbs (of which Wormwood is one) and send them to *Ægypt* on an errand never to return more; this by Antipathy. The Eyes are under the Luminaries, the right Eye of a Man, and the left Eye of a Woman, the *Sun* claims Dominion over: The left Eye of a Man, and the right Eye of a Woman, are the priviledg of the *Moon*, Wormwood an Herb of *Mars* cures both: What belongs to the Sun by Sympathy becaus he is exalted in his House; but what belongs to the Moon by Antipathy, because he hath

Choller, *Venery*, *Provokes Urine*, *Helps Surfets*, *Swellings*, *Appetite lost*, *Yelloow Jaundice*, *Preserve Health*, *Terms provokes*, *Biting of Rats & Mice*, *Mushroms*, *wheals*, *Pushes*, *Black & blew Spots*, *Quinsie*, *Eyes*;

his Fall in hers. Suppoſe a man be bitten or ſtung by a martial Creature, imagine a Waſp, a Hornet or Scorpion, Wormwood an Herb of *Mars* gives you a preſent cure: Then *Mars* as Chollerick as he is, hath learned that Patience, to paſs by your evil ſpeeches of him, and tells you by my Pen, That he gives you no Affliction but he gives you a Cure; You need not run to *Apollo* nor *Æſculapius*; and if he were ſo Chollerick as you make him to be, he would have drawn his Sword for Anger to ſee the ill conditions of thoſe people that can ſpy his Vices and not his Vertues. The eternal God when he made *Mars*, made him for a publick good, and the Sons of Men ſhall know it in the latter end of the world. *Et cælum Mars ſolus habet.* You ſay *Mars* is a Deſtroyer, mix a little Wormwood an Herb of *Mars* with your Ink, and neither Rats nor Mice will touch the Paper is written with it, and then *Mars* is a Preſerver. Aſtrologers ſay *Mars* cauſeth Scabs and Itch, and the Virgins are angry with him, becauſe wanton *Venus* told them he deforms their Skin: But quoth *Mars*, my only deſire is they ſhould know themſelves; my Herb Wormwood will reſtore them to the beauty they formerly had, and in that I will not come an inch behind my oppoſite *Venus*; for which doth the greateſt evil, he that takes away an innate beauty, and when he hath done knows how to reſtore it again; or ſhe that teaches a company of wanton Laſſes to paint their Faces? If *Mars* be in the Virgin in a Nativity, they ſay he uſually cauſeth the Chollick ('tis well God hath ſet ſomebody to pul down the Pride of Man) He in the Virgin troubles none with the Chollick but them that know not themſelves (for who knows himſelf may eaſily know all the world:) Wormwood an Herb of *Mars* is a preſent cure for it: and whether it be moſt like a Chriſtian to love him for his good, or hate him for his evil, judg ye. I had almoſt forgotten that Charity thinks no evil, I was once in the Tower and viewed the Wardrobe, and there was a great many fine Cloathes (I can give them no other title, for I was never neither Linnen or Woollen Draper) yet as brave as they looked, my opinion was, the Moaths might conſume them (yea *Henry* the eighth his Codpiece.) Moaths are under the Dominion of *Mars*, his Herb Wormwood being laid amongſt Cloathes will make a Moath ſcorn to meddle with the Cloath, as much as a Lyon ſcorns to meddle with a Mouſe, or an Eagle a Fly. You ſay *Mars* is angry, and 'tis true enough, he is angry with my Country-men for being ſuch Fools to be led by the Noſes by a Colledg of Phyſitians, as they lead Bears to *Paris-Garden*. Melancholly men cannot endure to be wrong'd in point of good name, and that hath ſorely troubled old *Saturn*, becauſe they called him the greateſt Infortune: In the Body of Man he rules the Spleen (and that makes Covetous men ſo Splenetick.) The poor old man lies crying out of his left ſide, Father *Saturn*'s angry, *Mars* comes to him, come Brother, I confeſs thou art evil ſpoken of, and ſo am I, thou knoweſt I have my exaltation in thy Houſe, I'le give him an Herb of mine, Wormwood, to cure the poor man; *Saturn* conſented, but ſpoke but little, and ſo *Mars* cured him by Sympathy. When *Mars* was free from War (for he loves to be fighting, and is the beſt friend a Soldier hath) I ſay when *Mars* was free from War he called a Councel of War in his own Brain to know how he ſhould do poor ſinful man good, (deſiring to forget his abuſes in being called an Infortune) He muſters up his own Forces and places them in Battalia, Oh, quoth he, why do I hurt a poor ſilly Man or Woman? His Angel Anſwers him, 'Tis becauſe they have offended their God [Look back to *Adam*] Well, ſaies *Mars*, though they ſpeak evil of me, I'le do good to them; Death's cold, my Herbs ſhall heat them, They are full of ill Humors (elſe they would never have ſpoken ill of me) my Herb ſhall cleanſe them and dry them: They are poor weak Creatures, my Herb ſhall ſtrengthen them; they are dul witted, my Herb ſhall fortifie their Apprehenſions; and yet amongſt Aſtrologers, all this doth not deſerve a good word; Oh, the Patience of *Mars*.

Biting or ſtinging by Venemous Beaſts.

Spleen.

Fælix qui potuit rerum cognoſcere cauſas
Inque domus ſuperum ſcandere cura fuit.

Oh happy he that can the Knowledg gain,
To know th'eternal God made nought in vain.
To this I add,
I know the reaſon cauſeth ſuch a Dearth
Of Knowledg, 'tis, becauſ men love the Earth.

The other day *Mars* told me he met with *Venus*, and he asked her what the Reaſon was that ſhe accuſed him for abuſing Women; he never gave them the Pox, in the Diſpute they fell out, and in anger parted, and *Mars* told me that his brother *Saturn* told him, that an Antivenerial Medicine was the beſt againſt the Pox. Once a Month he meets with the *Moon*, *Mars* is quick enough of ſpeech, and the *Moon* not much behind hand (neither are moſt Women) The *Moon* looks much after Children, and Children are much troubled with the Worms, ſhe deſired a Medicine of him, he bad her take his own Herb Wormwood: He had no ſooner parted with the *Moon* but he met with *Venus*, and ſhe was as drunk as a Bitch, Alas poor *Venus* quoth he, What, thou a Fortune and be drunk? I'le give thee an Antipathetical Cure, take my Herb Wormwood, thou ſhalt never get a

French Pox.

Surfet

Surfet, Surfet by drinking. A poor ſilly Countryman hath got an Ague and cannot go about his buſineſs, he wiſhes he had it not, and ſo do I, but I'le tell him a Remedy whereby he may prevent it. Take the Herb of *Mars* Wormwood, and if Infortunes will do good what will Fortunes do? Some ſay the Lungs are under *Jupiter*, and if the Lungs, then the breath, and yet a man ſomtimes gets a ſtinking breath, and yet *Jupiter* is a Fortune forſooth; up comes *Mars* to him, Come Brother *Jupiter*, thou knoweſt I ſent thee a couple of Trines to thy Houſes laſt night, the one from *Aries*, and the other from *Scorpio*, give me thy leave by Sympathy to cure the poor man by drinking a draught of Wormwood Beer every morning. The Moon was weak the other day, and ſhe gave a man two terrible miſchiefs, a dull Brain, and a weak ſight, *Mars* lies by his Sword and comes to her, Siſter *Moon* ſaith he, This man hath anger'd thee, but I beſeech thee take notice he is but a Fool, prithee be patient, I will with my Herb *Wormwood* cure him of both Infirmities by Antipathy, for thou knowſt, thou and I cannot agree; with that the *Moon* began to quarrel; *Mars* (not delighting much in Womens Tongues) went away, and did it whether ſhe would or no.

Stinking Breath,

Dull Brain, weak Sight.

He that reades this and underſtands what he reades, he hath a Jewel more worth then a Diamond: He that underſtands it not, is as little fit to give Phyſick. There lies a Key in theſe words, which will unlock (if it be turned by a wiſe hand) the *Cabbinet of Phyſick*: I have delivered it ſo plainly as I durſt; 'tis not upon Wormwood only that I wrote, but upon all Plants, Trees, and Herbs: He that underſtands it not, is unfit (in my Opinion) to give Phyſick. This ſhall live when I am dead; and thus I leave it to the World, not caring a Halfpenny whether they like or diſlike it. The Grave equals all men, and therefore ſhall equal me with the Princes, until which time the Eternal Providence is over me; then the ill tongue of a pratling Prieſt, or of one who hath more Tongue than Wit, or more Pride than Honeſty, ſhall never trouble me. Wiſdom is juſtified of her Children; and ſo much for *Wormwood*.

Yarrow. *Millefolium · noſe bleed*

Χιλιόφυλλον. ἀχιλλεία ἀβ Achille inventa
μυριόφυλλον. δι' ὃ στρατιώτης. miles.

Deſcription.

IT hath many long Leaves ſpread upon the ground and fine cut, and devided into many ſmal parts, Its Flowers are white but not all of a whiteneſs, and ſtaied in Knots, upon diverſe green Stalks which riſe from amongſt the Leaves.

Place.

It is very frequent in all Paſtures.

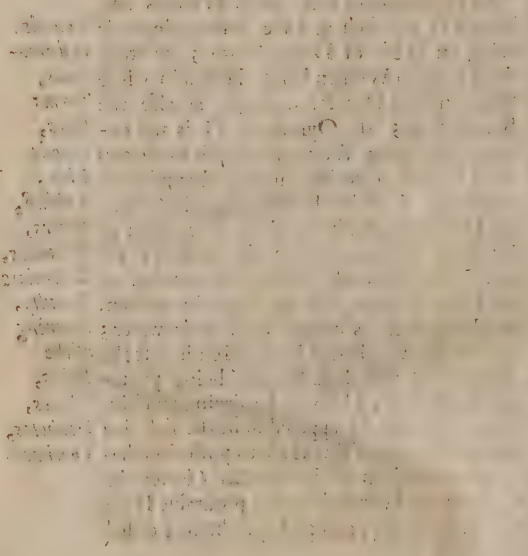
Time.

It Flowers late even in the latter end of *Auguſt*.

Vertues and Uſe.

An Oyntment of them cures Wounds and is moſt fit for ſuch as have Inflamations, it being an Herb of Dame *Venus*; It ſtops the Terms in Women being boyled in white Wine and the Decoction drunk, as alſo the Bloody Flux; the Oyntment of it is not only good for green Wounds, but alſo for Ulcers and Fiſtulaes, eſpecialy ſuch as abound with moiſture; It ſtaies the ſhedding off of Hair, the Head being bathed with the Decoction of it; inwardly taken, it helps the retentive faculty of the Stomach, it helps the running of the Reins in men, and the whites in women, and helps ſuch as cannot hold their water; and the Leaves chewed in the Mouth eaſe the Toothach; and theſe Vertues being put together ſhew the Herb to be drying and binding. *Achilles* is ſuppoſed to be the firſt that left the Vertues of this Herb to poſterity, having learned them of his Maſter *Chyron* the Centaure, and certainly a very profitable Herb it is in the Camp, and perhaps therfore called *Militaris*.

Wounds, Inflamations, Terms ſtops, Bloody Flux, Baldneſs, Ulcers, Fiſtulaes, Retentive Faculty, Running of the Reins, Whites, Diabetes, Toothach.



DIRECTIONS.

HAving in diverse places of this Treatise promised you the way of making Syrups, Conserves, Oyls, Oyntments, &c. of Herbs, Roots, Flowers &c. whereby you may have them ready for your use at such times when otherwise they cannot be had; I come now to perform what I promised, and you shall find me rather better than worse than my word.

That this may be done Methodically, I shall devide my Directions into two grand Sections, and each Section into several Chapters, and then you shall see it look with such a Countenance as this is.

Sect. 1.

Of gathering, drying, and keeping Simples and their Juyces.

Chap. 1. *Of Leaves of Herbs &c.*
Chap. 2. *Of Flowers.*
Chap. 3. *Of Seeds.*
Chap. 4. *Of Roots.*
Chap. 5. *Of Barks.*
Chap. 6. *Of Juyces.*

Sect. 2.

Of making and keeping Compounds.

Chap. 1. *Of Distilled Waters.*
Chap. 2. *Of Syrups.*
Chap. 3. *Of Juleps.*
Chap. 4. *Of Decoctions.*
Chap. 5. *Of Oyls.*
Chap. 6. *Of Electuaries.*
Chap. 7. *Of Conserves.*
Chap. 8. *Of Preserves.*
Chap. 9. *Of Lohochs.*
Chap. 10. *Of Oyntments.*
Chap. 11. *Of Plaisters.*
Chap. 12. *Of Pultisses.*
Chap. 13. *Of Troches.*
Chap. 14. *Of Pills.*
Chap. 15. *The way of fitting Medicines to Compound Diseases.*

Of all these in order.

SECT. I.

The way of gathering, drying, and preſerving Simples and their Juyces.

Chap. 1.

Of Leaves of Herbs or Trees.

1. OF Leaves, chuſe only ſuch as are green and full of Juyce, pick them carefully, and caſt away ſuch as are any way declining, for they will putrifie the reſt, ſo ſhall one handful be worth ten of thoſe you buy in *Cheap-ſide*.

2. Note in what place they moſt delight to grow in, and gather them there, for Betony that grows in the ſhadow is far better than that which grows in the Sun, becauſe it delights in the ſhadow; ſo alſo ſuch Herbs as delight to grow neer the Water, let ſuch be gathered as grow neer the Water, though happily you may find ſome of them upon dry ground, the Treatiſe will inform you where every Herb delights to grow.

3. The Leaves of ſuch Herbs as run up to Seed, are not ſo good when they are in flower as before (ſome few excepted, the Leaves of which are ſeldom or never uſed) in ſuch caſes, if through ignorance they were not known, or through negligence forgotten, you had better take the top and the Flower than the Leaf.

4. Dry them well in the Sun, and not in the ſhadow as the ſwinge of Phyſitians is, for if the Sun draw away the Vertues of Herbs, it muſt needs do the like by Hay by the ſame Rule, which the experience of every Country Farmer will explode for a notable piece of non-ſenſe.

5. Such as are Artiſts in Aſtrology (and indeed none elſe are fit to make Phyſitians) ſuch I adviſe, let the Planet that governs the Herb be Angular, and the ſtronger the better, if they can in Herbs of *Saturn*, let *Saturn* be in the Aſcendent, in the Herbs of *Mars*, let *Mars* be in the Mid-heaven, for in thoſe Houſes they delight, let the *Moon* apply to them by good Aſpect, and let her not be in the Houſes of their Enemies: If you cannot well ſtay till ſhe apply to them, let her apply to a Planet of the ſame Triplicity, if you cannot wait that time neither, let her be with a fixed Star of their Nature.

6. Having well dryed them put them up in brown Papers, ſewing the Paper up like a Sack, and preſs them not too hard together, and keep them in a dry place neer the fire.

7. As for the duration of dryed Herbs, a juſt time cannot be given, let Authors prate their pleaſures: For,

Firſt, Such as grow upon dry grounds will keep better than ſuch as grow on moiſt.

Secondly, Such Herbs as are full of Juyce will not keep ſo long as ſuch as are dryer.

Thirdly, Such Herbs as are well dryed will keep longer than ſuch as are ill dried.

Yet this I ſay, by this you may know when they are corrupted, *viz.* By their loſs of colour, or ſmell, or both, and if they be corrupted, reaſon will tell you that they muſt needs corrupt the Bodies of thoſe people that take them.

8. Gather all Leaves in the hour of that Planet that governs them.

Chap. 2.

Of Flowers.

1. THE Flower which is the beauty of the Plant, and of none of the leaſt uſe in Phyſick, groweth yeerly, and is to be gathered when it is in its prime.

2. As for the time of gathering them, let the Planetary hour, and the Planet that rules the Plant they come of, be obſerved, as we ſhewed you in the foregoing Chapter; as for the time of the day let it be when the Sun ſhines upon them that ſo they may be dry, for if you gather either Herbs or Flowers when they are wet or dewy, they will not keep, and this I forgot before.

3. Dry them well in the Sun, and keep them in Papers neer the fire, as I ſhewed you in the foregoing Chapter.

4. So long as they retain their colour and ſmel they are good, either of them being gone ſo is the Vertue alſo.

Chap.

Chap. 3.
Of Seeds.

1. THe Seed is that part of the Plant which is endewed with a vitall faculty to bring forth its like, and it contains potentially the whol Plant in it.

2. As for place let them be gathered from the plants where they delight to grow.

3. Let them be full ripe when they are gathered, and forget not the Cœleſtial Harmony before mentioned, for I have found by experience that their Vertues are twice as great at ſuch times than at others: There is an appointed time for every thing under the Sun.

4. When you have gathered them dry them a little, and but a little in the Sun before you lay them up.

5. You need not be ſo careful of keeping them ſo neer the fire as the other before mentioned, becauſe they are fuller of Spirit, and therefore not ſo ſubject to corrupt.

6. As for the time of their duration 'tis palpable they will keep good many yeers, yet this I ſay, they are beſt the firſt yeer, and this I make appear by a good argument, They will grow ſooneſt the firſt yeer they be ſet, therefore then are they in their prime, and 'tis an eaſie matter to renew them yeerly.

Chap. 4.
Of Roots.

1. OF Roots chuſe ſuch as are neither rotten nor wormeaten, but proper in their taſt, colour, and ſmell, ſuch as exceed neither in ſoftneſs nor hardneſs.

2. Give me leave to be a little critical againſt the Vulgar received Opinion, which is, That the Sap falls down into the Root in Autumn, and riſes again in Spring, as men go to Bed at night and riſe in the morning; and this idle tale of untruth is ſo grounded in the Heads not only of the Vulgar but alſo of the Learned, that a man cannot drive it out by Reaſon: I pray let ſuch Sap-mongers anſwer me to this Argument, If the Sap fall into the Root in the fall of the Leaf, and lie there all the Winter, then muſt the Root grow only in the Winter, as experience witneſſeth, but the Root grows not at all in the Winter, as the ſame experience teacheth, but only in the Summer. *Ergo*,

If you ſet an Apple Kernel in the Spring, you ſhall find the Root to grow to a pretty bigneſs in that Summer, and be not a whit bigger next Spring: What doth the Sap do in the Root all that while? pick ſtraws? For God's ſake build not your faith upon Tradition, 'tis as rotten as a rotten Poſt.

The truth is, when the *Sun* declines from the Tropick of *Cancer*, the Sap begins to congeal both in Root and Branch, when he toucheth the Tropick of *Capricorn* and aſcends to us ward, it begins to wax thin again, and by degrees as it congealed: But to proceed.

3. The dryer time you gather your Roots in the better they are, for they have the leſs excrementitious moiſture in them.

4. Such Roots as are ſoft, your beſt way is to dry in the Sun, or elſe hang them up in the Chimney corner upon a ſtring; as for ſuch as are hard you may dry them any where.

5. Such Roots as are great will keep longer than ſuch as are ſmall, yet moſt of them will keep a yeer.

6. Such Roots as are ſoft it is your beſt way to keep them alwaies neer the fire, and take this general Rule, If in Winter time you find any of your Roots, Herbs or Flowers begin to grow moiſt, as many times you ſhall, eſpecially in the Winter-time (for 'tis your beſt way to look to them once a month) dry them by a very gentle fire, or if you can with convenience keep them neer the fire, you may ſave your ſelf the labor.

7. It is in vain to dry ſuch Roots as may commonly be had, as Parſly, Fennel, Plantane &c. but gather them only for preſent need.

Chap. 5.
Of Barks.

1. BArks which Phyſitians uſe in Medicines are theſe ſorts, of Fruits, o Roots, of Boughs.

2. The Barks of Fruits is to be taken when the Fruit is full ripe, as Orrenges, Lemmons. &c. but becauſe I have nothing to do with Exoticks here, I ſhall paſs them without any more words.

3. The Barks of Trees are beſt gathered in the Spring, if it be of great Trees, as Oaks or the like, becauſe then they come eaſieſt off, and ſo you may dry them if you pleaſe, but indeed your beſt way is to gather all Barks only for preſent uſe.

4. As for the Bark of Roots, 'tis this, and thus to be gotten, Take the Roots of ſuch Herbs as have a pith in them, as Parſly, Fennel, &c. ſlit them in the middle, and when you have taken out the pith (which you may eaſily and quickly do) that which remains is called (though ſomthing improperly) the Bark and indeed is only to be uſed.

Chap. 6.
Of Juyces.

1. Juyces are to be preſſed out of Herbs when they are yong and tender, and alſo out of ſome Stalks, and tender tops of Herbs and Plants, and alſo out of ſome Flowers.

2. Having gathered your Herb you would preſerve the Juyce of, when it is very dry (for otherwiſe your Juyce will not be worth a Button) bruiſe it very well in a ſtone Mortar with a wooden Peſtle, then having put it into a Canvas Bag (the Herb I mean, not the Mortar for that will yield but little Juyce) preſs it hard in a preſs, then take the Juyce and clarifie it.

3. The manner of clarifying of it is this, put it into a Pipkin or Skillet, or ſome ſuch thing and ſet it over the fire, and when the Scum riſeth, take it off, let it ſtand over the fire till no more Scum riſe, then have you your Juyce clarified, caſt away the Scum as a thing of no uſe.

4. When you have thus clarified it, you have two waies to preſerve it all the yeer.

First, When it is cold put it into a Glaſs, and put ſo much Oyl on it as will cover it the thickneſs of two fingers, the Oyl will ſwim at top, and ſo keep the Air from coming to it to putrifie it; when you intend to uſe it, do no more but ſo, powr out into a Porrenger, a little more than you intend to uſe, and if any Oyl come out with it (as if the Glaſs be not full 'tis a hundred to one if there do) you may eaſily ſcum it off with a Spoon, and put the Juyce you uſe not, into the Glaſs again it will quickly ſink under the Oyl: This is the firſt way.

Secondly, The ſecond way is a little more difficult, and the Juyce of Fruits is uſually preſerved this way, when you have clarified the Juyce as before, boyl it over the fire, till (being cold) it be of the thickneſs of Honey, this is moſt commonly uſed for Diſeaſes of the mouth, and is called *Rob* and *Sapa*.

And thus much for the firſt Section, the Second follows.

Sect. 2.
The way of making and keeping all Neceſſary Compounds.

Chap. 1.
Of Diſtilled Waters.

Hitherto we have ſpoken of Medicines which conſiſt in their own Nature, which Authors vulgarly call Simples, though ſomthing improperly, for indeed and in truth, nothing is Simple but the pure Elements; all things elſe are compounded of them: We come now to treat of the Artificial Medicines, in the front of which (becauſe we muſt begin ſomewhere) we place diſtilled Waters; In which conſider,

1. [illegible]rs are diſtilled out of Herbs, Flowe[illegible] Roots.

2. [illegible] not here of ſtrong Waters but of cold, [illegible]ing to act *Galen*'s Part and not *Paracelſus*.

3. The Herbs ought to be diſtilled when they are in their greateſt vigor, and ſo ought the Flowers alſo.

4. The vulgar way of Diſtillation which people uſe, becauſe they know no better, is in a Peuter Still, and although Diſtilled Waters are the weakeſt of all Artificial Medicines, and good for little unleſs for mixtures of other Medicines, yet this way diſtilled they are weaker by many degrees than they would be, were they diſtilled in Sand: If I thought it not impoſſible to teach you the way of diſtilling in Sand by writing, I would attempt it.

5. When you have diſtilled your Water put it into a Glaſs, and having bound the top of it over with a Paper pricked full of holes, that ſo the excrementitious and fiery vapors may exhale (which indeed are they that cauſe that ſetling in diſtilled Waters called the Mother, which corrupts the Waters and might this way be prevented) cover it cloſe and keep it for your uſe.

6. Stopping diſtilled Waters with a Cork makes them muſty, and ſo will a Paper alſo if it do but touch the Water, your beſt way then

is

is to ſtop them with a Bladder, being firſt wet in Water, and bound over the top of the Glaſs.

Such cold Waters as are diſtilled in a Peuter Still (if well kept) will endure a yeer, ſuch as are diſtilled in Sand, as they are twice as ſtrong, ſo will they endure twice as long.

Chap. 2.
Of Syrups.

1. A Syrup is a Medicine of a Liquid form, compoſed of Infuſion, Decoction and Juyce; and 1. for the more grateful taſt, 2. for the better keeping of it, with a certain quantity of Honey or Sugar, hereafter mentioned boiled to the thickneſs of new Honey.

2. You ſee at the firſt view then that this Aphoriſm devides it ſelf into three Branches, which deſerve ſeverally to be treated of, *viz.*

1. *Syrups made by Infuſion.*
2. *Syrups made by Decoction.*
3. *Syrups made by Juyce.*

Of each of theſe (for your Inſtruction ſake kind Country men and women) I ſpeak a word, or two or three apart.

Firſt, Syrups made by Infuſion are uſually made of Flowers, and of ſuch Flowers, as ſoon loſe both colour and ſtrength by boyling, as Roſes, Violets, Peach-Flowers &c. my Tranſlation of the *London Diſpenſatory* will inſtruct you in the reſt: They are thus made, having picked your Flowers clean, to every pound of them ad three pound (or three pints, which you will for it is all one) of Spring Water made boyling hot by the fire, firſt put your Flowers in a Peuter Pot with a cover, then powr the Water to them, then ſhutting the Pot, let it ſtand by the fire to keep hot twelve hours, then ſtrain it out (in ſuch Syrups as purge, as Damask Roſes, Peach-Flowers, &c. the uſual and indeed the beſt way is to repeat this Infuſion, adding freſh Flowers to the ſame Liquor diverſe times that ſo it may be the ſtronger) having ſtrained it out, put the Infuſion into a Peuter Baſon, or an Earthen one well glaſſed, and to every pint of it, ad two pound of fine Sugar, which being only melted over the fire without boyling, and ſcummed, will produce you the Syrup you deſire.

Secondly, Syrups made by Decoction are uſually uſed of Compounds, yet may any Simple Herb be thus converted into Syrup; Take the Herb, Root, or Flower you would make into Syrup and bruiſe it a little, then boyl it in a convenient quantity of Spring Water; the more water you boyl it in the weaker will it be, a handful of the Herb, Root, &c. is a convenient quantity for a pint of Water; boyl it till half the water be conſumed, then let it ſtand till it be almoſt cold, and ſtrain it (being almoſt cold) through a woollen cloth, letting it run out at leiſure without preſſing, to every pint of this Decoction ad one pound of Sugar and boyl it over the fire till it come to a Syrup, which you may know if you now and then cool a little of it in a ſpoon, ſcum it all the while it boyls, and when it is ſufficiently boyled, whilſt it is hot ſtrain it again through a woollen cloth, but preſs it not; thus have you the Syrup perfected.

Thirdly, Syrups made of Juyces are uſually made of ſuch Herbs as are full of Juyce, and indeed they are better made into a Syrup this way than any other; the Operation is thus, having beaten the Herb in a ſtone Mortar with a wooden Peſtle, preſs out the Juyce and clarifie it as you were taught before in the Juyces, then let the Juyce boyl away till a quarter of it (or neer upon) be conſumed, to a pint of this ad a pound of Sugar, and boyl it to a Syrup, alwaies ſcumming it, and when it is boyled enough, ſtrain it through a woollen cloth as we taught you before, and keep it for your uſe.

3. If you make Syrups of Roots that are any thing hard, as Parſley, Fennel, and graſs Roots &c. when you have bruiſed them, lay them in ſteep ſome time in that Water which you intend to boyl them in, hot, ſo will the Vertue the better come out.

4. Keep your Syrups either in Glaſſes or ſtone Pots, and ſtop them not with Cork, nor Bladder, unleſs you would have the Glaſs break and the Syrup loſt; and as many Opinions as there are in this Nation, I ſuppoſe there are but few or none of this, only bind a Paper about the Mouth.

5. All Syrups if well made will continue a yeer, with ſome advantage yet of all, ſuch as are made by Infuſion keep the leaſt while.

Chap. 3.
Of Juleps.

1. Juleps were firſt invented as I ſuppoſe in *Arabia*, and my reaſon is becauſe the word *Juleb* is an Arabick word.

2. It ſignifies only a pleaſant Potion, and was vulgarly uſed (by ſuch as were ſick and wanted help, or ſuch as were in health, and wanted no money) to quench thirſt.

3. Now a daies 'tis commonly uſed,

1. *To prepare the Body for Purgation.*
2. *To open Obftructions and the Pores.*
3. *To digeft tough Humors.*
4. *To qualifie hot diftempers &c.*

4. It is thus made (I mean Simple Juleps for I have nothing to fay to Compounds here; all Compounds have as many feveral Idea's as men have crotchets in their Brain) I fay Simple Juleps are thus made: Take a pint of fuch diftilled Water as conduceth to the cure of your diftemper, which this Treatife will plentifully furnifh you withal, to which add two ounces of Syrup conducing to the fame effect (I fhall give you Rules for it in the laft Chapter) mix them together and drink a draught of it at your pleafure; If you love tart things ad ten drops of Oyl of Vitriol to your pint and fhake it together, and it will have a fine grateful taft.

5. All Juleps are made for prefent ufe, and therefore it is in vain to fpeak of their duration.

Chap. 4.
Of Decoctions.

1. ALL the difference between Decoctions and Syrups made by Decoction is this, Syrups are made to keep, Decoctions only for prefent ufe, for you can hardly keep a Decoction a week at any time, if the weather be hot, not half fo long.

2. Decoctions are made of Leaves, Roots, Flowers, Seeds, Fruits, or Barks, conducing to the cure of the Difeafe you make them for; in the fame manner are they made as we fhewed you in Syrups.

3. Decoctions made with Wine laft longer than fuch as are made with Water, and if you take your Decoction to cleanfe the paffages of Urine, or open Obftructions, your beft way is to make it with white Wine inftead of Water, becaufe that is moft penetrating.

4. Decoctions are of moft ufe in fuch Diseafes as lie in the Paffages of the Body, as the Stomach, Bowels, Kidneys, Paffages of Urine, and Bladder, becaufe Decoctions pafs quicker to thofe places than any other form of Medicines.

5. If you will fweeten your Decoction with Sugar, or any Syrup fit for the occafion you take it for which is better, you may and no harm done.

6. If in a Decoction you boyl both Roots, Herbs, Flowers, and Seeds together, let the Roots boyl a good while firft, becaufe they retain their Vertue longeft, then the next in order by the fame Rule; *viz.* 1. The Barks, 2. the Herbs, 3. the Seeds, 4. the Flowers, 5. the Spices if you put any in, becaufe their vertue comes fooneft out.

7. Such things as by boyling cauſe ſlimineſs to a Decoction, as Figs, Quince Seeds, Linſeed &c. your beſt way is, after you have bruiſed them, to tie them up in a linnen rag, as you tie up a Calves Brains, and ſo boyl them.

8. Keep all Decoctions in a Glaſs cloſe ſtopped, and in the cooler place you keep them, the longer will they laſt ere they be ſowr.

Laſtly, The uſual Doſe to be given at one time, is uſually two, three, four, or five ounces, according to the age and ſtrength of the Patient, the ſeaſon of the yeer, the ſtrength of the Medicine, and the quality of the Diſeaſe.

Chap. 5.
Of Oyles.

1. OYL Olive, which is commonly known by the name of Sallet Oyl, I ſuppoſe becauſe it is uſually eaten with Sallets by them that love it; If it be preſſed out of ripe Olives, according to *Galen* is temperate, and exceeds in no one quality.

2. Of Oyls, ſome are Simple, and ſome are Compound.

3. Simple Oyls are ſuch as are made of Fruits or Seeds, by expreſſion, as Oyl of ſweet and bitter Almonds, Linſeed, and Rapeſeed Oyl &c. of which ſee my *Diſpenſatory*.

4. Compound Oyls are made of Oyl of Olives and other Simples, imagine Herbs, Flowers, Roots, &c.

5. The way of making them is this, Having bruiſed the Herbs or Flowers you would make your Oyl of, put them in an Earthen pot, and to two or three handfuls of them, powr a pint of Oyl, cover the pot with a paper, and ſet it in the Sun, about a Fortnight or leſs according as the Sun is in hotneſs; then having warmed it very well by the fire, preſs out the Herbs &c. very hard in a preſs, and ad as many more Herbs to the ſame Oyl, bruiſed (the Herbs I mean not the Oyl) in like manner, ſet them in the Sun as before, the oftner you repeat this the ſtronger will your Oyl be; at laſt when you conceive it ſtrong enough, boyl both Herbs and Oyl together till the Juyce be conſumed which you may know by its leaving its bubling, and the Herbs will be criſp, then ſtrain it, whilſt it is hot, and keep it in a ſtone or Glaſs Veſſel for your uſe.

6. As for Chymical Oyls, I have nothing to ſay in this Treatiſe.

7. The General uſe of theſe Oyls is for pain in the Limbs, roughneſs of the Skin, the Itch &c. as alſo for Oyntments and Plaiſters.

8. If you have occaſion to uſe it for Wounds or Ulcers, in two ounces of Oyl, diſſolve half an ounce of Turpentine, the heat of the fire will quickly do it, for Oyl it ſelf is offenſive to Wounds, and the Turpentine qualifies it.

Chap.

Chap. 6.
Of Electuaries.

PHyſitians make more a quoil than needs behalf about Electuaries. I ſhall preſcribe but one general way of making them up, as for the Ingredients you may vary them as you pleaſe, and according as you find occaſion by the laſt Chapter.

1. That you may make Electuaries when you need them, it is requiſite that you keep alwaies Herbs, Roots, Seeds, Flowers &c. ready dried in your Houſe, that ſo you may be in readineſs to beat them into pouder when you need them.

2. Your better way is to keep them whol than beaten, for being beaten they are the more ſubject to loſe their ſtrength, becauſe the Air ſoon penetrates them.

3. If they be not dry enough to beat into pouder when you need them, dry them by a gentle fire till they are ſo.

4. Having beaten them, ſift them through a fine Tiffany Searce, that ſo there may be no great pieces found in your Electuary.

5. To on ounce of your Pouder, ad three ounces of clarified Honey, this quantity I hold to be ſufficient; I confeſs Authors differ about it: If you would make more or leſs Electuary, vary your proportions accordingly.

6. Mix them well together in a Mortar, and take this for a truth, you cannot mix them too much.

7. The way to clarifie Honey is to ſet it over the fire in a convenient veſſel till the ſcum ariſe, and when the ſcum is taken off it is clarified.

8. The uſual Doſe of Cordial Electuaries is from half a dram to two drams, of purging Electuaries from half an ounce to an ounce.

9. The manner of keeping them is in a pot.

10. The time of taking them, is either in the morning faſting, and faſting an hour after them, or at night going to bed three or four hours after ſupper.

Chap. 7.
Of Conſerves.

1. THe way of making Conſerves is twofold, one of Herbs and Flowers, and the other of Fruits.

2. Conſerves of Herbs and Flowers are thus made, If you make your Conſerves of Herbs, as of Scurvy-graſs, Wormwood, Rue, or the like, take only the Leaves and tender tops (for you may beat your heart out before you can beat the Stalks ſmall) and having beaten them, waigh them, and to everie pound of them ad three pound of Sugar, beat them verie well together in a Mortar, you cannot beat them too much.

3. Conſerves of Fruits, as of Barberries, Sloes, and the like is thus made; Firſt ſcald the Fruit, then rub the pulp through a thick hair Sieve made for the purpoſe, called a pulping Sieve, you may do it for a need with the back of a Spoon, then take this Pulp thus drawn, and ad to it its waight of Sugar and no more, put it in a Peuter Veſſel, and over a Charcoal fire ſtir it up and down till the Sugar be melted, and your Conſerve is made.

4. Thus have you the way of making Conſerves, the way of keeping of them is in Earthen pots.

5. The Doſe is uſually the quantity of a Nutmeg at a time morning and evening, or (unleſs they be purging) when you pleaſe.

6. Of Conſerves, ſome keep many yeers, as Conſerves of Roſes, others but a yeer, as Conſerves of Borrage, Bugloſs, Cowſlips and the like.

7. Have a care of the working of ſome Conſerves preſently after they are made, look to them once a day and ſtir them about; Conſerves of Borrage, Bugloſs, and Wormwood have gotten an excellent faculty at that ſport.

8. You may know when your Conſerves are almoſt ſpoiled by this, you ſhall find a hard cruſt at top with little holes in it as though Worms had been eating there.

Chap. 8.
Of Preſerves.

OF Preſerves are ſundry ſorts, and the Operations of all being ſomthing different we will handle them all apart.

There are preſerved with Sugar,

1 *Flowers.*
2 *Fruits.*
3 *Roots.*
4 *Barks.*

1. Flowers are but very ſeldom preſerved, I never ſaw any that I remember ſave only Cowſlip Flowers, and that was a great faſhion in *Suſſex* when I was a boy; It is thus done, firſt, take a flat Glaſs, we call them jarr Glaſſes, ſtrew in a lain of fine Sugar, on that a lain of Flowers, on that another lain of Sugar, on that another lain of Flowers, do ſo til your Glaſs be full, then tie it over with a paper, and in a little time you ſhall have very excellent and pleaſant Preſerves.

There is another way of Preſerving Flowers, namely with Vinegar and Salt, as they pickle Capers and Broom Buds, but becauſe I have little skill in it my ſelf I cánot teach you.

2. Fruits, as Quinces and the like are preſerved two waies,

Firſt, Boyl them well in Water, and then pulp them through a Sieve as we ſhewed you before, then with the like quantity of Sugar boyl the Water they were boyled in to a Syrup, *viz.* a pound of Sugar to a pint of Liquor, to every pound of this Syrup ad four ounces of the Pulp, then boyl it with a very gentle fire to the right conſiſtence, which you may eaſily know if you drop a drop of it upon a Trencher, if it be enough it will not ſtick to your fingers when it is cold.

Secondly, Another way to preſerve Fruits is this, Firſt pare off the rind, then cut them in halves and take out the Core, then boyl them in Water till they are ſoft, If you know when Beef is boyled enough you may eaſily know when they are; then boyl the Water with its like waight of Sugar into a Syrup, put the Syrup into a Pot, and put the boyled Fruit as whol as you left it when you cut it into it, and let it ſo remain till you have occaſion to uſe it.

3. Roots are thus preſerved, Firſt, ſcrape them very clean, and clenſe them from the Pith if they have any, for ſome Roots have not, as Eringo and the like, boyl them in Water till they be ſoft as we ſhew you before in the Fruits, then boyl the Water you boyled the Roots into a Syrup as we ſhewed you before, then keep the Roots whol in the Syrup till you uſe them.

4. As for Barks we have but few come to our hands to be done, and thoſe of thoſe few that I can remember, are Orrenges, Lemmons, Citrons, and the outer Bark of Walnuts which grows without the Shell, for the Shels themſelves would make but ſcurvy Preſerves, there be they I can remember, if there be any more put them into the number.

The way of Preſerving theſe is not all one in Authors, for ſome are bitter, ſome are not, ſuch as are bitter, ſay Authors, muſt be ſoaked in warm Water, often times changed till their bitter taſt be fled, but I like not this way, and my reaſon is, becauſe I doubt when their bitterneſs is gone, ſo is their Vertue alſo; I ſhall then preſcribe one common way, namely the ſame with the former, *viz.* Firſt boyl them whol till they be ſoft, then make a Syrup with Sugar and the Liquor you boyled them in, and keep the Barks in the Syrup.

5. They are kept in Glaſſes or glaſſed Pots.

6. The preſerved Flowers will keep a yeer if you can forbear eating of them, the Roots and Barke much longer.

7. This Art was plainly and cleerly at firſt invented for delicacy, yet came afterwards to be of excellent uſe in Phyſick; For,

Firſt, Hereby Medicines are made pleaſant for ſick and queazy Stomachs, which elſe would loath them.

2. Hereby they are preſerved from decaying a long time.

Chap. 9.
Of Lohochs.

1 THat which the Arabians call *Lohoch*, and the Greeks *Eclegma*, the Latins call *Linctus*, and in plain Engliſh, ſignifies nothing elſe but a thing to be licked up.

2 Their firſt invention was to prevent and remedy afflictions of the Breaſt and Lungs, to clenſe the Lungs of Flegm, and make it fit to be caſt out.

3 They are in Body thicker than a Syrup, and not ſo thick as an Electuary.

4. The manner of taking them is often to take a little with a Liquoris ſtick, and let it go down at leiſure.

5 They are eaſily thus made, make a Decoction of any pectoral Herbs, the Treatiſe will furniſh you with enough, and when you have ſtrained it, with twiſe its waight of Honey or Sugar, boyl it to a Lohoch; If you are moleſted with tough Flegm, Honey is better than Sugar, and if you ad a little Vineger to it you will do well, if not, I hold Sugar to be better than Honey.

6 It is kept in Pots and will a yeer and longer.

7 Its uſe is excellent for roughneſs of the Windpipe, Inflamations of the Lungs, Ulcers in the Lungs, difficultie of Breath, Aſthmaes, Coughs and diſtillation of Humors.

Chap. 10.
Of Oyntments.

1 VArious are the waies of making Oyntments which Authors have left to poſteritie, which I ſhall omit and quote one which is eaſieſt to be made, and therefore moſt beneficial to people that are ignorant in Phyſick, for whoſe ſakes I write this; It is thus done, p. 75-1

Bruiſe thoſe Herbs, Flowers, or Roots you would make an Oyntment of, and to two handfuls of your bruiſed Herbs ad a pound of Hogs Greaſe tryed, or clenſed from the skins, beat them very well together in a ſtone Mortar with a wooden Peſtle, then put it in a ſtone Pot (the Herbs and Greaſe I mean, not the Mortar) cover it with a paper, and ſet it either in the Sun or ſome other warm place three, four, or fivs daies, that it may melt, then take it out and boyl it a little, then whilſt it is hot, ſtrain it out, preſſing it out very hard in a Preſs, to this Greaſe ad as many more Herbs bruiſed as before, let them ſtand in like manner

ner as long, then boyl them as you did the former, if you think your Oyntment be not ſtrong enough you may do it the third and fourth time; yet this I tell you, the fuller of Juyce your Herbs are, the ſooner will your Oyntment be ſtrong, the laſt time you boyl it, boyl it ſo long till your Herbs be criſp and the Juyce conſumed, then ſtrain it, preſſing it hard in a Preſs, and to every pound of Oyntment, ad two ounces of Turpentine, and as much Wax, becauſe Greaſe is offenſive to Wounds as well as Oyl,

2 Oyntments are vulgarly known to be kept in Pots, and will laſt above a yeer, above two yeer.

Chap. 11.
Of Plaiſters.

1 THe Greeks made their Plaiſters of diverſe Simples and put Mettals in moſt of them if not in all, for having reduced their Mettals into Pouder they mixed them with that fatty ſubſtance, whereof the reſt of the Plaiſter conſiſted. whilſt it was yet hot, continually ſtirring it up and down leſt it ſhould ſink to the bottom, ſo they continually ſtirred it till it was ſtiff, then they made it up in rolls, which when they need for uſe they could melt by the fire again.

2. The Arabians made up theirs with Meals, Oyl, and Fat, which needed not ſo long boyling.

3 The Greeks Emplaſters conſiſted of theſe Ingredients, Mettals, Stones, diverſe ſorts of Earths, Feces, Juyces, Liquoris, Seeds, Roots, Herbs, Excrements of Creatures, Wax, Rozin, Gums.

Chap. 12.
Of Pultiſſes.

1 PUltiſſes are thoſe kind of things which the Latins call *Cataplaſmata*, and our learned Fellows that if they can read Engliſh thats all, call them *Cataplaſms*, becauſe 'tis a crabbed word few underſtand; it is indeed a very fine kind of Medicine to ripen Sores,

2 They are made of Herbs and Roots fitted to the Diſeaſe and Member afflicted, being chopped ſmal and boyled in Water almoſt to a Jelly, then by adding a little Barley Meal or Meal of Lupines, and a little Oyl or rough Sheep Suet, which I hold to be better, ſpread upon a cloath and applied to the grieved place.

3 Their uſe is to eaſe pains, to break Sores, to cool Inflamations, to diſſolve hardneſs, to eaſe the Spleen, to concoct Humors, to diſſipate Swellings.

4 I beſeech you take this Caution along with you, Uſe no Pultiſſes (if you can help it) that are of a heating Nature, before you have firſt clenſed the Body, becauſe they are ſubject to draw the Humors to them from every part of the Body.

Chap. 13.
Of Troches.

1 THe Latins call them *Placentulæ*, or little Cakes (and you might have ſeen what the Greeks call them too, had not the laſt Edition of my *London Diſpenſatory* been ſo helliſhly printed, that's all the Commonwealth gets by one Stationer's printing anothers Coppies, *viz.* To plague the Country with falſe Prints, and diſgrace the Author) the Greeks τροχίσκοι, κυκλίσκοι, and ἀρτίσκοι they are uſually little round flat Cakes, or you may make them ſquare if you will.

2 Their firſt invention was, that Pouders being ſo kept might reſiſt the intromiſſion of Air and ſo endure pure the longer.

3 Beſides, they are the eaſier carried in the Pockets of ſuch as travel; many a man (for example) is forced to travel whoſe Stomach is too cold, or at leaſt not ſo hot as it ſhould be, which is moſt proper, for the Stomach is never cold till a man be dead; in ſuch a caſe 'tis better to carry Troches of Wormwood or of Galanga, in a Paper in his Pocket and more convenient behalf than to lug a Gally-pot along with him.

4 They are thus made, At night when you go to bed, take two drams of fine Gum Tragacanth, put it into a Gally-pot, and put half a quarter of a pint of any diſtilled Water fitting the purpoſe you would make your Troches for, to it, cover it, and the next morning you ſhall find it in ſuch a Jelly as Phyſitians call Muſſilage, with this you may (with a little pains taking) make any Pouder into Paſt, and that Paſt into little Cakes called Troches.

5. Having made them, dry them well in the ſhadow and keep them in a Pot for your uſe.

Chap. 14.
Of Pills.

1 THey are called *Pilulæ* becauſe they reſemble little Balls, the Greeks call them *Catapotia.*

2 It is the Opinion of Modern Phyſitians that this way of making up Medicines was invented only to deceive the Pallat, that ſo by ſwallowing them down whol, the bittetneſs of the Medicine might not be perceived or at

least it might not be unsufferable, and indeed most of their Pills though not all are very bitter.

3 I am of a clean contrary Opinion to this, I rather think they were done up in this hard form that so they might be the longer in digesting, and my Opinion is grounded upon Reason too, not upon Fancy nor Hear-say; The first invention of Pills was to purge the Head, now as I told you before, such Infirmities as lay neer the passages, were best removed by Decoctions, because they pass to the grieved part soonest, so here, if the infirmity lie in the Head or any other remote part, the best way is to use Pills, because they are longer in digestion, and therefore the better able to call the offending Humor to them.

4 If I should tell you here a long Tale of Medicines working by Sympathy and Antipathy, you would not understand a word of it, they that are fit to make Physitians *may* find it in the Treatise: All Modern Physitians know not what belonged to a Sympathetical Cure, no more than a Cookoo knows what belongs to Flats and Sharps in Musick, but follow the vulgar road, and call it a hidden quality because 'tis hid from the Eyes of Dunces, and indeed none but Astrologers can give a reason of it, and Physick without Reason is like a Pudding without Fat.

5 The way to make Pills is very easie, for with the help of a Pestle and Mortar and a little diligence, you may make any Pouder into Pills, either with Syrup or the Jelly I told you of before.

Chap. ult.

The way of mixing Medicines according to the Cause of the Disease and part of the Body afflicted.

THis being indeed the Key of the Work, I shall be somthing the more dilligent in it: I shall deliver my self thus;

1. *To the Vulgar.*
2. *To Such as study Astrology, or such as study Physick Astrologically.*

First to the Vulgar: Kind souls I am sorry it hath been your hard mishap to have been so long trained in such Egyptian darkness, even darkness which to your sorrows may be felt; the vulgar road of Physick is not my practice, and I am therefore the more unfit to give you advice; and I have now published a little Book which will fully instruct you not only in the knowledg of your own Bodies but also in fit Medicines to remedy each part of it when afflicted, mean season take these few Rules to stay your Stomachs.

* *Galen's Art of Physick.*

1. With the Disease regard the Cause and part of the Body afflicted, for example, suppose a Woman be subject to miscarry through wind, thus do,
   1. Look [*Abortion*] in the Table of Diseases, and you shall be directed by that how many Herbs prevent miscarriage.
   2. Look [*Wind*] in the same Table, and you shall see how many of those Herbs expell wind.

These are the Herbs Medicinal for your Grief.

2. In all Diseases strengthen the part of the Body afflicted.

3. In mixed Diseases there lies some difficulty, for somtimes two parts of the Body are afflicted with contrary Humors the one to the other, somtimes one part is afflicted with two contrary Humors, as somtimes the Liver is afflicted with Choller and Water, as when a man hath both a Dropsie and the yellow Jaundice, and this is usually mortal.

In the former, suppose the Brain be too cold and moist, and the Liver too hot and dry, thus do,

1. *Keep your Head outwardly warm.*
2. *Accustom your self to smell of hot Herbs.*
3. *Take a Pill that heats the Head at night going to bed.*
4. *In the morning take a Decoction that cools the Liver, for that quickly passeth the Stomach, and is at the Liver immediately.*

You must not think (Courteous People) that I can spend time to give you examples of all Diseases, these are enough to let you see so much light as you without Art are able to receive, If I should set you to look upon the Sun I should dazle your eyes and make you blind.

Secondly, To such as study Astrology (who are the only men I know that are fit to study Physick, Physick without Astrology, being like a Lamp without Oyl) you are men I exceedingly respect, and such Documents as my Brain can give you at present (being absent from my study) I shall give you, and an example to shew the proof of them.

1. Fortifie the Body with Herbs of the Nature of the lord of the Ascendent, 'tis no matter whether he be a Fortune or an Infortune in this case.

2. Let your Medicine be somthing Antipathetical to the lord of the sixth.

3. Let your Medicine be somthing of the Nature of the Sign ascending.

4. If the lord of the Tenth be strong, make use of his Medicines.

5. If this cannot well be, make use of the Medicines of the light of time.

6. Be sure alwaies fortifie the grieved part of the body by Sympathetical Remedies.

7. Regard

7. Regard the Heart, keep that upon the Wheels becauſe the Sun is the Fountain of Life, and therefore thoſe Univerſal Remedies *Aurum potabile*, and the Phyloſophers Stone, cure all Diſeaſes by only fortifying the Heart.

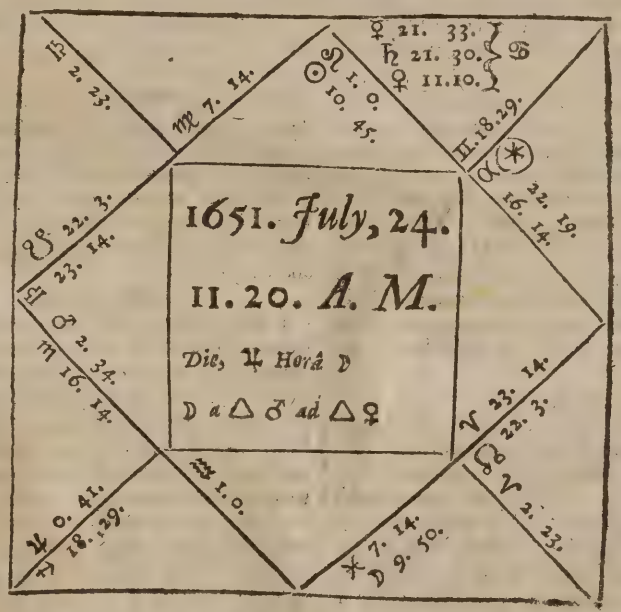
But that this may appear unto you as cleer as the Sun when he is upon the Meridian, I here quote you an Example, which I performed when I was as far off from my ſtudy as I am now, yet am I not aſhamed the world ſhould ſee how much or little of my Leſſon I have learned without Book.

On *July*, 25. 1651. there came a Letter to me out of *Bedfordſhire*, from a Gentleman (at that time) altogether to me unknown, though ſince well known, who was a Student both in Aſtrologie and Phyſick: The words which are theſe;

Mr. *Culpeper*,

My Love remembred unto you, although I know you not by face; yet becauſe I do much reſpect that pretty little Lark, you ſo lately let fly into the world, which you call Semeiotica Uranica, *which I have lately taken into my Cage; I am therefore imboldned to write unto you in the behalf of a Neighbors Wife, who is taken with a very violent Diſeaſe which began in the lowr parts of her Body, but is now aſcended upwards, and tormenteth her in her Breaſt, Throat, Tongue, and Lips: This Diſeaſe took poſſeſſion of her (as ſhe relateth to me) about a fortnight before* Michaelmas *laſt, but the certain day and hour ſhe is not able to nominate; ſhe ſent for me, and enquired whether ſhe were not under an ill Tongue or not, or of what nature the Diſeaſe was: I have ſent you the incloſed Scheam, I could find but one teſtimony of Faſcination or Witchcraft, which was one Sign poſſeſſing the Cusps of the Twelfth and Firſt Houſes, which to me holds forth no more than a ſtrong ſuſpition of it by the Querent; However I am confident there is a Natural Diſeaſ which hurts much, becauſe the Lord of the Sixt, which uſually gives ſignification of Natural Diſeaſes, is now placed in the Aſcendent; but at preſent I forbear to make any large diſcourſ of mine own Opinions, being deſirous that you would endeavor your Skill in this Cure, for there is not a Doctor of them all far or near that have been ſo skilful to find out the Diſeaſ, much leſs to effect the Cure. Sr. I expect your Anſwer; mean time bid you farewel, and remain yours in Affection, &c.*

The incloſed Scheam.



My Answer to the Letter, was to this effect.

Sir,

I received yours, *July* 25. wherein I find your enclosed Scheam, and (I suppose) the nature of the Disease, and have sent you such an Answer as I could, being far from my Study, which I entreat you to take in good part, being *Festinanti calamo Conscripta.* As for the ignorance of your Country Doctors, they wanting the true Judgment of Astrology, is to me no waies admirable; I perceive you to be a yong man by the time of your Genesis, which you also sent me, beware whom you trust with that, he that knows your Nativity knows when ill Directions operate, and if he be an Enemy, knows when to do you a mischief; If *Cecil* had not had *Essex* his Nativity, he had never gotten his Head off, but to instruct you being a yong Student, I shall give you my Judgment Methodically.

Diacritica.

You say you can find no Arguments of Witchcraft, but only one Sign possessing the Cusps of both Twelth and Ascendent, but if you had regarded the Propinquity of *Venus* to *Saturn* you would have made another of that, yet do not I think she is bewitched, because of other more prevalent testimonies; the *Moon* passing from the beams of *Mars* to the beams of *Venus* may seem to give some suspition of Honesty, and the Disease to come that way, which is encreased by *Mars* his being in the Ascendent in *Scorpio*, and the Dragons Tail upon the Cusp, yet I can hardly beleeve this, for *Cauda* in a humane Sign usually gives Slanders and not Tales of Truth, 'tis a hundred to one if she suffer not in point of good name by the vulgar [this was too true] Besides, the neerness of *Venus* to *Saturn* may well shew trouble of mind, and it being in the ninth House, pray enquire whether she have not been troubled about some tenents in Religion [the trouble of mind was true, but it was about a stranger, which the ninth House also signifies.]

Diagnostica.

Venus, Lady of the Twelfth, and Ascendent, and Eigth, shews her alwaies to be her own foe in respect of Health; and truly I beleeve the original of the Disease was a Surfet either by eating moist Fruits, or else by catching wet in travelling; *Venus* with *Saturn* who is in square to the Ascendent troubles her Breast with tough Elegm and Melancholly: Besides, there being a most forcible reception between the *Moon* and *Venus* from fruitful Signs, I question whether she be not with Child or not, the *Moon* being in the fifth House, *Mars* is lord of the Disease, really in the Scorpion, and accidentally in the Ascendent, together with *Aries* on the sixt, shew the Disease keeps his Court in the Womb, and accidentally afflicts the Head from thence, so that heat of the Womb must needs be cause of the present distemper, and *Mars* in a moist Sign in the first neer the second may well denote heat, and breaking out about her Face and Throat.

Prognostica.

Whether she be curable or not, or how or when the Disease will end is our next Point; Truly I can see no danger of death the Moon being strong in her hain, and applying by Trine with a strong reception to the Lady of the Ascendent; yet this is certain, *Mars* strong in a fixed Sign will maintain the Disease stoutly, her hopes will be but smal when *Venus* comes to the Body of *Saturn. viz. August* 2. for she will be overpressed with Melancholly, the time I suppose of her Cure may be (if good courses be taken) when *Mars* leaves the Sign he is in, and comes to the place where the Body of *Jupiter* is, or at least then it may turn to another Disease more propitious; the Sun strong in the Tenth shews she may be cured by Medicine, and he being exalted in the seventh, and caput there, I do not know but you are as likely a man to do it as any.

Indicationes Curativæ.

It is confessed here that the Sun being exceeding strong in the tenth House, should naturally signifie the curative Medicine, and as true that the evils of *Mars*, *viz.* heat in the Womb, and a salt humor in the blood ought to be removed before you meddle with the tough Flegm in the Breast, but yet seeing the Disease seems rather to participate of offending heat than any other Simple quality, you must have a care of hot Medicines lest you go about *ignem oleo extinguere*, the Medicines must 1. be cool, 2. strengthning the Womb, 3. repressing the vapors, 4. of the nature of *Sol* and *Venus*.

Therapeutice.

To this intent I first commend unto you stinking Arrach, a pattern whereof I have sent you enclosed, you may find it upon Dunghils, especially such as are made of Horse-dung: It is cold and moist, an Herb of *Venus* in the Scorpion; Also *Ros Solis* an Herb of the *Sun* and under the Cœlestial Crab, may do very well, and the better because *Venus* is in *Cancer*: It grows upon Bogs in untilled places, and is in flower about this time, it grows very low, with roundish green Leaves full of red hairs, and is fullest of dew when the Sun is hottest, whence it took its name; to these you may ad Tansie, which I take to be an Herb of *Venus* in *Libra*, and Lettice if you please which is an Herb of the *Moon*, *Mars* having his fall in *Cancer* they are all harmless, you may use them according to your own discretion: also Orpine, another Herb of the *Moon* is very good in this case.

Sir,

Sir, I wish you well, and if you esteem of my Lark above his deserts, I pray trim his Feathers for him (correct the Errors by the Errata) else will he make but unpleasing Musick. Thus remain yours, &c.

I the rather chose this Figure to judg of, because none should have just occasion to say of us Astrologers that we do as Physitians vulgar practice is, when they judg of Piss; first pump what they can out of the Querent, and then judg by his words; of which I will rehearse you one merry story, and so I will conclude the Book.

A Woman whose Husband had bruised himself, took his Water, and away to the Doctor trots she; the Doctor takes the Piss and shakes it about, *How long hath this party been ill* (saith he) Sr. saith the Woman, *He* hath been ill these two daies, This is a mans water quoth the Doctor presently, this he learned by the word *HE*; then looking on the water he spied blood in it, the man hath had a bruise saith he, I indeed saith the woman, my Husband fell down a pair of stairs backwards, then the Doctor knew well enough that what came first to danger must needs be his back and shoulders, said, the Bruise lay there; the woman she admired at the Doctors skil, and told him, that if he could tell her one thing more she would account him the ablest Physitian in *Europe*; well, what was that? How many Stairs her Husband fell down, this was a hard Question indeed, able to puzle a stronger Brain than Mr. Doctor had, to pumping goes he, and having taken the Urinal and given it a shake or two, enquires whereabout she lived, and knowing well the place, and that the Houses thereabouts were but low built Houses, made answer (after another view of the Urine for fashion sake) that probably he might fall down some seven or eight stairs; ah, quoth the woman, now I see you know nothing, my Husband fell down thirty; thirty! quoth the Doctor, and snatching up the Urinal, is here all the water saith he? no saith the woman, I spilt some in putting of it in, look you there quoth Mr. Doctor, there were all the other stairs spilt.

Yet mistake me not, I do not deny but such whose daily experience is to judg Waters, and usually judg a hundred in a day may know somthing by them: If any thing may be known by Urine, I am sure it may by Art, put them both together, *vis unita fortior*. Thus I take my leave of you; be diligent and I am yours.

A N

ALPHABETICAL CATALOGUE OF THE DISEASES SPECIFIED IN THIS TREATISE:

Together with the Page where to find the Cure.

FINIS.

The Names of several Books printed by Peter Cole, *at the sign of the Printing Press in Cornhill, by the Exchange,* London.

Four several Books, by Nich. Culpeper, *Gent. Student in* Physick *and* Astrology.

1 A PHYSICAL DIRECTORY: Or a Translation of the *Dispensatory*, made by the Colledg of Physitians of *London*. Whereunto is added, The *Key to* Galen's *Method of Physick*.

2 A DIRECTORY for *Midwives*; or a Guide for *Women*.

3 An EPHEMERIS for the year 1651. Amplified with Rational *Predictions* from the Book of the Creatures. 1 Of the State of the Year. 2 What may probably be the effects of the Conjunction of *Saturn* and *Mars*, July 9. 1650. in *Scotland*, *Holland*, *Zealand*, *York*, *Amsterdam*, *&c.* and about what time they may probably happen. To which is joyned, An *Astrologo-Physical Discourse of the Humane Vertues in the Body of Man.*

4. GALENS ART OF PHYSICK; wherein is laid down,

1. A Description of Bodies, Healthful, Unhealthful, and Neutral.

2. Signs of good and bad Constitutions.

3. Signs of the { *Brain*, *Heart*, *Liver*, *Testicles*, *Temperature*, *Lungues*, *Stomach*, *&c.* } being too { *Hot*, *Cold*, *Dry*, *Moist*, *Hot and dry*, *Hot and moist*, *Cold and dry*, *Cold and moist.* }

4. Signs and Causes of Sickness.

Translated into English, and largely Commented on; Together with convenient Medicines for all particular Distempers of the Parts, a Description of the Complexion, their Conditions, and what Diet and Exercise is fittest for them.

A Godly and Fruitful *Exposition*, on the first Epistle of *Peter*. By Mr. *John Rogers*, Minister of the Word of God at *Dedham* in *Essex*.

The Wonders of the *Load-stone*, by Mr. *Samuel Ward* of *Ipswich*.

An *Exposition* on the Gospel of the Evangelist St. *Matthew*. By Mr. *Ward*.

Clows Chirurgery.

Marks of Salvation.

Christians Engagement for the Gospel, by *John Goodwin*.

Great Church Ordinance of Baptism.

Mr. *Love*'s Case, containing his Petitions, Narrative, and Speech.

Vox Pacifica, or a Perswasive to Peace.

Dr. *Prestons* Saints submission, and Satans Overthrow.

Pious mans practice in Parliament Time.

A Treatise of the Rickets, being a Disease common to Children; Wherein is shewed, 1. The Essence, 2. The Causes, 3. The Signs, 4. The Remedies of the Disease. Published in Latin by Dr. *Glisson*, Dr. *Bate*, and Dr. *Regemorter*.

Mr. *Symsons* Sermon at *Westminster*.

Mr. *Feaks* Sermon before the Lord Major.

Mr. *Phillips* Treatise of Hell.

——— of Christs Geneology.

Seven Books of Mr. Jeremiah Burroughs *lately published; As also the Texts of Scripture upon which they are grounded.*

1 The Rare Jewel of *Christian Contentment*, on *Phil.* 4. 11. Wherin is shewed, 1. What *Contentment* is, 2. It is an holy Art and Mystery, 3. The Excellencies of it, 4. The Evil of the contrary sin of Murmuring, and the Aggravations of it.

2 *Gospel-Worship*, on *Levit.* 10. 3. Wherin is shewed, 1. The right manner of the Worship of God in general; and particularly, In Hearing the Word, Receiving the Lords Supper, and Prayer.

3 *Gospel-Conversation*, on *Phil.* 1. 17. Wherin is shewed, 1. That the Conversations of Beleevers must be above what could be by the Light of Natur, 2 Beyond those that lived under the Law, 3. And sutable to what Truths the Gospel holds forth. To which is added, *The Misery of those Men that have their Portion in this Life only*, on *Psal.* 17. 14.

4 A Treatise of *Earthly-mindedness*. Wherin is shewed, 1 What Earthly-mindedness is, 2 The great Evil therof, on *Phil.* 3. part of the 19. Vers. Also to the same Book is joyned, A Treatise of *Heavenly-mindedness, and walking with God*, on *Gen.* 5. 24. and on *Phil.* 3. 20.

5 An *Exposition*, on the fourth, fifth, sixth, and seventh Chapters of the Prophesie of *Hosea*.

6 An *Exposition* on the eighth, ninth, and tenth Chapters of *Hosea*.

7 An *Exposition* on the eleventh, twelfth, and thirteenth Chapters of *Hosea*.

The Compassionate Samaritan.

Twelve several Books of Mr. William Bridg, *Collected into one Volumn.* Viz.

1 The great Gospel-Mystery of the Saints Comfort and Holiness, opened and applied from Christs Priestly Office.

2 Satans Power to Tempt; and Crists Love to, and Care of His People under Temptation.

3 Thankfulness required in every Condition.

4 Grace for Grace; or, the Overflowings of Christs Fulness received by all Saints.

5 The Spiritual Actings of Faith, through Natural Impossibilities.

6 Evangelical Repentance.

7 The Spiritual-Life, and In-Being of Christ in all Beleevers.

8 The Woman of Canaan.

9 The Saints Hiding-Place in time of Gods Anger.

10 Christs Coming is at our Midnight.

11 A Vindication of Ordinances.

12 Grace and Love beyond Gifts.
